Section 2. That the capital stock of the corporation shall be \$500,000,000, all of which shall be subscribed by the United States of America, and such subscription shall be subject to call upon the vote of three-fifths of the board of directors of the corporation, with the approval of the secretary of the treasury, at such time or times as may be deemed advisable; and there is hereby appropriated, out of any money in the treasury not otherwise appropriated, the sum of \$200,000,000, or so much thereof as may be necessary for the purpose of making payment upon such subscription when and as called. Receipts for payments by the United States of America for or on account of such stock shall be issued by the corporation to the secretary of the treasury, and shall be evidence of stock ownership.

Sec. 3. That the management of the corporation shall be vested in a board of directors, consisting of the secretary of the treasury, who shall be chairman of the board, and four other persons, to be appointed by the president of the United States, by and with the advice and consent of the senate. No director, officer, attorney, agent or employe of the corporation shall in any manner, directly or indirectly, participate in the determination of any question affecting his personal interests, or the interests of any corporation, partnership or association in which he is directly or indirectly interested; and each director shall devote his time, not otherwise required by the business of the United States, principally to the business of the corporation. Before entering upon his duties, each of the four directors so appointed, and each officer, shall take an oath faithfully to discharge the duties of his office. Nothing contained in this or any other act shall be construed to prevent the appointment as a director of the corporation of any officer or employe under the United States or of a director of a federal reserve bank.

Of the four directors so appointed, the president of the United States shall designate two to serve for two years, and two for four years; and thereafter each director so appointed shall serve for four years. Whenever a vacancy shall occur among the directors so appointed, the person appointed director to fill any such vacancy shall hold office for the unexpired term of the member whose place he is selected to fill. Any director shall be subject to removal by the president of the United States. Three members of the board of directors shall constitute a quorum for the transaction of business.

Sec. 4. That the four directors of the corporation, appointed as hereinbefore provided shall receive annual salaries, payable monthly, of \$12,000. Any director receiving from the United States any salary or compensation for services shall not receive as salary from the corporation any amount which, together with any salary or compensation received from the United States, would make the total amount paid to him by the United States and by the corporation exceed \$12,000.

Sec. 5. That the principal office of the corporation shall be located in the District of Columbia, but there may be established agencies or branch offices in any city or cities of the United States under rules and regulations prescribed by the board of directors.

Sec. 6. That the corporation shall be empowered and authorized to adopt, alter and use a corporate seal; to make contracts; to

purchase or lease and hold or dispose of such real estate as may be necessary for the prosecution of its business; to sue and be sued; to complain and defend in any court of competent jurisdiction, state or federal; to appoint, by its board of directors, and fix the compensation of such officers, employees, attorneys and agents as are necessary for the transaction of the business of the corporation, to define their duties, require bonds of them and fix the penalties thereof, and to dismiss at pleasure such officers, employees, attorneys and agents; and to prescribe, amend and repeal, by its board of directors, subject to the approval of the secretary of the treasury, by-laws regulating the manner in which its general business may be conducted and the privileges granted to it by law may be exercised and enjoyed, and prescribing the powers and duties of its officers and agents.

Sec. 7. That the corporation shall be empowered and authorized to make advances, upon such terms, not inconsistent herewith, as it may prescribe, for periods not exceeding five years from the respective dates of such advances:

(1) To any bank, banker or trust company, in the United States, which shall have made after April 6, 1917, and which shall have outstanding, any loan or loans to any person, firm, corporation or association, conducting an established and going business in the United States, whose operations shall be necessary or contributory to the prosecution of the war, and evidenced by a note or notes, but no such advance shall exceed 75 per centum of the face value of such loan or loans; and

(2) To any bank, banker or trust company, in the United States, which shall have rendered financial assistance, directly or indirectly, to any such person, firm, corporation or association by the purchase after April 6, 1917, of its bonds or other obligations, but no such advance shall exceed 75 per centum of the value of such bonds or other obligations at the time of such advance, as estimated and determined by the board of directors of the corporation.

All advances shall be made upon the promissory note or notes of such bank, banker or trust company, secured by the notes, bonds or other obligations, which are the basis of any such advance by the corporation, together with all the securities, if any, which such bank, banker or trust company may hold as collateral for such notes, bonds or other obligations.

The corporation shall, however, have power to make advances (a) up to 100 per centum of the face value of any such loan made by any such bank, banker or trust company to any such person, firm, corporation or association, and (b) up to 100 per centum of the value at the time of any such advance (as estimated and determined by the board of directors of the corporation) of such bonds or other obligations by the purchase of which financial assistance shall have been rendered to such person, firm, corporation or association: Provided, That every such advance shall be secured in the manner described in the preceding part of this section, and in addition thereto by collateral security, to be furnished by the bank, banker or trust company, of such character as shall be prescribed by the board of directors, of a value, at the time of such advance (as estimated and determined by the board of directors of the corporation), equal to at least 33 per centum of the amount advanced by the corporation. The corporation shall retain power to require additional security at any time.

Sec. 8. That the corporation shall be empowered and authorized to make advances from time to time, upon such terms, not inconsistent herewith, as it may prescribe, for periods not exceeding one year, to any savings bank, banking institution or trust company, in the United States, which receives savings deposits, or to any building and loan association

in the United States, on the promissory note or notes of the borrowing institution, whenever the corporation shall deem such advances to be necessary or contributory to the prosecution of the war or important in the public interest: Provided, That such note or notes shall be secured by the pledge of securities of such character as shall be prescribed by the board of directors of the corporation, the value of which, at the time of such advance (as estimated and determined by the board of directors of the corporation), shall be equal in amount to at least 133 per centum of the amount of such advance. The rate of interest charged on any such advance shall not be less than 1 per centum per annum in excess of the rate of discount for ninety-day commercial paper prevailing at the time of such advance at the federal reserve bank of the district in which the borrowing institution is located, but such rate of interest shall in no case be greater than the average rate receivable by the borrowing institution on its loans and investments made during the six months prior to the date of the advance, except that where the average rate so receivable by the borrowing institution is less than such rate of discount for ninety-day commercial paper the rate of interest on such advance shall be equal to such rate of discount. The corporation shall retain power to require additional security at any time.

Sec. 9. That the corporation shall be empowered and authorized, in exceptional cases, to make advances directly to any person, firm, corporation or association, conducting an established and going business in the United States, whose operations shall be necessary or contributory to the prosecution of the war but only for the purpose of conducting such business in the United States and only when in the opinion of the board of directors of the corporation such person, firm, corporation or association is unable to obtain funds upon reasonable terms through banking channels or from the general public), for periods not exceeding five years from the respective dates of such advances, upon such terms, and subject to such rules and regulations as may be prescribed by the board of directors of the corporation. In no case shall the aggregate amount of the advances made under this section exceed at any one time an amount equal to 12½ per centum of the sum of (1) the authorized capital stock of the corporation plus (2) the aggregate amount of bonds of the corporation authorized to be outstanding at any one time when the capital stock is fully paid in. Every such advance shall be secured by adequate security of such character as shall be prescribed by the board of directors of a value at the time of such advance (as estimated and determined by the board of directors) equal to (except in case of an advance made to a railroad in the possession and control of the president, for the purpose of making additions, betterments or road extensions to such railroad) at least 125 per centum of the amount advanced by the corporation. The corporation shall retain power to require additional security at any time. The rate of interest charged on any such advance shall not be less than 1 per centum per annum in excess of the rate of discount for ninety-day commercial paper prevailing at the time of such advance at the federal reserve bank of the district in which the borrower is located.

Sec. 10. That in no case shall the aggregate amount of the advances made under this title to any one person, firm, corporation or association exceed at any one time an amount equal to 10 per centum of the authorized capital stock of the corporation, but this section shall not apply in the case of an advance made to a railroad in the possession and control of the president, for the purpose of making additions, betterments or road extensions to such railroad.

Sec. 11. That the corporation shall be empowered and authorized to subscribe for, acquire and own, buy, sell and deal in bonds and obligations of the United States issued or converted after Sept. 24, 1917, to such extent as the board of directors, with the approval of the secretary of the treasury, may from time to time determine.

Sec. 12. That the corporation shall be empowered and authorized to issue and have outstanding at any one time its bonds in an amount aggregating not more than six times its paid-in capital, such bonds to mature not less than one year nor more than five years from the respective dates of issue, and to bear such rate or rates of interest, and may be redeemable before maturity at the option of the corporation as may be determined by the board of directors, but such rate or rates of interest shall be subject to the approval of the secretary of the treasury. Such bonds shall have a first and paramount floating charge on all the assets of the corporation, and the corporation shall not at any time mortgage or pledge any of its assets. Such bonds may be issued at not less than par in payment of any advances authorized by this title, or may be offered for sale publicly or to any individual, firm, corporation or association, at such price or prices as the board of directors, with the approval of the secretary of the treasury, may determine.

Upon such terms not inconsistent herewith as may be determined from time to time by the board of directors, with the approval of the secretary of the treasury, at or before the issue thereof, any of such bonds may be issued payable in any foreign money or foreign moneys, or issued payable at the option of the respective holders thereof either in dollars or in any foreign money or foreign moneys at such fixed rate of exchange as may be stated in any such bonds. For the purpose of determining the amount of bonds issued payable in any foreign money or foreign moneys the dollar equivalent shall be determined by the par of exchange at the date of issue thereof, as estimated by the director of the mint and proclaimed by the secretary of the treasury in pursuance of the provisions of section 25 of the act entitled "An act to reduce taxation, to provide revenue for the government and for other purposes," approved Aug. 27, 1894.

Sec. 13. That the federal reserve banks shall be authorized, subject to the maturity limitations of the federal reserve act and to regulations of the federal reserve board, to discount the direct obligations of member banks secured by such bonds of the corporation and to rediscount eligible paper secured by such bonds and indorsed by a member bank. No discount or rediscount under this section shall be granted at a less interest charge than 1 per centum per annum above the prevailing rates for eligible commercial paper of corresponding maturity.

Any federal reserve bank may, with the approval of the federal reserve board, use any obligation or paper so acquired for any purpose for which it is authorized to use obligations or paper secured by bonds or notes of the United States not bearing the circulation privilege: Provided, however, That whenever federal reserve notes are issued against the security of such obligations or paper the federal reserve board may make a special interest charge on such notes, which, in the discretion of the federal reserve board, need not be applicable to other federal reserve notes which may from time to time be issued and outstanding. All provisions of law, not inconsistent herewith, in respect to the acquisition by any federal reserve bank of obligations or paper secured by such bonds or notes of the United States, and in respect to federal reserve notes issued against the security of such obligations or paper, shall extend, in so far as applicable, to the acquisition of obligations or paper secured by the bonds of the

corporation and to the federal reserve notes issued against the security of such obligations or paper.

Sec. 14. That the corporation shall not exercise any of the powers granted by this title or perform any business except such as is incidental and necessarily preliminary to its organization until it has been authorized by the president of the United States to commence business under the provisions of this title.

Sec. 15. That all net earnings of the corporation not required for its operations shall be accumulated as a reserve fund until such time as the corporation liquidates under the terms of this title. Such reserve fund shall, upon the direction of the board of directors, with the approval of the secretary of the treasury, be invested in bonds and obligations of the United States, issued or converted after Sept. 24, 1917, or upon like direction and approval may be deposited in member banks of the federal reserve system, or in any of the federal reserve banks, or be used from time to time, as well as any other funds of the corporation, in the purchase or redemption of any bonds issued by the corporation. The federal reserve banks are hereby authorized to act as depositaries for and as fiscal agents of the corporation in the general performance of the powers conferred by this title. Beginning six months after the termination of the war, the date of such termination to be fixed by a proclamation of the president of the United States, the directors of the corporation shall proceed to liquidate its assets and to wind up its affairs, but the directors of the corporation, in their discretion, may, from time to time, prior to such date, sell and dispose of any securities or other property acquired by the corporation. Any balance remaining after the payment of all its debts shall be paid into the treasury of the United States as miscellaneous receipts, and thereupon the corporation shall be dissolved.

Sec. 16. That any and all bonds issued by the corporation shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any state, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, corporations or associations. The interest on an amount of such bonds the principal of which does not exceed in the aggregate \$5,000, owned by any individual, partnership, corporation or association, shall be exempt from the taxes referred to in clause (b). The corporation, including its franchise and the capital and reserve or surplus thereof, and the income derived therefrom, shall be exempt from all taxation now or hereafter imposed by the United States, any state, or any of the possessions of the United States, or by any local taxing authority, except that any real property of the corporation shall be subject to state, county, or municipal taxes to the same extent, according to its value, as other real property is taxed.

Sec. 17. That the United States shall not be liable for the payment of any bond or other obligation or the interest thereon issued or incurred by the corporation, nor shall it incur any liability in respect of any act or omission of the corporation.

Sec. 18. That whoever (1) makes any statement, knowing it to be false, for the purpose of obtaining for himself or for any other person, firm, corporation or association any advance under this title, shall be punished by a fine of not more than \$10,000, or by imprisonment for not more than five years, or both.

Whoever willfully overvalues any security by which any such advance is secured shall be punished by a fine of not more than \$5,000,

or by imprisonment for not more than two years, or both.

Whoever (1) falsely makes, forges or counterfeits any bond, coupon or paper in imitation of or purporting to be in imitation of a bond or coupon issued by the corporation; or (2) passes, utters or publishes, or attempts to pass, utter or publish, any false, forged or counterfeited bond, coupon or paper purporting to be issued by the corporation, knowing the same to be falsely made, forged or counterfeited; or (3) falsely alters any such bond, coupon or paper; or (4) passes, utters or publishes as true any falsely altered or spurious bond, coupon or paper issued or purporting to have been issued by the corporation, knowing the same to be falsely altered or spurious, shall be punished by a fine of not more than \$10,000, or by imprisonment for not more than five years, or both.

Whoever, being connected in any capacity with the corporation, (1) embezzles, abstracts or willfully misapplies any moneys, funds or credits thereof, or (2) with intent to defraud the corporation or any other company, body politic or corporate, or any individual, or to deceive any officer of the corporation, (a) makes any false entry in any book, report or statement of the corporation, or (b) without authority from the directors draws any order or assigns any note, bond, draft, mortgage, judgment or decree thereof, shall be punished by a fine of not more than \$10,000, or by imprisonment for not more than five years, or both.

The secretary of the treasury is hereby authorized to direct and use the secret service division of the treasury department to detect, arrest and deliver into custody of the United States marshal having jurisdiction any person committing any of the offenses punishable under this section.

Sec. 19. That the corporation shall file quarterly reports with the secretary of the senate and with the clerk of the house of representatives, stating as of the first day of each month of the quarter just ended (1) the total amount of capital paid in, (2) the total amount of bonds issued, (3) the total amount of bonds outstanding, (4) the total amount of advances made under each of sections 7, 8 and 9, (5) a list of these classes and amounts of securities taken under each of such sections, (6) the total amount of advances outstanding under each of sections 7, 8 and 9 and (7) such other information as may be hereafter required by either house of congress.

The corporation shall make a report to congress on the first day of each regular session, including a detailed statement of receipts and expenditures.

Sec. 20. Section 5202 of the revised statutes of the United States is hereby amended so as to read as follows:

"Sec. 5202. No national banking association shall at any time be indebted, or in any way liable, to an amount exceeding the amount of its capital stock at such time actually paid in and remaining undiminished by losses or otherwise, except on account of demands of the nature following:

"First. Notes of circulation.

"Second. Moneys deposited with or collected by the association.

"Third. Bills of exchange or drafts drawn against money actually on deposit to the credit of the association, or due thereto.

"Fourth. Liabilities to the stockholders of the association or dividends and reserve profits.

"Fifth. Liabilities incurred under the provisions of the federal reserve act.

"Sixth. Liabilities incurred under the provisions of the war finance corporation act."

Title II.—Capital Issues Committee.

Sec. 200. That there is hereby created a committee to be known as the "capital issues committee," hereinafter called the committee,

and to be composed of seven members to be appointed by the president of the United States, by and with the advice and consent of the senate. At least three of the members shall be members of the federal reserve board.

No member, officer, attorney, agent or employee of the committee shall in any manner, directly or indirectly, participate in the determination of any question affecting his personal interests, or the interest of any corporation, partnership or association in which he is directly or indirectly interested. Before entering upon his duties, each member and officer shall take an oath faithfully to discharge the duties of his office. Nothing contained in this or any other act shall be construed to prevent the appointment as a member of the committee of any officer or employee under the United States or of a director of a federal reserve bank.

The terms during which the several members of the committee shall respectively hold office shall be determined by the president of the United States, and the compensation of the several members of the committee who are not members of the federal reserve board shall be \$7,500 per annum, payable monthly, but if any such member receives any other compensation from any office or employment under the United States the amount so received shall be deducted from such salary, and if such other compensation is \$7,500 or more, such member shall receive no salary as a member of the committee. Any member shall be subject to removal by the president of the United States. The president shall designate one of the members as chairman, but any subsequent vacancy in the chairmanship shall be filled by the committee. Four members of the committee shall constitute a quorum for the transaction of business.

Sec. 201. That the committee may employ and fix the compensation of such officers, attorneys, agents and other employees as may be deemed necessary to conduct its business, who shall be appointed without regard to the provisions of the act entitled "An act to regulate and improve the civil service of the United States," approved Jan. 16, 1883 (volume 22, United States Statutes at Large, page 403), and amendments thereto or any rules or regulations made in pursuance thereof. No such officer, attorney, agent or employee shall receive more compensation than persons performing services of like or similar character under the federal reserve board.

Sec. 202. That all the expenses of the committee, including all necessary expenses for transportation incurred by the members or by its officers, attorneys, agents or employees under its orders in making an investigation or upon official business in any other places than at their respective headquarters, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the chairman.

The committee may rent suitable offices for its use, and purchase such furniture, equipment and supplies as may be necessary, but shall not expend more than \$10,000 annually for offices in the District of Columbia.

The principal office of the committee shall be in the District of Columbia, but it may meet and exercise all its powers at any other place. The committee may, by one or more of its members, or by such agents as it may designate, prosecute any inquiry necessary to its duties in any part of the United States.

Sec. 203. That the committee may, under rules and regulations to be prescribed by it from time to time, investigate, pass upon and determine whether it is compatible with the national interest that there should be sold or offered for sale or for subscription any issue, or any part of any issue, of securities hereafter issued by any person, firm, corporation or association, or the total aggregate price or face value of which issue and any other securities issued by the same person, firm, corpora-

tion or association since the passage of this act is in excess of \$100,000. Shares of stock of any corporation or association without nominal or par value shall for the purpose of this section be deemed to be of the par value of \$100 each. Any securities which upon the date of the passage of this act are in the possession or control of the corporation, association or obligor issuing the same shall be deemed to have been issued after the passage of this act within the meaning hereof.

Nothing in this title shall be construed to authorize such committee to pass upon (1) any borrowing by any person, firm, corporation or association in the ordinary course of business as distinguished from borrowing for capital purposes, (2) the renewing or refunding of indebtedness existing at the time of the passage of this act, (3) the resale of any securities the sale or offering of which the committee has determined to be compatible with the national interest, (4) any securities issued by any railroad corporation the property of which may be in the possession and control of the president of the United States or (5) any bonds issued by the war finance corporation.

Nothing done or omitted by the committee hereunder shall be construed as carrying the approval of the committee or of the United States of the legality, validity, worth or security of any securities.

Sec. 204. That there is hereby appropriated out of any money in the treasury not otherwise appropriated, for the remainder of the fiscal year ending June 30, 1918, and the fiscal year ending June 30, 1919, the sum of \$200,000 for the purpose of defraying the expenses of the establishment and maintenance of the committee, including the payment of the salaries and rents herein authorized.

Sec. 205. That the committee shall make a report to congress on the first day of each regular session, including a detailed statement of receipts and expenditures, and also including the names of all officers and employes and the salary paid to each.

Sec. 206. That this title shall continue in effect until, but not after, the expiration of six months after the termination of the war, the date of such termination to be determined by a proclamation of the president of the United States, but the president may at any time by proclamation declare that this title is no longer necessary, and thereupon it shall cease to be in effect.

Title III.—Miscellaneous.

Sec. 300. That whoever willfully violates any of the provisions of this act, except where a different penalty is provided in this act, shall, upon conviction in any court of the United States of competent jurisdiction, be fined not more than \$10,000 or imprisoned for not more than one year or both; and whoever knowingly participates in any such violation, except where a different penalty is provided in this act, shall be punished by a fine or imprisonment, or both.

Sec. 301. That no stamp tax shall be required or imposed upon a promissory note secured by the pledge of bonds or obligations of the United States issued after April 24, 1917, or secured by the pledge of a promissory note which itself is secured by the pledge of such bonds or obligations: Provided, That in either case the par value of such bonds or obligations shall equal the amount of such note.

Sec. 302. That if any clause, sentence, paragraph or part of this act shall, for any reason, be adjudged by any court of competent jurisdiction to be invalid, or, in case any court of competent jurisdiction shall adjudge to be invalid any provisions hereof in respect of any class or classes of securities, such judgment shall not affect, impair or invalidate the remainder of this act, but shall be con-

finied in its operation to the clause, sentence, paragraph, part or subject matter of this act directly involved in the controversy in which such judgment shall have been rendered.

Sec. 303. That the term "securities," as used in this act, includes stocks, shares of stock, bonds, debentures, notes, certificates of indebtedness and other obligations.

Sec. 304. That the right to amend, alter or repeal this act is hereby expressly reserved.

Sec. 305. That the short title of this act shall be the "War Finance Corporation Act."

Sec. 306. That all provisions of any act or acts inconsistent with the provisions of this act are hereby repealed. (Approved April 5, 1918.)

War Finance Corporation Directors.

(Appointed by President April 29, 1918.)

William G. P. Harding (Ala.), 2 years.

Clifford M. Leorum (Ill.), 2 years.

Eugene Meyer, Jr. (N. Y.), 4 years.

Angus V. McLean (N. C.), 4 years.

SILVER COINAGE ACT.

An act to conserve the gold supply of the United States; to permit the settlement in silver of trade balances adverse to the United States; to provide silver for subsidiary coinage and for commercial use; to assist foreign governments at war with the enemies of the United States; and for the above purposes to stabilize the price and encourage the production of silver.

Be it enacted etc., That the secretary of the treasury is hereby authorized from time to time to melt or break up and to sell as bullion not in excess of 350,000,000 standard silver dollars now or hereafter held in the treasury of the United States. Any silver certificates which may be outstanding against such standard silver dollars so melted or broken up shall be retired at the rate of \$1 for each amount of such certificates for each standard silver dollar so melted or broken up. Sales of such bullion shall be made at such prices not less than \$1 per ounce of silver one thousand fine and upon such terms as shall be established from time to time by the secretary of the treasury.

Section 2. That upon every such sale of bullion from time to time the secretary of the treasury shall immediately direct the director of the mint to purchase in the United States, of the product of mines situated in the United States and of reduction works so located, an amount of silver equal to 371.25 grains of pure silver in respect of every standard silver dollar so melted or broken up and sold as bullion. Such purchases shall be made in accordance with the then existing regulations of the mint and at the fixed price of \$1 per ounce of silver one thousand fine, delivered at the option of the director of the mint at New York, Philadelphia, Denver, or San Francisco. Such silver so purchased may be resold for any of the purposes hereinafter specified in section 3 of this act, under rules and regulations to be established by the secretary of the treasury, and any excess of such silver so purchased over and above the requirements for such purposes shall be coined into standard silver dollars or held for the purpose of such coinage, and silver certificates shall be issued to the amount of such coinage. The net amount of silver so purchased, after making allowance for all resales, shall not exceed at any one time the amount needed to coin an aggregate number of standard silver

dollars equal to the aggregate number of standard silver dollars theretofore melted or broken up and sold as bullion under the provisions of this act, but such purchases of silver shall continue until the net amount of silver so purchased, after making allowance for all resales, shall be sufficient to coin therefrom an aggregate number of standard silver dollars equal to the aggregate number of standard silver dollars theretofore so melted or broken up and sold as bullion.

Sec. 3. That sales of silver bullion under authority of this act may be made for the purpose of conserving the existing stock of gold in the United States, of facilitating the settlement in silver of trade balances adverse to the United States, of providing silver for subsidiary coinage and for commercial use, and of assisting foreign governments at war with the enemies of the United States. The allocation of any silver to the director of the mint for subsidiary coinage shall, for the purposes of this act, be regarded as a sale or resale.

Sec. 4. That the secretary of the treasury is authorized, from any moneys in the treasury not otherwise appropriated, to reimburse the treasurer of the United States for the difference between the nominal or face value of all standard silver dollars so melted or broken up and the value of the silver bullion, at \$1 per ounce of silver one thousand fine, resulting from the melting or breaking up of such standard silver dollars.

Sec. 5. That in order to prevent contraction of the currency, the federal reserve banks may be either permitted or required by the federal reserve board, at the request of the secretary of the treasury, to issue federal reserve bank notes, in any denominations (including denominations of \$1 and \$2) authorized by the federal reserve board, in an aggregate amount not exceeding the amount of standard silver dollars melted or broken up and sold as bullion under authority of this act, upon deposit as provided by law with the treasurer of the United States as security therefor, of United States certificates of indebtedness, or of United States one year gold notes. The secretary of the treasury may, at his option, extend the time of payment of any maturing United States certificates of indebtedness deposited as security for such federal reserve bank notes for any period not exceeding one year at any one extension and may, at his option, pay such certificates of indebtedness prior to maturity, whether or not so extended. The deposit of United States certificates of indebtedness by federal reserve banks as security for federal reserve bank notes under authority of this act shall be deemed to constitute an agreement on the part of the federal reserve bank making such deposit, that the secretary of the treasury may so extend the time of payment of such certificates of indebtedness beyond the original maturity date or beyond any maturity date to which such certificates of indebtedness may have been extended, and that the secretary of the treasury may pay such certificates in advance of maturity, whether or not so extended.

Sec. 6. That as and when standard silver dollars shall be coined out of bullion purchased under authority of this act, the federal reserve banks shall be required by the federal reserve board to retire federal reserve bank notes issued under authority of section five of this act, if then outstanding, in an amount equal to the amount of standard silver dollars so coined, and the secretary of the treasury shall pay off and cancel any United States certificates of indebtedness deposited as security for federal reserve bank notes so retired.

Sec. 7. That the tax on any federal reserve bank notes issued under authority of this act, secured by the deposit of United States certificates of indebtedness or United States one year gold notes, shall be so adjusted that the net return on such certificates of indebted-

ness, or such one year gold notes, calculated on the face value thereof, shall be equal to the net return on United States two per cent bonds, used to secure federal reserve bank notes, after deducting the amount of the tax upon such federal reserve bank notes so secured.

Sec. 8. That except as herein provided, federal reserve bank notes issued under authority of this act, shall be subject to all existing provisions of law relating to federal reserve bank notes.

Sec. 9. That the provisions of Title VII, of an act approved June 15, 1917, entitled "An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes" and the powers conferred upon the president by subsection (b) of section 5 of an act approved Oct. 6, 1917, known as the "Trading with the enemy act," shall, in so far as applicable to the exportation from or shipment from or taking out of the United States of silver coin or silver bullion, continue until the net amount of silver required by section two of this act shall have been purchased as therein provided. (Approved, April 23, 1918.)

THIRD LIBERTY BOND ACT.

Be it enacted, etc., That the first section of the act approved Sept. 24, 1917, entitled "An act to authorize an additional issue of bonds to meet expenditures for the national security and defense, and, for the purpose of assisting in the prosecution of the war, to extend additional credit to foreign governments, and for other purposes," be, and is hereby, amended to read as follows:

"That the secretary of the treasury, with the approval of the president, is hereby authorized to borrow, from time to time, on the credit of the United States for the purposes of this act, and to meet expenditures authorized for the national security and defense and other public purposes authorized by law, not exceeding in the aggregate \$2,000,000,000, and to issue therefor bonds of the United States, in addition to the \$2,000,000,000 bonds already issued or offered for subscription under authority of the act approved April 24, 1917, entitled 'An act to authorize an issue of bonds to meet expenditures for the national security and defense, and, for the purpose of assisting in the prosecution of the war, to extend credit to foreign governments, and for other purposes': Provided, That of this sum \$3,063,945,460 shall be in lieu of that amount of the unissued bonds authorized by sections 1 and 4 of the act approved April 24, 1917, \$225,000,000 shall be in lieu of that amount of the unissued bonds authorized by section 39 of the act approved Aug. 5, 1909, \$150,000,000 shall be in lieu of the unissued bonds authorized by the joint resolution approved March 4, 1917, and \$100,000,000 shall be in lieu of the unissued bonds authorized by section 400 of the act approved March 3, 1917.

"The bonds herein authorized shall be in such form or forms and denomination or denominations and subject to such terms and conditions of issue, conversion, redemption, maturities, payment, and rate or rates of interest, not exceeding 4½ per cent per annum, and time or times of payment of interest as the secretary of the treasury from time to time at or before the issue thereof may prescribe. The principal and interest thereof shall be payable in United States gold coin of the present standard of value.

"The bonds herein authorized shall from time to time first be offered at not less than par as a popular loan, under such regulations, prescribed by the secretary of the treasury from time to time, as will in his opinion give the people of the United States as nearly as may be an equal opportunity to participate

therein, but he may make allotment in full upon applications for smaller amounts of bonds in advance of any date which he may set for the closing of subscriptions and may reject or reduce allotments upon later applications and applications for larger amounts, and may reject or reduce allotments upon applications from incorporated banks and trust companies for their own account and make allotment in full or larger allotments to others, and may establish a graduated scale of allotments, and may from time to time adopt any or all of said methods, should any such action be deemed by him to be in the public interest: Provided, That such reduction or increase of allotments of such bonds shall be made under general rules to be prescribed by said secretary and shall apply to all subscribers similarly situated. And any portion of the bonds so offered and not taken may be otherwise disposed of by the secretary of the treasury in such manner and at such price or prices, not less than par, as he may determine. The secretary may make special arrangements for subscriptions at not less than par from persons in the military or naval forces of the United States, but any bonds issued to such persons shall be in all respects the same as other bonds of the same issue."

Sec. 2. That the last sentence of section two of said act approved Sept. 24, 1917, be, and is hereby, amended to read as follows:

"For the purposes of this section there is appropriated, out of any money in the treasury not otherwise appropriated, the sum of \$5,500,000,000, and in addition thereto the unexpended balance of the appropriations made by section 2 of said act approved April 24, 1917, or so much thereof as may be necessary: Provided, That the authority granted by this section to the secretary of the treasury to establish credits for foreign governments, as aforesaid, shall cease upon the termination of the war between the United States and the imperial German government."

Sec. 3. That section 4 of said act approved Sept. 24, 1917, is hereby amended by adding two new paragraphs, as follows:

"That holders of bonds bearing interest at a higher rate than 4 per cent per annum, whether issued (a) under section 1, or (b) upon conversion of 4 per cent bonds issued under section 1, or (c) upon conversion of 3½ per cent bonds, issued under said act approved April 24, 1917, or (d) upon conversion of 4 per cent bonds issued upon conversion of such 3½ per cent bonds shall not be entitled to any privilege of conversion under or pursuant to this section or otherwise. The provisions of section 7 shall extend to all such bonds.

"If bonds bearing interest at a higher rate than 4 per cent per annum shall be issued before July 1, 1918, then any bonds bearing interest at the rate of 4 per cent per annum which shall, after July 1, 1918, and before the expiration of the six months' conversion period prescribed by the secretary of the treasury, be presented for conversion into bonds bearing interest at such higher rate, shall, for the purpose of computing the amount of interest payable, be deemed to have been converted on the dates for the payment of the semiannual interest on the respective bonds so presented for conversion, last preceding the date of such presentation."

Sec. 4. That the last sentence of section 5 of said act approved Sept. 24, 1917, be, and is hereby, amended to read as follows:

"The sum of such certificates outstanding hereunder and under section 3 of said act approved April 24, 1917, shall not at any one time exceed in the aggregate \$8,000,000,000."

Sec. 5. That section 8 of said act approved Sept. 24, 1917, be, and is hereby, amended to read as follows:

"Sec. 8. That the secretary of the treasury, in his discretion, is hereby authorized to deposit, in such incorporated banks and trust

companies as he may designate, the proceeds, or any part thereof, arising from the sale of the bonds and certificates of indebtedness and war-savings certificates authorized by this act, and arising from the payment of income and excess profits taxes, and such deposits shall bear such rate or rates of interest, and shall be secured in such manner, and shall be made upon and subject to such terms and conditions as the secretary of the treasury may from time to time prescribe: Provided, That the provisions of section 5191 of the revised statutes, as amended by the federal reserve act, and the amendments thereof, with reference to the reserves required to be kept by national banking associations and other member banks of the federal reserve system, shall not apply to deposits of public moneys by the United States in designated depositories. The secretary of the treasury is hereby authorized to designate depositories in foreign countries with which shall be deposited all public money which it may be necessary or desirable to have on deposit in such countries to provide for current disbursements to the military and naval forces of the United States and to the diplomatic and consular and other representatives of the United States in and about such countries until six months after the termination of the war between the United States and the imperial German government, and to prescribe the terms and conditions of such deposits."

Sec. 6. That said act approved Sept. 24, 1917 is hereby amended by adding four new sections, to read as follows:

"Sec. 14. That any bonds of the United States bearing interest at a higher rate than 4 per cent per annum (whether issued under section 1 of this act or upon conversion of bonds issued under this act or under said act approved April 24, 1917, which have been owned by any person continuously for at least six months prior to the date of his death, and which upon such date constitute part of his estate, shall, under rules and regulations prescribed by the secretary of the treasury, be receivable by the United States at par and accrued interest in payment of any estate or inheritance taxes imposed by the United States, under or by virtue of any present or future law upon such estate or the inheritance thereof.

"Sec. 15. That the secretary of the treasury is authorized, from time to time, until the expiration of one year after the termination of the war, to purchase bonds issued under authority of this act, including bonds issued upon conversion of bonds issued under this act or said act approved April 24, 1917, at such prices and upon such terms and conditions as he may prescribe. The par amount of bonds of any such series which may be purchased in the twelve months' period beginning on the date of issue shall not exceed one-twentieth of the par amount of bonds of such series originally issued, and in each twelve months' period thereafter shall not exceed one-twentieth of the amount of the bonds of such series outstanding at the beginning of such twelve months' period. The average cost of the bonds of any series purchased in any such twelve months' period shall not exceed par and accrued interest.

"For the purposes of this section the secretary of the treasury shall set aside, out of any money in the treasury not otherwise appropriated, a sum not exceeding one-twentieth of the amount of such bonds issued before April 1, 1918, and as and when any more such bonds are issued he shall set aside a sum not exceeding one-twentieth thereof. Whenever, by reason of purchases of bonds, as provided in this section, the amount so set aside falls below the sum which he deems necessary for the purposes of this section, the secretary of the treasury shall set aside such amount as he shall deem necessary, but not more than enough to bring the entire amount so set aside

at such time up to one-twentieth of the amount of such bonds then outstanding. The amount so set aside by the secretary of the treasury is hereby appropriated for the purposes of this section, to be available until the expiration of one year after the termination of the war.

"The secretary of the treasury shall make to congress at the beginning of each regular session a report including a detailed statement of the operations under this section.

"Sec. 16. That any of the bonds or certificates of indebtedness authorized by this act may be issued by the secretary of the treasury payable, principal and interest, in any foreign money or foreign moneys, as expressed in such bonds or certificates, but not also in United States gold coin, and he may dispose of such bonds or certificates in such manner and at such prices, not less than par, as he may determine, without compliance with the provisions of the third paragraph of section 1. In determining the amount of bonds and certificates issuable under this act, the dollar equivalent of the amount of any bonds or certificates payable in foreign money or foreign moneys shall be determined by the par of exchange at the date of issue thereof, as estimated by the director of the mint, and proclaimed by the secretary of the treasury, in pursuance of the provisions of section 25 of the act approved Aug. 27, 1894, entitled 'An act to reduce taxation, to provide revenue for the government, and for other purposes.' The secretary of the treasury may designate depositaries in foreign countries, with which may be deposited as he may determine all or any part of the proceeds of any bonds or certificates authorized by this act, payable in foreign money or foreign moneys.

"Sec. 17. That the short title of this act shall be 'Second liberty bond act.'"

Sec. 7. That the act entitled "An act to authorize an issue of bonds to meet expenditures for the national security and defense, and, for the purpose of assisting in the prosecution of the war, to extend credit to foreign governments, and for other purposes," approved April 24, 1917, is hereby amended by adding a new section to read as follows:

"Sec. 9. That the short title of this act shall be 'First liberty bond act.'"

Sec. 8. That the short title of this act shall be "Third liberty bond act." (Approved April 4, 1918.)

EXPORT TRADE ASSOCIATIONS.

Be it enacted, etc., That the words "export trade" wherever used in this act mean solely trade or commerce in goods, wares or merchandise exported, or in the course of being exported, from the United States or any territory thereof to any foreign nation; but the words "export trade" shall not be deemed to include the production, manufacture or selling for consumption or for resale, within the United States or any territory thereof, of such goods, wares or merchandise, or any act in the course of such production, manufacture or selling for consumption or for resale.

That the words "trade within the United States" wherever used in this act mean trade or commerce among the several states or in any territory of the United States, or in the District of Columbia, or between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia, or between the District of Columbia and any state or states.

That the word "association" wherever used in this act means any corporation or combination, by contract or otherwise, of two or more persons, partnerships or corporations.

Sec. 2. That nothing contained in the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, shall be construed as declaring to be illegal an association entered into for the sole purpose of en-

gaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association, provided such association, agreement or act is not in restraint of trade within the United States, and is not in restraint of the export trade of any domestic competitor of such association; And provided further, That such association does not, either in the United States or elsewhere, enter into any agreement, understanding or conspiracy, or do any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein."

Sec. 3. That nothing contained in section 7 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved Oct. 15, 1914, shall be construed to forbid the acquisition or ownership by any corporation of the whole or any part of the stock or other capital of any corporation organized solely for the purpose of engaging in export trade, and actually engaged solely in such export trade, unless the effect of such acquisition or ownership may be to restrain trade or substantially lessen competition within the United States.

Sec. 4. That the prohibition against "unfair methods of competition" and the remedies provided for enforcing said prohibition contained in the act entitled "An act to create a federal trade commission, to define its powers and duties, and for other purposes," approved Sept. 26, 1914, shall be construed as extending to unfair methods of competition used in export trade against competitors engaged in export trade, even though the acts constituting such unfair methods are done without the territorial jurisdiction of the United States.

Sec. 5. That every association now engaged solely in export trade, within sixty days after the passage of this act, and every association entered into hereafter which engages solely in export trade, within thirty days after its creation shall file with the federal trade commission a verified written statement setting forth the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members, and if a corporation, a copy of its certificate or articles of incorporation and by-laws, and if unincorporated, a copy of its articles or contract of association, and on the 1st day of January of each year thereafter it shall make a like statement of the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members and of all amendments to and changes in its articles or certificate of incorporation or in its articles or contract of association. It shall also furnish to the commission such information as the commission may require as to its organization, business, conduct, practices, management and relation to other associations, corporations, partnerships and individuals. Any association which shall fail so to do shall not have the benefit of the provisions of section 2 and section 3 of this act, and it shall also forfeit to the United States the sum of \$100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the association has its principal office, or in any district in which it shall do business. It shall be the duty of the various district attorneys under the direction of the attorney-general of the United States, to prosecute for the recovery of the forfeiture. The costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Whenever the federal trade commission shall have reason to believe that an association or any agreement made or act done by such association is in restraint of trade within the United States or in restraint of the export trade of any domestic competitor of such association, or that an association either in the United States or elsewhere has entered into any agreement, understanding or conspiracy, or done any act which artificially or intentionally enhances or depresses prices within the United States of commodities of the class exported by such association, or which substantially lessens competition within the United States or otherwise restrains trade therein, it shall summon such association, its officers and agents to appear before it, and thereafter conduct an investigation into the alleged violations of law. Upon investigation, if it shall conclude that the law has been violated, it may make to such association recommendations for the readjustment of its business, in order that it may thereafter maintain its organization and management and conduct its business in accordance with law. If such association fails to comply with the recommendations of the federal trade commission, said commission shall refer its findings and recommendations to the attorney-general of the United States for such action thereon as he may deem proper.

For the purpose of enforcing these provisions the federal trade commission shall have all the powers, so far as applicable, given it in "An act to create a federal trade commission, to define its powers and duties, and for other purposes." (Approved April 10, 1918.)

RAILROAD OPERATION LAW.

The president, having in time of war taken over the possession, use, control and operation (called hereinafter federal control) of certain railroads and systems of transportation (called herein carriers) is hereby authorized to agree with and to guarantee to any such carrier making operating returns to the interstate commerce commission, that during the period of such federal control it shall receive as just compensation an annual sum, payable from time to time in reasonable installments, for each year and pro rata for any fractional year of such federal control, not exceeding a sum equivalent as nearly as may be to its average annual railway operating income for the three years ended June 30, 1917.

That any railway operating income accruing during the period of federal control in excess of such just compensation shall remain the property of the United States. In the computation of such income, debits and credits arising from the accounts called in the monthly reports to the interstate commerce commission equipment, rents and joint facility rents shall be included, but debits and credits arising from the operation of such street electric passenger railways, including railways commonly called interurbans, as are at the time of the agreement not under federal control, shall be excluded. If any lines were acquired by, leased to or consolidated with such railroad or system between July 1, 1914, and Dec. 31, 1917, both inclusive, and separate operating returns to the interstate commerce commission were not made for such lines after such acquisition, lease or consolidation, there shall (before the average is computed) be added to the total railway operating income of such railroad or system for the three years ended June 30, 1917, the total railway operating income of the lines so acquired, leased or consolidated, for the period beginning July 1, 1914, and ending on the date of such acquisition, lease or consolidation, or on Dec. 31, 1917, whichever is the earlier. The average annual railway operating income shall be ascertained by the interstate commerce commission and certified by it to the president.

Its certificate shall, for the purpose of such agreement, be taken as conclusive of the amount of such average annual railway operating income.

Every such agreement shall provide that any federal taxes under the act of Oct. 3, 1917, or acts in addition thereto or in amendment thereof, commonly called war taxes, assessed for the period of federal control beginning Jan. 1, 1918, or any part of such period, shall be paid by the carrier out of its own funds, or shall be charged against or deducted from the just compensation; that other taxes assessed under federal or any other governmental authority for the period of federal control or any part thereof, either on the property used under such federal control or on the right to operate as a carrier, or on the revenues or any part thereof derived from operation (not including, however, assessments for public improvements or taxes assessed on property under construction, and chargeable under the classification of the interstate commerce commission to investment in road and equipment), shall be paid out of revenues derived from railway operations while under federal control; that all taxes assessed under federal or any other governmental authority for the period prior to Jan. 1, 1918, whenever levied or payable, shall be paid by the carrier out of its own funds, or shall be charged against or deducted from the just compensation.

Every such agreement shall also contain adequate and appropriate provisions for the maintenance, repair, renewals and depreciation of the property, for the creation of any reserves or reserve funds found necessary in connection therewith, and for such accounting and adjustments of charges and payments, both during and at the end of federal control as may be requisite in order that the property of each carrier may be returned to it in substantially as good repair and in substantially as complete equipment as it was in at the beginning of federal control, and also that the United States may, by deductions from the just compensations or by other proper means and charges, be reimbursed for the cost of any additions, repairs, renewals and betterments to such property not justly chargeable to the United States; in making such accounting and adjustments, due consideration shall be given to the amounts expended or reserved by each carrier for maintenance, repairs, renewals and depreciation during the three years ended June 30, 1917, to the condition of the property at the beginning and at the end of federal control and to any other pertinent facts and circumstances.

The president is further authorized in such agreement to make all other reasonable provisions, not inconsistent with the provisions of this act or of the act entitled "An act making appropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes," approved Aug. 29, 1916 that he may deem necessary or proper for such federal control or for the determination of the mutual rights and obligations of the parties to the agreement arising from or out of such federal control.

If the president shall find that the condition of any carrier was during all or a substantial portion of the period of three years ended June 30, 1917, because of nonoperation, receivership or where recent expenditures for additions or improvements or equipment were not fully reflected in the operating railway income of said three years or a substantial portion thereof, or because of any undeveloped or abnormal conditions, so exceptional as to make the basis of earnings hereinabove provided for plainly inequitable as a fair measure of just compensation, then the president may make with the carrier such agreement for such amount of just compensation as under the circumstances of the particular case he shall find just.

That every railroad not owned, controlled or

operated by another carrier company, and which has heretofore competed for traffic with a railroad or railroads of which the president has taken the possession, use and control, or which connects with such railroads and is engaged as a common carrier in general transportation, shall be held and considered as within "federal control," as herein defined, and necessary for the prosecution of the war, and shall be entitled to the benefit of all the provisions of this act: Provided, however, That nothing in this paragraph shall be construed as including any street or interurban electric railway which has as its principal source of operating revenue urban, suburban or interurban passenger traffic, or sale of power, heat and light, or both.

The agreement shall also provide that the carrier shall accept all the terms and conditions of this act and any regulation or order made by or through the president under authority of this act or of that portion of the act entitled "An act making appropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes," approved Aug. 29, 1916, which authorizes the president in time of war to take possession, assume control and utilize systems of transportation.

Sec. 2. That if no such agreement is made, or pending the execution of an agreement, the president may nevertheless pay to any carrier while under federal control an annual amount, payable in reasonable installments, not exceeding 90 per cent of the estimated annual amount of just compensation, remitting such carrier, in case where no agreement is made, to its legal rights for any balance claimed to the remedies provided in section 3 hereof. Any amount thereafter found due such carrier above the amount paid shall bear interest at the rate of 6 per cent per annum. The acceptance of any benefits under this section shall constitute an acceptance by the carrier of all the provisions of this act and shall obligate the carrier to pay to the United States, with interest at the rate of 6 per cent per annum from a date or dates fixed in proceedings under section 3, the amount by which the sums received under this section exceed the sum found due in such proceedings.

Sec. 3. That all claims for just compensation not adjusted (as provided in section 1) shall, on the application of the president or of any carrier, be submitted to boards, each consisting of three referees to be appointed by the interstate commerce commission, members of which and the official force thereof being eligible for service on such boards without additional compensation. Such boards of referees are hereby authorized to summon witnesses, require the production of records, books, correspondence, documents, memoranda and other papers, view properties, administer oaths, and may hold hearings in Washington and elsewhere, as their duties and the convenience of the parties may require. In case of disobedience to a subpoena the board may invoke the aid of any District court of the United States in requiring the attendance and testimony of witnesses and the production of documentary evidence, and such court within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpoena issued to any person, corporation, partnership or association, issue an order requiring appearance before the board, or the production of documentary evidence if so ordered, or the giving of evidence touching the matter in question; and any failure to obey such order of the court may be punished by such court as a contempt thereof. Such cases may be heard separately or together or by classes, by such boards as the interstate commerce commission in the first instance, or any board of referees to which any such cases shall be referred may determine. Said boards shall give full hearings to

such carriers and to the United States; shall consider all the facts and circumstances, and shall report as soon as practicable in each case to the president the just compensation, calculated on an annual basis and otherwise in such form as to be convenient and available for the making of such agreement as is authorized in section 1. The president is authorized to enter into an agreement with such carrier for just compensation upon a basis not in excess of that reported by such board, and may include therein provisions similar to those authorized under section 1. Failing such agreement, either the United States or such carrier may file a petition in the Court of Claims for the purpose of determining the amount of such just compensation, and in the proceedings in said court the report of said referees shall be prima facie evidence of the amount of just compensation and of the facts therein stated. Proceedings in the Court of Claims under this section shall be given precedence and expedited in every practicable way.

Sec. 4. That the just compensation that may be determined as hereinbefore provided by agreement or that may be adjudicated by the Court of Claims, shall be increased by an amount reckoned at a reasonable rate per centum to be fixed by the president upon the cost of any additions and betterments, less retirements, and upon the cost of road extensions to the property of such carrier made by such carrier with the approval of or by order of the president while such property is under federal control.

Sec. 5. That no carrier while under federal control shall, without the prior approval of the president, declare or pay any dividend in excess of its regular rate of dividends during the three years ended June 30, 1917. Provided, however, That such carriers as have paid no regular dividends or no dividends during said period may, with the prior approval of the president, pay dividends at such rate as the president may determine.

Sec. 6. That the sum of \$500,000,000 is hereby appropriated, out of any moneys in the treasury not otherwise appropriated, which, together with any funds available from any operating income of said carriers, may be used by the president as a revolving fund for the purpose of paying the expenses of the federal control, and so far as necessary the amount of just compensation, and to provide terminals, motive power, cars and other necessary equipment, such terminals, motive power, cars and equipment to be used and accounted for as the president may direct and to be disposed of as congress may hereafter by law provide.

The president may also make or order any carrier to make any additions, betterments or road extensions, and to provide terminals, motive power, cars and other equipment necessary or desirable for war purposes or in the public interest on or in connection with the property of any carrier. He may from said revolving fund advance to such carrier all or any part of the expense of such additions, betterments or road extensions, and to provide terminals, motive power, cars and other necessary equipment so ordered and constructed by such carrier or by the president, such advances to be charged against such carrier and to bear interest at such rate and be payable on such terms as may be determined by the president, to the end that the United States may be fully reimbursed for any sums so advanced.

Any loss claimed by any carrier by reason of any such additions, betterments or road extensions so ordered and constructed may be determined by agreement between the president and such carrier; failing such agreement the amount of such loss shall be ascertained as provided in section 3 hereof.

From said revolving fund the president may expend such an amount as he may deem neces-

sary or desirable for the utilization and operation of canals, or for the purchase, construction or utilization and operation of boats, barges, tugs and other transportation facilities on the inland, canal and coastwise waterways, and may in the operation and use of such facilities create or employ such agencies and enter into such contracts and agreements as he shall deem in the public interest.

Sec. 7. That for the purpose of providing funds requisite for maturing obligations or for other legal and proper expenditures, or for reorganizing railroads in receivership, carriers may, during the period of federal control, issue such bonds, notes, equipment trust certificates, stock and other forms of securities, secured or unsecured by mortgage, as the president may first approve as consistent with the public interest. The president may, out of the revolving fund created by this act, purchase for the United States all or any part of such securities at prices not exceeding par, and may sell such securities whenever in his judgment it is desirable at prices not less than the cost thereof. Any securities so purchased shall be held by the secretary of the treasury, who shall, under the direction of the president, represent the United States in all matters in connection therewith in the same manner as a private holder thereof. The president shall each year as soon as practicable after Jan. 1, cause a detailed report to be submitted to the congress of all receipts and expenditures made under this section and section 6 during the preceding calendar year.

Sec. 8. That the president may execute any of the powers herein and heretofore granted him with relation to federal control through such agencies as he may determine, and may fix the reasonable compensation for the performance of services in connection therewith, and may avail himself of the advice, assistance and co-operation of the interstate commerce commission and of the members and employes thereof, and may also call upon any department, commission or board of the government for such services as he may deem expedient. But no such official or employe of the United States shall receive any additional compensation for such services except as now permitted by law.

Sec. 9. That the provisions of the act entitled "An act making appropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes," approved Aug. 29, 1916, shall remain in force and effect except as expressly modified and restricted by this act; and the president, in addition to the powers conferred by this act, shall have and is hereby given such other and further powers necessary or appropriate to give effect to the powers herein and heretofore conferred. The provisions of this act shall also apply to any carriers to which federal control may be hereafter extended.

Sec. 10. That carriers while under federal control shall be subject to all laws and liabilities as common carriers, whether arising under state or federal laws or at common law, except in so far as may be inconsistent with the provisions of this act or any other act applicable to such federal control or with any order of the president. Actions at law or suits in equity may be brought by and against such carriers and judgments rendered as now provided by law; and in any action at law or suit in equity against the carrier, no defense shall be made thereto upon the ground that the carrier is an instrumentality or agency of the federal government. Nor shall any such carrier be entitled to have transferred to a federal court any action heretofore or hereafter instituted by or against it, which action was not so transferable prior to the federal control of such carrier; and any action which has heretofore been so transferred because of such federal control or of any act of congress or official order or proclamation relating thereto shall upon motion of either party be

retransferred to the court in which it was originally instituted. But no process, mesne or final, shall be levied against any property under such federal control.

That during the period of federal control, whenever in his opinion the public interest requires, the president may initiate rates, fares, charges, classifications, regulations and practices by filing the same with the interstate commerce commission, which said rates, fares, charges, classifications, regulations and practices shall not be suspended by the commission pending final determination.

Said rates, fares, charges, classifications, regulations and practices shall be reasonable and just and shall take effect at such time and upon such notice as he may direct, but the interstate commerce commission shall, upon complaint, enter upon a hearing concerning the justness and reasonableness of so much of any order of the president as establishes or changes any rate, fare, charge, classification, regulation or practice of any carrier under federal control, and may consider all the facts and circumstances existing at the time of the making of the same. In determining any question concerning any such rates, fares, charges, classifications, regulations or practices or changes therein, the interstate commerce commission shall give due consideration to the fact that the transportation systems are being operated under a unified and co-ordinated national control and not in competition.

After full hearing the commission may make such findings and orders as are authorized by the act to regulate commerce as amended, and said findings and orders shall be enforced as provided in said act. Provided, however, That when the president shall find and certify to the interstate commerce commission that in order to defray the expenses of federal control and operation fairly chargeable to railway operating expenses, and also to pay railway tax accruals other than war taxes, net rents for joint facilities and equipment, and compensation to the carriers, operating as a unit, it is necessary to increase the railway operating revenues, the interstate commerce commission in determining the justness and reasonableness of any rate, fare, charge, classification, regulation or practice shall take into consideration said finding and certificate by the president, together with such recommendations as he may make.

Sec. 11. That every person or corporation, whether carrier or shipper, or any receiver, trustee, lessee, agent or person acting for or employed by a carrier or shipper, or other person, who shall knowingly violate or fail to observe any of the provisions of this act, or shall knowingly interfere with or impede the possession, use, operation or control of any railroad property, railroad or transportation system hitherto or hereafter taken over by the president, or shall knowingly violate any of the provisions of any order or regulation made in pursuance of this act, shall be guilty of a misdemeanor, and shall, upon conviction be punished by a fine of not more than \$5,000, or, if a person, by imprisonment for not more than two years, or both. Each independent transaction constituting a violation of, or a failure to observe, any of the provisions of this act, or any order entered in pursuance hereof, shall constitute a separate offense. For the taking or conversion to his own use or the embezzlement of money or property derived from or used in connection with the possession, use or operation of said railroads or transportation systems, the criminal statutes of the United States, as well as the criminal statutes of the various states where applicable, shall apply to all officers, agents and employes engaged in said railroad and transportation service, while the same is under federal control, to the same extent as to persons employed in the regular service of the United States. Prosecutions for violations of this act or of any order entered hereunder

shall be in the District courts of the United States, under the direction of the attorney-general, in accordance with the procedure for the collection and imposing of fines and penalties now existing in said courts.

Sec. 12. That moneys and other property derived from the operation of the carriers during federal control are hereby declared to be the property of the United States. Unless otherwise directed by the president, such moneys shall not be covered into the treasury, but such moneys and property shall remain in the custody of the same officers, and the accounting thereof shall be in the same manner and form as before federal control. Disbursements therefrom shall, without further appropriation, be made in the same manner as before federal control and for such purposes as under the interstate commerce commission classification of accounts in force on Dec. 27, 1917, are chargeable to operating expenses or to railway tax accruals and for such other purposes in connection with federal control as the president may direct, except that taxes under titles one and two of the act entitled "An act to provide revenue to defray war expenses, and for other purposes," approved Oct. 3, 1917, or any act in addition thereto or in amendment thereof, shall be paid by the carrier out of its own funds. If federal control begins or ends during the tax year for which any taxes so chargeable to railway tax accruals are assessed, the taxes for such year shall be apportioned to the date of the beginning or ending of such federal control, and disbursements shall be made only for that portion of such taxes as is due for the part of such tax year which falls within the period of federal control.

At such periods as the president may direct, the books shall be closed and the balance of revenues over disbursements shall be covered into the treasury of the United States to the credit of the revolving fund created by this act. If such revenues are insufficient to meet such disbursements, the deficit shall be paid out of such revolving fund in such manner as the president may direct.

Sec. 13. That all pending cases in the courts of the United States affecting railroads or other transportation systems brought under the act to regulate commerce, approved Feb. 4, 1887, as amended and supplemented, including the commodities clause, so called, or under the act to protect trade and commerce against unlawful restraints and monopolies, approved July 2, 1890, and amendments thereto, shall proceed to final determination as soon as may be, as if the United States had not assumed control of transportation systems; but in any such case the court having jurisdiction may, upon the application of the United States, stay execution of final judgment or decree until such time as it shall deem proper.

Sec. 14. That the federal control of railroads and transportation systems herein and heretofore provided for shall continue for and during the period of the war and for a reasonable time thereafter, which shall not exceed one year and nine months next following the date of the proclamation by the president of the exchange of ratifications of the treaty of peace: Provided, however, That the president may, prior to July 1, 1918, relinquish control of all or any part of any railroad or system of transportation, further federal control of which the president shall deem not needful or desirable; and the president may at any time during the period of federal control agree with the owners thereof to relinquish all or any part of any railroad or system of transportation. The president may relinquish all railroads and systems of transportation under federal control at any time he shall deem such action needful or desirable. No right to compensation shall accrue to such owners from and after the date of

relinquishment for the property so relinquished.

Sec. 15. That nothing in this act shall be construed to amend, repeal, impair or affect the existing laws or powers of the states in relation to taxation or the lawful police regulations of the several states, except wherein such laws, powers or regulations may affect the transportation of troops, war materials, government supplies or the issue of stocks and bonds.

Sec. 16. That this act is expressly declared to be emergency legislation enacted to meet conditions growing out of war; and nothing herein is to be construed as expressing or prejudicing the future policy of the federal government concerning the ownership, control or regulation of carriers or the method or basis of the capitalization thereof. (Approved March 21, 1918.)

PUNISHMENT FOR DESTROYING WAR MATERIAL.

("Sabotage" Act.)

The words "war material" as used in the act shall include arms, armament, ammunition, live stock, stores of clothing, food, foodstuffs or fuel; and shall also include supplies, munitions, and all other articles of whatever description, and any part or ingredient thereof, intended for, adapted to or suitable for the use of the United States, or any associate nation, in connection with the conduct of the war.

The words "war premises," as used, shall include all buildings, grounds, mines or other places wherein such war material is being produced, manufactured, repaired, stored, mined, extracted, distributed, loaded, unloaded or transported, together with all machinery and appliances therein contained; and all forts, arsenals, navy yards, camps, prisons or other military or naval stations of the United States or any associate nation.

The words "war utilities," as used, shall include all railroads, railways, electric lines, roads of whatever description, railroad or railway fixture, canal, lock, dam, wharf, pier, dock, bridge, building, structure, engine, machine, mechanical contrivance, car, vehicle, boat or aircraft, or any other means of transportation whatsoever, whereon or whereby such war material or any troops of the United States, or of any associate nation, are being or may be transported either within the limits of the United States or upon the high seas; and all dams, reservoirs, aqueducts, water and gas mains and pipes, structures and buildings, whereby or in connection with which water or gas is being furnished, or may be furnished, to any war premises or to the military or naval forces of the United States, or any associate nation, and all electric light and power, steam or pneumatic power, telephone and telegraph plants, poles, wires and fixtures and wireless stations, and the buildings connected with the maintenance and operation thereof used to supply water, light, heat, power or facilities of communication to any war premises or to the military or naval forces of the United States or any associate nation.

The words "United States" shall include the Canal Zone and all territory and waters, continental and insular, subject to the jurisdiction of the United States.

The words "associate nation," as used in this act, shall be deemed to mean any nation at war with any nation with which the United States is at war.

When the United States is at war, whoever, with intent to injure, interfere with or obstruct the United States or any associate nation in preparing for or carrying on the war, or whoever, with reason to believe that his act may injure, interfere with or obstruct the United States or any associate nation in preparing for or carrying on the war, shall willfully injure or destroy, or shall attempt to

so injure or destroy, any war material, war premises or war utilities, as herein defined, shall, upon conviction thereof, be fined not more than \$10,000 or imprisoned not more than thirty years, or both.

When the United States is at war, whoever, with intent to injure, interfere with or obstruct the United States or any associate nation in preparing for or carrying on the war, or whoever, with reason to believe that his act may injure, interfere with or obstruct the United States or any associate nation in preparing for or carrying on the war, shall willfully make or cause to be made in a defective manner, or attempt to make or cause to be made in a defective manner, any war material, as herein defined, or any tool, implement, machine, utensil or receptacle used or employed in making, producing, manufacturing or repairing any such war material, as herein defined, shall, upon conviction thereof, be fined not more than \$10,000 or imprisoned not more than thirty years, or both. (Approved April 20, 1918.)

WOMAN ALIEN ENEMIES.

Section 4067 of the revised statutes is amended by extending its scope to include women, making the section read as follows:

"Section 4067. Whenever there is a declared war between the United States and any foreign nation or government, or any invasion or predatory incursion is perpetrated, attempted or threatened against the territory of the United States by any foreign nation or government, and the president makes public proclamation of the event, all natives, citizens, denizens or subjects of the hostile nation or government being of the age of 14 years and upward, who shall be within the United States and not actually naturalized, shall be liable to be apprehended, restrained, secured and removed as alien enemies. The president is authorized, in any such event, by his proclamation thereof, or other public act, to direct the conduct to be observed, on the part of the United States, toward the aliens who become so liable; the manner and degree of the restraint to which they shall be subject and in what cases, and upon what security their residence shall be permitted, and to provide for the removal of those who, not being permitted to reside within the United States, refuse or neglect to depart therefrom; and to establish any other regulations which are found necessary in the premises and for the public safety." (Approved April 16, 1918.)

HOUSING OF SHIPYARD EMPLOYEES.

The United States shipping board emergency fleet corporation is authorized within the limits of the amounts herein authorized—

(a) To purchase, lease, requisition, or acquire by condemnation or otherwise any improved or unimproved land or any interest therein suitable for the construction thereon of houses for the use of employes and the families of employes of shipyards in which ships are being constructed for the United States.

(b) To construct on such land for the use of such employes and their families houses and all other necessary or convenient facilities, upon such conditions and at such price as may be determined by it, and to sell, lease, or exchange such houses, land, and facilities upon such terms and conditions as it may determine.

(c) To purchase, lease, requisition, or acquire by condemnation or otherwise any houses or other buildings for the use of such employes and their families, together with the land on which the same are erected, or any interest therein, all necessary and proper fixtures and furnishings therefor, to manage, repair, sell, lease, or exchange such lands, houses, buildings, fixtures, furnishings and facilities upon such terms and conditions as it may determine to carry out the purposes of this act.

(d) To make loans to persons, firms, or corporations in such manner, upon such terms and security, and for such time not exceeding ten years, as it may determine, to provide houses and facilities for the employes and the families of employes of such shipyards.

Whenever said United States shipping board emergency fleet corporation shall acquire by requisition or condemnation such property or any interest therein, it shall determine and make just compensation therefor, and if the amount so determined is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined, and shall be entitled to sue the United States to recover such further sum as will make such an amount as will be just compensation for the property or interest therein so taken.

Whenever the United States shipping board emergency fleet corporation shall requisition any property or rights, or upon the filing of a petition for condemnation hereunder, immediate possession may be taken by it of such land, houses, or other property, rights, and facilities, to the extent of the interests to be acquired therein.

The power to acquire property by purchase, lease, requisition, or condemnation, or to construct houses, or other buildings, and to make loans, or otherwise extend aid as herein granted, shall cease with the termination of the present war with Germany. The date of the conclusion of the war shall be declared by proclamation of the president.

That for the purpose of carrying out the provisions of this act the expenditure of \$50,000,000 is authorized, and in executing the authority granted by this act, the said United States shipping board emergency fleet corporation shall not expend or obligate the United States to expend more than the said sum, nor shall any contract for construction be entered into which provides that the compensation of the contractor shall be the cost of construction plus a percentage thereof for profit, unless such contract shall also fix the reasonable cost of such construction as determined by the emergency fleet corporation and provide that upon any increase in cost above the reasonable cost so fixed by such board, the percentage of profit shall decrease as the cost increases in accordance with a rate to be fixed by the board and expressed in the contract. Nothing herein contained shall be construed to prevent the board from contracting for the payment of premiums or bonuses for the speedy completion of the work contracted for. The United States shipping board emergency fleet corporation shall report to congress on the first Monday in December of each year the names of all persons or corporations with whom it has made contracts and of such subcontractors as may be employed in furtherance of this act, including a statement of the purposes and amounts thereof, together with a detailed statement of all expenditures by contract or otherwise for land, buildings, material, labor, salaries, commissions, demurrage, or other charges in excess of \$10,000. (Approved March 1, 1918.)

TRANSPORTATION FOR SHIPYARD EMPLOYEES.

The act amends the urgent deficiency appropriation act of June 15, 1917, by adding to the shipping fund provisions a new provision reading as follows:

"(f) To take possession of, lease or assume control of, any street railroad, interurban railroad, or part thereof wherever operated, and all cars, appurtenances and franchises or parts thereof commonly used in connection with the operation thereof necessary for the transfer and transportation of employes of shipyards or plants engaged or that may hereafter be engaged in the construction of ships or equipment therefor for the United States."

Paragraph (b) of section 1 of the act is

amended by adding, after the word "material," the following words, "or take possession, lease or assume control of any street railroad, interurban railroad, or part thereof, cars and other equipment necessary to operation."

Upon taking possession of such property, or leasing or assuming control thereof, just compensation shall be made therefor, to be determined by the president, and if the amount thereof so determined by the president is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the president and shall be entitled to sue the United States of America to recover such further sums as added to 75 per cent will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the judicial code.

The president may exercise the power and authority vested in him through the several departments of the government, and through such agency or agencies as he shall determine from time to time. (Approved April 22, 1918.)

PROTECTION OF HOMING PIGEONS.

It is declared to be unlawful knowingly to entrap, capture, shoot, kill, possess, or in any way detain an Antwerp, or homing, pigeon, commonly called carrier pigeon, which is owned by the United States or bears a band owned and issued by the United States having thereon the letters "U. S. A." or "U. S. N." and a serial number.

The possession or detention of any such pigeon by any person or persons in any loft, house, cage, building, or structure in the ownership or under the control of such person or persons without giving immediate notice by registered mail to the nearest military or naval authorities, shall be prima facie evidence of a violation of the act.

Any person violating the provisions of the act shall, upon conviction, be punished by a fine of not more than \$100, or by imprisonment for not more than six months, or by both such fine and imprisonment. (Approved April 19, 1918.)

LANDS FOR MILITARY PURPOSES.

The act authorizing condemnation proceeding of lands for military purposes, approved July 2, 1917, is amended by adding the following: "and for the construction and operation of plants for the production of nitrates and other compounds and the manufacture of explosives and other munitions of war and for the development and transmission of power for the operation of such plants." (Approved April 11, 1918.)

PROFESSORS OF MILITARY SCIENCE.

Sections 45, 46 and 56 of the act making further provision for the national defense approved June 3, 1916, are suspended for the period of the war, after which they shall become reinstated. During the present war the president is authorized to detail such number of officers of the army of the United States, either active or retired, not above the grade of colonel, as may be necessary for duty as professors and assistant professors of military science and tactics at institutions where one or more units of the reserve officers' training corps are maintained; but the total number of active officers so detailed shall not exceed 1,000 and no officer shall be so detailed who has not had at least one year's commissioned service in the army of the United States. Retired officers below the grade of lieutenant-colonel so detailed shall receive the full pay and allowances of their grade, and retired officers above the grade of major so detailed shall receive the same pay and allowances as a retired major would receive under like detail.

During the present war the president is

authorized to detail for duty at institutions where one or more units of the reserve officers' training corps are maintained such number of enlisted men, either active or retired, of the army of the United States as he may deem necessary, but the active noncommissioned officers so detailed shall have had at least one year's active service, and the total number of such active noncommissioned officers so detailed shall not exceed 3,000 and shall be additional in their respective grades to those otherwise authorized for the army of the United States. While detailed under the provisions of this section retired noncommissioned officers of the army of the United States shall receive active pay and allowances.

During the present war such arms, tentage and equipment as the secretary of war shall deem necessary for proper military training shall be supplied by the government to schools and colleges other than those provided for in section 47 of the national defense act, approved June 3, 1916, having a course of military training prescribed by the secretary of war, and having not less than 100 physically fit male students above the age of 14 years, under such rules and regulations as he may prescribe; and the secretary of war is hereby authorized during the present war to detail commissioned and noncommissioned officers of the army of the United States to said schools and colleges, detailing not less than one such officer or noncommissioned officer to each 500 students under military instruction; but no officer or noncommissioned officer shall be so detailed who has not had at least one year's active service in the army of the United States. (Approved April 17, 1918.)

INDEMNITY FOR ARMY DAMAGES ABROAD.

Claims of inhabitants of France or of any other European country not an enemy or ally of an enemy for damages caused by American military forces may be presented to any officer designated by the president, and when approved by such an officer shall be paid under regulations made by the secretary of war.

Claims under this statute shall not be approved unless they would be payable according to the law or practice governing the military forces of the country in which they occur.

Hereafter appropriations for the incidental expenses of the quartermaster corps shall be available for paying the claims herein described.

This statute does not supersede other modes of indemnity now in existence and does not diminish responsibility of any member of the military forces to the person injured or to the United States. (Approved April 18, 1918.)

PHILIPPINE MILITIA IN SERVICE.

The militia and other locally created armed forces in the Philippine islands may be called into the service of the United States, and all members thereof may be drafted into the service and organized in such manner as is or may be provided by law for calling or drafting the national guard into the service, and shall in all respects while therein be upon the same footing with members of the national guard so called or drafted: Provided, That the pay and allowances of officers and men of the Philippine militia and other locally created armed forces when serving in the Philippine islands shall in no case exceed the pay and allowances for corresponding grades of Philippine scouts. (Approved Jan. 26, 1918.)

GARABED INVENTION.

The secretary of the interior is authorized to accept, as trustee for the United States government, from Garabed T. K. Giragossian an assignment of the right to utilize for the government's own use his discovery or invention to be known as the "Garabed." The assignment shall be free of charge or expense.

The secretary of the interior is authorized to perform any and all acts as may be necessary to carry this resolution into effect. Provided, however, That Garabed T. K. Giragossian shall demonstrate the practicability of his discovery or invention to a commission of five eminent scientists, who shall be appointed by Garabed T. K. Giragossian and be approved by the secretary of the interior.

If such demonstration shall in the opinion of the scientists prove the practicability of the discovery or invention, and that he is the original discoverer or inventor thereof, Garabed T. K. Giragossian shall be recognized by the United States government as the original discoverer, inventor and legal owner of the invention. The certificate of the commission of scientists shall entitle him to all the rights and benefits of the discovery or invention for a period of seventeen years.

The United States government shall not issue to anyone else any patent involving or relating to the distinctive principle of the "Garabed" free energy generator regardless of its form or shape, or for any device, improvement, process, equipment or apparatus based upon the distinctive principle of the discovery or invention, or for any improvement or change developed in the use of the said "Garabed," and shall prevent the construction, importation, use or exploitation thereof, in whole or in part, in the United States, and shall protect Garabed T. K. Giragossian in the rights and interests in the "Garabed" in the above respect for a period of seventeen years in the United States.

After the successful demonstration of the "Garabed," if the United States government wishes to purchase the right and title for the exclusive use and ownership of said discovery or invention, the said Garabed T. K. Giragossian will comply with the request of the United States government: Provided, That he shall be remunerated to the extent commensurate with the value of his discovery or invention, which shall be appraised by a committee of even number, one-half of the membership of which shall be selected by the secretary of the interior and one-half selected by the said Garabed T. K. Giragossian, and the finding of said committee shall be subject to the approval of the secretary of the interior and of the said Garabed T. K. Giragossian.

The United States government will have the right to exercise its right to utilize the invention for its own use simultaneously with the beginning of the public and general use of the "Garabed" system. (Approved Feb. 8, 1918.)

MORE MIDSHIPMEN.

Hereafter there shall be allowed at the United States naval academy five midshipmen for each senator, representative and delegate in congress, one for Porto Rico, two for the District of Columbia, fifteen appointed each year at large and one hundred appointed annually from enlisted men of the navy, as now authorized by law. (Approved Dec. 20, 1917.)

NAVAL ACADEMY TERM REDUCED.

The president is authorized until Aug. 1, 1921, to reduce in his discretion the course of instruction at the United States naval academy from four to three years and to graduate classes which have completed such reduced courses of instruction. (Approved April 2, 1918.)

ASSISTANT SECRETARIES OF WAR.

Be it enacted, etc., That an act entitled "An act providing for an assistant secretary of war," approved March 5, 1890, be, and the same hereby is, amended to read as follows: "There shall be in the department of war an assistant secretary, a second assistant secretary and a third assistant secretary, each of

whom shall be appointed by the president, by and with the advice and consent of the senate. The assistant secretary shall be entitled to a salary of \$5,000 per annum, payable monthly, and the second assistant secretary and third assistant secretary shall each be entitled to a salary of \$4,500 per annum, payable monthly, and shall perform such duties in the department of war as shall be prescribed by the secretary or as may be required by law." (Approved April 6, 1918.)

FURLONGHS FOR CIVIL WORK.

Whenever during the continuance of the present war in the opinion of the secretary of war the interests of the service or the national security and defense render it necessary or desirable, the secretary of war be, and he hereby is, authorized to grant furloughs to enlisted men of the army of the United States with or without pay and allowances or with partial pay and allowances, and, for such periods as he may designate, to permit said enlisted men to engage in civil occupations and pursuits: Provided, That such furloughs shall be granted only upon the voluntary application of such enlisted men under regulations to be prescribed by the secretary of war. (Approved March 16, 1918.)

SOLDIERS AND SAILORS' CIVIL RELIEF ACT.

An act to extend protection to the civil rights of members of the military and naval establishments of the United States engaged in the present war. Be it enacted, etc.:

Article I.—General Provisions.

Section 100. That for the purpose of enabling the United States the more successfully to prosecute and carry on the war in which it is at present engaged, protection is hereby extended to persons in military service of the United States in order to prevent prejudice or injury to their civil rights during their term of service and to enable them to devote their entire energy to the military needs of the nation, and to this end the following provisions are made for the temporary suspension of legal proceedings and transactions which may prejudice the civil rights of persons in such service during the continuance of the present war.

Sec. 101. (1) That the term "persons in military service," as used in this act, shall include the following persons and no others: All officers and enlisted men of the regular army, the regular army reserve, the officers' reserve corps and the enlisted reserve corps; all officers and enlisted men of the national guard and national guard reserve recognized by the militia bureau of the war department; all forces raised under the act entitled "An act to authorize the president to increase temporarily the military establishment of the United States," approved May 18, 1917; all officers and enlisted men of the navy, the marine corps and the coast guard; all officers and enlisted men of the naval militia, naval reserve force, marine corps reserve and national naval volunteers recognized by the navy department; all officers of the public health service detailed by the secretary of the treasury for duty either with the army or the navy; any of the personnel of the lighthouse service and of the coast and geodetic survey transferred by the president to the service and jurisdiction of the war department or of the navy department; members of the nurse corps; army field clerks; field clerks, quartermaster corps; civilian clerks and employes on duty with the military forces detailed for service abroad in accordance with provisions of existing law; and members of any other body who have heretofore or may hereafter become a part of the military or naval forces of the United States. The term "military service," as used in this definition, shall signify active service in any branch of service

heretofore mentioned or referred to, but reserves and persons on the retired list shall not be included in the term "persons in military service" until ordered to active service. The term "active service" shall include the period during which a person in military service is absent from duty on account of sickness, wounds, leave or other lawful cause.

(2) The term "period of military service," as used in this act, shall include the time between the following dates: For persons in active service at the date of the approval of this act it shall begin with the date of approval of this act; for persons entering active service after the date of this act, with the date of entering active service. It shall terminate with the date of discharge from active service or death while in active service, but in no case later than the date when this act ceases to be in force.

(3) The term "person," as used in this act, with reference to the holder of any right alleged to exist against a person in military service or against a person secondarily liable under such right, shall include individuals, partnerships, corporations and any other forms of business association.

(4) The term "court" as used in this act shall include any court of competent jurisdiction of the United States or of any state, whether or not a court of record.

(5) The term "termination of the war" as used in this act shall mean the termination of the present war by the treaty of peace as proclaimed by the president.

Sec. 102. (1) That the provisions of this act shall apply to the United States, the several states and territories, the District of Columbia and all territory subject to the jurisdiction of the United States, and to proceedings commenced in any court therein, and shall be enforced through the usual forms of procedure obtaining in such courts or under such regulations as may be by them prescribed.

(2) When under this act any application is required to be made to a court in which no proceeding has already been commenced with respect to the matter, such application may be made to any court.

Sec. 103. Whenever pursuant to any of the provisions of this act the enforcement of any obligation or liability, the prosecution of any suit or proceeding, the entry or enforcement of any order, writ, judgment or decree, or the performance of any other act, may be stayed, postponed or suspended, such stay, postponement or suspension may, in the discretion of the court, likewise be granted to sureties, guarantors, indorsers and others subject to the obligation or liability, the performance or enforcement of which is stayed, postponed or suspended.

When a judgment or decree is vacated or set aside in whole or in part, as provided in this act, the same may, in the discretion of the court, likewise be set aside and vacated as to any surety, guarantor, indorser or other person liable upon the contract or liability for the enforcement of which the judgment or decree was entered.

Article II.—General Relief.

Sec. 200. That in any action or proceeding commenced in any court if there shall be a default of an appearance by the defendant the plaintiff before entering judgment shall file in the court an affidavit setting forth facts showing that the defendant is not in military service. If unable to file such affidavit plaintiff shall in lieu thereof file an affidavit setting forth either that the defendant is in the military service or that plaintiff is not able to determine whether or not defendant is in such service. If an affidavit is not filed showing that the defendant is not in the military service, no judgment shall be entered without first securing an order of court directing such entry, and no such order shall be made if the defendant is in such service until after the court shall have appointed an attor-

ney to represent defendant and protect his interest and the court shall on application make such appointment. Unless it appears that the defendant is not in such service the court may require as a condition before judgment is entered that the plaintiff file a bond approved by the court conditioned to indemnify the defendant, if in military service, against any loss or damage that he may suffer by reason of any judgment should the judgment be thereafter set aside in whole or in part. And the court may make such other and further order or enter such judgment as in its opinion may be necessary to protect the rights of the defendant under this act.

(2) Any person who shall make or use an affidavit required under this section knowing it to be false shall be guilty of a misdemeanor and shall be punishable by imprisonment not to exceed one year or by fine not to exceed \$1,000, or both.

(3) In any action or proceeding in which a person in military service is a party if such party does not personally appear therein or is not represented by an authorized attorney, the court may appoint an attorney to represent him; and in such case a like bond may be required and an order made to protect the rights of such person. But no attorney appointed under this act to protect a person in military service shall have power to waive any right of the person for whom he is appointed or bind him by his acts.

(4) If any judgment shall be rendered in any action or proceeding governed by this section against any person in military service during the period of such service or within thirty days thereafter, and it appears that such person was prejudiced by reason of his military service in making his defense thereto, such judgment may, upon application made by such person or his legal representative, not later than ninety days after the termination of such service, be opened by the court rendering the same and such defendant or his legal representative let in to defend; provided it is made to appear that the defendant has a meritorious or legal defense to the action or some part thereof. Vacating, setting aside or reversing any judgment because of any of the provisions of this act shall not impair any right or title acquired by any bona fide purchaser for value under such judgment.

Sec. 201. That at any stage thereof any action or proceeding commenced in any court by or against a person in military service during the period of such service or within sixty days thereafter may, in the discretion of the court in which it is pending, on its own motion, and shall, on application to it, by such person or some person on his behalf, be stayed as provided in this act, unless, in the opinion of the court, the ability of plaintiff to prosecute the action or the defendant to conduct his defense is not materially affected by reason of his military service.

Sec. 202. That when an action for compliance with the terms of any contract is stayed pursuant to this act no fine or penalty shall accrue by reason of failure to comply with the terms of such contract during the period of such stay, and in any case where a person fails to perform any obligation and a fine or penalty for such nonperformance is incurred a court may, on such terms as may be just, relieve against the enforcement of such fine or penalty if it shall appear that the person who would suffer by such fine or penalty was in the military service when the penalty was incurred and that by reason of such service the ability of such person to pay or perform was thereby materially impaired.

Sec. 203. That in any action or proceeding commenced in any court against a person in military service before or during the period of such service, or within sixty days thereafter, the court may in its discretion, on its own motion, or on application to it by such per-

son or some person on his behalf shall, unless in the opinion of the court the ability of the defendant to comply with the judgment or order entered or sought is not materially affected by reason of his military service:

(1) Stay the execution of any judgment or order entered against such person, as provided in this act, and

(2) Vacate or stay any attachment or garnishment of property, money or debts in the hands of another, whether before or after judgment, as provided in this act.

Sec. 204. That any stay of any action, proceeding, attachment or execution ordered by any court under the provisions of this act may, except as otherwise provided, be ordered for the period of military service and three months thereafter or any part of such period, and subject to such terms as may be just, whether as to payment in installments of such amounts and at such times as the court may fix or otherwise. Where the person in military service is a codefendant with others the plaintiff may nevertheless by leave of court proceed against the others.

Sec. 205. That the period of military service shall not be included in computing any period now or hereafter to be limited by any law for the bringing of any action by or against any person in military service or by or against his heirs, executors, administrators or assigns, whether such cause of action shall have accrued prior to or during the period of such service.

Article III.—Rent, Installment Contracts, Mortgages.

Sec. 300. (1) That no eviction or distress shall be made during the period of military service in respect of any premises for which the agreed rent does not exceed \$50 per month, occupied chiefly for dwelling purposes by the wife, children or other dependents of a person in military service, except upon leave of court granted upon application therefor or granted in an action or proceeding affecting the right of possession.

(2) On any such application or in any such action the court may, in its discretion, on its own motion, and shall, on application, unless in the opinion of the court the ability of the tenant to pay the agreed rent is not materially affected by reason of such military service, stay the proceedings for not longer than three months, as provided in this act, or it may make such other order as may be just.

(3) Any person who shall knowingly take part in any eviction or distress otherwise than as provided in subsection (1) hereof shall be guilty of a misdemeanor, and shall be punishable by imprisonment not to exceed one year or by fine not to exceed \$1,000, or both.

(4) The secretary of war or the secretary of the navy, as the case may be, is hereby empowered, subject to such regulations as he may prescribe, to order an allotment of the pay of a person in military service in reasonable proportion to discharge the rent of premises occupied for dwelling purposes by the wife, children or other dependents of such person.

Sec. 301. (1) That no person who has received, or whose assignor has received, under a contract for the purchase of real or personal property, or of lease or bailment with a view to purchase of such property, a deposit or installment of the purchase price from a person or from the assignor of a person who, after the date of payment of such deposit or installment, has entered military service, shall exercise any right or option under such contract to rescind or terminate the contract or resume possession of the property for non-payment of any installment falling due during the period of such military service, except by action in a court of competent jurisdiction.

(1a) Any person who shall knowingly resume possession of property which is the subject of this section otherwise than as provided in subsection (1) hereof shall be guilty of a

misdemeanor and shall be punished by imprisonment not to exceed one year or by fine not to exceed \$1,000, or both.

(2) Upon the hearing of such action the court may order the repayment of prior installments or deposits or any part thereof, as a condition of terminating the contract and resuming possession of the property, or may, in its discretion, on its own motion, and shall on application to it by such person in military service or some person on his behalf, order a stay of proceedings as provided in this act, unless, in the opinion of the court, the ability of the defendant to comply with the terms of the contract is not materially affected by reason of such service; or it may make such other disposition of the case as may be equitable to conserve the interests of all parties.

Sec. 302. (1) That the provisions of this section shall apply only to obligations originating prior to the date of approval of this act and secured by mortgage, trust deed or other security in the nature of a mortgage upon real or personal property owned by a person in military service at the commencement of the period of the military service and still so owned by him.

(2) In any proceeding commenced in any court during the period of military service to enforce such obligation arising out of non-payment of any sum thereunder due or out of any other breach of the terms thereof occurring prior to or during the period of such service, the court may, after hearing, in its discretion, on its own motion, and shall on application to it by such person in military service or some person on his behalf, unless in the opinion of the court the ability of the defendant to comply with the terms of the obligation is not materially affected by reason of his military service:

(a) Stay the proceedings as provided in this act; or

(b) Make such other disposition of the case as may be equitable to conserve the interests of all parties.

(3) No sale under a power of sale or under a judgment entered upon warrant of attorney to confess judgment contained in any such obligation shall be valid if made during the period of military service or within three months thereafter, unless upon an order of sale previously granted by the court and a return thereto made and approved by the court.

Article IV.—Insurance.

Sec. 400. That in this article the term "policy" shall include any contract of life insurance on the level premium or legal reserve plan. It shall also include any benefit in the nature of life insurance arising out of membership in any fraternal or beneficial association; the term "premium" shall include membership dues or assessments in such association, and the date of issuance of policy as herein limited shall refer to the date of admission to membership in such association; the term "insured" shall include any person who is the holder of a policy as defined in this article; the term "insurer" shall include any corporation, partnership or other form of association which secures or provides insurance under any policy, as defined in this article.

Sec. 401. That the benefits of this article shall apply to any person in military service who is the holder of a policy of life insurance, when such holder shall apply for such benefits on a form prepared in accordance with regulations which shall be prescribed by the secretary of the treasury. Such form shall set forth particularly that the application therein made is a consent to such modification of the terms of the original contract of insurance as are made necessary by the provisions of this article and by receiving and filing the same the insurer shall be deemed to have assented thereto, to the extent, if any, to which the policy on which the application

is made is within the provisions of this article. The original of such application shall be sent by the insured to the insurer, and a copy thereof to the bureau of war risk insurance.

The bureau of war risk insurance shall issue through suitable military and naval channels a notice explaining the provisions of this article and shall furnish forms to be distributed to those desiring to make application for its benefits.

Sec. 402. That the benefits of this act shall be available to any person in military service in respect of contracts of insurance in force under their terms up to but not exceeding a face value of \$5,000, irrespective of the number of policies held by such person whether in one or more companies, when such contracts were made and a premium was paid thereon before Sept. 1, 1917; but in no event shall the provisions of this article apply to any policy on which premiums are due and unpaid for a period of more than one year at the time when application for the benefits of this article is made or in respect of any policy on which there is outstanding a policy loan or other indebtedness equal to or greater than 50 per cent of the cash surrender value of the policy.

Sec. 403. That the bureau of war risk insurance shall, subject to regulations which shall be prescribed by the secretary of the treasury, compile and maintain a list of such persons in military service as have made application for the benefits of this article, and shall (1) reject any applications for such benefits made by persons who are not persons in military service; (2) reject any applications for such benefits in excess of the amount permitted by section 402; and (3) reject any applications in respect of contracts of insurance otherwise not entitled to the benefits of this article. Said bureau shall immediately notify the insurer and the insured in writing of every rejection or approval.

Sec. 404. That when one or more applications are made under this article by any one person in military service in respect of insurance exceeding a total face value of \$5,000, whether on one or more policies or in one or more companies, and the insured shall not in his application indicate an order of preference, the bureau of war risk insurance shall reject such policies as have the inferior cash surrender value, so as to reduce the total benefits conferred within the face value of \$5,000, and where necessary for this purpose shall direct the insurer to divide any policy into two separate policies. The said bureau shall immediately notify the insurer and the insured in writing of such selection.

Sec. 405. That no policy which has not lapsed for the nonpayment of premium before the commencement of the period of military service of the insured, and which has been brought within the benefits of this article, shall lapse or be forfeited for the nonpayment of premium during the period of such service or during one year after the expiration of such period: Provided, That in no case shall this prohibition extend for more than one year after the termination of the war.

Sec. 406. That within the first fifteen days of each calendar month after the date of approval of this act until the expiration of one year after the termination of the war, every insurance corporation or association to which application has been made as herein provided for the benefits of this article, shall render to the bureau of war risk insurance a report, duly verified, setting forth the following facts:

First. The names of the persons who have applied for such benefits, and the face value of the policies in respect of which such benefits have been applied for by such persons, during the preceding calendar month:

Second. A list as far as practicable of the premiums in respect of policies entitled to the benefits of this article which remain unpaid on the last day of the preceding calendar

month, which day is at least thirty-one days after the due date of the premiums, provided such premiums have not previously been so reported as in default:

Third. A list of premiums which, having been previously reported as in default, have been paid by the policyholder or some one on his behalf in whole or in part during the preceding calendar month:

Fourth. A computation of the difference between the total amount of defaulted premiums therein reported and the total amount of premiums paid as therein reported, after having been previously reported as a default. From this sum shall be deducted the total sum of any premiums previously reported as in default, upon policies in respect of which the bureau of war risk insurance has, since the date of such report, rejected an application for the benefits of this article. The final sum so arrived at shall be denominated the monthly difference.

Sec. 407. That the bureau of war risk insurance shall verify the computation of monthly difference reported by each insurer, and shall certify it, as corrected, to the secretary of the treasury and the insurer.

Sec. 408. That the secretary of the treasury shall, within ten days thereafter, deliver each month to the proper officer of each insurer, bonds of the United States to the amount of that multiple of \$100 nearest to the monthly difference certified in respect of each insurer. Such bonds shall be registered in the names of the respective insurers, who shall be entitled to receive the interest accruing thereon, and such bonds shall not be transferred or again registered, except upon the approval of the director of the bureau of war risk insurance, and shall remain in the possession of the insurer until settlement is made in accordance with this article: Provided, That whenever the fact of insolvency shall be ascertained by the director of the bureau of war risk insurance all obligation on the part of the United States, under this article, for future premiums on policies of such insurer shall thereupon terminate. An insurer shall furnish semiannual statements to the bureau of war risk insurance.

Sec. 409. That the bonds so delivered shall be held by the respective insurers as security for the payment of the defaulted premiums with interest. To indemnify it against loss the United States shall have a first lien upon any policy receiving the benefits of this article, subject only to any lien existing at the time the policy became subject to this act, and no loan or settlement or payment of dividend shall be made by the insurer on such policy which may prejudice the security of such lien. Before any dividend is paid or any loan or settlement is made the written consent of the bureau of war risk insurance must be obtained.

Sec. 410. That in the event that the military service of any person being the holder of a policy receiving the benefits of this article shall be terminated by death, the amount of any unpaid premiums, with interest, at the rate provided for in the policy for policy loans, shall be deducted from the proceeds of the policy and shall be included in the next monthly report of the insurer as premiums paid.

Sec. 411. That if the insured does not within one year after the termination of his period of military service pay to the insurer all past due premiums with interest thereon from their several due dates at the rate provided in the policy for policy loans, the policy shall at the end of such year immediately lapse and become void and the insurer shall thereupon become liable to pay the cash surrender value thereof, if any: Provided, That if the insured is in the military service at the termination of the war such lapse shall occur and surrender value be payable at the expiration of one year after the termination of the war.

Sec. 412. That at the expiration of one year after the termination of the war there shall be an account stated between each insurer and the United States, in which the following items shall be credited to the insurer:

(1) The total amount of the monthly differences reported under this article;

(2) The difference between the total interest received by the insurer upon the bonds held by it as security and the total interest upon such monthly differences at the rate of 5 per cent per annum; and in which there shall be credited to the United States the amount of the cash surrender value of each policy lapsed or forfeited as provided in section 411, but not in any case a greater amount on any policy than the total of the unpaid premiums with interest thereon at the rate provided for in the policy for policy loans.

Sec. 413. That the balance in favor of the insurer shall, in each case, be paid to it by the United States upon the surrender by the insurer of the bonds delivered to it from time to time by the secretary of the treasury under the provisions of this article.

Sec. 414. That this article shall not apply to any policy which is void or which may at the option of the insurer be voidable, if the insured is in military service, either in this country or abroad, nor to any policy which as a result of being in military service, either in this country or abroad, provides for the payment of any sum less than the face thereof or for the payment of an additional amount as premium.

Sec. 415. That this article shall apply only to insurance companies or associations which are required by the law under which they are organized or doing business to maintain a reserve, or which if not so required, have made or shall make provision for the collection from all those insured in such insurer of a premium to cover the special war risk of those insured persons who are in military service.

Article V.—Taxes and Public Lands.

Sec. 500. (1) That the provisions of this section shall apply when any taxes or assessments, whether general or special, falling due during the period of military service in respect of real property owned and occupied for dwelling or business purposes by a person in military service or his dependents at the commencement of his period of military service and still so occupied by his dependents or employes are not paid.

(2) When any person in military service, or any person in his behalf, shall file with the collector of taxes, or other officer whose duty it is to enforce the collection of taxes or assessments, an affidavit showing (a) that a tax or assessment has been assessed upon property which is the subject of this section, (b) that such tax or assessment is unpaid, and (c) that by reason of such military service the ability of such person to pay such tax or assessment is materially affected, no sale of such property shall be made to enforce the collection of such tax or assessment, or any proceeding or action for such purpose commenced, except upon leave of court granted upon an application made therefor by such collector or other officer. The court thereupon may stay such proceedings or such sale, as provided in this act, for a period extending not more than six months after the termination of the war.

(3) When by law such property may be sold or forfeited to enforce the collection of such tax or assessment, such person in military service shall have the right to redeem or commence an action to redeem such property, at any time not later than six months after the termination of such service, but in no case later than six months after the termination of the war; but this shall not be taken to shorten any period now or hereafter provided by the laws of any state or territory for such redemption.

(4) Whenever any tax or assessment shall not be paid when due, such tax or assessment due and unpaid shall bear interest until paid at the rate of 6 per cent per annum, and no other penalty or interest shall be incurred by reason of such nonpayment. Any lien for such unpaid taxes or assessments shall also include such interest thereon.

Sec. 501. That no right to any public lands initiated or acquired prior to entering military service by any person under the homestead laws, the desert-land laws, the mining-land laws, or any other laws of the United States, shall be forfeited or prejudiced by reason of his absence from such land, or of his failure to perform any work or make any improvements thereon, or to do any other act required by any such law during the period of such service. Nothing in this section contained shall be construed to deprive a person in military service or his heirs or devisees of any benefits to which he or they may be entitled under the act entitled "An act for the relief of homestead entrymen or settlers who enter the military or naval service of the United States in time of war," approved July 28, 1917; the act entitled "An act for the protection of desert-land entrymen who enter the military or naval service of the United States in time of war," approved Aug. 7, 1917; the act entitled "An act to provide further for the national security and defense by stimulating agriculture and facilitating the distribution of agricultural products," approved Aug. 10, 1917; the joint resolution "To relieve the owners of mining claims who have been mustered into the military or naval service of the United States as officers or enlisted men from performing assessment work during the term of such service," approved July 17, 1917; or any other act or resolution of congress: Provided, That nothing in this section contained shall be construed to limit or affect the right of a person in the military service to take any action during his term of service that may be authorized by law, or the regulations of the interior department thereunder, for the perfection, defense, or further assertion of rights initiated prior to the date of entering military service, and it shall be lawful for any person while in military service to make any affidavit or submit any proof that may be required by law, or the practice of the general land office in connection with the entry, perfection, defense, or further assertion of any rights initiated prior to entering military service, before the officer in immediate command and holding a commission in the branch of the service in which the party is engaged, which affidavits shall be as binding in law and with like penalties as if taken before the register of the United States land office.

Article VI.—Administrative Remedies.

Sec. 600. That where in any proceeding to enforce a civil right in any court it is made to appear to the satisfaction of the court that any interest, property or contract has since the date of the approval of this act been transferred or acquired with intent to delay the just enforcement of such right by taking advantage of this act, the court shall enter such judgment or make such order as might lawfully be entered or made, the provisions of this act to the contrary notwithstanding.

Sec. 601. (1) That in any proceeding under this act a certificate signed by the adjutant-general of the army as to persons in the army or in any branch of the United States service while serving pursuant to law with the army, signed by the chief of the bureau of navigation of the navy department as to persons in the navy or in any other branch of the United States service while serving pursuant to law with the navy, and signed by the major-general, commandant, United States marine corps, as to persons in the marine corps, or in any other branch of the United States service while serving pursuant to law with the marine corps, or signed by an officer

designated by any of them, respectively, for the purpose, shall when produced be prima facie evidence as to any of the following facts stated in such certificate:

That a person named has not been, or is, or has been in military service; the time when and the place where such person entered military service, his residence at that time, and the rank, branch and unit of such service that he entered, the dates within which he was in military service, the monthly pay received by such person at the date of issuing the certificate, the time when and place where such person died in or was discharged from such service.

It shall be the duty of the foregoing officers to furnish such certificate on application, and any such certificate when purporting to be signed by any one of such officers or by any person purporting upon the face of the certificate to have been so authorized shall be prima facie evidence of its contents and of the authority of the signer to issue the same.

(2) Where a person in military service has been reported missing he shall be presumed to continue in the service until accounted for, and no period herein limited which begins or ends with the death of such person shall begin or end until the death of such person is in fact reported to or found by the department of war or navy, or any court or board thereof, or until such death is found by a court of competent jurisdiction: Provided, That no period herein limited which begins or ends with the death of such person shall be extended hereby beyond a period of six months after the termination of the war.

Sec. 602. That any interlocutory order made by any court under the provisions of this act may, upon the court's own motion or otherwise, be revoked, modified or extended by it upon such notice to the parties affected as it may require.

Sec. 603. That this act shall remain in force until the termination of the war, and for six months thereafter: Provided, That wherever under any section or provision of this act a proceeding, remedy, privilege, stay, limitation, accounting or other transaction has been authorized or provided, the due exercise or enjoyment of which may extend beyond the period herein fixed for the termination of this act, such section or provision shall be deemed to continue in full force and effect so long as may be necessary to the exercise or enjoyment of the proceeding, remedy, privilege, stay, limitation, accounting or transaction aforesaid.

Sec. 604. That this act may be cited as the soldiers' and sailors' civil relief act. (Approved March 8, 1918.)

HOUSING FOR WAR NEEDS.

The president, for the purposes of providing housing, local transportation and other general community utilities for such industrial workers as are engaged in arsenals and navy yards of the United States and in industries connected with and essential to the national defense, and their families, and also employes of the United States whose duties require them to reside in the District of Columbia, and whose services are essential to war needs, and their families, only during the continuation of the existing war, is hereby authorized and empowered, within the limits of the amounts herein authorized—

(a) To purchase, acquire by lease, construct, requisition or acquire by condemnation or by gift such houses, buildings, furnishings, improvements, local transportation and other general community utilities and parts thereof as he may determine to be necessary for the proper conduct of the existing war.

(b) To purchase, lease or acquire by condemnation or by gift any improved or unimproved land or any interest therein on which such houses, buildings, improvements, local transportation and other general community utilities and parts thereof have been or may be constructed. Colleges, museums, libraries, state or

municipal buildings, and the furnishings in private dwellings shall not be acquired except by contract, nor shall any occupied dwelling or place of abode be taken under the powers in this act given except by contract unless the necessity thereof shall be determined by a judge of the Circuit or District court of the United States exercising jurisdiction in the locality on petition setting forth the reason and necessity for such taking. No existing limitation upon the right of any person to make a contract with the United States shall apply to owners whose property the president determines is necessary for government purposes and desires to either lease or purchase by contract.

(c) To equip, manage, maintain, alter, rent, lease, exchange, sell and convey such lands, or any right, title or interest therein, houses, buildings, improvements, local transportation and other general community utilities, parts thereof and equipment upon such terms and conditions as he may determine. No sale and conveyance shall be made hereunder on credit without reserving a first lien on such property for the unpaid purchase money. In no case shall any property hereby acquired be given away, nor shall rents be furnished free, but the rental charges shall be reasonable and just as between the employes and the government.

(d) To aid in providing, equipping, managing and maintaining houses, buildings, improvements, local transportation and other general community utilities by loan or otherwise to such person or persons and upon such terms and conditions as he may determine. No loan shall be made and no house or money given under this act to any person not an American citizen.

(e) To take possession of, alter, repair, improve and suitably arrange for living purposes to be used under the terms of this act all houses on square 633 except the Maltby building, owned by the United States, together with any other houses in the District of Columbia owned by the government and not now occupied. Houses erected by the government under the authority of this act shall be of only a temporary character except where the interests of the government will be best subserved by the erection of buildings of a permanent character.

Whenever the president shall acquire such land or such houses he shall make just compensation therefor, to be determined by him, and if the amount thereof so determined is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per centum of the amount so determined and shall be entitled to sue the United States to recover such further sum as, added to such 75 per centum, will make up such amount as will be just compensation.

The power and authority granted herein shall cease with the termination of the present war, except the power and authority to care for, sell or rent such property as remains undisposed of.

At the beginning of each session of congress the president shall make to congress a full and detailed report covering all of the transactions with relation to the subject matter of this act.

No work to be done or contract to be made under any provision of this act shall be done or made on or under a percentage or cost-plus percentage basis, nor shall any contract be let involving more than \$1,000 until at least three responsible competing contractors shall have been notified and considered in connection with such contract, and all contracts to be awarded to the lowest responsible bidder, the government reserving the right to reject any and all bids.

The president, if in his judgment such action is deemed necessary or advantageous, may authorize the creation of a corporation or corporations for the purpose of carrying out the act. The total capital stock of the corporation or corporations authorized hereunder shall not exceed \$60,000,000.

For carrying out the provisions of this act and for the administration thereof the sum of \$60,000,000, or so much thereof as may be necessary, is authorized. (Approved May 16, 1918.)

ILLINOIS ANNIVERSARY COIN.

In commemoration of the 100th anniversary of the admission of the state of Illinois into the Union as a state, there shall be coined at the mint of the United States silver 50-cent pieces to the number of 100,000, such 50-cent pieces to be of the standard troy weight, composition, diameter, device and design as shall be fixed by the director of the mint, with the approval of the secretary of the treasury, and shall be legal tender in any payment to the amount of their face value. The government shall not be subject to the expense of making the necessary dies and other preparations for this coinage. (Approved June 1, 1918.)

POSTAGE ON AEROPLANE MAIL.

The postmaster-general, in his discretion, may require the payment of postage on mail carried by aeroplane at not exceeding 24 cents per ounce or fraction thereof. (Approved May 10, 1918.)

UNLAWFUL ENTRY AND DEPARTURE.

When the United States is at war, if the president shall find that the public safety requires that restrictions and prohibitions in addition to those provided otherwise than by this act be imposed upon the departure of persons from and their entry into the United States, and shall make public proclamation thereof, it shall, until otherwise ordered by the president or congress, be unlawful—

(a) For any alien to depart from or enter or attempt to depart from or enter the United States except under such reasonable rules, regulations and orders and subject to such limitations and exceptions as the president shall prescribe;

(b) For any person to transport or attempt to transport from or into the United States another person with knowledge or reasonable cause to believe that the departure or entry of such other person is forbidden by this act;

(c) For any person knowingly to make any false statement in an application for permission to depart from or enter the United States with intent to induce or secure the granting of such permission either for himself or for another;

(d) For any person knowingly to furnish or attempt to furnish or assist in furnishing to another a permit or evidence of permission to depart or enter not issued and designed for such other person's use;

(e) For any person knowingly to use or attempt to use any permit or evidence of permission to depart or enter not issued and designed for his use;

(f) For any person to forge, counterfeit, mutilate or alter, or cause or procure to be forged, counterfeited, mutilated or altered, any permit or evidence of permission to depart from or enter the United States.

(g) For any person knowingly to use or attempt to use or furnish to another for use any false, forged, counterfeit, mutilated or altered permit, or evidence of permission, or any permit or evidence of permission which, though originally valid, has become or been made void or invalid.

Sec. 2. After such proclamation as is provided for by the preceding section has been made and published and while said proclamation is in force, it shall, except as otherwise provided by the president, and subject to such limitations and exceptions as the president may authorize and prescribe, be unlawful for any citizen of the United States to depart from or enter or attempt to depart from or enter the United States unless he bears a valid passport.

Sec. 3. Any person who shall willfully violate any of the provisions of this act, or of any order or proclamation of the president promulgated, or of any permit, rule or regulation issued thereunder, shall, upon conviction, be fined not more than \$10,000, or, if a natural person, imprisoned for not more than twenty years, or both; and the officer, director or agent of any corporation who knowingly participates in such violation shall be punished by like fine or imprisonment, or both, and any vehicle or any ves-

sel, together with its or her appurtenances, equipment, tackle, apparel and furniture, concerned in any such violation, shall be forfeited to the United States.

Sec. 4. The term "United States" as used in this act includes the Canal Zone and all territory and waters, continental or insular, subject to the jurisdiction of the United States.

The word "person" as used herein shall be deemed to mean any individual, partnership, association, company or other unincorporated body of individuals or corporation, or body politic. (Approved May 22, 1918.)

NATURALIZATION OF ALIENS IN MILITARY SERVICE.

Be it enacted, etc., That section 4 of the act entitled "An act to establish a bureau of immigration and naturalization and to provide a uniform rule for the naturalization of aliens throughout the United States," approved June 29, 1906, be and is hereby amended by adding seven new subdivisions as follows:

7. Any native-born Filipino of the age of 21 years and upward who has declared his intention to become a citizen of the United States and who has enlisted or may hereafter enlist in the United States navy or marine corps or the naval auxiliary service, and who, after service of not less than three years, may be honorably discharged therefrom, or who may receive an ordinary discharge with recommendation for re-enlistment; or any alien, or any Porto Rican not a citizen of the United States of the age of 21 years and upward, who has enlisted or entered or may hereafter enlist in or enter the armies of the United States, either the regular or the volunteer forces, or the national army, the national guard or naval militia of any state, territory or the District of Columbia, or the state militia in federal service, or in the United States navy or marine corps, or in the United States coast guard, or who has served for three years on board of any vessel of the United States government, or for three years on board of merchant or fishing vessels of the United States of more than twenty tons burden, and while still in the service on a re-enlistment or re-appointment, or within six months after an honorable discharge or separation therefrom, or while on furlough to the army reserve or regular army reserve after honorable service,

may, on presentation of the required declaration of intention for naturalization without proof of the required five years' residence within the United States if upon examination by the representative of the bureau of naturalization, in accordance with the requirements of this subdivision, it is shown that such residence cannot be established; any alien serving in the military or naval service of the United States during the time this country is engaged in the present war may file his petition for naturalization without making the preliminary declaration of intention and without proof of the required five years' residence within the United States; any alien declarant who has served in the United States army or navy, or the Philippine constabulary, and has been honorably discharged therefrom, and has been accepted for service in either the military or naval service of the United States on the condition that he becomes a citizen of the United States, may file his petition for naturalization upon proof of continuous residence within the United States for the three years immediately preceding his petition, by two witnesses, citizens of the United States, and in these cases only residence in the Philippine islands and the Panama Canal Zone by aliens may be considered residence within the United States, and the place of such military service shall be construed as the place of residence required to be established for purposes of naturalization; and any alien or any person, owing permanent allegiance to the United States, embraced within this subdivision, may file his petition for naturalization

in the most convenient court without proof of residence within its jurisdiction, notwithstanding the limitation upon the jurisdiction of the courts specified in section 3 of the act of June 29, 1906, provided he appears with his two witnesses before the appropriate representative of the bureau of naturalization and passes the preliminary examination hereby required before filing his petition for naturalization in the office of the clerk of the court, and in each case the record of this examination shall be offered in evidence by the representative of the government from the bureau of naturalization and made a part of the record at the original and any subsequent hearings; and, except as otherwise herein provided, the honorable discharge certificate of such alien, or person owing permanent allegiance to the United States, or the certificate of service showing good conduct, signed by a duly authorized officer, or by the masters of said vessels, shall be deemed prima facie evidence to satisfy all of the requirements of residence within the United States and within the state, territory or the District of Columbia, and good moral character required by law, when supported by the affidavits of two witnesses, citizens of the United States, identifying the applicant as the person named in the certificate of honorable discharge, and in those cases only where the alien is actually in the military or naval service of the United States, the certificate of arrival shall not be filed with the petition for naturalization in the manner prescribed; and any petition for naturalization filed under the provisions of this subdivision may be heard immediately, notwithstanding the law prohibits the hearing of a petition for naturalization during thirty days preceding any election in the jurisdiction of the court. Any alien who, at the time of the passage of this act, is in the military service of the United States, who may not be within the jurisdiction of any court authorized to naturalize aliens, may file his petition for naturalization without appearing in person in the office of the clerk of the court, and shall not be required to take the prescribed oath of allegiance in open court. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens of the United States, and who shall prove in their affidavits the portion of the residence that they have personally known the applicant to have resided within the United States. The time of military service may be established by the affidavits of at least two other citizens of the United States, which, together with the oath of allegiance, may be taken in accordance with the terms of section 1750 of the revised statutes of the United States after notice from and under regulations of the bureau of naturalization. Such affidavits and oath of allegiance shall be admitted in evidence in any original or appellate naturalization proceeding without proof of the genuineness of the seal or signature or of the official character of the officer before whom the affidavits and oath of allegiance were taken, and shall be filed by the representative of the government from the bureau of naturalization at the hearing as provided by section 11 of the act of June 29, 1906. Members of the naturalization bureau and service may be designated by the secretary of labor to administer oaths relating to the administration of the naturalization law; and the requirement of section 10 of notice to take depositions to the United States attorneys is repealed, and the duty they perform under section 15 of the act of June 29, 1906 (Thirty-Fourth Statutes at Large, part one, page 596), may also be performed by the commissioner or deputy commissioner of naturalization: Provided, That it shall not be lawful to make a declaration of intention before the clerk of any court on election day or during the period of thirty days preceding the day of holding any election in the jurisdiction of the court. Provided further,

That service by aliens upon vessels other than of American registry, whether continuous or broken, shall not be considered as residence for naturalization purposes within the jurisdiction of the United States, and such aliens cannot secure residence for naturalization purposes during service upon vessels of foreign registry.

During the time when the United States is at war no clerk of a United States court shall charge or collect a naturalization fee from an alien in the military service of the United States for filing his petition or issuing the certificate of naturalization upon admission to citizenship, and no clerk of any state court shall charge or collect any fee for this service unless the laws of the state require such charge to be made, in which case nothing more than the portion of the fee required to be paid to the state shall be charged or collected. A full accounting for all of these transactions shall be made to the bureau of naturalization in the manner provided by section 13 of the act of June 29, 1906.

8. That every seaman, being an alien, shall, after his declaration of intention to become a citizen of the United States, and after he shall have served three years upon such merchant or fishing vessels of the United States, be deemed a citizen of the United States for the purpose of serving on board any such merchant or fishing vessel of the United States, anything to the contrary in any act of congress notwithstanding; but such seaman shall, for all purposes of protection as an American citizen, be deemed such after the filing of his declaration of intention to become such citizen: Provided, That nothing contained in this act shall be taken or construed to repeal or modify any portion of the act approved March 4, 1915 (Thirty-Eighth Statutes at Large, part one, page 1164, chapter 153), being an act to promote the welfare of American seamen.

9. That for the purpose of carrying on the work of the bureau of naturalization of sending the names of the candidates for citizenship to the public schools and otherwise promoting instruction and training in citizenship responsibilities of applicants for naturalization, as provided in this subdivision, authority is hereby given for the reimbursement of the printing and binding appropriation of the department of labor upon the records of the treasury department from the naturalization fees deposited in the treasury through the bureau of naturalization for the cost of publishing the citizenship textbook prepared and to be distributed by the bureau of naturalization to those candidates for citizenship only who are in attendance upon the public schools, such reimbursement to be made upon statements by the commissioner of naturalization of books actually delivered to such student candidates for citizenship, and a monthly naturalization bulletin, and in this duty to secure the aid of and co-operate with the official state and national organizations, including those concerned with vocational education and including personal services in the District of Columbia, and to aid the army exemption board to co-operate with the war department in locating declarants subject to the army draft and expenses incidental thereto.

10. That any person not an alien enemy, who resided uninterruptedly within the United States during the period of five years next preceding July 1, 1914, and was on that date otherwise qualified to become a citizen of the United States, except that he had not made the declaration of intention required by law and who during or prior to that time, because of misinformation regarding his citizenship status erroneously exercised the rights and performed the duties of a citizen of the United States in good faith, may file the petition for naturalization prescribed by law without making the preliminary declaration of intention required of other aliens, and upon satisfactory proof to the court that he has acted may be

admitted as a citizen of the United States upon complying in all respects with the other requirements of the naturalization law.

11. No alien who is a native, citizen, subject or denizen of any country, state or sovereignty with which the United States is at war shall be admitted to become a citizen of the United States unless he made his declaration of intention not less than two nor more than seven years prior to the existence of the state of war, or was at that time entitled to become a citizen of the United States without making a declaration of intention, or unless his petition for naturalization shall then be pending and is otherwise entitled to admission, notwithstanding he shall be an alien enemy at the time and in the manner prescribed by the laws passed upon that subject: Provided, That no alien embraced within this subdivision shall have his petition for naturalization called for a hearing, or heard, except after ninety days' notice given by the clerk of the court to the commissioner or deputy commissioner of naturalization to be present, and a petition shall be given no final hearing except in open court and after such notice to the representative of the government, from the bureau of naturalization, whose objection shall cause the petition to be continued from time to time for so long as the government may require: Provided, however, That nothing herein contained shall be taken or construed to interfere with or prevent the apprehension and removal, agreeably to law, of any alien enemy at any time previous to the actual naturalization of such alien; and section 2171 of the revised statutes of the United States is hereby repealed: Provided further, That the president of the United States may, in his discretion, upon investigation and report by the department of justice fully establishing the loyalty of any alien enemy not included in the foregoing exemption, except such alien enemy from the classification of alien enemy, and thereupon he shall have the privilege of applying for naturalization; and for the purpose of carrying into effect the provisions of this section, including personal services in the District of Columbia the sum of \$400,000 is hereby appropriated, to be available until June 30, 1919, including travel expenses for members of the bureau of naturalization and its field service only, and the provisions of section 3679 of the revised statutes shall not be applicable in any way to this appropriation.

12. That any person who, while a citizen of the United States and during the existing war in Europe, entered the military or naval service of any country at war with a country with which the United States is now at war, who shall be deemed to have lost his citizenship by reason of any oath or obligation taken by him for the purpose of entering such service, may resume his citizenship by taking the oath of allegiance to the United States prescribed by the naturalization law and regulations, and such oath may be taken before any court of the United States or of any state authorized by law to naturalize aliens, or before any consul of the United States, and certified copies thereof shall be sent by such court or consul to the department of state and the bureau of naturalization, and the act (Public 55, Sixty-fifth congress, approved Oct. 5, 1917) is hereby repealed.

13. That any person who is serving in the military or naval forces of the United States at the termination of the existing war, and any person who before the termination of the existing war may have been honorably discharged from the military or naval services of the United States on account of disability incurred in line of duty, shall, if he applies to the proper court for admission as a citizen of the United States, be relieved from the necessity of proving that immediately preceding the date of his application he has resided continuously within the United States the time required by law of other aliens, or within the

state, territory, or the District of Columbia for the year immediately preceding the date of his petition for naturalization; but his petition for naturalization shall be supported by the affidavits of two credible witnesses, citizens of the United States, identifying the petitioner as the person named in the certificate of honorable discharge, which said certificate may be accepted as evidence of good moral character required by law, and he shall comply with the other requirements of the naturalization law.

Sec. 2. That the following provisions of law be, and they are hereby, repealed. Sections 2170 and 2174 of the Revised Statutes of the United States of America and so much of an act approved July 26, 1894, entitled "An act making provisions for the naval service for the fiscal year ending June 30, 1895, and for other purposes," being chapter 165 of the laws of 1894 (Twenty-Eighth Statutes at Large, page 124), reading as follows: "Any alien of the age of 21 years and upward who has enlisted or may enlist in the United States navy or marine corps and has served or may hereafter serve five consecutive years in the United States navy or the enlistment in the United States marine corps and has been or may hereafter be honorably discharged, shall be admitted to become a citizen of the United States upon his petition without any previous declaration of his intention to become such; and the court admitting such alien shall, in addition to proof of good moral character, be satisfied by competent proof of such person's service in and honorable discharge from the United States navy or marine corps"; and so much of an act approved June 30, 1914, entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1915, and for other purposes," being chapter 130 of the laws of 1914 (Thirty-Eighth Statutes at Large, part one, page 392), reading as follows: "Any alien of the age of 21 years and upward who may under existing law become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States navy or marine corps and who has received therefrom an honorable discharge or an ordinary discharge with recommendation for re-enlistment, or who has completed four years in the revenue cutter service and received therefrom an honorable discharge or an ordinary discharge with recommendation for re-enlistment, or who has completed four years of honorable service in the naval auxiliary service, shall be admitted to become a citizen of the United States upon his petition and without any previous declaration of his intention to become such, and without proof of residence on shore, and the court admitting such alien shall, in addition to proof of good moral character, be satisfied by competent proof from naval or revenue cutter sources of such service: Provided, That an honorable discharge from the navy, marine corps, revenue cutter service, or the naval auxiliary service, or an ordinary discharge with recommendation for re-enlistment, shall be accepted as proof of good moral character: Provided further, That any court which now has or may hereafter be given jurisdiction to naturalize aliens as citizens of the United States may immediately naturalize any alien applying under and furnishing the proof prescribed by the foregoing provisions"; and so much of section 3 of an act approved June 25, 1910 (Thirty-Fourth Statutes at Large, part one, page 630), reading as follows: "That paragraph two of section four of an act entitled 'An act to establish a bureau of immigration and naturalization, and to provide for a uniform rule for the naturalization of aliens throughout the United States,' approved June 29, 1906, be amended by adding after the proviso in paragraph two of section four of said act, the following: Provided further, That any person belonging to the class of persons authorized and qualified

under existing law to become a citizen of the United States, who has resided constantly in the United States during a period of five years next preceding May 1, 1910, who, because of misinformation in regard to his citizenship or the requirements of the law governing the naturalization of citizens has labored and acted under the impression that he was or could become a citizen of the United States and has in good faith exercised the rights or duties of a citizen or intended citizen of the United States because of such wrongful information and belief may, upon making a showing of such facts satisfactory to a court having jurisdiction to issue papers of naturalization to an alien, and the court in its judgment believes that such person has been for a period of more than five years entitled upon proper proceedings to be naturalized as a citizen of the United States, receive from the said court a final certificate of naturalization, and said court may issue such certificate without requiring proof of former declaration by or on part of such person of his intention to become a citizen of the United States, but such applicant for naturalization shall comply in all other respects with the law relative to the issuance of final papers of naturalization to aliens.

That all acts or parts of acts inconsistent with or repugnant to the provisions of this act are hereby repealed; but nothing in this act shall repeal or in any way enlarge section 2169 of the Revised Statutes, except as specified in the seventh subdivision of this act and under the limitation therein defined: Provided, That for the purposes of the prosecution of all crimes and offenses against the naturalization laws of the United States which may have been committed prior to this act the statutes and laws hereby repealed shall remain in full force and effect: Provided further, That as to all aliens who prior to Jan. 1, 1900, served in the armies of the United States and were honorably discharged therefrom, section 2166 of the Revised Statutes of the United States shall be and remain in full force and effect, anything in this act to the contrary notwithstanding.

Sec. 3. That all certificates of naturalization granted by courts of competent jurisdiction prior to Dec. 31, 1918, upon petitions for naturalization filed prior to Jan. 31, 1918, upon declarations of intention filed prior to Sept. 27, 1906, are hereby declared to be valid in so far as the declaration of intention is concerned, but shall not be by this act further validated or legalized.

The word "District" in sections four, ten, and twenty-seven of the act which this act amends is hereby amended to read "the District of Columbia." (Approved May 9, 1918.)

LIABILITY TO MILITARY SERVICE.

Resolved, etc., That if under any regulations heretofore or hereafter prescribed by the president persons registered and liable for military service under the terms of the act of congress approved May 18, 1917, entitled "An act to authorize the president to increase temporarily the military establishment of the United States," are placed in classes for the purpose of determining their relative liability for military service, no provision of said act shall prevent the president from calling for immediate military service under regulations heretofore or hereafter prescribed by the president all or part of the persons in any class or classes except those exempt from draft under the provisions of said act, in proportion to the total number of persons placed in such class or classes in the various subdivisions of the states, territories, and the District of Columbia designated by the president under the terms of said act; or from calling into immediate military service persons classed as skilled experts in industry or agriculture, how-

ever-classified or wherever residing. (Approved May 16, 1918.)

REGISTRATION FOR MILITARY SERVICE.

Resolved, etc., That during the present emergency all male persons, citizens of the United States and all male persons residing in the United States, who have, since the fifth day of June, 1917, and on or before the day set for the registration by proclamation by the president, attained the age of twenty-one years, shall be subject to registration in accordance with regulations to be prescribed by the president, and that upon proclamation by the president, stating the time and place of such registration, it shall be the duty of all such persons, except such persons as are exempt from registration under the act of May 18, 1917, and any act or acts amendatory thereof, to present themselves for and submit to registration under the provisions of said act approved May 18, 1917, and they shall be registered in the same manner and subject to the same requirements and liabilities as those previously registered under the terms of said act: Provided, That those persons registered under the provisions of this act shall be placed at the bottom of the list of those liable for military service, in the several classes to which they are assigned, under such rules and regulations as the president may prescribe.

Sec. 2. That after the day set under section 1 hereof for the registration by proclamation by the president at such intervals as the president may from time to time prescribe, the president may require that all male persons, citizens of the United States and all male persons residing in the United States, who have attained the age of twenty-one years since the last preceding date of registration, and on or before the next day set for the registration by proclamation by the president, except such persons as are exempt from registration under the act of May 18, 1917, and any act or acts amendatory thereof, shall be registered in the same manner and subject to the same requirements and liabilities as those previously registered under the terms of said act: Provided, That students who are preparing for the ministry in recognized theological or divinity schools, and students who are preparing for the practice of medicine and surgery in recognized medical schools, at the time of the approval of this act shall be exempt from the selective draft prescribed in the act of May 18, 1917.

Sec. 3. That all such persons when registered shall be liable to military service and to draft under the terms of said act approved May 18, 1917, under such regulations as the president may prescribe not inconsistent with the terms of said act.

Sec. 4. That all such persons shall be subject to the terms and provisions and liabilities of said act approved May 18, 1917, in all respects as if they had been registered under the terms of said act, and every such person shall be deemed to have notice of the requirements of said act and of this joint resolution upon the publication of any such proclamation by the president. (Approved May 20, 1918.)

ESPIONAGE ACT AMENDMENT.

Be it enacted, etc., That section 3 of title I, of the act entitled "An act to punish acts of interference with the foreign relations, the neutrality and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, be, and the same is hereby, amended so as to read as follows:

"Sec. 3. Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operation or success of the military or naval forces of the United States,

or to promote the success of its enemies, or shall willfully make or convey false reports or false statements, or say or do anything except by way of bona fide and not disloyal advice to an investor or investors, with intent to obstruct the sale by the United States of bonds or other securities of the United States or the making of loans by or to the United States, and whoever, when the United States is at war, shall willfully cause, or attempt to cause, or incite or attempt to incite, insubordination, disloyalty, mutiny or refusal of duty, in the military or naval forces of the United States, or shall willfully obstruct or attempt to obstruct the recruiting or enlistment service of the United States, and whoever, when the United States is at war, shall willfully utter, print, write or publish any disloyal, profane, scurrilous or abusive language about the form of government of the United States, or the constitution of the United States, or the military or naval forces of the United States, or the flag of the United States, or the uniform of the army or navy of the United States, or any language intended to bring the form of government of the United States, or the constitution of the United States, or the military or naval forces of the United States or the flag of the United States, or the uniform of the army or navy of the United States into contempt, scorn, contumely or disrepute, or shall willfully utter, print, write or publish any language intended to incite, provoke or encourage resistance to the United States, or to promote the cause of its enemies, or shall willfully display the flag of any foreign enemy, or shall willfully by utterance, writing, printing, publication or language spoken, urge, incite or advocate any curtailment of production in this country of any thing or things, product or products, necessary or essential to the prosecution of the war in which the United States may be engaged, with intent by such curtailment to cripple or hinder the United States in the prosecution of the war, and whoever shall willfully advocate, teach, defend, or suggest the doing of any of the acts or things in this section enumerated, and whoever shall by word or act support or favor the cause of any country with which the United States is at war or by word or act oppose the cause of the United States therein, shall be punished by a fine of not more than \$10,000 or imprisonment for not more than twenty years, or both: Provided, That any employe or official of the United States government who commits any disloyal act or utters any unpatriotic or disloyal language, or who in an abusive and violent manner criticizes the army or navy or the flag of the United States shall be at once dismissed from the service. Any such employe shall be dismissed by the head of the department in which the employe may be engaged and any such official shall be dismissed by the authority having power to appoint a successor to the dismissed official."

Sec. 2. That section 1 of title XII, and all other provisions of the act entitled "An act to punish acts of interference with the foreign relations, the neutrality and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes," approved June 15, 1917, which apply to section 3 of title I, thereof shall apply with equal force and effect to said section 3 as amended.

Title XII, of the said act of June 15, 1917, be, and the same is hereby, amended by adding thereto the following section:

"Sec. 4. When the United States is at war, the postmaster-general may, upon evidence satisfactory to him that any person or concern is using the mails in violation of any of the provisions of the act, instruct the postmaster at any postoffice at which mail is received addressed to such person or concern to return to the postmaster at the office at

which they were originally mailed all letters or other matter so addressed, with the words 'Mail to this address undeliverable under espionage act' plainly written or stamped upon the outside thereof, and all such letters or other matter so returned to such postmasters shall be by them returned to the senders thereof under such regulations as the postmaster-general may prescribe." (Approved May 16, 1918.)

CONSOLIDATION OF BUREAUS.

For the national security and defense, for the successful prosecution of the war, for the support and maintenance of the army and navy, for the better utilization of resources and industries, and for the more effective exercise and more efficient administration by the president of his powers as commander in chief of the land and naval forces, the president is hereby authorized to make such redistribution of functions among executive agencies as he may deem necessary including any functions, duties, and powers hitherto by law conferred upon any executive department, commission, bureau, agency, office or officer, in such manner as in his judgment shall seem best fitted to carry out the purposes of this act, and to this end is authorized to make such regulations and to issue such orders as he may deem necessary, which regulations and orders shall be in writing and shall be filed with the head of the department affected and constitute a public record. This act shall remain in force during the continuance of the present war and for six months after the termination of the war by the proclamation of the treaty of peace, or at such earlier time as the president may designate. The authority by this act granted shall be exercised only in matters relating to the conduct of the present war.

In carrying out the purposes of this act the president is authorized to utilize, co-ordinate or consolidate any executive or administrative commissions, bureaus, agencies, offices or officers now existing by law, to transfer any duties or powers from one existing department, commission, bureau, agency, office or officer to another, to transfer the personnel thereof or any part of it either by detail or assignment, together with the whole or any part of the records and public property belonging thereto.

Aircraft Agency.

The president is further authorized to establish an executive agency which may exercise such jurisdiction and control over the production of aeroplanes, aeroplane engines, and aircraft equipment as in his judgment may be advantageous; and, further, to transfer to such agency, for its use, all or any moneys heretofore appropriated for the production of aeroplanes, aeroplane engines and aircraft equipment.

For the purpose of carrying out the provisions of this act, any moneys heretofore and hereafter appropriated for the use of any executive department, commission, bureau, agency, office or officer shall be expended only for the purposes for which it was appropriated under the director of such other agency as may be directed by the president hereunder to perform and execute said function.

Should the president, in redistributing the functions among the executive agencies as provided in this act, conclude that any bureau should be abolished and its duties and functions conferred upon some other department or bureau or eliminated entirely, he shall report his conclusions to congress with such recommendations as he may deem proper.

Upon the termination of this act all executive or administrative agencies, departments, commissions, bureaus, offices or officers shall exercise the same functions, duties, and powers as heretofore or as hereafter by law may be provided, any authorization of the president under this act to the contrary notwithstanding. (Approved May 30, 1918.)

PROHIBITION IN HAWAII.

Ninety days after the passage of this act, during the period of the war and thereafter, except as herein provided, it shall be unlawful in the territory of Hawaii to sell, give away, manufacture, transport, import or export intoxicating liquors, except for mechanical, scientific, sacramental or medical purposes, for which purposes the sale, gift, transport, import and export of the same shall be under such rules and regulations as the governor of the territory may prescribe, and any person violating the provisions hereof shall be fined in a sum not exceeding \$500 or imprisoned for a period of not longer than one year, or both. At any general election of the territory of Hawaii, held within two years after the conclusion of peace, the repeal of this act may, upon petition of not less than 20 per centum of the qualified electors of the territory at the last preceding general election, be submitted to a vote of the qualified electors of the territory, and if a majority of all the qualified electors voting upon such question shall vote to repeal this act, it shall thereafter not be in force and effect; otherwise it shall be in full force and effect.

The said petition shall be addressed to and filed with the secretary of the territory at least two months before the election at which the question is to be voted upon, and the person obtaining any signature to such petition shall make affidavit that he witnessed the signing of the same and believes the address of each petitioner affixed to his name is the true address of such petitioner. Such election shall be conducted under the laws of the territory provided for general elections. (Approved May 23, 1918.)

NUMBER OF ARMY CHAPLAINS.

The president is authorized to appoint, by and with the advice and consent of the senate, chaplains in the army at the rate of not to exceed, including chaplains now in the service, one for each 1,200 officers and men in all branches of the military establishment, with rank, pay and allowance as now authorized by law. There shall be assigned at least one chaplain for each regiment of cavalry, infantry, field artillery and engineers. The persons appointed under this act shall be duly accredited by some religious denomination or organization and of good standing therein, under such regulations as may be prescribed by the secretary of war. No person shall be appointed chaplain in the army who on the date of appointment is more than 45 years of age. (Approved May 25, 1918.)

SALE OF WAR MATERIALS.

During the existing emergency the president is authorized, in his discretion, and upon such terms as he shall deem expedient, through the head of any executive department, to sell any supplies, materials, equipment or other property heretofore or hereafter purchased, acquired or manufactured by the United States in connection with or incidental to the prosecution of the war, to any person, partnership, association or corporation, or to any foreign state or government engaged in war against any government with which the United States is at war; and any moneys received by the United States as the proceeds of any such sale shall be covered into the treasury of the United States and a full report of the same shall be forthwith submitted to congress. (Approved May 10, 1918.)

AGE OF NAVAL CADETS.

Hereafter all candidates for admission to the naval academy must be not less than 16 years of age nor more than 20 years of age on April 1 of the calendar year in which they enter the academy: Provided, That the foregoing shall not apply to candidates for midshipmen designated for entrance to the academy in 1918. (Approved May 14, 1918.)

BANKS MAY CONTRIBUTE TO RED CROSS.

During the continuance of the state of war now existing it shall be lawful for any national banking association to contribute to the American National Red Cross out of any net profits otherwise available under the law for the declaration of dividends such sum or sums as the directors of said association shall deem expedient. Each association shall report to the comptroller of the currency within ten days after the making of any such contribution the amount of such contribution and the amount of net earnings in excess of such contribution. Such report shall be attested by the president or cashier of the association in like manner as the report of the declaration of any dividend.

All sums so contributed shall be utilized by the American National Red Cross in furnishing volunteer aid to the sick and wounded of the combatant armies, the voluntary relief of the army and navy of the United States, and the relief and mitigation of the suffering caused by the war to the people of the United States and their allied nations. (Approved May 22, 1918.)

REQUISITIONING OF VESSELS.

The president may exercise the power and authority hereby vested in him through such agency or agencies as he shall determine from time to time.

All power and authority hereby vested in the president and all restrictions imposed in this act shall cease upon the proclamation of the final treaty of peace between the United States and the imperial German government: Provided, That if, in the judgment of the president, the tonnage shortage at such time is so severe that national interests of the United States are jeopardized, he may, by proclamation, extend the provisions of this act for a further period of not exceeding six months.

The president may, by proclamation, require that vessels of the United States of any specified class or description, or in any specified trade or trades, shall not be chartered unless the instrument in which such charter is embodied, and the rates, terms and conditions thereof are first approved by him. Whenever any vessel is comprised in any such proclamation it shall be unlawful to make any charter thereof without first obtaining the approval thereof by the president.

The president shall have power to determine and enforce reasonable freight rates and conditions which shall govern the transportation of goods on vessels of the United States, which shall be filed with the United States shipping board and open to public inspection. It shall be unlawful to charge or collect any compensation for the transportation of goods on any such vessel, not in accordance with the rates, terms and conditions prescribed.

The president shall have power to prescribe the order of priority in which goods shall be carried or other services performed by any vessel of the United States and to specify goods which shall be carried or to direct the voyage or employment of any such vessel and to make such rules, regulations, and orders, with respect to any such vessel, relating to the loading, discharging, lighterage or storage of goods, or the procurement of bunker fuel, or any other matter as may in his judgment be necessary and proper for the efficient utilization of transportation facilities and the effective conduct of the war.

The president may by proclamation extend the above provisions to any vessel of foreign nationality under charter to a citizen of the United States or other person subject to the jurisdiction thereof.

The president shall have power to make such rules, regulations and orders regarding voyages, courses, the use of protective devices and any other matters affecting the navigation, equipment, fueling, painting or

arming of vessels of the United States as may, in his judgment, be conducive to the protection of such vessels from submarines, mines or other war perils, any expense so incurred to be allowed for in determining freight and charter rates under this act. If in his judgment any vessel or class of vessels on account of size, speed, structure, method of propulsion or for any other reason is unfit for service in any waters which he may declare to be a danger zone, he may, by order, exclude such vessel or vessels from such danger zone. It shall be unlawful to violate any order, rule or regulation made under this section. Rules, regulations or orders issued under this section may, in the discretion of the president, be issued confidentially, in which event they shall be binding only on such persons as have notice thereof.

The president may by proclamation require that no citizen of the United States, or other person subject to the jurisdiction thereof, shall charter any vessel of foreign nationality unless the instrument in which such charter is embodied and the rates, terms and conditions thereof are first approved by the president.

The president shall have power to requisition for military purposes, or for any other national purpose connected with or arising out of the present war, the temporary possession of any vessel, or, without taking actual possession, to requisition the services of any vessel and to require the person entitled to the possession thereof to issue to the master such instructions as may be necessary to place the vessel at the service of the United States.

Upon requisitioning such possession or services the president shall transmit to the person entitled to the possession of such vessel a charter setting forth the terms which, in his judgment, should govern the relations between the United States and such person and a statement of the rental or rate of hire which, in his judgment, will be just compensation for the use of such vessel and for the services required under the terms of such charter. If such person does not execute and deliver such charter and accept such rental or rate of hire, the president shall pay to such person a sum equal to 75 per cent of such rental or rate of hire and such person shall be entitled to sue the United States to recover such further sum as added to such 75 per cent will make up such amount as will be just compensation for the use of the vessel and for the services required.

The president shall have power to prescribe the order of priority in which persons in possession of drydocks, wharves, lighterage systems or loading or discharging terminal facilities in any port of the United States, or warehouses, equipment or terminal railways connected therewith, shall serve vessels and shippers, and to determine and enforce the rates, terms and conditions charged or required for the furnishing of such services, including stevedoring and handling of cargo, and the handling, dispatching and bunkering of vessels, and to make such rules and regulations with respect to the conduct of any such business as may be necessary and proper.

The president shall have power to lease or requisition the use or temporary possession of, or to assume temporary control of, any drydocks, wharves or loading or discharging terminal facilities, in any port of the United States, or warehouses, equipment or terminal railways connected therewith.

Whenever the president requisitions or assumes control of any such property the United States shall pay just compensation therefor, to be determined by the president.

Nothing in this section shall authorize the president to requisition the title to any such property owned by any state, municipality or subdivision thereof.

All vessels of which the possession or services are requisitioned under this act, and all

drydocks, wharves, loading or discharging terminal facilities, warehouses, equipment or terminal railways, of which the president may acquire the title, or possession or of which he may assume control under this act, may be operated and managed as the president may from time to time direct. The net proceeds derived from any activity authorized in this act shall be deposited in the treasury in a separate and distinct fund and may be expended by the president in carrying out the purposes of this act, and within the limits of the amounts heretofore or hereafter authorized, for the construction, requisitioning or purchasing of vessels; Provided, That none of the provisions of this act shall apply to vessels plying exclusively on the inland rivers and canals of the United States.

Whoever does or attempts to do anything in this act declared to be unlawful, or willfully violates any rule, regulation or order issued under authority conferred herein, shall be punished by a fine of not more than \$5,000 or by imprisonment for not more than two years, or both. (Approved July 18, 1918.)

FOURTH LIBERTY BOND ACT.

Section 1 of the second liberty bond act, as amended by the third liberty bond act, is hereby further amended by striking out the figures "\$12,000,000,000" and inserting in lieu thereof the figures "\$20,000,000,000."

Section 2 of the second liberty bond act, as amended by the third liberty bond act, is hereby further amended by striking out the figures "\$5,500,000,000" and inserting in lieu thereof the figures "\$7,000,000,000."

Notwithstanding the provisions of the second liberty bond act, as amended by the third liberty bond act, or of the War Finance corporation act, bonds and certificates of indebtedness of the United States payable in any foreign money or foreign moneys, and bonds of the War Finance corporation payable in any foreign money or foreign moneys exclusively or in the alternative, shall, if and to the extent expressed in such bonds at the time of their issue, with the approval of the secretary of the treasury, while beneficially owned by a nonresident alien individual, or by a foreign partnership, or by a foreign corporation, partnership or association, not engaged in business in the United States, be exempt both as to principal and interest from any and all taxation now or hereafter imposed by the United States, any state or any of the possessions of the United States, or by any local taxing authority.

Any incorporated bank or trust company designated as a depository by the secretary of the treasury under the authority conferred by section 8 of the second liberty bond act, as amended by the third liberty bond act, which gives security for such deposits as, and to amounts, by him prescribed, may, upon and subject to such terms and conditions as the secretary of the treasury may prescribe, act as a fiscal agent of the United States in connection with the operations of selling and delivering any bonds, certificates of indebtedness or war savings certificates of the United States. The short title of this act shall be "Fourth liberty bond act." (Approved July 9, 1918.)

VOCATIONAL REHABILITATION ACT.

This act shall be known as the "Vocational rehabilitation act." The word "board" shall mean the "federal board for vocational education"; the word "bureau" shall mean the "bureau of war-risk insurance."

Every person who is disabled under circumstances entitling him, after discharge from the military or naval forces of the United States, to compensation under article III. of the act entitled "An act to amend an act entitled 'An act to authorize the establishment of a bureau of war-risk insurance in the treasury department,'" approved Oct. 6, 1917,

hereinafter referred to as "said act," and who, after his discharge, in the opinion of the board, is unable to carry on a gainful occupation, to resume his former occupation or to enter upon some other occupation or having resumed or entered upon such occupation is unable to continue the same successfully, shall be furnished by the said board, where vocational rehabilitation is feasible, such course of vocational rehabilitation as the board shall prescribe and provide.

The board shall have power, and it shall be its duty, to furnish the persons included in this section suitable courses of vocational rehabilitation to be prescribed and provided by the board, and every person electing to follow such a course of vocational rehabilitation shall, while following the same, receive monthly compensation equal to the amount of his monthly pay for the last month of his active service, or equal to the amount to which he would be entitled under article III. of said act, whichever amount is the greater. If such person was an enlisted man at the time of his discharge, for the period during which he is so afforded a course of rehabilitation, his family shall receive compulsory allotment and family allowance according to the terms of article II. of said act in the same manner as if he were an enlisted man, and for the purpose of computing and paying compulsory allotment and family allowance his compensation shall be treated as his monthly pay. Provided, That if such person willfully fails or refuses to follow the prescribed course of vocational rehabilitation which he has elected to follow, in a manner satisfactory to the board, the said board in its discretion may certify to that effect to the bureau and the said bureau shall, during such period of failure or refusal, withhold any part or all of the monthly compensation due such person and not subject to compulsory allotment which the said board may have determined should be withheld: Provided, however, That no vocational teaching shall be carried on in any hospital until the medical authorities certify that the condition of the patient is such as to justify such teaching.

The military and naval family allowance appropriation provided for in section 18 of said act shall be available for the payment of the family allowances provided by this section, and the military and naval compensation appropriation provided for in section 19 of said act shall be available for the payment of the monthly compensation herein provided. No compensation under article III. of said act shall be paid for the period during which any such person is furnished by said board a course of vocational rehabilitation except as is hereinbefore provided.

The courses of vocational rehabilitation provided for under this act shall, as far as practicable and under such conditions as the board may prescribe, be made available without cost for instruction for the benefit of any person who is disabled under circumstances entitling him, after discharge from the military or naval forces of the United States, to compensation under article III. of said act and who is not included in section 2 hereof.

The board shall have the power and it shall be its duty, to provide such facilities, instructors and courses as may be necessary to insure proper training for such persons as are required to follow such courses as herein provided; to prescribe the courses to be followed by such persons; to pay, when in the discretion of the board such payment is necessary, the expense of travel, lodging, subsistence and other necessary expenses of such persons while following the prescribed courses; to do all things necessary to insure vocational rehabilitation; to provide for the placement of rehabilitated persons in suitable or gainful occupations. The board shall have the power to make such rules and regulations as may be necessary for the proper performance of its

duties as prescribed by this act, and is hereby authorized and directed to utilize, with the approval of the secretary of labor, the facilities of the department of labor, in so far as may be practicable, in the placement of rehabilitated persons in suitable or gainful occupations.

It shall also be the duty of the board to make or cause to have made studies, investigation and reports regarding the vocational rehabilitation of disabled persons and their placement in suitable or gainful occupations. When the board deems it advisable, such studies, investigations and reports may be made in co-operation with or through other departments and bureaus of the government, and the board in its discretion may co-operate with such public or private agencies as it may deem advisable in performing the duties imposed upon it by this act.

All medical and surgical work or other treatment necessary to give functional and mental restoration to disabled persons prior to their discharge from the military or naval forces of the United States shall be under the control of the war department and the navy department, respectively. Whenever training is employed as a therapeutic measure by the war department or the navy department a plan may be established between these agencies and the board acting in an advisory capacity to insure, in so far as medical requirements permit, a proper process of training and the proper preparation of instructors for such training. A plan may also be established between the war and navy departments and the board whereby these departments shall act in an advisory capacity with the board in the care of the health of the soldier and sailor after his discharge.

The board shall, in establishing its plans and rules and regulations for vocational training, co-operate with the war department and the navy department in so far as may be necessary to effect a continuous process of vocational training.

The board is hereby authorized and empowered to receive such gifts and donations from either public or private sources as may be offered unconditionally. All moneys received as gifts or donations shall be paid into the treasury of the United States, and shall constitute a permanent fund, to be called the "special fund for vocational rehabilitation," to be used under the direction of the board, in connection with the appropriations hereby made or hereafter to be made, to defray the expenses of providing and maintaining courses of vocational rehabilitation.

There is hereby appropriated, available immediately and until expended, the sum of \$2,000,000 or so much thereof as may be necessary, to be used by the federal board for vocational education for the purposes of this act, to wit, for renting and remodeling buildings and quarters, repairing, maintaining and equipping same, and for equipment and other facilities necessary for proper instruction of disabled persons, \$250,000; for the preparation of instructors and salaries of instructors, supervisors and other experts, including necessary traveling expenses, \$545,000; for traveling expenses of disabled persons in connection with training and for lodging, subsistence and other necessary expenses in special cases of persons following prescribed courses, \$250,000; for tuition for disabled persons pursuing courses in existing institutions, public or private, \$545,000; for the placement and supervision after placement of vocationally rehabilitated persons, \$45,000; for studies, investigations, reports and preparation of special courses of instruction, \$55,000; for miscellaneous contingencies, including special mechanical appliances necessary in special cases for disabled men, \$110,000, and for the administrative expenses of said board incident to performing the duties imposed by this act, including salaries of such assistants,

experts, clerks and other employes in the District of Columbia or elsewhere as the board may deem necessary, actual traveling and other necessary expenses incurred by the members of the board and by its employes under its orders, including attendance at meetings of educational associations and other organizations, rent and equipment of offices in the District of Columbia and elsewhere, purchase of books of reference, law books and periodicals, stationery, typewriters and exchange thereof, miscellaneous supplies, postage on foreign mail, printing and binding to be done at the government printing office, and all other necessary expenses, \$200,000.

The board shall file with the clerk of the house and the secretary of the senate on July 1 and every three months thereafter, for the information of the congress, an itemized account of all expenditures made under this act, including names and salaries of employes. The board shall also make an annual report to the congress of its doings under this act on or before Dec. 1 of each year.

No person of draft age physically fit for military service shall be exempted from such service on account of being employed under the terms of this act. (Approved June 27, 1918.)

SPANISH WAR PENSIONS.

From and after the passage of this act if any volunteer officer or enlisted man who served ninety days or more in the army, navy or marine corps of the United States, during the war with Spain or the Philippine insurrection, between April 21, 1898, and July 4, 1902, inclusive, service to be computed from date of enlistment to date of discharge, or any officer or enlisted man of the regular establishment who rendered ninety days' or more actual military or naval service in the United States army, navy or marine corps in the war with Spain or the Philippine insurrection, or as a participant in the Chinese boxer rebellion campaign between June 16, 1900, and Oct. 1, 1900, and who has been honorably discharged therefrom, has died or shall hereafter die leaving a widow without means of support other than her daily labor and an actual net income not exceeding \$250 per year, or leaving a minor child or children under the age of 16 years, such widow shall upon due proof of her husband's death, without proving his death to be the result of his army or navy service, be placed on the pension roll from the date of the filing of her application therefor under this act, at the rate of \$12 per month during her widowhood, and shall also be paid \$2 per month for each child of such officer or enlisted man under 16 years of age, and in case of the death or remarriage of the widow, leaving a child or children of such officer or enlisted man under the age of 16 years, such pension shall be paid such child or children until the age of 16: Provided, That in case a minor child is insane, idiotic or otherwise permanently helpless the pension shall continue during the life of said child, or during the period of such disability, and shall commence from the date of application therefor after the passage of this act: Provided further, That said widow shall have married said officer or enlisted man previous to the passage of this act.

GERMAN-AMERICAN ALLIANCE.

The act approved Feb. 25, 1907, entitled "An act to incorporate the National German-American alliance" is hereby repealed. (Approved July 30, 1918.)

NOBEL PRIZE RETURNED TO ROOSEVELT.

The resolution recites that in compliance with the desire of Theodore Roosevelt congress in 1907 passed an act to establish the "Foundation for the Promotion of Industrial Peace" with power to accept from him the money gift carried as a part of the Nobel

peace prize awarded to him in 1906. The committee appointed under the act having found it impracticable to dispose of the money in accordance with the provisions of the act is therefore authorized to return the money, principal and interest, represented in the Nobel peace prize, to Theodore Roosevelt. (Approved July 12, 1918.)

GOVERNMENT TELEGRAPH CONTROL.

The president during the continuance of the present war is authorized and empowered, whenever he shall deem it necessary for the national security or defense, to supervise or to take possession and assume control of any telegraph, telephone, marine cable or radio system or systems, or any part thereof, and to operate the same in such manner as may be needful or desirable for the duration of the war, which supervision, possession, control or operation shall not extend beyond the date of the proclamation by the president of the exchange of ratifications of the treaty of peace: Provided, That just compensation shall be made for such supervision, possession, control or operation, to be determined by the president, and if the amount thereof, so determined by the president, is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the president and shall be entitled to sue the United States to recover such further sum as added to 75 per cent will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the judicial code: Provided further, That nothing in this act shall be construed to amend, repeal, impair or affect existing laws or powers of the states in relation to taxation or the lawful police regulations of the several states, except wherein such laws, powers or regulations may affect the transmission of government communications or the issue of stocks and bonds by such system or systems. (Approved July 16, 1918.)

CHANGES IN DRAFT AGE.

Be it enacted, etc., that the second sentence of section 2 of the act entitled "An act to authorize the president to increase temporarily the military establishment of the United States," approved May 18, 1917, as amended, be, and is hereby, amended to read as follows:

Such draft as herein provided shall be based upon liability to military service of all male citizens and male persons residing in the United States, not alien enemies, who have declared their intention to become citizens, between the ages of 18 and 45, both inclusive, and shall take place and be maintained under such regulations as the president may prescribe not inconsistent with the terms of this act: Provided, That the president may draft such persons liable to military service in such sequence of ages and at such time or times as he may prescribe: Provided further, That a citizen or subject of a country neutral in the present war who has declared his intention to become a citizen of the United States shall be relieved from liability to military service upon his making a declaration, in accordance with such regulations as the president may prescribe, withdrawing his intention to become a citizen of the United States, which shall operate and be held to cancel his declaration of intention to become an American citizen, and he shall forever be debarred from becoming a citizen of the United States.

Sec. 2. That the provision wherever occurring in section 4 of said act, "persons engaged in industries, including agriculture, found to be necessary to the maintenance of the military establishment or the effective operation of the military forces or the maintenance of national interest during emergency," be, and is hereby, amended to read as follows:

"Persons engaged in industries, occupations of

employments, including agriculture, found to be necessary to the maintenance of the military establishment or the effective operation of the military forces or the maintenance of national interest during the emergency."

Sec. 3. That section 5 of said act be, and is hereby, amended to read as follows:

"That all male persons between the ages of 18 to 45, both inclusive, shall be subject to registration in accordance with regulations to be prescribed by the president, and, upon proclamation by the president or other public notice given by him or by his direction stating the time or times and place or places of any such registration, it shall be the duty of all persons of the designated ages, except officers and enlisted men of the regular army; officers and enlisted men of the national guard while in the service of the United States; officers of the officers' reserve corps and enlisted men in the enlisted reserve corps while in the service of the United States; officers and enlisted men of the navy and marine corps; officers and enlisted and enrolled men of the naval reserve force and marine corps reserve while in the service of the United States; officers commissioned in the army of the United States under the provisions of this act; persons who, prior to any day set for registration by the president hereunder, have registered under the terms of this act or under the terms of the resolution entitled 'Joint resolution providing for the registration for military service of all male persons citizens of the United States and all male persons residing in the United States who have, since the 5th day of June, 1917, and on or before the day set for the registration by proclamation by the president, attained the age of 21 years, in accordance with such rules and regulations as the president may prescribe under the terms of the act approved May 18, 1917, entitled "An act to authorize the president to increase temporarily the military establishment of the United States," approved May 20, 1918, whether called for service or not, and diplomatic representatives, technical attaches of foreign embassies and legations, consuls-general, consuls, vice-consuls and consular agents of foreign countries, residing in the United States, who are not citizens of the United States, to present themselves for and submit to registration under the provisions of this act, and every such person shall be deemed to have notice of the requirements of this act upon the publication of any such proclamation or any such other public notice as aforesaid given by the president or by his direction, and any person who shall willfully fail or refuse to present himself for registration, or to submit thereto as herein provided shall be guilty of a misdemeanor and shall, upon conviction in a District court of the United States having jurisdiction thereof, be punished by imprisonment for not more than one year and shall thereupon be duly registered: Provided, That in the call of the docket precedence shall be given, in courts trying the same, to the trial of criminal proceedings under this act: Provided further, That persons shall be subject to registration as herein provided who shall have attained their 18th birthday and who shall not have attained their 46th birthday on or before the day set for the registration in any such proclamation by the president or any such other public notice given by him or by his direction, and all persons so registered shall be and remain subject to draft into the forces hereby authorized, unless exempted or excused therefrom as in this act provided: Provided further, That the president may at such intervals as he may desire from time to time require all male persons who have attained the age of 18 years since the last preceding date of registration and on or before the next date set for registration by proclamation by the president, except such persons as are exempt from registration hereunder, to register in the same manner and subject to the same requirements and liabilities as those previously registered under the terms hereof: And

provided further, That in the case of temporary absence from actual place of legal residence of any person liable to registration as provided herein, such registration may be made by mail under regulations to be prescribed by the president: And provided further, That men registered under the provisions of this act who have served in the navy of the United States shall, upon their own application, be permitted to enlist in the naval or marine service of the United States with and by the approval of the secretary of the navy."

Sec. 4. That all men rendered available for induction into the military service of the United States through registration or draft heretofore or hereafter made pursuant to law, shall be liable to service in the army or the navy or the marine corps, and shall be allotted to the army, the navy or the marine corps under regulations to be prescribed by the president: Provided, That all persons drafted and allotted to the navy or the marine corps in pursuance hereof shall, from the date of allotment, be subject to the laws and regulations governing the navy and the marine corps, respectively.

Sec. 5. That the wife of a soldier or sailor serving in the present war shall not be disqualified for any position or appointment under the government because she is a married woman.

Sec. 6. That soldiers, during the present emergency, regardless of age and existing law and regulations, shall be eligible to receive commissions in the army of the United States. They shall likewise be eligible to admission to officers' schools under such rules and regulations as may be adopted for entrance to such schools, but shall not be barred therefrom or discriminated against on account of age.

Sec. 7. That the secretary of war is authorized to assign to educational institutions, for special and technical training, soldiers who enter the military service under the provisions of this act in such numbers and under such regulations as he may prescribe, and is authorized to contract with such educational institutions for the subsistence, quarters and military and academic instruction of such soldiers.

Sec. 8. That any person, under the age of 21, who has served or shall hereafter serve in the army of the United States during the present emergency, shall be entitled to the same rights under the homestead and other land and mineral entry laws, general or special, as those over 21 years of age now possess under said laws: Provided, That any requirements as to establishment of residence within a limited time shall be suspended as to entry by such person until six months after his discharge from military service: Provided further, That applications for entry may be verified before any officer in the United States, or any foreign country, authorized to administer oaths by the laws of the state or territory in which the land may be situated.

Sec. 9. That hereafter, uniforms, accouterments and equipment shall, upon the request of any officer of the army or cadet at the military academy, be furnished by the government at cost, subject to such restrictions and regulations as the secretary of war may prescribe. (Approved Aug. 31, 1918.)

WAR-RISK INSURANCE LAW AMENDED.

Be it enacted, etc., that the second subdivision (4) of section 22 of the act entitled "An act to authorize the establishment of a bureau of war-risk insurance in the treasury department," approved Sept. 2, 1914, as amended, relating to the definition of the term "parent," is hereby amended to read as follows:

"(4) The term 'parent' includes a father, mother, grandfather, grandmother, father through adoption, mother through adoption, stepfather and stepmother, either of the person in the service or of the spouse."

Sec. 2. That four new sections are hereby added to article I. of said act, to be known as

sections 27, 28, 29 and 30, respectively, and to read as follows:

"Sec. 27. That whoever shall obtain or receive any money, check, allotment, family allowance, compensation or insurance under articles II., III. or IV. of this act, without being entitled thereto, with intent to defraud the United States, or any person in the military or naval forces of the United States, shall be punished by a fine of not more than \$2,000, or by imprisonment for not more than one year, or both.

"Sec. 28. That the allotments and family allowances, compensation and insurance payable under articles II., III. and IV., respectively, shall not be assignable; shall not be subject to the claims of creditors of any person to whom an award is made under articles II., III. or IV., and shall be exempt from all taxation: Provided, That such allotments and family allowances, compensation and insurance shall be subject to any claims which the United States may have, under articles II., III. and IV., against the person on whose account the allotments and family allowances, compensation or insurance are payable.

"Sec. 29. That the discharge or dismissal of any person from the military or naval forces on the ground that he is an enemy alien, conscientious objector or a deserter, or as guilty of mutiny, treason, spying or any offense involving moral turpitude or willful and persistent misconduct, shall terminate any insurance granted on the life of such person under the provisions of article IV. and shall bar all rights to any compensation under article III. or any insurance under article IV.

"Sec. 30. That this act may be cited as the war-risk insurance act."

Sec. 3. That section 200 of said act is hereby amended to read as follows:

"Sec. 200. That the provisions of this article shall apply to all enlisted men in the military or naval forces of the United States, except the Philippine scouts, the insular force of the navy and the Samoan native guard and band of the navy."

Sec. 4. That the second and third paragraphs of section 201 of said act are hereby amended to read as follows:

"The monthly compulsory allotment shall be \$15. For a wife living separate and apart from her husband under court order or written agreement, or for a former wife divorced, the monthly compulsory allotment shall not exceed the amount specified in the court order, decree or written agreement to be paid to her, and for an illegitimate child, to whose support the father has been judicially ordered or decreed to contribute, it shall not exceed the amount fixed in the order or decree.

"If there is a compulsory allotment for a wife or child, then a former wife divorced who has not remarried and to whom alimony has been decreed shall not be entitled to a compulsory allotment, but shall be entitled to a family allowance as hereinafter provided."

Sec. 5. That section 203 of said act is hereby amended to read as follows:

"Sec. 203. That in case one-half of an enlisted man's monthly pay is not allotted, regulations to be made by the secretary of war and the secretary of the navy, respectively, may require, under such circumstances and conditions as may be prescribed in such regulations, that any proportion of such one-half pay as is not allotted shall be deposited to his credit, to be held during such period of his service as may be prescribed. Such deposit shall bear interest at the same rate as United States bonds bear for the same period, and, when payable, shall be paid, principal and interest, to the enlisted man, if living, otherwise to any beneficiary or beneficiaries he may have designated, or if there be no such beneficiary, then to the person or persons who, under the laws of the state of his residence, would be entitled to his personal property in case of intestacy."

Sec. 6. That the third and fourth para-

graphs of section 204 of said act are hereby amended to read as follows:

"Class A. In the case of a man to his wife (including a former wife divorced) and to his child or children—

"(a) If there is a wife but no child, \$15;

"(b) If there is a wife and one child, \$25;

"(c) If there is a wife and two children, \$32.50, with \$5 per month additional for each additional child;

"(d) If there is no wife, but one child, \$5;

"(e) If there is no wife, but two children, \$12.50;

"(f) If there is no wife, but three children, \$20;

"(g) If there is no wife, but four children, \$30, with \$5 per month additional for each additional child;

"(h) If there is a former wife divorced who has not remarried and to whom alimony has been decreed, \$15.

"Class B. In the case of a man or woman to a grandchild, a parent, brother or sister—

"(a) If there is one parent, \$10;

"(b) If there are two parents, \$20;

"(c) If there is a grandchild, brother, sister or additional parent, \$5 for each.

"In the case of a woman, the family allowances for a husband and children shall be in the same amounts, respectively, as are payable, in the case of a man, to a wife and children, provided she makes a voluntary allotment of \$15 as a basis therefor, and provided further that dependency exists as required in section 206."

Sec. 7. That section 206 of said act is hereby amended to read as follows:

"Sec. 206. That family allowances to members of class B shall be paid only if and while the members are dependents in whole or in part on the enlisted man, and then only if and while the enlisted man makes a monthly allotment of his pay for such members in the following amounts:

"(a) If an enlisted man is not making a compulsory allotment for class A the allotment for class B required as a condition to the family allowance shall be \$15.

"(b) If an enlisted man is making a compulsory allotment for class A the additional allotment for class B required as a condition to the family allowance shall be \$5 or if a woman is making an allotment of \$15 for a dependent husband or child the additional allotment for the other members of class B required as a condition to the family allowance shall be \$5."

Sec. 8. That section 210 of said act is hereby amended to read as follows:

"Sec. 210. That upon receipt of any application for family allowance, the commissioner shall make all proper investigations and shall make an award, on the basis of which award the amount of the allotments to be made by the man shall be certified to the war department or navy department, as may be proper. Whenever the commissioner shall have reason to believe that an allowance has been improperly made or that the conditions have changed, he shall investigate or reinvestigate and may modify the award. The amount of each monthly allotment and allowance shall be determined according to the family conditions existing on the first day of the month."

Sec. 9. That sections 4, 6, 7 and 8 of this act shall take effect on the 1st day of July, 1918.

Sec. 10. That section 300 of said act is hereby amended to read as follows:

"Sec. 300. That for death or disability resulting from personal injury suffered or disease contracted in the line of duty, by any commissioned officer or enlisted man or by any member of the army nurse corps (female) or of the navy nurse corps (female) when employed in the active service under the war department or navy department, the United States shall pay compensation as hereinafter provided; but no compensation shall be paid if the injury or disease has been caused by his own

willful misconduct: Provided, That for the purposes of this section said officer, enlisted man or other member shall be held and taken to have been in sound condition when examined, accepted and enrolled for service: Provided further, That this section, as amended, shall be deemed to become effective as of Oct. 6, 1917."

Sec. 11. That section 301 of said act is hereby amended to read as follows:

"Sec. 301. That if death results from injury—

"If the deceased leaves a widow or child, or if he leaves a mother or father either or both dependent upon him for support, the monthly compensation shall be the following amounts:

"(a) If there is a widow but no child, \$25;

"(b) If there is a widow and one child, \$35;

"(c) If there is a widow and two children, \$42.50, with \$5 for each additional child up to two;

"(d) If there is no widow, but one child, \$20;

"(e) If there is no widow, but two children, \$30;

"(f) If there is no widow, but three children, \$40, with \$5 for each additional child up to two;

"(g) If there is a dependent mother (or dependent father), \$20, or both, \$30. The amount payable under this subdivision shall not exceed the difference between the total amount payable to the widow and children and the sum of \$75. This compensation shall be payable for the death of but one child, and no compensation for the death of a child shall be payable if the dependent mother is in receipt of compensation under the provisions of this article for the death of her husband. Such compensation shall be payable whether the dependency of the father or mother or both arises before or after the death of the person, but no compensation shall be payable if the dependency arises more than five years after the death of the person.

"If the death occurs before discharge or resignation from service, the United States shall pay for burial expenses and the return of the body to his home a sum not to exceed \$100, as may be fixed by regulations.

"The payment of compensation to a widow shall continue until her death or remarriage.

"The payment of compensation to or for a child shall continue until such child reaches the age of 18 years or marries, or if such child be incapable, because of insanity, idiocy or being otherwise permanently helpless, then during such incapacity.

"Whenever the compensation payable to or for the benefit of any person under the provisions of this section is terminated by the happening of the contingency upon which it is limited, the compensation thereafter for the remaining beneficiary or beneficiaries, if any, shall be the amount which would have been payable to them if they had been the sole original beneficiaries.

"As between the widow and the children not in her custody, and as between children, the amount of the compensation shall be apportioned as may be prescribed by regulation.

"The term 'widow' as used in this section shall not include one who shall have married the deceased later than ten years after the time of injury, and shall include a widower, whenever his condition is such that, if the deceased person were living, he would have been dependent upon her for support."

Sec. 12. That subdivision (1) of section 302 of said act is hereby amended to read as follows:

"(1) If and while the disability is total, the monthly compensation shall be the following amounts:

"(a) If the disabled person has neither wife nor child living, \$30;

"(b) If he has a wife but no child living, \$45;

"(c) If he has a wife and one child living, \$55;

"(d) If he has a wife and two children living, \$65;

"(e) If he has a wife and three or more children living, \$75;

"(f) If he has no wife but one child living, \$40, with \$10 for each additional child up to two;

"(g) If he has a mother or father, either or both dependent on him for support, then in addition to the above amounts, \$10 for each;

"(h) If he is totally disabled and in addition so helpless as to be in constant need of a nurse or attendant, such additional sum shall be paid, but not exceeding \$20 per month, as the director may deem reasonable: Provided, however, That for the loss of both feet or both hands or both eyes or for becoming totally blind or becoming helpless and permanently bedridden from causes occurring in the line of duty in the service of the United States, the rate of compensation shall be \$100 per month: Provided further, That where the rate of compensation is \$100 per month, no allowance shall be made for a nurse or attendant."

Sec. 13. That subdivision (4) of section 302 of said act is hereby amended to read as follows:

"(4) The amount of each monthly payment shall be determined according to the family conditions existing on the first day of the month."

Sec. 14. That two new subdivisions are hereby added to section 302 of said act, to be known as subdivisions (5) and (6), respectively, and to read as follows:

"(5) Where the disabled person and his wife are not living together, or where the children are not in the custody of the disabled person, the amount of the compensation shall be apportioned as may be prescribed by regulations.

"(6) The term 'wife' as used in this section shall include 'husband' if the husband is dependent upon the wife for support."

Sec. 15. That where section 301 of said act is amended by striking out the provisions that a mother is entitled to compensation only when she is widowed and substitute provisions are included to the effect that compensation is payable to a dependent mother or dependent father, such substitute provisions shall be deemed to be in effect as of Oct. 6, 1917.

Sec. 16. That section 311 of said act is hereby repealed.

Sec. 17. That section 312 of said act is hereby amended to read as follows:

"Sec. 312. That compensation under this article shall not be paid while the person is in receipt of service or retirement pay. The laws providing for gratuities or payments in the event of death in the service and existing pension laws shall not be applicable after the enactment of this amendment to any person in the active military or naval service on the sixth day of October, 1917, or who thereafter entered the active military or naval service, or to their widows, children, or their dependents, except in so far as rights under any such law have heretofore accrued.

"Compensation because of disability or death of members of the army nurse corps (female) or of the navy nurse corps (female) shall be in lieu of any compensation for such disability or death under the act entitled 'An act to provide compensation for employes of the United States suffering injuries while in the performance of their duties, and for other purposes,' approved Sept. 7, 1916."

Sec. 18. That section 313 of said act is hereby amended to read as follows:

"Sec. 313. (1) That if an injury or death for which compensation is payable under this

article is caused under circumstances creating a legal liability upon some person other than the United States or the enemy to pay damages therefor, the director, as a condition to payment of compensation by the United States, may require the beneficiary to assign to the United States any right of action he may have to enforce such liability of such other person, or, if it appears to be for the best interests of the beneficiary, the director may require him to prosecute the said action in his own name, subject to regulations. The director may require such assignment or prosecution at any time after the injury or death and the failure on the part of the beneficiary to so assign or to prosecute said cause of action in his own name within a reasonable time, to be fixed by the director, shall bar any right to compensation on account of the same injury or death. The cause of action so assigned to the United States may be prosecuted or compromised by the director, and any money realized or collected thereon, less the reasonable expenses of such realization or collection, shall be placed to the credit of the military and naval compensation appropriation. If the amount placed to the credit of such appropriation in such case is in excess of the amount of the award of compensation, if any, such excess shall be paid to the beneficiary after any compensation award for the same injury or death is made.

"If a beneficiary or conditional beneficiary shall have recovered, as a result of a suit brought by him or on his behalf, or as a result of a settlement made by him or on his behalf, any money or other property in satisfaction of the liability of such other person, such money or other property so recovered shall be credited upon any compensation payable or which may become payable to such beneficiary or conditional beneficiary by the United States on account of the same injury or death.

"(2) If an injury or death for which compensation may be payable under this article is caused under circumstances creating a legal liability upon some person, other than the United States or the enemy, to pay damages therefor, then, in order to preserve the right of action, the director may require the conditional beneficiary at any time after the injury or death, to assign such right of action to the United States, or, if it appears to be for the best interests of such conditional beneficiary, to prosecute the said cause of action in his own name, subject to regulations. The failure on the part of the beneficiary to so assign or to prosecute the said cause of action in his own name within a reasonable time, to be fixed by the director, shall bar any right to compensation on account of the same injury or death. The cause of action so assigned may be prosecuted or compromised by the director, and any money realized or collected thereon, less the reasonable expenses of such realization or collection, shall be paid to such beneficiary, and be credited upon any future compensation which may become payable to such beneficiary by the United States on account of the same injury or death.

"(3) The bureau shall make all necessary regulations for carrying out the purposes of this section. For the purposes of computation only under this section the total amount of compensation due any beneficiary shall be deemed to be equivalent to a lump sum equal to the present value of all future payments of compensation computed as of the date of the award of compensation at 4 per centum, true discount, compounded annually. The probability of the beneficiary's death before the expiration of the period during which he is entitled to compensation shall be determined according to the American Experience Table of Mortality.

"A conditional beneficiary is any person who may become entitled to compensation under

this article on or after the death of the injured person.

"Nothing in this section shall be construed to impose any administrative duties upon the war or navy departments."

Sec. 19. That section 401 of said act is hereby amended to read as follows:

"Sec. 401. That such insurance must be applied for within 120 days after enlistment or after entrance into or employment in the active service and before discharge or resignation, except that those persons who are in the active war service at the time of the publication of the terms and conditions of such contract of insurance may apply at any time within 120 days thereafter and while in such service. Any person in the active service on or after the sixth day of April, 1917, who, while in such service and before the expiration of 120 days from and after such publication, becomes or has become totally and permanently disabled, or dies, or has died, without having applied for insurance, shall be deemed to have applied for and to have been granted insurance, payable to such person during his life in monthly installments of \$25 each. If he shall die either before he shall have received any of such monthly installments or before he shall have received 240 of such monthly installments, then \$25 per month shall be paid to his widow from the time of his death and during her widowhood, or if there is no widow surviving him, then to his child or children, or if there is no child surviving him, then to his mother, or if there is no mother surviving him, then to his father, if and while they survive him: Provided, however, That not more than 240 of such monthly installments, including those received by such person during his total and permanent disability, shall be so paid. The amount of the monthly installments shall be apportioned between children as may be provided by regulations."

Sec. 20. That section 19 of this act amending section 401 of the act entitled "An act to authorize the establishment of a bureau of war-risk insurance in the treasury department," approved Sept. 2, 1914, as amended, shall be deemed to be in effect as of Oct. 6, 1917: Provided, That nothing herein shall be construed to interfere with the payment of monthly installments, authorized to be made under the provisions of said section 401 as originally enacted, for the months up to and including June, 1918: Provided further, That all awards of automatic insurance under the provisions of said section 401 as originally enacted shall be revised as of the first day of July, 1918, in accordance with the provisions of said section 401 as amended by section 19 of this act.

Sec. 21. That section 402 of said act is hereby amended to read as follows:

"Sec. 402. That the director, subject to the general direction of the secretary of the treasury, shall promptly determine upon and publish the full and exact terms and conditions of such contract of insurance. The insurance shall be payable only to a spouse, child, grandchild, parent, brother, or sister, and also during total and permanent disability to the insured person or to any or all of them. The insurance shall be payable in 240 equal monthly installments. Provisions for maturity at certain ages, for continuous installments during the life of the insured or beneficiaries, or both, for cash, loan, paid up and extended values, dividends from gains and savings, and such other provisions for the protection and advantage of and for alternative benefits to the insured and the beneficiaries as may be found to be reasonable and practicable, may be provided for in the contract of insurance, or from time to time by regulations. All calculations shall be based upon the American Experience Table of Mortality and interest at 3½ per centum

per annum, except that no deduction shall be made for continuous installments during the life of the insured in case his total and permanent disability continues more than 240 months. Subject to regulations, the insured shall at all times have the right to change the beneficiary or beneficiaries of such insurance without the consent of such beneficiary or beneficiaries, but only within the classes herein provided. If no beneficiary within the permitted class be designated by the insured, either in his lifetime or by his last will and testament, or if the designated beneficiary does not survive the insured, the insurance shall be payable to such person or persons within the permitted class of beneficiaries as would under the laws of the state of the residence of the insured be entitled to his personal property in case of intestacy. If no such person survive the insured, then there shall be paid to the estate of the insured an amount equal to the reserve value, if any, of the insurance at the time of his death, calculated on the basis of the American Experience Table of Mortality and 3½ per centum interest in full of all obligations under the contract of insurance." (Approved June 25, 1918.)

Marine and Seamen's Insurance.

Be it enacted, etc., That the war-risk insurance act is hereby amended by adding a new section to be known as section 2b, to read:

"Sec. 2b. That when it appears to the secretary of the treasury that vessels of foreign friendly flags, or their masters, officers or crews, or shippers or importers in such vessels, are unable in any trade to secure adequate war-risk insurance on reasonable terms, the bureau of war-risk insurance with the approval of the secretary, is hereby authorized to make provisions for the insurance by the United States of (1) such vessels of foreign friendly flags, their freight and passage moneys, and personal effects of the masters, officers and crews thereof against the risks of war when such vessels are chartered or operated by the United States shipping board or its agent, or chartered by any person a citizen of the United States, and (2) the cargoes to be shipped in such vessels of foreign friendly flags, whether or not they are so chartered. Such insurance on the vessel, however, is authorized only when the United States shipping board or its agent operates the vessel or the charterers are, by the terms of the charter party or contract with the vessel owners, required to assume the war risk or provide insurance protecting the vessel owners against war risk during the term of the charter or hire of the vessel.

The bureau of war-risk insurance, with the approval of the secretary of the treasury, is also hereby authorized to insure the masters, officers and crews of vessels operated or chartered as aforesaid against the loss of life or personal injury by the risk of war and for compensation during the detention following capture by enemies of the United States, whenever it appears to the secretary that the owners, operators or charterers of such vessels are unable, in any trade, to secure such insurance on reasonable terms."

Sec. 2. That section 5 of the war-risk insurance act is hereby amended to read as follows:

"Sec. 5. That the secretary of the treasury is authorized to establish an advisory board, to consist of three members skilled in the practices of war-risk insurance, for the purpose of assisting the bureau of war-risk insurance in fixing rates of premium and in adjustment of claims for losses and generally in carrying out the purposes of this act; the compensation of the members of said board to be determined by the secretary of the treasury, but not to exceed \$20 a day each while actually employed. He is likewise authorized to appoint two persons skilled in the practice of accident insurance for the purpose of assisting the bureau of war-risk

insurance in the adjustment of claims for death, personal injury or detention; the compensation of persons so appointed to be determined by the secretary of the treasury, but not to exceed \$20 a day each while actually employed. In the event of disagreement as to the claim for losses or amount thereof, between the said bureau and the parties to such contract of insurance, an action on the claim may be brought against the United States in the District court of the United States, sitting in admiralty, in the district in which the claimant or his agents may reside. The secretary of the treasury is, in his judgment, authorized to compromise the claim either before or after the institution of an action therein."

Sec. 3. That section 9 of the war-risk insurance act is hereby amended to read as follows:

"Sec. 9. That the president is authorized, whenever in his judgment the necessity of further war insurance by the United States shall have ceased to exist to suspend the operation of this act, in so far as the division of marine and seamen's insurance is concerned, which suspension shall be made in any event within six months after the end of the war, but shall not affect any insurance outstanding at the time or any claims pending adjustment. For the purpose of the final adjustment of any such outstanding insurance or claims, the division of marine and seamen's insurance may, in the discretion of the president, be continued in existence for a period not exceeding three years after such suspension.

"The words 'end of the war' as used herein shall be deemed to mean the date of proclamation of exchange of ratification of the treaty of peace, unless the president shall, by proclamation, declare a prior date, in which case the date so proclaimed shall be deemed to be the 'end of the war' within the meaning of this act." Approved July 11, 1918.

LIBERTY LOAN TAX EXEMPTION.

Be it enacted, etc., that until the expiration of two years after the date of the termination of the war between the United States and the imperial German government, as fixed by proclamation of the president—

(1) The interest on an amount of bonds of the fourth liberty loan the principal of which does not exceed \$30,000, owned by any individual, partnership, association or corporation, shall be exempt from graduated additional income taxes, commonly known as surtaxes and excess profits and war-profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations or corporations;

(2) The interest received after Jan. 1, 1918, on an amount of bonds of the first liberty loan, converted, dated either Nov. 15, 1917, or May 9, 1918, the second liberty loan, converted and unconverted, and the third liberty loan, the principal of which does not exceed \$45,000 in the aggregate, owned by any individual, partnership, association or corporation, shall be exempt from such taxes: Provided, however, That no owner of such bonds shall be entitled to such exemption in respect to the interest on an aggregate principal amount of such bonds, exceeding one and one-half times the principal amount of bonds of the fourth liberty loan originally subscribed for by such owner and still owned by him at the date of his tax return; and

(3) The interest on an amount of bonds, the principal of which does not exceed \$30,000, owned by any individual, partnership, association or corporation, issued upon conversion of 3½ per centum bonds of the first liberty loan in the exercise of any privilege arising as a consequence of the issue of bonds of the fourth liberty loan, shall be exempt from such taxes.

The exemptions provided in this section shall be in addition to the exemption provided in section 7 of the second liberty bond act in respect to the interest on an amount of bonds.

and certificates, authorized by such act and amendments thereto, the principal of which does not exceed in the aggregate \$5,000, and in addition to all other exemptions provided in the second liberty bond act.

Sec. 2. That section 6 of the second liberty bond act is hereby amended by striking out the figures "\$2,000,000,000," and inserting in lieu thereof the figures "\$1,000,000,000." Such section is further amended by striking out the words "The amount of war savings certificates sold to any one person at any one time shall not exceed \$100, and it shall not be lawful for any one person at any one time to hold war savings certificates to an aggregate amount exceeding \$1,000," and inserting in lieu thereof the words "It shall not be lawful for any one person at any one time to hold war savings certificates of any one series to an aggregate amount exceeding \$1,000."

Sec. 3. That the provisions of section 8 of the second liberty bond act, as amended by the third liberty bond act, shall apply to the proceeds arising from the payment of war-profits taxes as well as income and excess-profits taxes.

Sec. 4. That the secretary of the treasury may, during the war and for two years after its termination, make arrangements in or with foreign countries to stabilize the foreign exchanges and to obtain foreign currencies and credits in such currencies, and he may use any such credits and foreign currencies for the purpose of stabilizing or rectifying the foreign exchanges, and he may designate depositories in foreign countries with which may be deposited as he may determine all or any part of the avails of any foreign credits or foreign currencies.

Sec. 5. That subdivision (b) of section 5 of the trading with the enemy act be, and hereby is, amended to read as follows:

(b) That the president may investigate, regulate or prohibit, under such rules and regulations as he may prescribe, by means of licenses or otherwise, any transaction in foreign exchange and the export, hoarding, melting or earmarking of gold or silver coin or bullion or currency, transfers of credit in any form (other than credits relating solely to transactions to be executed wholly within the United States), and transfers of evidences of indebtedness or of the ownership of property between the United States and any foreign country, whether enemy, ally of enemy or otherwise, or between residents of one or more foreign countries, by any person within the United States; and, for the purpose of strengthening, sustaining and broadening the market for bonds and certificates of indebtedness of the United States, of preventing frauds upon the holders thereof and of protecting such holders, he may investigate and regulate, by means of licenses or otherwise (until the expiration of two years after the date of the termination of the present war with the imperial German government, as fixed by his proclamation), any transactions in such bonds or certificates by or between any person or persons: Provided, That nothing contained in this subdivision (b) shall be construed to confer any power to prohibit the purchase or sale for cash, or for note eligible for discount at any federal reserve bank, of bonds or certificates of indebtedness of the United States, and he may require any person engaged in any transaction referred to in this subdivision to furnish, under oath, complete information relative thereto, including the production of any books of account, contracts, letters or other papers, in connection therewith in the custody or control of such person, either before or after such transaction is completed."

Sec. 6. That section 5200 of the revised statutes, as amended, be, and hereby is, amended to read as follows:

"Sec. 5200. The total liabilities of any association, of any person or of any company, corporation or firm for money borrowed, includ-

ing in the liabilities of a company or firm the liabilities of the several members thereof, shall at no time exceed 10 per centum of the amount of the capital stock of such association, actually paid in and unimpaired, and 10 per centum of its unimpaired surplus fund: Provided, however, That (1) the discount of bills of exchange drawn in good faith against actually existing values, (2) the discount of commercial or business paper actually owned by the person, company, corporation or firm negotiating the same, and (3) the purchase or discount of any note or notes secured by not less than a like face amount of bonds of the United States issued since April 24, 1917, or certificates of indebtedness of the United States, shall not be considered as money borrowed within the meaning of this section, but the total liabilities to any association, of any person or of any company, corporation or firm, upon any note or notes purchased or discounted by such association and secured by such bonds or certificates of indebtedness, shall not exceed (except to the extent permitted by rules and regulations prescribed by the comptroller of the currency, with the approval of the secretary of the treasury) 10 per centum of such capital stock and surplus fund of such association."

Sec. 7. That the short title of this act shall be "Supplement to second liberty bond act." Approved Sept. 24, 1918.

AIRCRAFT PRODUCTION CORPORATION.

It is provided in the army appropriation bill approved July 9, 1918, that the director of aircraft production may, whenever in his judgment it will facilitate and expedite the production of aircraft, aircraft equipment or materials therefor, for the United States and governments allied with it in the prosecution of the present war, form under the laws of the District of Columbia or under the laws of any state one or more corporations for the purchase, production, manufacture and sale of aircraft, aircraft equipment, or materials therefor, and to build, own and operate railroads in connection therewith. The total capital stock of the corporation or corporations so formed, together with any bonds, notes, debentures or other securities issued by them shall not at any one time exceed \$100,000,000.

The director of aircraft production may, for and on behalf of the United States, subscribe, purchase and vote not less than a majority of the voting capital stock of any such corporation, and may purchase for and on behalf of the United States all or any part of the preferred nonvoting stock, bonds, notes, debentures or other securities issued by such corporations, and do all things necessary to protect the interest of the United States; and, with the approval of the secretary of war, may sell any or all of the stock, bonds, notes, debentures or other securities of the United States in such corporation: Provided, That at no time shall the United States be a minority holder of voting stock therein. Any sums heretofore or hereafter appropriated for the purchase or procurement of aircraft, aircraft equipment, or materials therefor, for the army shall be available for the purchase of the capital stock of such corporation or corporations or their bonds, notes, debentures or other securities.

Within one year from the signing of a treaty of peace with the imperial German government the director of aircraft production shall, on behalf of the United States as a stockholder, institute such proceedings as are necessary to dissolve such corporation or corporations under the laws of the District of Columbia or the state or states under which such corporation or corporations are organized. Upon the dissolution of the corporation or corporations the same shall be liquidated and the assets distributed in accordance with the laws of the District of Columbia or the state

or states under which such corporation or corporations are organized.

The secretary of war is hereby authorized to assign for duty, under the direction of the director of aircraft production, any enlisted men or commissioned officers, from time to time, in the military organization as he shall deem necessary or desirable to carry on the work of such corporation or corporations: Provided, That nothing in this chapter shall prevent such corporation or corporations from employing civilians in the manner customary in the conduct of ordinary business under corporate organization.

The secretary of war, acting through the director of aircraft production, is authorized to transfer, by appropriate instruments, to any such corporation as may be formed under this chapter, any interest of the United States in any existing contracts for aircraft, aircraft equipment or materials therefor, and the title to any lands, plants, railroads or equipment used in or in connection with the production of aircraft, aircraft equipment or materials therefor, or such terms as the secretary of war, acting through the director of aircraft production, shall deem fit.

MEDALS AND DECORATIONS.

In the army appropriation act approved July 9, 1918, it is provided: That the provisions of existing law relating to the award of medals of honor to officers, noncommissioned officers and privates of the army be, and they hereby are, amended so that the president is authorized to present, in the name of the congress, a medal of honor only to each person who, while an officer or enlisted man of the army, shall hereafter in action involving actual conflict with an enemy, distinguish himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty.

That the president be, and he is hereby, further authorized to present, but not in the name of the congress, a distinguished service cross of appropriate design and a ribbon, together with a rosette or other device, to be worn in lieu thereof, to any person who, while serving in any capacity with the army of the United States since the 6th day of April, 1917, has distinguished, or who shall hereafter distinguish, himself or herself by extraordinary heroism in connection with military operations against an armed enemy.

That the president be, and he is hereby, further authorized to present, but not in the name of congress, a distinguished service medal of appropriate design and a ribbon, together with a rosette or other device, to be worn in lieu thereof, to any person who, while serving in any capacity with the army of the United States since the 6th day of April, 1917, has distinguished, or who hereafter shall distinguish, himself or herself by exceptionally meritorious service to the government in a duty of great responsibility, and said distinguished service medal shall also be issued to all enlisted men of the army to whom the certificate of merit has been granted up to and including the date of the passage of this act under the provisions of previously existing law, in lieu of such certificate of merit, and after the passage of this act the award of the certificate of merit for distinguished service shall cease, and additional pay heretofore authorized by law for holders of the certificate of merit shall not be paid to them beyond the date of the award of the distinguished service medal in lieu thereof as aforesaid.

That each enlisted man of the army to whom there has been or shall be awarded a medal of honor, a distinguished service cross or a distinguished service medal shall, for each such award, be entitled to additional pay at the rate of \$2 per month from the date of the distinguished act or service on which the award is based, and each bar or other suitable device, in lieu of a medal of honor, a dis-

tinguished service cross or a distinguished service medal, as hereinafter provided, shall entitle him to further additional pay at the rate of \$2 per month from the date of the distinguished act or service for which the bar is awarded, and said additional pay shall continue throughout his active service, whether such service shall or shall not be continuous; but when the award is in lieu of the certificate of merit, as provided for in section 3 hereof, the additional pay shall begin with the date of the award.

That no more than one medal of honor or one distinguished service cross or one distinguished service medal shall be issued to any one person; but for each succeeding deed or act sufficient to justify the award of a medal of honor or a distinguished service cross or a distinguished service medal, respectively, the president may award a suitable bar, or other suitable device, to be worn as he shall direct, and for each other citation of an officer or enlisted man for gallantry in action published in orders issued from the headquarters of a force commanded by a general officer he shall be entitled to wear, as the president shall direct, a silver star three-sixteenths of an inch in diameter.

That the secretary of war be, and he is hereby, authorized to expend from the appropriations for contingent expenses of his department from time to time so much as may be necessary to defray the cost of the medals of honor, distinguished service crosses, distinguished service medals, bars, rosettes and other devices hereinbefore provided for.

That whenever a medal, cross, bar, ribbon, rosette or other device presented under the provisions of this act shall have been lost, destroyed or rendered unfit for use, without fault or neglect on the part of the person to whom it was awarded, such medal, cross, bar, ribbon, rosette or device shall be replaced without charge therefor.

That, except as otherwise prescribed herein, no medals of honor, distinguished service crosses, distinguished service medal or bar or other suitable device in lieu of either of said medals or of said cross, shall be issued to any person after more than three years from the date of the act justifying the award thereof, nor unless a specific statement or report distinctly setting forth the distinguished service and suggesting or recommending official recognition thereof shall have been made at the time of the distinguished service or within two years thereafter, nor unless it shall appear from official records in the war department that such person has so distinguished himself as to entitle him thereto; but in case an individual who shall distinguish himself dies before the making of the award to which he may be entitled, the award may nevertheless be made and the medal or cross or the bar or other emblem or device presented, within three years from the date of the act justifying the award thereof, to such representative of the deceased as the president may designate; but no medal, cross, bar or other device hereinbefore authorized shall be awarded or presented to any individual whose entire service subsequent to the time he distinguished himself shall not have been honorable; but in cases of officers and enlisted men now in the army for whom the award of the medal of honor has been recommended in full compliance with then existing regulations, but on account of services which, though insufficient fully to justify the award of the medal of honor, appear to have been such as to justify the award of the distinguished service cross or distinguished service medal hereinbefore provided for, such cases may be considered and acted upon under the provisions of this act authorizing the award of the distinguished service cross and distinguished service medal, notwithstanding that said services may have been rendered more than three years before said cases shall have been considered as authorized by this act, but all consideration of

and action upon any of said cases shall be based exclusively upon official records now on file in the war department, and in the cases of officers and enlisted men now in the army who have been mentioned in orders now a part of official records, for extraordinary heroism or especially meritorious services, such as to justify the award of the distinguished service cross or the distinguished service medal hereinbefore provided for, such cases may be considered and acted on under the provisions of this act, notwithstanding that said act or services may have been rendered more than three years before said cases shall have been considered as authorized by this act, but all consideration of and action upon any said cases shall be based exclusively upon official records of the war department.

That the president be, and he is hereby, authorized to delegate, under such conditions, regulations and limitations as he shall prescribe, to the commanding general of a separate army or higher unit in the field, the power conferred upon him by this act to award the medal of honor, the distinguished service cross and the distinguished service medal, and he is further authorized to make from time to time any and all rules, regulations and orders which he shall deem necessary to carry into effect the provisions of this act and to execute the full purpose and intention thereof.

Foreign Decorations.

That American citizens who have received since Aug. 1, 1914, decorations or medals for distinguished service in the armies or in connection with the field service of those nations engaged in war against the imperial German government, shall, on entering the military service of the United States, be permitted to wear such medals or decorations.

That any and all members of the military forces of the United States serving in the present war be, and they are hereby, permitted and authorized to accept during the present war or within one year thereafter, from the government of any of the countries engaged in war with any country with which the United States is or shall be concurrently likewise engaged in war, such decorations, when tendered, as are conferred by such government upon the members of its own military forces, and the consent of congress required therefor by clause 8 of section 9 of article I. of the constitution is hereby expressly granted: Provided, That any officer or enlisted man of the military forces of the United States is hereby authorized to accept and wear any medal or decoration heretofore bestowed by the government of any of the nations concurrently engaged with the United States in the present war.

The president is authorized, under regulations to be prescribed by him, to confer such medals and decorations as may be authorized in the military service of the United States upon officers and enlisted men of the military forces of the countries concurrently engaged with the United States in the present war.

MEDAL FOR NATIONAL GUARDSMEN.

That the secretary of war be, and he is hereby, authorized and directed to procure a bronze medal, with suitable device and ribbon, to be presented to each of the several officers and enlisted men, and families of such as may be dead, of the national guard who, under the orders of the president of the United States, served not less than ninety days in the war with Spain, and who have received an honorable discharge from the service, and who served on the Mexican border in the years 1916 and 1917 and who are not eligible to receive the Mexican service badge heretofore authorized by the president: Provided, That such medals shall not be issued to men who have, subsequent to such service, been dishonorably discharged from the service or deserted.

INCREASE OF NAVAL PERSONNEL.

In the naval appropriation act approved it is provided: The authorized enlisted strength of the active list of the navy is temporarily increased from 135,485 to 181,485; the number of apprentice seamen is increased from 6,000 to 24,000, and the number of men in the flying corps is increased from 350 to 10,000. The president is authorized at any time during the present war to increase the enlisted strength of the navy by the addition of 50,000 men.

The enlisted strength of the marine corps is increased from 17,400 to 75,500. The rank of first class private is created. The rank and title of major-general is created in the marine corps. The act provides for the temporary appointment of additional brigadier-generals and other officers in the marine corps necessitated by the increase in the number of enlisted men.

INCREASE OF THE ARMY.

In the army appropriation bill approved July 9, 1918, it is provided: The authority conferred upon the president by the act approved May 18, 1917, entitled "An act to authorize the president to increase temporarily the military establishment of the United States," is extended so as to authorize him during each fiscal year to raise by draft as provided in that act and acts amendatory thereof the maximum number of men which may be organized, equipped, trained and used during such year for the prosecution of the present war until the same shall have been brought to a successful conclusion.

SLAVIC LEGION.

In the army appropriation act approved July 9, 1918, it is provided: That, under such regulations as the president may prescribe, a force of volunteer troops in such unit or units as he may direct may be raised to be composed of Jugo Slavs, Czecho-Slovaks and Ruthenians (Ukrainians) belonging to the oppressed races of the Austro-Hungarian or German empire resident in the United States but not citizens thereof nor subject to the draft. Such force shall be known as the Slavic legion or by such other description as the president may prescribe. No man shall be enlisted in it until he has furnished satisfactory evidence that he will faithfully and loyally serve the cause of the United States and that he desires to fight the imperial governments of Germany and Austria-Hungary and the allies thereof. The force so raised and duly sworn into the service may be equipped, maintained and trained with our own troops or separately as the president may direct and thereafter may be transported to such field of action as the president may direct to be used against the common enemy in connection with our own troops or with those of any nation associated with the United States in the present war, and the several items of expense involved in the equipment, maintenance, training and transportation of such force may be paid from the respective appropriations herein made or from any subsequent appropriations for the same: Provided, That American citizens of Austrian or German birth, or who were born in alien enemy territory, who have passed the necessary examination and whose loyalty is unquestioned, may, in the discretion of the commander-in-chief of the army and navy, be commissioned in the United States army or navy.

WAR APPROPRIATIONS.

Following is a summary of the appropriations made at the second session of the 65th congress for meeting war expenditures. Only the more important items are included.

Army.

In the army appropriation bill approved July 9, 1918:

Military information section, general staff corps, \$2,000,000.	Engineer department, operations, \$70,000,000.
Telegraph and telephone systems, signal service, \$105,946,054.77.	Ordnance department—Ordnance stores, ammunition, \$107,732,000.
Aerial appliances and instruction, \$884,304,758.	Small-arms target practice, \$900,000.
Army registration expenses, \$15,762,000.	Ordnance stores and supplies, \$19,826,585.
Pay of officers of the line, \$201,654,279.	Manufacture of arms, \$27,996,100.
For length of service, \$3,500,000.	Terminal storage and shipping facilities, \$5,000,000.
Pay of enlisted men of the line, \$776,458,721.04.	In the deficiency appropriation act approved July 8, 1918:
For length of service, \$8,520,000.	Quartermaster corps—Storage and shipping facilities, \$50,000,000.
Pay of enlisted men in ordnance service, \$26,111,095.56.	Mileage, \$2,750,000.
Pay of enlisted men in quartermaster corps, \$76,978,205.70.	Incidental expenses, \$20,500,000.
Pay of enlisted men in signal corps, \$72,779,501.85.	Clothing and camp and garrison equipage, \$712,232,605.
Pay of enlisted men in medical department, \$74,876,475.85.	Regular supplies, \$90,971,072.06.
Pay of officers—General staff corps, \$730,908.	Barracks and quarters, \$27,767,860.32.
Adjutant general's department, \$2,095,578.	Construction and repair of hospitals, \$13,936,534.66.
Inspector-general's department, \$619,884.	Civilian military training camps, \$1,000,000.
Corps of engineers, \$837,306.	Medical department, \$33,000,000.
Ordnance department, \$16,743,807.	<i>Navy.</i>
Quartermaster corps, \$17,539,479.	In naval appropriation bill approved July 1, 1918:
Medical department, \$54,223,659.	For miscellaneous pay, \$4,350,000.
Judge-advocate general's department, \$837,306.	Aviation, \$220,383,119.
Signal corps, \$39,716,523.	Transportation, \$12,000,000.
Commutation of quarters, \$33,350,000.	Outfits on first enlistment, \$9,975,000.
Increase of pay for foreign service, officers, \$24,683,808.73.	Instruments and supplies, \$3,469,800.
Increase of pay for foreign service, enlisted men, \$89,806,752.	Camps of instruction, \$2,655,360.
Subsistence of the army, \$830,557,398.	Ordnance and ordnance stores, \$30,522,279.
Regular supplies, quartermaster corps, \$552,868,390.	Smokeless powder, \$2,400,000.
Incidental expenses, quartermaster corps, \$35,000,000.	New batteries, \$85,014,110.
Transportation of army and its supplies, \$1,532,606,103.	Ammunition, \$73,289,530.
Water and sewers at military posts, \$70,569,605.	Torpedoes and appliances, \$10,000,000.
Clothing and camp and garrison equipage, \$1,230,190,089.	Navy mine depot, \$3,000,000.
Storage and shipping facilities, \$147,000,000.	Navy nitrate plant, \$9,150,000.
Horses for cavalry, engineers, artillery, etc., \$70,000,000.	Maintenance yards and docks, \$10,500,000.
Barracks and quarters, \$175,100,000.	Hospital construction, \$10,295,000.
Medical and hospital supplies, \$267,408,948.	Surgeons' necessaries, \$5,000,000.
Ordnance service, \$30,000,000.	Pay of the navy, \$27,372,946.
Ordnance stores, ammunition, \$390,000,000.	Provisions, \$75,520,216.
Small arms target practice, \$75,200,000.	Clothing and small stores, \$27,000,000.
Manufacture of arms, \$50,000,000.	Maintenance, bureau supplies, \$17,836,625.
Ordnance stores and supplies, \$93,400,000.	Fuel and transportation, \$49,400,000.
Automatic machine rifles, \$237,144,000.	Construction and repair, \$60,000,000.
Armored motor cars, \$75,550,000.	Bureau of steam engineering, \$50,000,000.
Contract obligations for ordnance, \$600,000,000.	Pay of marine corps, \$50,135,874.14.
Arming and training of national guard, \$2,473,650.	Provisions, marine corps, \$15,053,500.
Arms, uniforms, etc., for national guard, \$3,210,000.	Clothing, marine corps, \$32,470,480.
Ordnance equipment of home guards, \$2,500,000.	Stores, marine corps, \$25,277,750.
Supplies for reserve officers' training corps, \$2,788,096.	Totals for marine corps, \$160,016,756.14.
Ordnance stores, \$2,921,725.	For torpedo boat destroyers, \$125,000,000.
Ordnance supplies for schools and colleges, \$1,138,700.	For torpedo boats (submarines), \$32,397,000.
In the urgent deficiency act approved March 28, 1918:	Armor and armament, \$20,000,000.
Additional employes war department, \$3,000,000.	Ammunition, \$7,000,000.
Armories and arsenals, \$1,010,000.	Total increase of navy, \$184,397,000.
Provost marshal general's office (draft expenses), \$8,476,490.	For materials, equipment, munitions, for the purchase or construction of additional naval craft, to be expended at the direction of the president, \$100,000,000.
Quartermaster corps—Mileage, \$5,000,000.	Improving and equipping navy yards, \$10,000,000.
Regular supplies, \$26,358,176.	In urgent deficiency appropriation act, approved March 28, 1918:
Transportation, \$125,000,000.	Bureau of navigation—Transportation, \$2,000,000.
Storage and shipping facilities, \$100,000,000.	Outfits on first enlistment, \$1,000,000.
Barracks and quarters, \$61,252,744.	Naval reserve force, \$100,000.
Water and sewers at military posts, \$18,681,820.	Bureau of ordnance—Ordnance and stores, \$10,000,000.
Roads, wharves, walks and drainage, \$9,194,100.	Naval gun factory, Washington, D. C., \$5,499,737.
Construction and repair of hospitals, \$19,654,300.	Batteries and outfits for vessels, \$13,200,000.
Shooting galleries and supplies, \$984,000.	Ammunition for vessels, \$8,064,000.
Military post exchanges, \$550,000.	Reserve ordnance supplies, \$13,000,000.

Bureau of yards and docks—Maintenance, \$2,500,000.

Contingent, \$2,000,000.

Hospital construction, \$2,750,000.

Power plants, \$3,500,000.

Training camps, \$12,000,000.

Ordnance stations, \$2,500,000.

Marine corps—Pay, \$6,000,000.

Clothing, \$2,750,000.

Contingent, \$1,180,000.

In deficiency appropriation act, approved July 8, 1918:

General account of advances \$268,289.60.
Maintenance yards and docks, \$3,875,000.
Training camps, \$1,250,000.
Surgeons' necessaries, \$2,000,000.

Fortifications.

In the act making appropriations for fortifications, approved July 8, 1918:
Aviation stations, \$5,000,000.
Mountain, field and siege cannon, \$500,000,000.
Ammunition, \$2,000,000,000.
Ammunition for seacoast cannon, \$3,885,000.
Ammunition, subcaliber guns, etc., seacoast artillery, \$1,700,000.
Mobile artillery, \$2,000,000,000.
Ammunition, subcaliber guns, etc., mountain, field and siege artillery, \$84,000,000.
Proving grounds, \$8,480,000.
Panama canal fortification, \$2,025,788.85.

Miscellaneous.

The act making appropriations for the sundry civil expenses of the government, approved July 1, 1918, carried the important war appropriations:
For the national security and defense, to be expended at the discretion of the president, \$50,000,000.
For the coast guard (all purposes), \$7,247,835.
Alien property custodian, \$900,000.
Committee on public information, \$1,250,000.
Council of national defense, \$400,000.
Food administration, \$7,500,000.
Fuel administration, \$3,500,000.
Shipping board, \$800,000.
Expediting construction of ships, \$65,000,000.
Construction of ships, \$1,438,451,000.
Acquisition of shipbuilding plants, \$87,000,000.
Operation of ships, \$60,000,000.
For acquisition of land for shipping board, \$75,000,000.
For transportation of shipyard employes, \$20,000,000.
For the purchase of ships, \$55,000,000.
For recruiting and training crews, \$6,250,000.
War industries board, \$1,150,000.
War trade board, \$3,500,000.
Secretary of labor to assist in furnishing war labor and in standardizing wages, \$5,500,000.
Secretary of labor for war labor administration, \$1,335,000.

RECAPITULATION OF APPROPRIATIONS.

Sixty-fifth congress, second session.	
Title of act.	Total.
Agriculture	\$27,875,353.00
Army	12,083,811,113.91
Diplomatic and consular.....	7,937,376.66
District of Columbia.....	15,046,768.66
Fortifications	5,437,814,112.85

Title of act.	Total.
Indian	\$11,021,910.00

Loans to our allies by the third and fourth liberty bond acts.....	3,000,000,000.00
War Finance corporation and capital issues committee....	500,200,000.00
Federal operation of railroads	500,000,000.00
Purchase of federal land bank bonds.....	200,000,000.00
Vocational rehabilitation of disabled soldiers and sailors	2,000,000.00
Combating Spanish influenza and other communicable diseases	1,000,000.00
Encouraging production and regulation of ores, metals and minerals	50,500,000.00
Encouraging production, etc., and distribution of food products	11,212,283.00
Other miscellaneous appropriations	1,666,000.00

Total miscellaneous appropriations

4,266,578,283.00

Permanent annual and indefinite appropriations, including \$588,049,168 interest on the public debt; \$153,814,000 for the sinking fund; \$30,904,255.36 for the preparation and issuance of loans; and \$51,946,030, the necessary approximated amount to pay the increased compensation to government employes....

896,453,398.36

Grand total.....36,298,405,223.07

*As passed by the house. †Includes \$9,421,030,122 contract obligations to be met by fee.

WILSON-CHAMBERLAIN CONTROVERSY.

Senator George E. Chamberlain of Oregon, chairman of senate military committee, in a speech in New York city Jan. 19, 1918, made this statement:

"The military establishment of America has fallen down. There is no use to be optimistic about a thing that does not exist. It has almost stopped functioning, my friends. Why? Because of inefficiency in every department of the government of the United States. We are trying to work it out. I speak not as a democrat but as an American citizen."

PRESIDENT RESENTS CRITICISM.

Replying to this criticism President Wilson issued the following, Jan. 21:

"Senator Chamberlain's statement as to the present inaction and ineffectiveness of the government is an astonishing and absolutely unjustifiable distortion of the truth. As a matter of fact, the war department has performed a task of unparalleled magnitude and difficulty with extraordinary promptness and efficiency.

"There have been delays and disappointments and partial miscarriages of plans, all of which

have been drawn into the foreground and exaggerated by the investigations which have been in progress since the congress assembled—investigations which drew indispensable officials of the department constantly away from their work and officers from their commands and contributed a great deal to such delay and confusion as had inevitably arisen.

"But by comparison with what has been accomplished, these things, much as they were to be regretted, were insignificant, and no mistake has been made which has been repeated.

"Nothing helpful or likely to speed or facilitate the war tasks of the government has come out of such criticism and investigation. I understand that reorganizations by legislation are to be proposed—I have not been consulted about them and have learned of them only at second hand—but their proposal came after effective measures of reorganization had been thoughtfully and maturely perfected, and inasmuch as these measures have been the result of experience, they are much more likely than any other to be effective. If the congress will but remove the few statutory obstacles of rigid departmental organization

which stand in their way. The legislative proposals I have heard of would involve long additional delays and turn our experience into mere lost motion.

"My association and constant conference with the secretary of war have taught me to regard him as one of the ablest public officials I have ever known. The country will soon learn whether he or his critics understand the business in hand.

"To add, as Senator Chamberlain did, that there is inefficiency in every department and bureau of the government is to show such ignorance of actual conditions as to make it impossible to attach any importance to his statement. I am bound to infer that that statement sprang out of opposition to the administration's whole policy rather than out of any serious intention to reform its practice."

CHAMBERLAIN DEFENDS SPEECH.

Senator Chamberlain read the president's statement and made the following reply on the same date:

"In my New York speech I had not prepared the address and spoke twenty minutes extemporaneously without notes. I pointed out that from Bunker Hill to the present time we had had no military organization or policy.

"The press report of my address was correct. But my argument was directed to the military establishment and not to other departments of the government, although it was broad enough to be subject to that interpretation. But those hearing it knew I referred merely to the military establishment and that the senate military committee had undertaken, through the bills for a war cabinet and a director of munitions, to work out changes in the establishment.

"I explained that these bills were not administrative measures. I did not misrepresent them.

"Secretary Baker's efforts to better his organization have my utmost approval. He has made much improvement. But the inherent weakness of his organization is that nobody between the army and the president has legal authority.

"There is the council of national defense, the war industries board and the clearance committee—all purely voluntary organizations—between the president and the army. The war cabinet and director of the munitions would be created by law with definite legal powers and duties, respectively, to map out and direct war policies and to have charge of war supplies. By this plan we would substitute a strong for the only weak link in the chain of organization.

"I regret very much that the administration is not with me. But I am acting under my oath and will have the approval of my own conscience even if not of the administration.

"The people are entitled to be let into the committee's confidence. If the people don't want it, that will be all right. It is their war."

REPEATS CHARGES IN SENATE.

On Jan. 24 Mr. Chamberlain made a speech in the senate in which he maintained that the president had not been informed as to the real state of affairs and was consequently ignorant of shortcomings of the war department. He criticized particularly the ordnance and quartermaster departments and the health conditions at the training camps. Letters were read by him from parents who had seen their sons die under the most distressing circumstances in the camp hospitals. The senator called particular attention to the delay in deciding upon the type of machine gun to use and in furnishing the soldiers with rifles and uniforms.

STATEMENT BY SECRETARY BAKER.

Newton D. Baker, secretary of war, feeling that the Chamberlain speech virtually accused the war department of having "fallen down"

in its work, asked that he be given an opportunity of being heard by the senate committee on military affairs. His request was granted and he appeared before the committee Jan. 28. For nearly six hours he told in detail what had been accomplished by the war department in raising, training and sending troops to Europe. Following are some of the more important statements made by the secretary:

The United States government could have from 1,500,000 to 2,000,000 troops in France in 1918; 500,000 men would be there by spring and another 1,500,000 would be ready to go as fast as they could be transported. More than 1,000,000 men in the national guard and national army were ready to go at any time.

With regard to the sites of the cantonments and the construction of the barracks the highest sanitary and medical experts of the country had been consulted. Everything possible had been done to protect the men. The food furnished the American soldiers had been of the highest quality.

All the uniforms of the soldiers were 100 per cent wool. As regarded the shortage in uniforms, the secretary considered it better to have the men go into camp and begin training than to wait until the last button was sewed on their coats.

Concerning artillery, Gen. Bliss had sent this message from the interallied conference in Paris: "The representatives of Great Britain and France state that their production of artillery is now established on so large a scale that they are able to equip completely all the American divisions as they arrive in France in 1918. Gen. Joffre and his associates bring to me the assurance that we are not taking from France and Great Britain the things which they need."

With regard to machine guns, Gen. Pershing did not desire to use the Lewis gun for land service, but it had been chosen by the experts for the air service. The marines who went abroad had been armed with Lewis guns, but these weapons had been retired and the regiments had been supplied with Chauchut rifles (light machine weapons) and Hotchkiss guns. The department had ordered every machine gun it could get.

The choice of a rifle had been made at a conference in the secretary's office at which were Gen. Crozier, Gen. Scott, Gen. Bliss, Gen. Kuhn, Gen. Pershing and ten experts from the ordnance department. It was unanimously decided to use the Springfield rifle and a modification of the Enfield rifle, which would allow it to be chambered for American ammunition. This had led to some delay, but Gen. Wood had suggested the advisability of calling out a large army before all the rifles had been manufactured, as the men needed many things before they needed rifles. He pointed out that the Kitchener army had drilled for months in civilian clothes and had used sticks for arms. Every soldier sent to Europe was armed with an excellent rifle. Only a few complaints had been received of bad treatment in the army hospitals and each case was investigated. Where there was a material shortage it was referred to the surgeon-general for instant correction. Where there was a breakdown in the human element it was referred for action to be taken which would be not only corrective but punitive.

PRESIDENT'S FOOD PROCLAMATION.

The following appeal for further saving of food was issued by President Wilson Jan. 26, 1918:

"Many causes have contributed to create the necessity for a more intensive effort on the part of our people to save food in order that we may supply our associates in the war with the sustenance vitally necessary to them in these days of privation and stress. The reduced productivity of Europe because of the

large diversion of man power to the war, the partial failure of harvests and the elimination of the more distant markets for foodstuffs through the destruction of shipping, places the burden of their subsistence very largely on our shoulders. The food administration has formulated suggestions which, if followed, will enable us to meet this great responsibility without any real inconvenience on our part.

"In order that we may reduce our consumption of wheat and wheat products by 30 per cent—a reduction imperatively necessary to provide the supply for overseas—wholesalers, jobbers and retailers should purchase and resell to their customers only 70 per cent of the amounts used in 1917. All manufacturers of alimentary pastes, biscuits, crackers, pastry and breakfast cereals should reduce their purchases and consumption of wheat and wheat flour to 70 per cent of their 1917 requirements and all bakers of bread and rolls to 80 per cent of their current requirements. Consumers should reduce their purchases of wheat products for home preparation to at most 70 per cent of those of last year, or, when buying bread, should purchase mixed cereal breads from the bakers.

"To provide sufficient cereal food, homes, public eating places, dealers and manufacturers should substitute potatoes, vegetables, corn, barley, oats and rice products, and the mixed cereal bread and other products of the bakers which contain an admixture of other cereals.

"In order that consumption may be restricted to this extent, Mondays and Wednesdays should be observed as wheatless days each week and one meal each day should be observed as a wheatless meal.

"In both homes and public eating places, in order to reduce the consumption of beef, pork and sheep products, Tuesday should be observed as meatless day in each week, one meatless meal should be observed in each day; while, in addition, Saturday in each week should be further observed as a day upon which there should be no consumption of pork products.

"A continued economy in the use of sugar will be necessary until later in the year.

"It is imperative that all waste and unnecessary consumption of all sorts of foodstuffs should be rigidly eliminated.

"The maintenance of the health and strength of our own people is vitally necessary at this time and there should be no dangerous restriction of the food supply; but the elimination of every sort of waste and the substitution of other commodities, of which we have more abundant supplies, for those which we need to save, will in no way impair the strength of our people and will enable us to meet one of the most pressing obligations of the war.

"I, therefore, in the national interest, take the liberty of calling upon every loyal American to take fully to heart the suggestions which are being circulated by the food administration and of begging that they be followed. I am confident that the great body of our women who have labored so loyally in co-operation with the food administration for the success of food conservation will strengthen their efforts and will take it as a part of their burden in this period of national service to see that the above suggestions are observed throughout the land.

"WOODROW WILSON."

NEW FOOD RULES.

The suggestions made by the food administration referred to in the president's proclamation were:

"The following is a summary of the rules that have been formulated by the United States food administration with the approval of the president, in order to effect the further conservation in foodstuffs necessary to support the allies and our own armed forces over the next four months.

"These rules are effective from the morning of Monday, Jan. 28.

"The effectiveness of these rules is dependent solely upon the good will of and the willingness to sacrifice by the American people. In the last analysis the success or failure of any plan such as here outlined rests with the people. We are dependent upon the co-operation of the trades.

"We have but one police force—the American woman—and we depend upon her to organize in co-operation with our state and local food administrators to see that these rules are obeyed by that small minority who may fail.

"Part of the rules will be enforced under the Lever food act; other parts are voluntary, and will depend for their success upon public sentiment. Our experience hitherto has shown a willingness of the vast majority of consumers and a full co-operation of the trades to undergo the self-sacrifice necessary to render such measures effective. The small minority who refuse to co-operate should not be allowed to defeat the nation's necessities.

"1. As their part in reducing the consumption of wheat flour, the consumers of the country are called upon in purchasing such flour to buy at the same time an equal weight of the other cereals (corn meal, corn starch, corn flour, hominy, corn grits, barley flour, rice, rice flour, oatmeal, rolled oats, buckwheat flour, potato flour, sweet potato flour, soy bean flour and feretita flours and meals). The housewife may use these products separately in making bread, cakes and pastry, or mix them as she thinks best.

"The retailers are to sell wheat flour only with an equal weight of these other cereals.

"2. Consumers will be able to obtain mixed cereal bread from their bakers, who will be required under the license regulations to mix 5 per cent of other cereals with their wheat flour, both in bread and rolls, and will be required gradually to increase this substitution until, beginning Feb. 24, a minimum of 20 per cent of such cereals is to be used. The food administration strongly urges on consumers the buying of this bread, which will be known as victory bread and will contain not less than 20 per cent of cereals other than wheat. Graham or whole wheat bread will also be given that name, because, containing, as they do, 25 per cent more of the wheat grain than white bread, they, too, will serve the purpose of saving wheat flour.

"If you bake bread at home use wheat substitutes; if you buy it, buy only victory bread.

"3. Manufacturers of macaroni, spaghetti, noodles, crackers, breakfast foods, pie, cake and pastry are not to purchase to exceed 70 per cent of the wheat flour they used during the corresponding months of 1917. These manufacturers will be performing a patriotic service by using cereals other than wheat in their productions.

"4. Wholesalers will be required, under license regulations, not to buy more than 70 per cent of their purchases of flour from millers as based on their purchases for the corresponding months of the previous year, and their sales to the retail trade must be in proportion of one pound of wheat flour to one pound of other cereals, this being the same proportion in which the retailer satisfies himself that the substitutes have been already purchased from another source.

"A ruling has been made that in making any combination sales under this program dealers shall name a price for each of the articles so sold which shall not represent more than a normal pre-war profit on any one of the articles sold.

"5. Millers of flour are to distribute their output through their customary channels and markets in such a manner that each city, town and district may receive its usual proportion. The wheat millers have been required to produce one barrel of flour (196 pounds) from

264 pounds of wheat. This is a white flour and represents from 2 per cent to 4 per cent higher extraction, than from last year's harvest.

Wheatless Days.

"6. To assist further in conservation, Monday and Wednesday of each week are to be observed as wheatless days and one meal of each day as a wheatless meal. This applies both in the home and in the public eating place, and on such days and meals no crackers, pastries, macaroni, breakfast foods or other cereals containing wheat should be used. The only exception to this is such small amounts of flour as may be needed for thickening soups or gravies or as a binder in corn bread or other cereal breads.

"7. On wheatless days and at wheatless meals the food administration urges that bread baked in the home be other than wheat bread. Where bread is purchased either for use in public eating places or in the home victory bread should be used if no wheat substitutes can be found.

"The federal food administrator in each state will announce the meal to be observed as a wheatless meal in his state. If no meal is designated, the United States food administration prefers that the evening meal be wheatless.

Meatless Days.

"8. It is further desired, in order that meat and pork products be conserved, that one meatless day (Tuesday) in every week, and one meatless meal in every day, be observed, and, in addition, two porkless days (Tuesday and Saturday) in every week, be strictly kept. By 'meatless' is meant without hog, cattle or sheep products. On other days use mutton and lamb in preference to beef or pork. By 'porkless' is meant without pork, bacon, ham, lard or hog products. On these days use fish, poultry and eggs.

"9. For local situations where exceptions are necessary application should be made to the state food administrators."

WILSON'S MESSAGE TO FARMERS.

President Wilson sent the following message to a farmers' war conference held at the University of Illinois in Urbana, Jan. 31, 1918:

"I am very sorry, indeed, that I cannot be present in person at the Urbana conference. I should like to enjoy the benefit of the inspiration and exchange of counsel which I know should obtain, but in the circumstances it has seemed impossible for me to be present, and, therefore, I can only send you a very earnest message expressing my interest and the thoughts which such a conference must bring prominently into every mind.

"I need not tell you, for I am sure you realize as keenly as I do, that we are as a nation in the presence of a great task which demands supreme sacrifice and endeavor of every one of us. We can give everything that is needed with the greater willingness and even satisfaction because the object of the war in which we are engaged is the greatest that free men have ever undertaken.

"It is to prevent the life of the world from being determined and the fortunes of men everywhere affected by small groups of military masters who seek their own interest and the selfish dominion throughout the world of the governments they unhappily for the moment control.

"You will not need to be convinced that it was necessary for us as a free people to take part in this war. It had raised its evil hand against us. The rulers of Germany had sought to exercise their power in such a way as to shut off our economic life so far as our intercourse with Europe was concerned, and to confine our people within the western hemisphere while they accomplished purposes which would have permanently impaired and im-

peded every process of our national life and have put the fortunes of America at the mercy of the imperial government of Germany. This was no threat. It had become a reality. Their hand of violence had been laid upon our own people and our own property in flagrant violation not only of justice but of the well recognized and long standing covenants of international law and treaty.

"We are fighting, therefore, as truly for the liberty and self-government of the United States as if the war of our own revolution had to be fought over again, and every man in every business in the United States must know by this time that his whole future fortune lies in the balance.

"Our national life and our whole economic development will pass under the sinister influences of foreign control if we do not win. We must win, therefore, and we shall win. I need not ask you to pledge your lives and fortunes with those of the rest of the nation to the accomplishment of that great end.

"You will realize, as I think statesmen on both sides of the water realize, that the culminating crisis of the struggle has come and that the achievements of this year on the one side or the other must determine the issue. It has turned out that the forces that fight for freedom, the freedom of men all over the world as well as our own, depend upon us in an extraordinary and unexpected degree for sustenance, for the supply of the materials by which men are to live and to fight, and it will be our glory when the war is over that we have supplied those materials and supplied them abundantly, and it will be all the more glory because in supplying them we have made our supreme effort and sacrifice.

"In the field of agriculture we have agencies and instrumentalities fortunately such as no other government in the world can show. The department of agriculture is undoubtedly the greatest practical and scientific agricultural organization in the world.

"And let me say that the stimulation of the agencies I have enumerated has been responded to by the farmers in splendid fashion. I dare say that you are aware that the farmers of this country are as efficient as any other farmers in the world. They do not produce more per acre than the farmers in Europe. It is not necessary that they should do so. It would perhaps be bad economy for them to attempt it. But they do produce by two to three or four times more per man, per unit of labor and capital than the farmers of any European country. They are more alert and use more labor saving devices than any other farmers in the world. And their response to the demands of the present emergency has been in every way remarkable.

"But I ought to say to you that it is not only necessary that these achievements should be repeated but that they should be exceeded.

"In fixing the prices of foodstuffs the government has sincerely tried to keep the interests of the farmer as much in mind as the interests of the communities which are to be served.

"I will not appeal to you to continue and renew and increase your efforts. I do not believe that it is necessary to do so."

WILSON'S BALTIMORE SPEECH.

In Baltimore, Md., April 6, 1918, on the anniversary of the nation's declaration of war against Germany, President Wilson made the following speech:

"Fellow Citizens: This is the anniversary of our acceptance of Germany's challenge to fight for our right to live and be free, and for the sacred rights of free men everywhere.

"The nation is awake. There is no need to call to it. We know what the war must cost, our utmost sacrifice, the lives of our fittest

men, and if need be, all that we possess. The loan we are met to discuss is one of the least parts of what we are called upon to give and to do, though in itself imperative.

"The people of the whole country are alive to the necessity of it and are ready to offer to the utmost, even where it involves a sharp skimming and daily sacrifice to lend out of meager earnings. They will look with reprobation and contempt upon those who can and will not, upon those who demand a higher rate of interest, upon those who think of it as a mere commercial transaction.

"I have not come, therefore, to urge the loan. I have come only to give you, if I can, a more vivid conception of what it is for.

"The reasons for this great war, the reason why it had to come, the need to fight it through, and the issues that hang upon its outcome are more clearly disclosed now than ever before. It is easy to see just what this particular loan means because the cause we are fighting for stands more sharply revealed than at any previous crisis of the momentous struggle.

"The man who knows least can now see plainly how the cause of justice stands and what the imperishable thing is he is asked to invest in. Men in America may be more sure than they ever were before that the cause is their own and that, if it should be lost, their own great nation's place and mission in the world would be lost with it.

"I call you to witness, my fellow countrymen, that at no stage of this terrible business have I judged the purposes of Germany intemperately. I should be ashamed in the presence of affairs so grave, so fraught with the destinies of mankind throughout all the world, to speak with truculence, to use the weak language of hatred or vindictive purpose.

"We must judge as we would be judged. I have sought to learn the objects Germany has in this war from the mouths of her own spokesmen and to deal as frankly with them as I wished them to deal with me. I have laid bare our own ideals, our own purposes, without reserve or doubtful phrase, and have asked them to say as plainly what it is that they seek.

"We have ourselves proposed no injustice, no aggression. We are ready, whenever the final reckoning is made, to be just to the German people, deal fairly with the German power as with all others. There can be no difference between peoples in the final judgment if it is indeed to be a righteous judgment.

"To propose anything but justice, even-handed and dispassionate justice, to Germany at any time, whatever the outcome of the war, would be to renounce and dishonor our own cause. For we ask nothing that we are not willing to accord.

"It has been with this thought that I have sought to learn from those who spoke for Germany whether it was justice or dominion and the execution of their own will upon other nations of the world that the German leaders were seeking. They have answered, answered in unmistakable terms. They have avowed that it was not justice but dominion and the unhindered execution of their own will.

"The avowal has not come from Germany's statesmen. It has come from her military leaders, who are her real rulers. Her statesmen have said that they wished peace and were ready to discuss its terms whenever their opponents were willing to sit down at the conference table with them.

"Her present chancellor has said—in indefinite and uncertain terms, indeed, and in phrases that often seem to deny their own meaning, but with as much plainness as he thought prudent—that he believed that peace should be based upon the principles which we had declared would be our own in the final settlement.

"At Brest-Litovsk her civilian delegates spoke in similar terms; professed their desire

to conclude a fair peace and accord to the peoples with whose fortunes they were dealing the right to choose their own allegiances.

"But action accompanied and followed the profession. Their military masters, the men who act for Germany and exhibit her purpose in execution, proclaimed a very different conclusion.

"We cannot mistake what they have done—in Russia, in Finland, in the Ukraine, in Roumania.

"The real test of their justice and fair play has come. From this we may judge the rest. They are enjoying in Russia a cheap triumph in which no brave or gallant nation can long take pride.

"A great people, helpless by their own act, lie for the time at their mercy. Their fair professions are forgotten. They nowhere set up justice, but everywhere impose their power and exploit everything for their own use and aggrandizement, and the peoples of conquered provinces are invited to be free under their dominion!

"Are we not justified in believing that they would do the same things at their western front if they were not there face to face with armies which even their countless divisions cannot overcome? If when they have felt their check to be final they should propose favorable and equitable terms with regard to Belgium and France and Italy, could they blame us if we concluded that they do so only to assure themselves of a free hand in Russia and the east?

"Their purpose is undoubtedly to make all the free and ambitious nations of the Baltic peninsula, all the lands that Turkey has dominated and misruled, subject to their will and ambition and build upon that dominion an empire of force upon which they fancy that they can then erect an empire of gain and commercial supremacy, an empire as hostile to the Americas as to the Europe which it will overawe, an empire which will ultimately master Persia, India and the peoples of the far east.

"In such a program our ideals, the ideals of justice and humanity and liberty, the principle of the free self-determination of nations upon which all the modern world insists, can play no part.

"They are rejected for the ideals of power, for the principle that the strong must rule the weak, that trade must follow the flag, whether those to whom it is taken welcome it or not, that the peoples of the world are to be made subject to the patronage and overlordship of those who have the power to enforce it.

"That program once carried out, America and all who care or dare to stand with her must arm and prepare themselves to contest the mastery of the world, a mastery in which the rights of common men, the rights of women and of all who are weak, must for the time being be trodden under foot and disregarded, and the old, age-long struggle for freedom and right must begin again at its beginning. Everything that America has lived for and loved and grown great to vindicate and bring to a glorious realization will have fallen in utter ruin and the gates of mercy will once more pitilessly shut upon mankind.

"The thing is preposterous and impossible, and yet is not that what the whole course and action of the German armies has meant wherever they have moved?

"I do not wish, even in this moment of utter disillusionment, to judge harshly or unrighteously. I judge only what the German arms have accomplished with unpinning thoroughness throughout every fair region they have touched. What, then, are we to do?

"For myself, I am ready, ready still, ready even now, to discuss a fair and just and honest peace at any time that it is sincerely proposed, a peace in which the strong and the weak shall fare alike. But the answer, when I proposed such a peace, came from the Ger-

man commanders in Russia, and I cannot mistake the meaning of the answer.

"I accept the challenge. I know that you accept it. All the world shall know that you accept it. It shall appear in the utter sacrifice and self-forgetfulness with which we shall give all that we love and all that we have to redeem the world and make it fit for free men like ourselves to live in.

"This now is the meaning of all that we do. Let everything that we say, my fellow countrymen, everything that we henceforth plan and accomplish, ring true to this response till the majesty and might of our concerted power shall fill the thought and utterly defeat the force of those who flout and misprize what we honor and hold dear.

"Germany has once more said that force, and force alone, shall decide whether justice and peace shall reign in the affairs of men; whether right, as America conceives it, or dominion, as she conceives it, shall determine the destinies of mankind.

"There is, therefore, but one response possible from us: force to the utmost, force without stint or limit, the righteous and triumphant force which shall make right the law of the world and cast every selfish dominion down in the dust."

LIBERTY DAY PROCLAMATION.

To promote the success of the third liberty loan President Wilson on April 18, 1918, issued the following proclamation:

An enemy who has grossly abused the power of organized government, and who seeks to dominate the world by the might of the sword, challenges the rights of America and the liberty and life of all the free nations of the earth. Our brave sons are facing the fire of battle in defense of the honor and rights of America and the liberty of nations. To sustain them and to assist our gallant associates in the war a generous and patriotic people have been called upon to subscribe to the third liberty loan.

Now therefore I, Woodrow Wilson, president of the United States of America, do appoint Friday, the 26th day of April, 1918, as Liberty day. On the afternoon of that day I request the people of the United States to assemble in their respective communities and liberally pledge anew their financial support to sustain the nation's cause. Patriotic demonstrations should be held in every city, town and hamlet throughout the land under the general direction of the secretary of the treasury and the immediate direction of the liberty loan committees organized by the federal reserve banks. Let the nation's response to the third liberty loan express in unmistakable terms the determination of America to fight for peace, the permanent peace of justice.

For the purpose of participating in liberty day celebrations all employees of the federal government throughout the country whose services can be spared may be excused at 12 o'clock noon Friday, the 26th of April.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this 18th day of April, in the year of our Lord 1918 and of the independence of the United States of America the one hundred and forty-second.

WOODROW WILSON.

By the president:
ROBERT LANSING, Secretary of State.

WILSON'S RED CROSS SPEECH.

On the occasion of the opening of the second Red Cross campaign for \$100,000,000 President Wilson made the following speech at the Metropolitan Opera house in New York city, Saturday night, May 18, 1918:

"Mr. Chairman and Fellow Countrymen: I should be very sorry to think that Mr. Davi-

son in any degree curtailed his exceedingly interesting speech for fear that he was postponing mine, because I am sure you listened with the same intent and intimate interest with which I listened to the extraordinarily vivid account he gave of the things which he had realized because he had come in contact with them on the other side of the waters.

"We compass them with our imagination; he compassed them in his personal experience, and I am not come here to-night to review for you the work of the Red Cross; I am not competent to do so, because I have not had the time or the opportunity to follow it in detail. I have come here simply to say a few words to you as to what it all seems to me to mean, and it means a great deal.

"There are two duties with which we are face to face. The first duty is to win the war. And the second duty, that goes hand-in-hand with it, is to win it greatly and worthily, showing the real quality of our power not only, but the real quality of our purpose and of ourselves.

"Of course, the first duty, the duty that we must keep in the foreground of our thought until it is accomplished, is to win the war. I have heard gentlemen recently say that we must get 5,000,000 men ready. Why limit it to 5,000,000?

"I have asked the congress of the United States to name no limit, because the congress intends, I am sure, as we all intend, that every ship that can carry men or supplies shall go laden upon every voyage with every man and every supply she can carry.

"And we are not to be diverted from the grim purpose of winning the war by any insincere approaches upon the subject of peace. I can say with a clear conscience that I have tested those intimations and have found them insincere. I now recognize them for what they are, an opportunity to have a free hand, particularly in the east, to carry out purposes of conquest and exploitation.

"Every proposal with regard to accommodation in the west involves a reservation with regard to the east. Now, so far as I am concerned, I intend to stand by Russia as well as France."

A voice from the audience interrupted with: "God bless you."

"The helpless and the friendless are the very ones that need friends and succor," the president continued. "and if any man in Germany thinks we are going to sacrifice anybody for our own sake I tell him now he is mistaken.

"For the glory of this war, my fellow citizens, in so far as we are concerned, is that it is, perhaps for the first time in history, an unselfish war. I could not be proud to fight for a selfish purpose, but I can be proud to fight for mankind.

"If they wish peace let them come forward through accredited representatives and lay their terms on the table. We have laid ours and they know what they are.

"But behind all this grim purpose, my friends, lies the opportunity to demonstrate not only force which will be demonstrated to the utmost but the opportunity to demonstrate character, and it is that opportunity that we have most conspicuously in the work of the Red Cross.

"Not that our men in arms do not represent our character, for they do, and it is a character which those who see and realize appreciate and admire; but their duty is the duty of force. The duty of the Red Cross is the duty of mercy and succor and friendship.

"Have you formed a picture in your imagination of what this war is doing for us and for the world? In my own mind I am convinced that not a hundred years of peace could have knitted this nation together as this single year of war has knitted it together; and,

better even than that, if possible, it is knitting the world together.

"Look at the picture. In the center of the scene four nations engaged against the world, and at every point of vantage showing that they are seeking selfish aggrandizement; and, against them, twenty-three governments representing the greater part of the population of the world drawn together into a new sense of community of interest, a new sense of community of purpose, a new sense of unity of life.

"The secretary of war told me an interesting incident the other day. He said when he was in Italy a member of the Italian government was explaining to him the many reasons why Italy felt near to the United States.

"If you want to try an interesting experiment go up to any one of these troop trains and ask in English how many of them have been in America and see what happens."

"He tried the experiment. He went up to a troop train and he said, 'How many of you boys have been in America?' and he said it seemed to him as if half of them sprang up: 'Me from San Francisco'; 'Me from New York'; all over. There was part of the heart of America in the Italian army. People that had been knitted to us by association, who knew us, who had lived among us, who had worked shoulder to shoulder with us, and now friends of America, were fighting for their native Italy.

"Friendship is the only cement that will ever hold the world together. And this intimate contact of the Red Cross with the peoples who are suffering the terrors and deprivations of this war is going to be one of the greatest instrumentalities of friendship that the world ever knew, and the center of the heart of it all, if we sustain it properly, will be this land that we so dearly love.

"My friends, a great day of duty has come, and duty finds a man's soul as no kind of work can ever find it.

"May I say this—the duty that faces us all now is to serve one another, and no man can afford to make a fortune out of this war. There are men among us who have forgotten that, if they ever saw it. Some of you are old enough—I am old enough—to remember men who made fortunes out of the civil war, and you know how they were regarded by their fellow citizens. That was a war to save one country—this is a war to save the world.

"And your relation to the Red Cross is one of the relations which will relieve you of the stigma. You can't give anything to the government of the United States; it won't accept it. There is a law of congress against accepting even services without pay. The only thing that the government will accept is a loan, and duties performed; but it is a great deal better to give than to lend or to pay, and your great channel for giving is the American Red Cross.

"Down in your hearts you can't take very much satisfaction, in the last analysis, in lending money to the government of the United States, because the interest which you draw will burn your pockets; it is a commercial transaction, and some men have even dared to cavil at the rate of interest, not knowing the incidental commentary that constitutes upon their attitude.

"But when you give, something of your heart, something of your soul, something of yourself goes with the gift, particularly when it is given in such form that it never can come back by way of direct benefit to yourself. You know there is the old cynical definition of gratitude, as 'the lively expectation of favors to come.'

"Well, there is no expectation of favors to come in this kind of giving. These things are bestowed in order that the world may be a fitter place to live in, that men may be succored, that homes may be restored, that

suffering may be relieved, that the face of the earth may have the blight of destruction taken away from it, and that wherever force goes there shall go mercy and helpfulness.

"And when you give, give absolutely all that you can spare, and don't consider yourself liberal in the giving. If you give with self-adulation you are not giving; at all you are giving to your own vanity; but if you give until it hurts, then your heart blood goes into it.

"And think what we have here! We call it the American Red Cross, but it is merely a branch of a great international organization, which is not only recognized by the statutes of each of the civilized governments of the world, but it is recognized by international agreement and treaty as the recognized and accepted instrumentality of mercy and succor. And one of the deepest stains that rests upon the reputation of the German army is that they have not respected the Red Cross.

"That goes to the root of the matter. They have not respected the instrumentality they themselves participated in setting up as the thing which no man was to touch, because it was the expression of common humanity. We are members, by being members of the American Red Cross, of a great fraternity and comradeship which extends all over the world, and this cross which these women bore to-day is an emblem of Christianity itself.

"It fills my imagination, ladies and gentlemen, to think of the women all over this country who are busy to-night and are busy every night and every day doing the work of the Red Cross, busy with a great eagerness to find out the most serviceable thing to do, busy with a forgetfulness of all the old frivolities of their social relationships, ready to curtail the duties of the household in order that they may contribute to this common work that all their hearts are engaged in, and in doing which their hearts become acquainted with each other.

"When you think of this, you realize how the people of the United States are being drawn together into a great intimate family whose heart is being used for the service of the soldiers not only, but for the service of civilians where they suffer and are lost in a maze of distresses and distractions.

"And you have, then, this noble picture of justice and mercy as the two servants of liberty. For only where men are free do they think the thoughts of comradeship; only where they are free do they think the thoughts of sympathy; only where they are free are they mutually helpful; only where they are free do they realize their dependence upon one another and their comradeship in a common interest and common necessity.

"I heard a story told the other day that was ridiculous, but it is worth repeating, because it contains the germ of truth. An Indian was enlisted in the army. He returned to the reservation on a furlough. He was asked what he thought of it. He said: 'No much good; too much salute; not much shoot.' Then he was asked: 'Are you going back?' 'Yes.' 'Well, do you know what you are fighting for?' 'Yes, me know; fight to make whole damn world democratic party.'

"He had evidently misunderstood some innocent sentence of my own. But, after all, although there is no party purpose in it, he got it right as far as the word 'party,' to make the whole world democratic in the sense of community of interest and of purpose, and if you ladies and gentlemen could read some of the touching dispatches which come through official channels, for even through these channels there come voices of humanity that are infinitely pathetic, if you could catch some of those voices that speak the utter longing of oppressed and helpless peoples all over the

world to hear something like the 'Battle Hymn of the Republic,' to hear the feet of the great hosts of liberty going to set them free, to set their minds free, set their lives free, set their children free, you would know what comes into the heart of those who are trying to contribute all the brains and power they have to this great enterprise of liberty.

"I summon you to the comradeship, I summon you in this next week to say how much and how sincerely and how unanimously you sustain the heart of the world."

PRESIDENT ASKS CONGRESS FOR NEW TAXES.

Owing to a division of opinion among the members of congress as to the necessity of passing new revenue bills for war expenses, President Wilson appeared before a joint session of the house and senate on May 27, 1918, and made the following speech:

"It is with unaffected reluctance that I come to ask you to prolong your session long enough to provide more adequate resources for the treasury for the conduct of the war. I have reason to appreciate as fully as you do how arduous the session has been. Your labors have been severe and protracted. You have passed a long series of measures which required the debate of many doubtful questions of judgment and many exceedingly difficult questions of principle as well as of practice.

"The summer is upon us, in which labor and counsel are twice arduous and are constantly apt to be impaired by lassitude and fatigue. The elections are at hand and we ought as soon as possible to go and render an intimate account of our trusteeship to the people who delegated us to act for them in the weighty and anxious matters that crowd upon us in these days of critical choice and action.

"But we dare not go to the elections until we have done our duty to the full. These are days when duty stands stark and naked, and even with closed eyes we know it is there. Excuses are unavailing. We have either done our duty or we have not. The fact will be as gross and plain as the duty itself. In such a case lassitude and fatigue seem negligible enough. The facts are tonic and suffice to freshen the labor.

"And the facts are these: Additional revenues must manifestly be provided for. It would be a most unsound policy to raise too large a proportion of them by loan, and it is evident that the \$4,000,000,000 now provided for by taxation will not of themselves sustain the greatly enlarged budget to which we must immediately look forward.

"We cannot, in fairness, wait until the end of the fiscal year is at hand to apprise our people of the taxes they must pay on their earnings of the present calendar year, whose accountings and expenditures will then be closed. We cannot get increased taxes unless the country knows what they are to be and practices the necessary economy to make them available.

"Definiteness, early definiteness, as to what its tasks are to be is absolutely necessary for the successful administration of the treasury; it cannot frame fair and workable regulations in haste, and it must frame its regulations in haste if it is not to know its exact task until the very eve of its performance.

"The present tax laws are marred, moreover, by inequities which ought to be remedied. Indisputable facts, every one; and we cannot alter or blink them. To state them is argument enough. And yet, perhaps, you will permit me to dwell for a moment upon the situation they disclose. Enormous loans freely spent in the stimulation of industry of almost every sort produce inflations and extravagances which presently make the whole

economic structure questionable and insecure and the very basis of credit is cut away.

"Only fair, equitably distributed taxation of the widest incidence and drawing chiefly from the sources which would be likely to demoralize credit by their very abundance can prevent inflation and keep our industrial system free of speculation and waste.

"We shall naturally turn, therefore, I suppose, to war profits and incomes and luxuries for the additional taxes. But the war profits and incomes upon which the increased taxes will be levied will be the profits and incomes of the calendar year 1918. It would be manifestly unfair to wait until the early months of 1919 to say what they are to be. It might be difficult, I should imagine, to run the mill with water that had already gone over the wheel.

"Moreover, taxes of that sort will not be paid until June of next year and the treasury must anticipate them. It must use the money they are to produce before it is due. It must sell short time certificates of indebtedness. In the autumn a much larger sale of long time bonds must be effected than has yet been attempted. What are the bankers to think of the certificates if they do not certainly know where the money is to come from which is to take them up? And how are investors to approach the purchase of bonds with any sort of confidence or knowledge of their own affairs if they do not know what taxes they are to pay and what economies and adjustments of their business they must effect?

"I cannot assure the country of a successful administration of the treasury in 1918 if the question of further taxation is to be left undecided until 1919.

"The consideration that dominates every other now, and makes every other seem trivial and negligible, is the winning of the war. We are not only in the midst of the war; we are at the very peak and crisis of it. Hundreds of thousands of our men, carrying our hearts with them and our fortunes, are in the field and ships are crowding faster and faster to the ports of France and England with regiment after regiment, thousand after thousand, to join them until the enemy shall be beaten and brought to a reckoning with mankind.

"There can be no pause or intermission. The great enterprise must, on the contrary, be pushed with greater and greater energy. The volume of our might must steadily and rapidly be augmented until there can be no question of resisting it.

"If that is to be accomplished, gentlemen, money must sustain it to the utmost. Our financial program must no more be left in doubt or suffered to lag than our ordnance program, or our ship program, or our munitions program, or our program for making millions of men ready. These others are not programs, indeed, but mere plans upon paper, unless there is to be an unquestionable supply of money.

"That is the situation, and it is the situation which creates the duty, no choice or preference of ours. There is only one way to meet that duty. We must meet it without selfishness or fear of consequences. Politics is adjoined. The elections will go to those who think least of it; to those who go to the constituencies without explanation or excuses, with a plain record of duty faithfully and disinterestedly performed.

"I, for one, am always confident that the people of this country will give a just verdict upon the service of the men who act for them when the facts are such that no man can disguise or conceal them. There is no danger of deceit now. An intense and pitiless light beats upon every man and every action in this tragic plot of war that is now upon the stage.

"If lobbyists hurry to Washington to at-

tempt to turn what you do in the matter of taxation to their protection or advantage the light will beat also upon them.

"There is abundant fuel for the light in the records of the treasury with regard to profits of every sort. The profiteering that cannot be got at by the restraints of conscience and love of country can be got at by taxation. There is such profiteering now and the information with regard to it is available and indisputable.

"I am advising you to act upon this matter of taxation now, gentlemen, not because I do not know that you can see and interpret the facts and the duty they impose just as well and with as clear a perception of the obligations involved as I can, but because there is a certain solemn satisfaction in sharing with you the responsibilities of such a time.

"The world never stood in such case before. Men never before had so clear or so moving a vision of duty. I know that you will begrudge the work to be done here by us no more than the men begrudge us theirs who lie in the trenches and sally forth to their death. There is a stimulating comradeship knitting us all together.

"And this task to which I invite your immediate consideration will be performed under favorable influences if we will look to what the country is thinking and expecting and care nothing at all for what is being said and believed in the lobbies of Washington hotels, where the atmosphere seems to make it possible to believe what is believed nowhere else.

"Have you not felt the spirit of the nation rise and its thought become a single and common thought since these eventful days came, in which we have been sending our boys to the other side? I think you must read that thought, as I do, to mean this, that the people of this country are not only united in the resolute purpose to win this war, but are ready and willing to bear any burden and undergo any sacrifice that it may be necessary for them to bear in order to win it.

"We need not be afraid to tax them if we lay taxes justly. They know that the war must be paid for, and that it is they who must pay for it, and if the burden is justly distributed and the sacrifice made a common sacrifice, from which none escapes who can bear it at all, they will carry it cheerfully and with a sort of solemn pride.

"I have always been proud to be an American, and was never more proud than now, when all that we have said and all that we have foreseen about our people is coming true. The great days have come when the only thing that they ask for or admire is duty, greatly and adequately done; when their only wish for America is that she may share the freedom she enjoys; when a great, compelling sympathy wells up in their hearts for men everywhere who suffer and are oppressed, and when they see at last the high uses for which their wealth has been piled up and their mighty power accumulated, and, counting neither blood nor treasure, now that the final day of opportunity has come, rejoice to spend and to be spent through a long night of suffering and terror, in order that they and men everywhere may see the dawn of a day of righteousness and justice and peace. Shall we grow weary when they bid us act?

WILSON'S MOUNT VERNON ADDRESS, JULY 4, 1918.

Addressing foreign diplomats and representatives of foreign born Americans gathered about the tomb of George Washington at Mount Vernon, Va., July 4, 1918, President Wilson spoke as follows:

"Gentlemen of the Diplomatic Corps and My Fellow Citizens: I am happy to draw apart with you to this quiet place of old counsel in order to speak a little of the meaning of this day of our nation's independence. The

place seems very still and remote. It is as serene and untouched by the hurry of the world as it was in those great days long ago when Gen. Washington was here and held leisurely conference with the men who were to be associated with him in the creation of a nation.

"From these gentle slopes they looked out upon the world and saw it whole, saw it with the light of the future upon it, saw it with modern eyes that turned away from a past which men of liberated spirits could no longer endure.

"It is for that reason that we cannot feel, even here, in the immediate presence of this sacred tomb, that this is a place of death. It was a place of achievement. A great promise that was meant for all mankind was here given plain and reality.

"The associations by which we are here surrounded are the inspiriting associations of that noble death which is only a glorious consummation. From this green hillside we also ought to be able to see with comprehending eyes the world that lies about us and should conceive anew the purposes that must set men free.

"It is significant—significant of their own character and purpose and of the influences they were setting afoot—that Washington and his associates, like the barons at Runnymede, spoke and acted not for a class but for a people. It has been left for us to see to it that it shall be understood that they spoke and acted not for a single people only but for all mankind.

"They were thinking not of themselves and of the material interests which centered in the little groups of landholders and merchants and men of affairs with whom they were accustomed to act in Virginia and the colonies to the north and south of her, but of a people which wished to be done with classes and special interests and the authority of men whom they had not themselves chosen to rule over them.

"They entertained no private purpose, desired no peculiar privilege. They were consciously planning that men of every class should be free and America a place to which men out of every nation might resort who wished to share with them the rights and privileges of free men.

"And we take our cue from them—do we not? We intend what they intended. We here in America believe our participation in this present war to be only the fruitage of what they planned.

"Our case differs from theirs only in this, that it is our inestimable privilege to concert with men out of every nation what shall make not only the liberties of America secure but the liberties of every other people as well. We are happy in the thought that we are permitted to do what they would have done had they been in our place.

"There must now be settled once for all what was settled for America in the great age upon whose inspiration we draw to-day. This is surely a fitting place from which we may fortify our spirits for its accomplishment. And this is the appropriate place from which to avow, alike to the friends who look on and to the friends with whom we have the happiness to be associated in action, the faith and purpose with which we act.

"This, then, is our conception of the great struggle in which we are engaged. The plot is written plain upon every scene and every act of the supreme tragedy. On the one hand stand the peoples of the world—not only the peoples actually engaged, but many others also who suffer under mastery, but cannot act; peoples of many races and in every part of the world—the people of stricken Russia still, among the rest, though they are for the moment unorganized and helpless.

"Opposed to them, masters of many armies,

stand an isolated, friendless group of governments who speak no common purpose, but only selfish ambitions of their own by which none can profit but themselves, and whose peoples are fuel in their hands; governments which fear their people and yet are for the time their sovereign lords, making every choice for them and disposing of their lives and fortunes as they will, as well as of the lives and fortunes of every people who fall under their power—governments clothed with the strange trappings and the primitive authority of an age that is altogether alien and hostile to our own.

"The past and the present are in deadly grapple, and the peoples of the world are being done to death between them.

"There can be but one issue. The settlement must be final. There can be no compromise. No half-way decision would be tolerable. No half-way decision is conceivable. These are the ends for which the associated peoples of the world are fighting and which must be conceded them before there can be peace:

"1. The destruction of every arbitrary power anywhere that can separately, secretly and of its single choice disturb the peace of the world; or, if it cannot be presently destroyed, at the least its reduction to virtual impotence.

"2. The settlement of every question, whether of territory, of sovereignty, of economic arrangement or of political relationship, upon the basis of the free acceptance of that settlement by the people immediately concerned, and not upon the basis of the material interest or advantage of any other nation or people which may desire a different settlement for the sake of its own exterior influence or mastery.

"3. The consent of all nations to be governed in their conduct toward each other by the same principles of honor and of respect for the common law of civilized society that govern the individual citizens of all modern states in their relations with one another; to the end that all promises and covenants may be sacredly observed, no private plots or conspiracies hatched, no selfish injuries wrought with impunity, and a mutual trust established upon the handsome foundation of a mutual respect for right.

"4. The establishment of an organization of peace which shall make it certain that the combined power of free nations will check every invasion of right and serve to make peace and justice the more secure by affording a definite tribunal of opinion to which all must submit and by which every international readjustment that cannot be amicably agreed upon by the peoples directly concerned shall be sanctioned.

"These great objects can be put into a single sentence. What we seek is the reign of law, based upon the consent of the governed and sustained by the organized opinion of mankind.

"These great ends cannot be achieved by debating and seeking to reconcile and accommodate what statesmen may wish, with their projects for balances of power and of national opportunity. They can be realized only by the determination of what the thinking peoples of the world desire, with their longing hope for justice and for social freedom and opportunity.

"I can fancy that the air of this place carries the accents of such principles with a peculiar kindness. Here were started forces which the great nation against which they were primarily directed at first regarded as a revolt against its rightful authority, but which it has long since seen to have been a step in the liberation of its own people as well as of the people of the United States, and I stand here now to speak—speak proudly and with confident hope—of the spread of this revolt, this liberation, to the great stage of the world itself.

"The blinded rulers of Prussia have roused forces they knew little of—forces which, once

roused, can never be crushed to earth again; for they have at their heart an inspiration and a purpose which are deathless and of the very stuff of triumph!"

MESSAGE TO FOREIGN BORN.

One of the features of the celebration of July 4, 1918, was the part taken in it by foreign-born residents of the United States. These held gatherings in all parts of the country to pledge anew their allegiance to the land of their adoption. To them President Wilson sent the following message:

"You are met, my fellow citizens, to commemorate the signing of that declaration of independence which marked the awakening of a new spirit in the lives of nations. Since the birth of our republic we have seen this spirit grow. We have heard the demand and watched the struggle for self-government spread and triumph among many peoples. We have come to regard the right to political liberty as the common right of humankind. Year after year, within the security of our borders, we have continued to rejoice in the peaceful increase of freedom and democracy throughout the world. And yet now, suddenly, we are confronted with a menace which endangers everything that we have won and everything that the world has won.

"In all its old insolence, with all its ancient cruelty and injustice, military autocracy has again armed itself against the pacific hopes of men. Having suppressed self-government among its own people by an organization maintained in part by falsehood and treachery, it has set out to impose its will upon its neighbors and upon us. One by one it has compelled every civilized nation in the world either to forego its aspirations or to declare war in their defense. We find ourselves fighting again for our national existence. We are face to face with the necessity of asserting anew the fundamental right of free men to make their own laws and choose their own allegiance, or else permit humanity to become the victim of a ruthless ambition that is determined to destroy what it cannot master.

"Against its threat the liberty loving people of the world have risen and allied themselves. No fear has deterred them and no bribe of material well being has held them back. They have made sacrifices such as the world has never known before, and their resistance in the face of death and suffering has proved that the aim which animates the German effort can never hope to rule the spirit of mankind. Against the horror of military conquest, against the emptiness of living in mere bodily contentment, against the desolation of becoming part of a state that knows neither truth nor honor, the world has so revolted that even people long dominated and suppressed by force have now begun to stir and arm themselves.

"Centuries of subjugation have not destroyed the racial aspirations of the many distinct peoples of eastern Europe, nor have they accepted the sordid ideals of their political and military masters. They have survived the slow persecutions of peace as well as the agonies of war, and now demand recognition for their just claims to autonomy and self-government. Representatives of these races are with you to-day, voicing their loyalty to our ideals and offering their services in the common cause. I ask you, fellow citizens, to unite with them in making this our independence day the first that shall be consecrated to a declaration of independence for all the peoples of the world."

LABOR DAY MESSAGE.

The following message on labor and the war was written by President Wilson for publication on Labor day, Sept. 2, 1918:

"My Fellow Citizens: Labor day, 1918, is not like any Labor day that we have known. Labor day was always deeply significant with us. Now it is supremely significant. Keenly as we were aware a year ago of the enter-

prise of life and death upon which the nation had embarked, we did not perceive its meaning as clearly as we do now.

"We knew that we were all partners and must stand and strive together, but we did not realize as we do now that we are all enlisted men, members of a single army, of many parts and many tasks, but commanded by a single obligation, our faces set toward a single object.

"We now know that every tool in every essential industry is a weapon, and a weapon wielded for the same purpose that an army rifle is wielded—a weapon which if we were to lay down no rifle would be of any use.

"And a weapon for what? What is the war for? Why are we enlisted? Why should we be ashamed if we were not enlisted? At first it seemed hardly more than a war of defense against the military aggression of Germany. Belgium had been violated, France invaded, and Germany was afield again, as in 1870 and 1866, to work out her ambitions in Europe; and it was necessary to meet her force with force. But it is clear now that it is much more than a war to alter the balance of power in Europe.

"Germany, it is now plain, was striking at what free men everywhere desire and must have—the right to determine their own fortunes, to insist upon justice, and to oblige governments to act for them and not for the private and selfish interest of a governing class. It is a war to make the nations and peoples of the world secure against every such power as the German autocracy represents.

"It is a war of emancipation. Not until it is won can men anywhere live free from constant fear or breathe freely while they go about their daily tasks and know that governments are their servants, not their masters.

"This is, therefore, the war of all wars which labor should support, and support with all its concentrated power. The world cannot be safe, men's lives cannot be secure, no man's rights can be confidently and successfully asserted against the rule and mastery of arbitrary groups and special interests, so long as governments like that which, after long premeditation, drew Austria and Germany into this war are permitted to control the destinies and the daily fortunes of men and nations, plotting while honest men work, laying the fires of which innocent men, women and children are to be the fuel.

"You know the nature of this war. It is

a war which industry must sustain. The army of laborers at home is as important, as essential, as the army of fighting men in the far fields of actual battle.

"And the laborer is not only needed as much as the soldier. It is his war. The soldier is his champion and representative.

"To fail to win would be to imperil everything that the laborer has striven for and held dear since freedom first had its dawn and his struggle for justice began. The soldiers at the front know this. It steels their muscles to think of it. They are crusaders. They are fighting for no selfish advantage for their own nation. They would despise any one who fought for the selfish advantage of any nation. They are giving their lives that homes everywhere, as well as the homes they love in America, may be kept sacred and safe and men everywhere be free, as they insist upon being free.

"They are fighting for the ideals of their own land—great ideals, immortal ideals, ideals which shall light the way for all men to the places where justice is done and men live with lifted heads and emancipated spirits. That is the reason they fight with solemn joy and are invincible.

"Let us make this, therefore, a day of fresh comprehension, not only of what we are about, and of renewed and clear eyed resolution, but a day of consecration also, in which we devote ourselves without pause or limit to the great task of setting our own country and the whole world free to render justice to all, and of making it impossible for small groups of political rulers anywhere to disturb our peace or the peace of the world or in any way to make tools and puppets of those upon whose consent and upon whose power their own authority and their own very existence depend.

"We may count upon each other. The nation is of a single mind. It is taking counsel with no special class. It is serving no private or single interest. Its own mind has been cleared and fortified by these days which burn the dross away.

"The light of a new conviction has penetrated to every class among us. We realize as we never realized before that we are comrades, dependent upon one another, irresistible when united, powerless when divided. And so we join hands to lead the world to a new and better day.

"WOODROW WILSON."

RESTRICTION OF COAL CONSUMPTION.

The following order was issued by Dr. Harry A. Garfield, United States fuel administrator, in Washington, D. C., Jan. 17, 1918:

"United States Fuel Administration, Washington, D. C., Jan. 17.—Regulation making provision for a more adequate supply of fuel for railroads, domestic consumers, public utilities and other uses necessary to the national security.

"The United States fuel administration, acting under the authority of an executive order of the president of the United States, dated Aug. 23, 1917, appointing said administrator, in furtherance of the purposes of said order and of the purposes of the act of congress therein referred to, approved Aug. 10, 1917, and finding it essential effectively to carry out the provisions of this act, to make provision for a more adequate supply of fuel for railroads, domestic consumers, public utilities and for other uses necessary to the national security in certain parts of the United States, hereby makes and prescribes the following regulations:

"Section 1. Until further order of the United States fuel administrator, all persons selling fuel in whatever capacity shall, in filling their contracts or orders now on hand, give preference to necessary current require-

ments of: Railroads, domestic consumers, hospitals, charitable institutions, army and navy cantonments, public utilities, by-product coke plants supplying gas for household use, telephone and telegraph plants, shipping for bunker purposes, the United States for strictly governmental purposes (not including factories or plants working on contracts for the United States), manufacturers of perishable food or of food for necessary immediate consumption, and municipal, county or state governments for necessary public uses.

"Any tonnage remaining after the foregoing preferred shipments have been made may be applied in filling any other contracts or orders.

"Sec. 2. On the following days, namely, Jan. 18, 19, 20, 21 and 22, 1918, the state fuel administrators and their accredited representatives in the various communities in the territory in which this regulation applies are hereby empowered and directed to divert such fuel as arrives in such communities in car-load lots to meet the current requirements and to provide an adequate and normal supply for such consumers of fuel as are specified in section 1 hereof.

"Sec. 3. On the following days, namely, Jan. 18, 19, 20, 21 and 22, 1918, and, also, on each and every Monday beginning Jan. 28,

1918, and continuing up to and including March 25, 1918, no manufacturer or manufacturing plant shall burn fuel or use power derived from fuel for any purpose, with the following exceptions:

"A. Plants which necessarily must be continuously operated seven days each week to avoid serious injury to the plant itself or its contents may use only such quantities of fuel as is necessary to prevent such injury to the plant or its contents.

"B. Manufacturers or plants manufacturing perishable foods or foods for necessary immediate consumption;

"C. Manufacturers of food not perishable and not necessary for immediate consumption may burn fuel to the extent authorized by the fuel administrator of the state in which such plant is located or by his duly authorized representative upon application by the United States food administrator;

"D. Plants necessary to the printing and publication of daily papers may burn fuel or use power derived therefrom as usual, except that on every Monday from Jan. 21 to March 25, 1918, inclusive, they may burn fuel or use power derived therefrom only to such extent as is necessary to print and publish such editions as such plants customarily print and publish on legal holidays other than the Sabbath; or, if such plants do not customarily print or publish any editions on such legal holidays, they may burn fuel or use such power to such extent as is necessary to issue one edition on the said Mondays;

"E. Printing establishments may burn fuel on Jan. 18, 19, 20, 21 and 22, 1918, to such extent as is necessary to issue current numbers of magazines and other publications periodically issued.

"Sec. 4. On each Monday, beginning Jan. 21, 1918, and continuing up to and including Monday, March 25, 1918, no fuel shall be burned (except to such extent as is essential to prevent injury to property from freezing) for the purpose of supplying heat for:

"A. Any business or professional offices, except offices used by the United States, state, county or municipal governments, transportation companies, public utility companies, telephone or telegraph companies, banks, trust companies, physicians or dentists.

"B. Wholesale or retail stores, or any other stores, business houses or business buildings whatever, except that for the purpose of selling food only, stores may maintain necessary heat on any of the specified days until 12 o'clock noon; and except that for the purpose of selling drugs and medical supplies only, stores may maintain necessary heat throughout the day and evening.

"C. Theaters, moving picture houses, bowling alleys, billiard rooms, private or public dance halls, or any other place of public amusement.

"Sec. 5. On each Monday beginning Jan. 21, 1918, and continuing up to and including March 25, 1918, no fuel shall be burned for the purpose of heating rooms in which intoxicating liquor is sold or served on those days.

"Nothing in this regulation shall be construed to forbid the heating of restaurants, hotels or other places in which meals are served, but in which no intoxicating liquor is sold or served on the said Mondays.

"Sec. 6. No fuel shall be burned on any of the Mondays specified in the foregoing section for the purpose of supplying power for the movement of surface, elevated, subway or suburban cars or trains in excess of the amount used on the Sunday previous thereto.

"Sec. 7. Nothing in this regulation shall be construed to apply to or affect the operation of any mine or plant producing fuel, nor shall this regulation be construed to forbid the heating of such rooms or offices, or such por-

tions of buildings as are used in connection with the production, transportation or distribution of fuel.

"Sec. 8. State fuel administrators and their representatives specifically authorized so to do are hereby empowered to grant such relief as may be essential to prevent injury to health or to prevent destruction of or injury to property by fire or freezing.

"Sec. 9. This regulation is effective throughout the United States east of the Mississippi river, including the whole of the states of Louisiana and Minnesota.

"Sec. 10. Any person, firm, association or corporation which violates or refuses to conform to the above regulation may be liable to the penalty prescribed in the aforesaid act of congress.

H. A. GARFIELD,

"United States Fuel Administrator."

EXPLANATION OF ORDER.

Twenty-four hours' notice of the coal order was given the region affected, a summary of the order being issued Jan. 16, together with an explanatory statement by the fuel administrator as to the necessity of the step. This summary was superseded Jan. 17 by the foregoing official order and a new and more detailed statement was given out by Dr. Garfield, in which he set forth his reasons for shutting down practically all the great industries of the country. This statement follows:

"The most urgent thing to be done is to send to the American forces abroad and to the allies the food and war supplies which they vitally need. War munitions, food, manufactured articles of every description, lying in Atlantic ports in tens of thousands of tons, where literally hundreds of ships, loaded with war goods for our men and the allies, cannot take the seas because their bunkers are empty of coal. The coal to send them on their way is waiting behind the congested freight that has jammed all terminals.

"It is worse than useless to bend our energies to more manufacturing when what we have already manufactured lies at tidewater congesting terminal facilities, jamming the railroad yards and sidetracks for long distances back into the country. No power on earth can move this freight into the war zone where it is needed until we supply the ships with fuel.

"Once the docks are cleared of the valuable freight for which our men and associates in the war now wait in vain, then again our energies and power may be turned to manufacturing, more efficient than ever, so that a steady and uninterrupted stream of vital supplies may be this nation's answer to the allies' cry for help."

"It has been excess of production, in our wartime speeding up, that has done so much to cause congestion on our railroads; that has filled the freight yards to overflowing; that has cluttered the docks of our Atlantic ports with goods waiting to go abroad. At tidewater the flood of freight has stopped. The ships were unable to complete the journey from our factories to the war depots behind the firing line.

"Added to this has been difficulty of transporting coal for our own domestic needs.

"On top of these difficulties has come one of the most terribly severe winters we have known in years.

"The wheels were choked and stopped; zero weather and snowbound trains; terminals congested; harbors with shipping frozen in; rivers and canals unpassable—it was useless to continue manufacture and pile confusion on top of confusion.

"A clear line from the manufacturing establishments to the seaboard and beyond: that was the imperative need. It was like soldiers marching to the front. The men in the foremost ranks must have room to move.

"More than a shock was needed to make a way through that congestion at the terminals and on the docks so that the aid so vitally needed by the allies could get through.

"The incidental effect of this transportation situation on coal production has been disastrous. There is and always has been plenty of fuel, but it cannot be moved to those places where it is so badly needed while railroad lines and terminals are choked.

"Throughout the coal fields scores, even hundreds, of mines are lying idle because of railroad inability to supply the cars to carry away their product. Coal mines cannot operate without cars. Cars cannot be supplied while the railroads are crippled by the present freight congestion, which keeps idle cars lying useless in the freight yards.

"In the last week the production of coal has been disastrously reduced. Reports in some cases have shown 90 per cent of the mines in certain fields closed completely for lack of cars.

"This is war. Whatever the cost we must pay so that in the face of the enemy there can never be the reproach that we held back from doing our full share. Those ships laden with our supplies of food for men and food for guns must have coal and put to sea."

PROTESTS IN VAIN.

While the industries affected announced their willingness to obey the order there were many vigorous protests from those who believed that the end sought could be achieved by less drastic means or that a longer notice should have been given so that the industries might have had time to adjust themselves to the new situation. The United States senate on Jan. 17 passed the following resolution by a vote of 50 to 19:

"Resolved, That the fuel administrator of the United States be and is hereby requested to delay for five days the order suspending the operation of industrial plants in portions of the United States, in order that the protests

may be heard, investigation made and information presented."

In spite of this the order, with the approval of President Wilson, went into effect at the time designated.

PRESIDENT SUSTAINS GARFIELD.

On the evening of Jan. 18 President Wilson issued the following statement in support of Dr. Garfield's coal order:

"I was, of course, consulted by Mr. Garfield before the fuel order of yesterday was issued and fully agreed with him that it was necessary, much as I regretted the necessity.

"This war calls for many sacrifices, and sacrifices of the sort called for by this order are infinitely less than sacrifices of life which might otherwise be involved.

"It is absolutely necessary to get the ships away, it is absolutely necessary to relieve the congestion at the ports and upon the railways, it is absolutely necessary to move great quantities of food, and it is absolutely necessary that our people should be warmed in their homes if nowhere else, and half-way measures would not have accomplished the desired ends.

"If action such as this had not been taken, we should have limped along from day to day with a slowly improving condition of affairs with regard to the shipment of food and coal, but without such immediate relief as had become absolutely necessary because of the congestions of traffic which have been piling up for the last few months.

"I have every confidence that the results of action of this sort will justify it and that the people of the country will loyally and patriotically respond to necessities of this kind as they have to every other sacrifice involved in the war.

"We are upon a war footing, and I am confident that the people of the United States are willing to observe the same sort of discipline that might be involved in the actual conflict itself."

RAILROADS IN GOVERNMENT CONTROL.

Because of conditions created by the war all the railroad and steamship lines of the United States passed into the control of the government at noon Dec. 28, 1917. Before issuing a formal proclamation taking over the railroads President Wilson made public the following explanation of the act:

"I have exercised the powers over the transportation systems of the country which were granted me by act of congress of August, 1916, because it has become imperatively necessary for me to do so.

"This is a war of resources no less than of men, perhaps even more than of men, and it is necessary for the complete mobilization of our resources that the transportation systems of the country should be organized and employed under a single authority and a simplified method of co-ordination which have not proved possible under private management and control.

"The committee of railway executives who have been co-operating with the government in this all-important matter have done the utmost that it was possible for them to do; have done it with patriotic zeal and with great ability; but there were difficulties that they could neither escape nor neutralize.

"Complete unity of administration in the present circumstances involves upon occasion and at many points a serious dislocation of earnings, and the committee was, of course, without power or authority to rearrange charges or effect proper compensations and adjustments of earnings. Several roads which were willingly and with admirable public spirit accepting the orders of the committee have already suffered from these circumstances and should not be required to suffer further.

"In mere fairness to them the full authority

of the government must be substituted. The government itself will thereby gain an immense increase of efficiency in the conduct of the war and of the innumerable activities upon which its successful conduct depends.

"The public interest must be first served, and, in addition, the financial interests of the government and the financial interests of the railways must be brought under a common direction. The financial operations of the railways need not then interfere with the borrowings of the government, and they themselves can be conducted at a greater advantage.

"Investors in railway securities may rest assured that their rights and interests will be as scrupulously looked after by the government as they could be by the directors of the several railway systems. Immediately upon the reassembling of congress I shall recommend that these definite guaranties be given:

"First, of course, that the railway properties will be maintained during the period of federal control in as good repair and as complete equipment as when taken over by the government; and,

"Second, that the roads shall receive a net operating income equal in each case to the average net income of the three years preceding June 30, 1917.

"And I am entirely confident that the congress will be disposed in this case, as in others, to see that justice is done and full security assured to the owners and creditors of the great systems which the government must now use under its own direction or else suffer serious embarrassment.

"The secretary of war and I are agreed that, all the circumstances being taken into consideration, the best results can be obtained under the immediate executive direction of the Hon.

William G. McAdoo, whose practical experience peculiarly fits him for the service and whose authority as secretary of the treasury will enable him to co-ordinate as no other man could the many financial interests which will be involved and which might, unless systematically directed, suffer very embarrassing entanglements.

The government of the United States is the only great government now engaged in the war which has not already assumed control of this sort. It was thought to be in the spirit of American institutions to attempt to do everything that was necessary through private management, and if zeal and ability and patriotic motive could have accomplished the necessary unification of administration it would certainly have been accomplished, but no zeal or ability could overcome insuperable obstacles, and I have deemed it my duty to recognize that fact in all candor, now that it is demonstrated, and to use without reserve the great authority reposed in me.

"A great national necessity dictated the action and I was therefore not at liberty to abstain from it."

FORMAL PROCLAMATION.

President Wilson in his formal proclamation first quotes the acts of congress declaring war on Germany (April 6, 1917) and on Austria-Hungary (Dec. 7, 1917) and then continues:

"And, whereas, it is provided by section 1 of the act approved Aug. 29, 1916, entitled 'An act making appropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes,' as follows:

"The president, in time of war, is empowered, through the secretary of war, to take possession and assume control of any system or systems of transportation or any part thereof, and to utilize the same to the exclusion as far as may be necessary of all other traffic thereon, for the transfer or transportation of troops, war material and equipment, or for such other purposes connected with the emergency as may be needful or desirable"; and

"Whereas, It has now become necessary in the national defense to take possession and assume control of certain systems of transportation and to utilize the same, to the exclusion as far as may be necessary of other than war traffic thereon, for the transportation of troops, war material and equipment therefor, and for other needful and desirable purposes connected with the prosecution of the war;

"Now, therefore, I, Woodrow Wilson, president of the United States, under and by virtue of the powers vested in me by the foregoing resolutions and statute, and by virtue of all other powers thereto me enabling, do hereby, through Newton D. Baker, secretary of war, take possession and assume control at 12 o'clock noon on the 28th day of December, 1917, of each and every system of transportation and the appurtenances thereof located wholly or in part within the boundaries of the continental United States and consisting of railroads, and owned or controlled systems of coastwise and inland transportation, engaged in general transportation, whether operated by steam or by electric power, including also terminals, terminal companies and terminal associations, sleeping and parlor cars, private cars and private car lines, elevators, warehouses, telegraph and telephone lines and all other equipment and appurtenances commonly used upon or operated as a part of such rail or combined rail and water systems of transportation—to the end that such systems of transportation be utilized for the transfer and transportation of troops, war material and equipment, to the exclusion so far as may be necessary of all other traffic thereon; and that so far as such exclusive use be not necessary or desirable, such systems of transportation be operated and utilized in the performance of such other services as the national interest may require and the usual and ordinary business and duties of common carriers.

"It is hereby directed that the possession, control, operation and utilization of such transportation systems hereby by me undertaken shall be exercised by and through William G. McAdoo, who is hereby appointed and designated director-general of railroads. Said director may perform the duties imposed upon him, so long and to such extent as he shall determine, through the boards of directors, receivers, officers and employes of said systems of transportation.

"Until and except so far as said director shall from time to time by general or special orders otherwise provide, the boards of directors, receivers, officers and employes of the various transportation systems shall continue the operation thereof in the usual and ordinary course of the business of common carriers, in the names of their respective companies.

"Until and except so far as said director shall from time to time otherwise by general or special orders determine, such systems of transportation shall remain subject to all existing statutes and orders of the interstate commerce commission and to all statutes and orders of regulating commissions of the various states in which said systems or any part thereof may be situated. But any orders, general or special, hereafter made by said director shall have paramount authority and be obeyed as such.

"Nothing herein shall be construed as now affecting the possession, operation and control of street electric passenger railways, including railways commonly called interurban, whether such railways be or be not owned or controlled by such railroad companies or systems. By subsequent order and proclamation, if and when it shall be found necessary or desirable, possession control or operation may be taken of all or any part of such street railway systems, including subways and tunnels, and by subsequent order and proclamation possession, control and operation in whole or in part may also be relinquished to the owners thereof of any part of the railroad system or rail and water systems, possession and control of which are hereby assumed.

"The director shall as soon as may be after having assumed such possession and control enter upon negotiations with the several companies looking to agreements for just and reasonable compensation for the possession, use and control of their respective properties on the basis of an annual guaranteed compensation, above accruing depreciation and the maintenance of their properties, equivalent, as nearly as may be, to the average of the net operating income thereof for the three year period ending June 30, 1917—the results of such negotiations to be reported to me if such action as may be appropriate and lawful.

"But nothing herein contained, expressed or implied, or hereafter done or suffered hereunder, shall be deemed in any way to impair the rights of stockholders, bondholders, creditors and other persons having interests in said systems of transportation or in the profits thereof, to receive just and adequate compensation for the use and control and operation of their property hereby assumed.

"Regular dividends hitherto declared, and maturing interest upon bonds, debentures and other obligations may be paid in due course, and such regular dividends and interest may continue to be paid until and unless the said director shall from time to time otherwise by general or special orders determine, and, subject to the approval of the director, the various carriers may agree upon and arrange for the renewal and extension of maturing obligations.

"Except with the prior written assent of said director, no attachment by mesne process or on execution shall be levied on or against any of the property used by any of the said transportation systems in the conduct of their business as common carriers, but suits may be brought by and against said carriers and judgments rendered as hitherto until and except so

far as said director may, by general or special orders, otherwise determine.

"From and after 12 o'clock on said 28th day of December, 1917, all transportation systems included in this order and proclamation shall conclusively be deemed within the possession and control of said director without further act or notice. But for the purpose of accounting said possession and control shall date from 12 o'clock midnight on Dec. 31, 1917.

"In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done by the president, through Newton D. Baker, secretary of war, in the District of Columbia, this 26th day of December, in the year of our Lord one thousand nine hundred and seventeen, and of the independence of the United States the one hundred and forty-second.

"WOODROW WILSON,
"NEWTON D. BAKER,
"Secretary of War.
"ROBERT LANSING,
"Secretary of State."

OLD WAR BOARD GOES OUT.

On Dec. 31 the five members of the railroads' war board, which attempted to unify the roads under private control, offered their resignations, which were accepted. Director-General McAdoo then appointed a temporary advisory committee consisting of the following: John Skelton Williams, controller of the currency.

Hale Holden, president of the Burlington system.

Henry Walters, chairman of the board of the Atlantic Coast line.

Edward Chambers, former traffic manager of the Santa Fe system.

Walker D. Hines, ex-officio chairman of the executive committee of the Santa Fe.

WILSON'S MESSAGE TO CONGRESS.

President Wilson, at a joint session of the houses of congress Jan. 4, 1918, made the following recommendations for carrying out government operation of railroads:

"Gentlemen of the Congress: I have asked the privilege of addressing you in order to report that on the 28th day of December last, during the recess of congress, acting through the secretary of war and under the authority conferred upon me by the act of congress approved Aug. 29, 1916, I took possession and assumed control of the railway lines of the country and the systems of water transportation under their control. This step seemed to be imperatively necessary in the interest of the public welfare, in the presence of the great tasks of war with which we are now dealing.

"As our experience develops difficulties and makes it clear what they are, I have deemed it my duty to remove those difficulties wherever I have the legal power to do so. To assume control of the vast railway systems of the country is, I realize, a very heavy responsibility, but to fail to do so in the existing circumstances would have been a much greater. I assumed the less responsibility rather than the greater.

"I am sure that I am speaking the mind of all thoughtful Americans when I say that it is our duty as the representatives of the nation to do everything that it is necessary to do to secure the complete mobilization of the whole resources of America by as rapid and effective a means as can be found. Transportation supplies all the arteries of mobilization. Unless it be under a single and unified direction the whole process of the nation's action is embarrassed.

"It was in the true spirit of America, and it was right, that we should first try to effect the necessary unification under the voluntary action of those who were in charge of the great railway properties, and we did try it. The directors of the railways responded to the need promptly and generously.

"The group of railway executives who were charged with the task of actual co-ordination and general direction performed their difficult duties with patriotic zeal and marked ability, as was to have been expected, and did, I believe, everything that it was possible for them to do in the circumstances. If I have taken the task out of their hands it has not been because of any dereliction or failure on their part, but only because there were some things which the government can do and present management cannot. We shall continue to value most highly the advice and assistance of these gentlemen, and I am sure we shall not find them withholding it.

"It has become unmistakably plain that only under government administration can the entire equipment of the several systems of transportation be fully and unreservedly thrown into a common service without injurious discrimination against particular properties. Only under government administration can an absolutely unrestricted and unembarrassed common use be made of all tracks, terminals, terminal facilities and equipment of every kind. Only under that authority can new terminals be constructed and developed without regard to the requirements or limitations of particular roads. But under government administration all these things will be possible—not instantly, but as fast as practical difficulties which cannot be merely conjured away give way before the new management.

"The common administration will be carried out with as little disturbance of the present operating organizations and personnel of the railways as possible. Nothing will be altered or disturbed which it is not necessary to disturb. We are serving the public interest and safeguarding the public safety, but we are also regarding the interest of those by whom these great properties are owned and glad to avail ourselves of the experience and trained ability of those who have been managing them. It is necessary that the transportation of troops and of war materials, of food and of fuel, and of everything that is necessary for the full mobilization of the energies and resources of the country, should be first considered, but it is clearly in the public interest also that the ordinary activities and the normal industrial and commercial life of the country should be interfered with and dislocated as little as possible, and the public may rest assured that the interest and convenience of the private shipper will be as carefully served and safeguarded as it is possible to serve and safeguard it in the present extraordinary circumstances.

"While the present authority of the executive suffices for all purposes of administration and while, of course, all private interests must for the present give way to the public necessity, it is, I am sure you will agree with me, right and necessary that the owners and creditors of the railways, the holders of their stocks and bonds, should receive from the government an unqualified guaranty that their properties will be maintained throughout the period of federal control in as good repair and as complete equipment as at present, and that the several roads will receive under federal management such compensation as is equitable and just alike to their owners and to the general public.

"I would suggest the average net railway operating income of the three years ending June 30, 1917. I earnestly recommend that these guaranties be given by appropriate legislation and given as promptly as circumstances permit.

"I need not point out the essential justice of such guaranties and their great influence and significance as elements in the present financial and industrial situation of the country. Indeed, one of the strong arguments for assuming control of the railroads at this time is the financial argument. It is necessary that the values of railway securities should be justly and fairly paid and that the large financial operations every year necessary in connection

with the maintenance, operation and development of the roads should, during the period of the war, be wisely related to the financial operations of the government.

"Our first duty is, of course, to conserve the common interest and the common safety and to make certain that nothing stands in the way of the successful prosecution of the great war for liberty and justice, but it is an obligation of public conscience and of public honor that the private interests we disturb should be kept safe from unjust injury, and it is of the utmost consequence to the government itself that all great financial operations should be stabilized and co-ordinated with the financial operations of the government. No borrowing should run athwart the borrowings of the federal treasury and no fundamental industrial values should anywhere be unnecessarily impaired. In the hands of many small investors in the country, as well as in national banks, in insurance companies, in savings banks, in trust companies, in financial agencies of every kind, railway securities, the sum total of which runs up to some \$10,000,000,000 or \$11,000,000,000, constitute a vital part of the structure of credit, and the unquestioned solidity of that structure must be maintained.

"The secretary of war and I easily agreed that, in view of the many complex interests which must be safeguarded and harmonized, as well as because of his exceptional experience and ability in this new field of governmental action, the Hon. William G. McAdoo was the right man to assume direct administrative control of this new executive task. At our request he consented to assume the authority and duties of organizer and director-general of the new railway administration. He has assumed those duties and his work is in active progress.

"It is probably too much to expect that even under the unified railway administration which will now be possible sufficient economies can be effected in the operation of the railways to make it possible to add to their equipment and extend their operative facilities as much as the present extraordinary demands upon their use will render desirable, without resorting to the national treasury for the funds. If it is not possible, it will, of course, be necessary to resort to the congress for grants of money for that purpose. The secretary of the treasury will advise with your committee with regard to this very practical aspect of the matter. For the present, I suggest only the guaranties I have indicated and such appropriations as are necessary at the outset of this task. I take the liberty of expressing the hope that the congress may grant these promptly and ungrudgingly. We are dealing with great matters and will, I am sure, deal with them greatly."

Congress enacted a law providing for the operation of the transportation systems of the country, the measure being approved by the president March 21. (See "Work of 65th Congress," page 370, in this volume.)

WAGE COMMISSION AND BOARD.

Director-General McAdoo announced Jan. 18 the appointment of a railroad wage commission of four public men to determine the wages of the different classes of labor on the railroads. The men chosen were:

Franklin K. Lane, secretary of the interior,
C. C. McChord, interstate commerce commissioner.

J. Harry Covington, chief justice of the District of Columbia.

William R. Willcox, lawyer, New York, N. Y.

WAGES INCREASED.

In accordance with recommendations made by the commission the railroad administration issued an order (No. 27) on May 25, 1918, establishing new rates of pay effective from Jan. 1, 1918, and recognizing the principle of the basic eight-hour day. This order

affected chiefly engineers, firemen, conductors, brakemen, flagmen and other employees in the operating department. Orders increasing the wages of other railroad employees were issued Sept. 5, more than 1,000,000 men being affected. Generally speaking, the wage increases as compared with the wages paid Jan. 1, 1918, amounted to \$25 a month for employes paid on the monthly basis and 12 cents an hour for those paid on the hourly basis. The wages of Pullman employes were subsequently raised on the same basis as those of other railroad employes.

By the order of May 25 a board of railroad wages and working conditions was created, consisting of G. H. Sines, F. H. Gaines, J. J. Dermody, C. E. Lindsey, W. E. Morse and A. O. Wharton.

RATES AND FARES INCREASED.

By an order (No. 28) issued May 25, 1918, the railroad administration increased freight and passenger rates in order to meet the heavier expenses under increased wages and the higher cost of coal and other articles consumed by the railroads. The new freight rates went into effect June 25 and the passenger fares on June 10. Class rates were increased 25 per cent, the increase also applying to commodity rates generally, except the commodities of which there is a heavy movement on which certain amounts were added and specific rates were fixed.

Passenger fares were advanced to 3 cents a mile for one-way travel in day coaches. Round trip tourist rates were also increased. Officers, enlisted men and nurses of the United States army, navy and marine corps when traveling in uniform at their own expense were given a rate of 1 cent a mile. This reduced rate also applied to union and confederate veterans attending their national encampment in 1918; the rate to state encampments was fixed at 2 cents a mile. Commutation fares were advanced 10 per cent. Passengers traveling in standard sleeping and parlor cars were required to pay an additional passage charge of 16 per cent of the normal one-way fare and passengers traveling in tourist sleeping cars an additional charge of 8 per cent of the normal one-way fare. These charges were in addition to those required for the occupancy of berths in sleeping cars or seats in the parlor cars. The rates on excess baggage were also increased.

MEASURES OF ECONOMY.

By an order issued Jan. 28, 1918, the railroad administration prohibited railroads from making payments to agents or other persons employed to affect legislation; to attorneys not actually engaged in necessary work; to persons or agencies constituting associations of carriers unless approved by the director-general and to any person for political services.

The administration also issued an order May 21 substituting federal managers for railway presidents.

Union ticket offices were established in the large cities where under the old system the various lines maintained their own ticket offices.

RAILROAD ADMINISTRATION.

The railroads since the government assumed control have been under the administration of Director-General McAdoo and a staff of assistants in Washington, D. C., and of federal managers appointed by the director-general for regional districts. The principal officials of the central administration in 1918 were:

Director-General—William G. McAdoo,
Assistant to Director-General—Oscar A. Price,
Assistant Director-General—Walker D. Hines,
General Counsel, Division of Law—John Barto
Payne.

Director Division of Capital Expenditure—
Robert S. Lovett.

Director Division of Finance and Purchases—
John Skelton Williams.

Director Division of Public Service—Charles A. Prouty.
 Director of Division of Operation—Carl R. Gray.
 Chairman Board of Wages and Working Conditions—G. H. Sines.
 Director of Division of Labor—W. S. Carter.
 Director of Division of Traffic—Edward Chambers.
 Manager Coastwise Ship Lines—H. B. Walker.
 Manager Troop Movement Section—George Hodges.

REGIONAL DIRECTORS.

Eastern District—Alfred H. Smith, New York, N. Y.
 Northwestern District—R. H. Aishton, Chicago, Ill.
 Central Western District—Hale Holden, Chicago, Ill.
 Southern District—B. L. Winchell, Atlanta, Ga.
 Southwestern District—B. F. Bush, St. Louis, Mo.
 Allegheny District—C. H. Markham, Philadelphia, Pa.
 Pochontas District—H. D. Maher, Roanoke, Va.
 Ohio-Indiana District—H. A. Worcester, Cincinnati, O.
 New England District—J. H. Hustis, Boston, Mass.

EXPRESS COMPANIES UNDER FEDERAL CONTROL.

On May 28, 1918, the four principal express companies, the Adams, American, Wells-Fargo and Southern, entered into a contract with the director-general of railroads, William G. McAdoo, providing for the carrying on of the express business for all the railroads under federal control, the new express company acting as the director-general's agent. The contract was formally signed June 21. The new company which assumed the name of the American Railway Express company, put into the business physical properties of the actual value of \$30,000,000, for which capital stock to that amount was issued. Under the contract the government receives 50% per cent of the gross earnings, the company paying out of the balance the operating expenses, taxes and a dividend of 5 per cent on its capital stock. Out of the next 2 per cent available for distribution the company and the government each receive 1 per cent; out of the next 3 per cent the company gets 1 per cent and the government 2 per cent; any further amounts available for distribution are divided, one-quarter to the company and three-quarters to the government. Service and rates are under control of the director-general of railroads.

WAR LABOR ADMINISTRATION.

As a result of a series of conferences on the subject of labor policies, the council of national defense submitted to the president a program for war labor administration which was approved by him and made public Jan. 9, 1918. The secretary of labor was requested to take charge of the matter and to provide for the purpose the following agencies:

1. A means of furnishing adequate and stable supply of labor to war industries. This will include:

(a) A satisfactory system of labor exchanges.

(b) A satisfactory method and administration of training of workers.

(c) An agency for determining priorities of labor demand.

(d) Agencies for dilution of skilled labor as and when needed.

2. Machinery which will provide for the immediate and equitable adjustment of disputes in accordance with principles to be agreed upon between labor and capital and without stoppage of work. Such machinery would deal with demands concerning wages, hours, shop conditions, etc.

3. Machinery for safeguarding conditions of labor in the production of war essentials. This to include industrial hygiene, safety, woman and child labor, etc.

4. Machinery for safeguarding conditions of living, including housing, transportation, etc.

5. Fact gathering body to assemble and present data, collected through various existing governmental agencies or by independent research, to furnish the information necessary for effective executive action.

6. Information and education division, which has the functions of developing sound public sentiment, securing an exchange of information between departments of labor administration, and promotion in industrial plants of local machinery helpful in carrying out the national labor program.

Some of these agencies already existed in part in the department of labor. For example, the mediation service, the system of labor exchanges and the bureau of labor statistics were utilized.

Denying the existence of a real labor shortage in the United States and the necessity of a conscription of labor, and asserting that the solution of the war labor problem lay in the proper distribution of the available supply of workers, the department of labor announced that the United States employment service would serve as the national labor mobilization

and distribution machine. Allowing for the turnover, the department estimated that the reorganized and expanded federal service must place between three and four million workers in agriculture, shipbuilding and the other war industries in 1918.

To successfully handle its task, the employment service was divorced from the bureau of immigration and made a separate bureau of the labor department, and one of the largest and most important of the national government's war prosecuting agencies. John B. Densmore of Montana, formerly solicitor for the labor department, was named by Secretary of Labor Wilson as director of the reorganized service.

For several months the labor department had been quietly working to equip the federal employment service to handle the war labor problem. Funds amounting to more than \$1,000,000 were made available and kept the labor supplying machine in operation until the end of the fiscal year in June; \$250,000 of the total was appropriated by congress and the president allotted \$825,000 more from his war emergency fund.

The service began covering the entire continent with a network of labor exchanges. Federal, state and municipal employment offices and the facilities of the various state councils of defense were utilized. At the beginning of the year more than 200 such exchanges were in operation and the number was being rapidly increased.

In addition to naming Mr. Densmore director of the service, Secretary of Labor Wilson appointed Charles T. Clayton of Maryland assistant director in charge of the field work and co-operating bodies, and Robert Watson of Massachusetts assistant director in charge of administration.

Five divisions handled the detail of the service's national operations. These divisions, with their chiefs, appointed by Secretary Wilson, were:

Division of information, T. V. Powderly of Pennsylvania, chief; division of farm service, A. L. Barkman of Kansas City, Mo., chief; women's division, Mrs. Hilda Muhlhauser of Ohio, chief; division of reserves, William E. Hall of New York, chief, and division of investigation, Alexander D. Chiqueine, Jr., of Philadelphia, Pa., chief. The information and women's division existed under the former organization of the federal employment service, Mr. Hall, chief of the division of reserves, is the national director of the public service and the boys' working reserves.

ADVISORY COUNCIL.

On Jan. 15, 1918, the secretary of labor appointed the following advisory council to assist in carrying out the war labor program:

John Lind, former governor of Minnesota, representative of the public, chairman.
Waddill Catchings of Alabama, representing employers.

A. A. Landon of New York, representing employers.

John B. Lennon of Illinois, representing employers.

John J. Casey of Pennsylvania, representing employers.

Dr. L. C. Marshall of the University of Chicago, economist.

Agnes Nestor of Illinois, representing women.
The duty of the advisory council, as outlined by the secretary of labor was to standardize labor policies; provide, distribute and maintain a stable and adequate supply of workers, consider labor dilution and training, priority demands, adjustment of disputes and safeguard employment generally.

WAR LABOR CONFERENCE BOARD.

On the recommendation of the advisory council the secretary of labor called upon the president of the American Federation of Labor and the National Industrial Conference board to appoint representatives of labor and of capital for the purpose of reaching an agreement on the principles and policies that should govern their relations during the war emergency and insure the maximum production of war materials. The presidents of the two organizations each appointed five men and each of the two groups chose one additional member to represent the public. The men selected were as follows:

Employers.

B. L. Warden, New York city, vice-president Submarine Boat corporation.

L. F. Loree, 32 Nassau street, New York city, president Delaware & Hudson company, chairman of board and executive committee Kansas City Southern Railroad company, etc.

C. Edwin Michael, Roanoke, Va., president Virginia Bridge and Iron company.

Loyall A. Osborne, 165 Broadway, New York city, vice-president Westinghouse Electric and Manufacturing company, chairman executive committee national industrial conference board.

W. H. Van Dervoort, East Moline, Ill., president Root & Van Dervoort Engineering company.

William Howard Taft, New Haven, Conn., former president of the United States, representing the public.

Employes.

William H. Johnston, president International Association of Machinists.

Frank J. Hayes, Merchants' building, Indianapolis, Ind., president United Mine Workers of America.

William L. Hutcheson, Carpenters' building, Indianapolis, Ind., president United Brotherhood of Carpenters and Joiners of America.

Victor A. Olander, 168 West Washington street, Chicago, Ill., representative International Seamen's Union of America.

T. A. Rickert, 175 West Washington street, Chicago, Ill., United Garment Workers of America.

Frank P. Walsh, Kansas City, Mo., former chairman federal industrial relations commission, representing the public.

Recommendations of Board.

This board after various conferences submitted the following report to William B. Wilson, secretary of labor, March 29, 1918:

Sir: The commission of representatives of employers and workers, selected in accord with the suggestion of your letter of Jan. 28, 1918, to aid in the formulation, in the present emergency, of a national labor program, present to you, as a result of their conferences, the following:

(a) That there be created, for the period of the war, a national war labor board of the same number and to be selected in the same manner and by the same agencies as the commission making this recommendation.

(b) That the functions and powers of the national board shall be as follows:

1. To bring about a settlement by mediation and conciliation, of every controversy arising between employers and workers in the field of production necessary for the effective conduct of the war.

2. To do the same thing in similar controversies in other fields of national activity, delays and obstructions which may, in the opinion of the national board, affect detrimentally such productions.

3. To provide such machinery by direct appointment, or otherwise, for selection of committees or boards to sit in various parts of the country where controversies arise, to secure settlement by local mediation and conciliation.

4. To summon the parties to the controversy for hearing and action by the national board in case of failure to secure settlement by local mediation and conciliation.

Provision for Umpire.

(c) If the sincere and determined effort of the national board shall fail to bring about a voluntary settlement, and the members of the board shall be unable unanimously to agree upon a decision, then and in that case and only as a last resort, an umpire appointed in the manner provided in the next paragraph shall hear and finally decide the controversy under simple rules of procedure prescribed by the national board.

(d) The members of the national board shall choose the umpire by unanimous vote. Failing such choice, the name of the umpire shall be drawn by lot from a list of ten suitable and disinterested persons to be nominated for the purpose by the president of the United States.

(e) The national board shall hold its regular meetings in the city of Washington, with power to meet at any other place convenient for the board and the occasion.

(f) The national board may alter its methods and practice in settlement of controversies hereunder, from time to time, as experience may suggest.

(g) The national board shall refuse to take cognizance of a controversy between employer and workers in any field of industrial or other activity where there is by agreement or federal law a means of settlement which has not been invoked.

(h) The place of each member of the national board unavoidably detained from attending one or more of its sessions may be filled by a substitute to be named by such member as his regular substitute. The substitute shall have the same representative character as his principal.

(i) The national board shall have power to appoint a secretary and to create such other clerical organization under it as may be in its judgment necessary for the discharge of its duties.

(j) The national board may apply to the secretary of labor for authority to use the machinery of the department in its work for conciliation and mediation.

(k) The action of the national board may be invoked in respect to controversies within its jurisdiction by the secretary of labor or by either side in a controversy or its duly authorized representative. The board, after summary consideration, may refuse further hearing if the case is not of such character or importance as to justify it.

(l) In the appointment of committees of its own members to act for the board in general or local matters, and in the creation of local committees, the employers and the workers shall be equally represented.

(m) The representatives of the public in the

board shall preside alternately at successive sessions of the board or as agreed upon.

(n) The board in its mediating and conciliatory action, and the umpire in his consideration of a controversy, shall be governed by the following principles:

Principles to Be Observed.

There should be no strikes or lockouts during the war.

1. The right of workers to organize in trade unions and to bargain collectively through chosen representatives is recognized and affirmed. This right shall not be denied, abridged or interfered with by the employers in any manner whatsoever.

2. The right of employes to organize in associations of groups and to bargain collectively through chosen representatives is recognized and affirmed. This right shall not be denied, abridged or interfered with by the workers in any manner whatsoever.

3. Employers should not discharge workers for membership in trade unions, nor for legitimate trade union activities.

4. The workers, in the exercise of their right to organize, shall not use coercive measures of any kind to induce persons to join their organizations, nor, to induce employers to bargain or deal therewith.

Existing Conditions.

1. In establishments where the union shop exists the same shall continue and the union standards as to wages, hours of labor and other conditions of employment shall be maintained.

2. In establishments where union and non-union men and women now work together, and the employer meets only with employes or representatives engaged in said establishments, the continuance of such condition shall not be deemed a grievance. The declaration, however, is not intended in any manner to deny the right or discourage the practice of the formation of labor unions, or the joining of the same by the workers in said establishments, as guaranteed in the last paragraph, nor to prevent the war labor board from urging or any umpire from granting, under the machinery herein provided, improvement of their situation in the matter of wages, hours of labor or other conditions, as shall be found desirable from time to time.

3. Established safeguards and regulations for the protection of the health and safety of workers shall not be relaxed.

Women in Industry.

It shall become necessary to employ women on work ordinarily performed by men, they must be allowed equal pay for equal work and must not be allotted tasks disproportionate to their strength.

Hours of Labor.

The basic eight hour day is recognized as applying in all cases in which existing law requires it. In all other cases the question of hours of labor shall be settled with due regard to governmental necessities and the welfare, health and proper comfort of the workers.

Maximum Production.

The maximum production of all war industries should be maintained, and methods of work and operation on the part of employers or workers which operate to delay or limit production, or which have a tendency to artificially increase the cost thereof, should be discouraged.

Mobilization of Labor.

For the purpose of mobilizing the labor supply with a view to its rapid and effective distribution, a permanent list of the number of skilled and other workers available in different parts of the nation shall be kept on file by the department of labor, the information to be constantly furnished:

1. By the trade unions.
2. By state employment bureaus and federal agencies of like character.

3. By the managers and operators of industrial establishments throughout the country.

These agencies should be given opportunity to aid in the distribution of labor as necessity demands.

Custom of Localities.

In fixing wages, hours and conditions of labor regard should always be had to the labor standards, wage scales and other conditions prevailing in the localities affected.

The Living Wage.

1. The right of all workers, including common laborers, to a living wage is hereby declared.

2. In fixing wages, minimum rates of pay shall be established which will insure the subsistence of the worker and his family in health and reasonable comfort.

NATIONAL WAR LABOR BOARD.

Secretary Wilson approved the report of the conference board and appointed the members of the board to serve throughout the war as a national war labor board. Then President Wilson, on April 8, 1918, issued the following proclamation:

Whereas, in January, 1918, the secretary of labor, upon the nomination of the president of the American Federation of Labor and the president of the national industrial conference board, appointed a war labor conference board for the purpose of devising for the period of the war a method of labor adjustment which would be acceptable to employers and employes; and

Whereas, said board has made a report recommending the creation for the period of the war of a national war labor board, with the same number of members as and to be selected by the same agencies that created the war labor conference board, whose duty it shall be to adjust labor disputes in the manner specified and in accordance with certain conditions set forth in the said report; and

Whereas, the secretary of labor has, in accordance with the recommendation contained in the report of said war labor conference board, dated March 29, 1918, appointed as members of the national war labor board the Hon. William Howard Taft and the Hon. Frank P. Walsh, representatives of the general public of the United States; Messrs. Loyall A. Osborne, L. F. Loree, W. H. Van Dervoort, C. E. Michael and B. L. Worden, representatives of the employers of the United States, and Messrs. Frank J. Hayes, William L. Hutcheson, William H. Johnston, Victor A. Olander and T. A. Rickett, representatives of the employes of the United States;

Now, therefore, I, Woodrow Wilson, president of the United States of America, do hereby approve and affirm the said appointments and make due proclamation thereof and of the following for the information and guidance of all concerned:

The powers, functions and duties of the national war labor board shall be: To settle by mediation and conciliation controversies arising between employers and workers in fields of production necessary for the effective conduct of the war, or in other fields of national activity, delays and obstructions in which might, in the opinion of the national board, affect detrimentally such production; to provide, by direct appointment or otherwise, for committees or boards to sit in various parts of the country where controversies arise and secure settlement by local mediation and conciliation, and to summon the parties to controversies for hearing and action by the national board in event of failure to secure settlement by mediation and conciliation.

The principles to be observed and the methods to be followed by the national board in exercising such powers and functions and performing such duties shall be those specified in the said report of the war labor conference board, dated March 29, 1918, a complete copy of which is herewith appended.

The national board shall refuse to take cognizance of a controversy between employer and workers in any field of industrial or other activity where there is by agreement or federal law a means of settlement which has not been invoked.

And I do hereby urge upon all employers and employes within the United States the necessity of utilizing the means and methods thus provided for the adjustment of all industrial disputes, and request that during the pendency of mediation or arbitration through the said means and methods, there shall be no discontinuance of industrial operations which would result in curtailment of the production of war necessities.

William H. Taft and Frank P. Walsh are joint chairmen of the board and W. Jett Lauck secretary.

William P. Harvey of Kansas City, Mo., was appointed May 17, 1918, as a field representative of the national war labor board.

War Labor Umpires.

On July 12, 1918, President Wilson named ten disinterested persons as suitable to act as umpire when drawn by lot as provided in paragraph (d) of the war labor conference board:

Henry Ford, Detroit, Mich.
Matthew Hale, Boston, Mass.
James Harry Covington, Washington, D. C.
Charles C. McChord, Washington, D. C.
V. Everit Macy, New York, N. Y.
Julian W. Mack, Chicago, Ill.
Henry Suzzallo, Seattle, Wash.
John Lind, Minneapolis, Minn.
William R. Willcox, New York, N. Y.
Walter Clark, Raleigh, N. C.

Method of Procedure.

The national war labor board at a meeting held May 14, 1918, agreed upon a plan of procedure and method in all cases. This plan provided for the appointment of subcommittees composed of two members to act for the board in every local controversy and the appointment of permanent local committees in cities and districts to act in cases therein arising, and also comprehended a method of investigating industrial disputes by trained field agents sent out from Washington. Under the form of procedure adopted the board itself will sit only in cases when its sections or subcommittees find it impossible to settle a controversy. In such cases the board will sit as a board of arbitration, decide the controversy and make an award. The board will hear appeals in the following cases:

1. Where the principles established by the president of the United States in his proclamation of April 8, 1918, have been violated.

2. Where an award made by a board has not been put into effect, or where the employes have refused to accept or abide by such award.

3. To determine questions of jurisdiction as between government boards.

Any person desiring to bring before the national war labor board an issue between employer and employes, of which the board has

cognizance, shall deliver to the secretary of the board a written statement, signed by him, with his proper postoffice address at his home and in Washington. The statement shall contain a brief description of the grievance and the names of the persons or corporations against whom he complains, with their postoffice addresses.

Where an employer and employes both desire to submit a controversy to the board, they shall sign a short joint statement of the issue between them, with their respective postoffice addresses, and request the action of the board. They shall deliver this signed statement to the secretary of the board.

Controversies in which the secretary of labor invokes the action of the board, together with the documents transmitted by him, shall be delivered to the secretary of the board.

WAR LABOR POLICIES BOARD.

Under the general plan of the war labor administration a new board was created in the latter part of May, 1918, to supplement the work of the national war labor board. This was called the war labor policies board. Felix Frankfurter, assistant secretary of labor, was made its chairman. The distinction between this board and the national war labor board is that the former is administrative and the second is judicial and legislative—judicial in the sense that it is a court of appeal where one or more of its enunciated principles are involved in dispute, and legislative at such times as the establishment of a new principle to govern industrial relations is contemplated. The policies board determines directly for war industries and indirectly for nonwar industries all questions involving the distribution of wages, labor, hours and working conditions. Its decisions are executed by the various production departments of the government, each of which is represented in its membership. This execution is direct for all industries engaged in war work. In nonwar industries its decisions are given effect through the war industries board, which controls the flow of raw materials for all industries. The policies board represents the war department, the navy department, the department of agriculture, the Emergency Fleet corporation, the railroad administration, the war industries board and the national war labor board.

Membership of Board.

Chairman—Felix Frankfurter.
Representative of war department—Stanley King.
Representative of the navy department—Louis McH. Howe.
Representative of department of agriculture—G. I. Christie.
Representative of war industries board—Hugh Frayne.
Representative of fuel administration—John P. White.
Representative of United States shipping board—R. P. Bass.
Representative of Emergency Fleet corporation—Howard Conoley.
Representative of food administration—M. B. Hammond.
Representative of railroad administration—W. T. Tyler.
Representing women's division in department of labor—Miss Mary Van Kleeck.

DUTCH MERCHANT SHIPS REQUISITIONED.

On March 20, 1918, President Wilson issued the following proclamation:

"Whereas, the law and practice of nations accord to a belligerent power the right in time of war to take over and utilize neutral vessels lying within its jurisdiction; and

"Whereas, the act of congress of June 15, 1917, entitled 'An act making appropriations to supply deficiencies in appropriation for the military and naval establishments on account

of war expenses for the fiscal year ending June 30, 1917, and for other purposes,' confers upon the president the power to take over the possession of any vessels within the jurisdiction of the United States for use or operation by the United States;

"Now, therefore, I, Woodrow Wilson, president of the United States of America, in accordance with international law and practice and by virtue of the act of congress

aforesaid, and as commander in chief of the army and navy of the United States, do hereby find and proclaim that the imperative military needs of the United States require the immediate utilization of vessels of Netherlands registry now lying within the territorial waters of the United States.

"And I do, therefore, authorize and empower the secretary of the navy to take over on behalf of the United States the possession of and to employ all such vessels of Netherlands registry as may be necessary for essential purposes connected with the prosecution of the war against the imperial German government.

"The vessels shall be manned, equipped and operated by the navy department and the United States shipping board, as may be deemed expedient; and the United States shipping board shall make to the owners thereof full compensation in accordance with the principles of international law."

In accordance with the proclamation some seventy-seven ships flying the Netherlands flag with an aggregate tonnage of 600,000 were taken over by the United States navy department on the evening of March 20. Corresponding action was taken by the British government, which requisitioned Dutch merchant vessels having a total tonnage of 400,000. President Wilson on the same date issued the following statement giving a summary of the negotiations with the Netherlands government and the reasons making the requisitioning of the vessels by the United States and its allies necessary:

"For some months the United States and the entente allies have been conducting negotiations with the Dutch government with the object of concluding a general commercial agreement.

"A clear statement of the character of these negotiations was made on March 12 to the Dutch parliament by his excellency the minister of foreign affairs of Holland. As appears from the statement, the discussion proceeded upon the basis of two fundamental propositions—namely, that the United States and the allies should facilitate the importation into Holland of foodstuffs and other commodities required to maintain her economic life, and that Holland should restore her merchant marine to a normal condition of activity.

"It was the task of the negotiators to develop a specific application of these propositions which would be acceptable to the governments concerned.

"Early in January, 1918, the negotiators came to an understanding, which was embodied in a tentative agreement which was submitted to the governments concerned in order that, if acceptable, it might be ratified, or, if unacceptable, a counterproposal might be made.

"The negotiations becoming prolonged, the Dutch delegates proposed, in order that their ships might sooner be put into remunerative service, that Dutch tonnage lying idle in American waters should, with certain exceptions, be immediately chartered to the United States for periods not exceeding ninety days. This proposal was accepted by the United States government, and, on Jan. 25, 1918, the Dutch minister at Washington handed to the secretary of state of the United States a note expressing the terms of the temporary chartering agreement and his government's acceptance thereof.

"This agreement provided, among other things, that 150,000 tons of Dutch shipping should, at the discretion of the United States, be employed partly in the service of Belgian relief and partly for Switzerland on safe conduct to Cete, France, and that for each ship sent to Holland in the service of Belgian relief a corresponding vessel should leave Holland for the United States.

"Two Dutch ships in the United States ports

with cargoes of foodstuffs were to proceed to Holland, similar tonnage being sent in exchange from Holland to the United States for charter as in the case of other Dutch ships lying in the United States ports.

"The agreement was explicitly temporary in character, and, being designed to meet an immediate situation, prompt performance was of the essence.

"The Dutch government at once disclosed, however, that it was unwilling or unable to carry out this chartering agreement which it had itself proposed. The first desire of the United States was to secure at once shipping, as contemplated by the agreement to transport to Switzerland foodstuffs much needed by the state.

"One difficulty after another was, however, raised to postpone the chartering of Dutch ships for Swiss relief, and although the reason was never formally expressed, it was generally known that the Dutch shipowners feared lest their ships should be destroyed by German submarines, even if on an errand of mercy and though not traversing any of the so-called 'danger zones' proclaimed by the German government.

"That this fear was not wholly unjustified has unhappily been shown by the recent act of the German government in sinking the Spanish ship Sardinero outside the 'danger zone,' when carrying a cargo of grain for Switzerland, and after the submarine commander had ascertained this fact by an inspection of the ship's papers.

"In respect to Belgian relief, the Dutch government expressed its present inability to comply with the agreement on the ground that the German government had given Holland to understand that it would forcibly prevent the departure from Holland of the corresponding ships which, under the agreement, were to leave coincidentally for the United States.

"The Dutch government even felt itself unable to secure the two cargoes of foodstuffs which, under the agreement, it was permitted to secure, since here again the German government intervened and threatened to destroy the equivalent Dutch tonnage which under the agreement was to leave Holland for the United States.

"Nearly two months have elapsed since the making of the temporary chartering agreement, and the proposed general agreement has lain even longer without reply on the part of Holland. Meanwhile German threats have grown more violent, with a view to preventing any permanent agreement and of forcing Holland to violate any temporary agreement.

"On March 7, through Great Britain, a final proposal, expiring on the 18th, was submitted to Holland. A reply has been received which, while in itself unacceptable, might under other conditions have served as a basis for further negotiations. But the events to which I have alluded had served to demonstrate conclusively that we have been attempting to negotiate where the essential basis for an agreement—namely, the meeting of free wills—is absent. Even were an agreement concluded, there is lacking that power of independent action which alone can assure performance.

"I say this not in criticism of the Dutch government. I profoundly sympathize with the difficulty of her position under the menace of a military power which has in every way demonstrated its disdain of neutral rights. But since coercion does in fact exist, no alternative is left to us but to accomplish, through the exercise of our indisputable rights as a sovereign, that which is so reasonable that in other circumstances we would be confident of accomplishing it by agreement.

"Steps are accordingly being taken to put into our service Dutch shipping lying within our territorial jurisdiction. This action on our part and the similar action which is being

taken by governments associated with us leaves to Holland ample tonnage for her domestic and colonial needs. We have informed the Dutch government that her colonial trade will be facilitated and that she may at once send ships from Holland to secure the bread cereals which her people require. These ships will be freely bunkered and will be immune from detention on our part.

"The liner New Amsterdam, which came within our jurisdiction under an agreement for its return, will, of course, be permitted at once to return to Holland. Not only so, but it will be authorized to carry back with it the two cargoes of foodstuffs which Holland would have secured under the temporary chartering agreement had not Germany prevented. Ample compensation will be paid to the Dutch owners of the ships which will be put into our service, and suitable provision will be made to meet the possibility of ships being lost through enemy action.

"It is our earnest desire to safeguard to the fullest extent the interests of Holland and of her nationals. By exercising in this crisis our admitted right to control all property within our territory we do no wrong to Holland. The manner in which we proposed to exercise this right and our proposals made to Holland concurrently therewith cannot, I believe, fail to evidence to Holland the sincerity of our friendship toward her. WOODROW WILSON."

DUTCH GOVERNMENT PROTESTS.

In the Staats Courant of March 30, 1918, the Netherlands government issued the following statement:

"The Dutch government and the whole Dutch people have taken note with painful surprise of the proclamation and statement of the president of the United States of March 20 relative to the seizure of part of the Dutch mercantile marine. The seizure en masse of a neutral mercantile fleet, although merely for the duration of the war, is an act which is indefensible from the point of view of international law and apart from legal considerations is unjustifiable when taken against a friendly nation. Furthermore the manner in which the act of violence is defended in the president's statement does not contribute to making it any the less grievous, for the defense has clearly been set up under the influence of an entirely wrong conception of the facts.

The manner in which the Dutch mercantile fleet has been treated for months past in the United States, the interminable difficulties placed in the way of our vessels' departure from American ports, the continually repeated refusal of bunker coal, the enforced unloading of cargoes already purchased—all of this may not be in conflict with the rights of the United States with the exception of one case, that of the Zealandia which entered an American port with her own bunker coal and has been detained there illegally ever since, but it was nevertheless in conflict with the traditional friendship between the two countries. This, however, is merely said in passing. On this point, however, the statement is silent.

According to the presidential statement Holland is said not to have fulfilled entirely, because of German pressure, the provisional agreement which has been proposed in order that, pending a definite agreement relative to tonnage and the rationing of our country, our vessels lying in American ports should no longer lie there idle but be given an opportunity of making a voyage of ninety days at the most. This is absolutely incorrect, as is the assertion that Germany is said to have threatened to sink the two vessels which were to leave here in return for the two vessels leaving for Holland with America's approval and that Germany made more and more serious threats in order to prevent compliance with the modus vivendi as well as the conclusion of a permanent agreement.

The true state of affairs is as follows: After the war trade board had urged that the Dutch vessels in American ports should make a voyage pending the definite agreement the Dutch government proposed that some of these ships should travel in the service of the commission for relief in Belgium, that work of relief which the Netherlands has always promoted with all energy for the sake of the suffering population of Belgium and northern France. When the report came that Germany raised difficulties against America's demand that each time a Dutch ship should leave here in exchange for the departure of a relief ship from America the Netherlands government was of the opinion that it was bound in good faith immediately to warn the American authorities in order that the said ships, which were on their way to Argentina, would be able to make for some other destination, which had the direct result that these ships were kept in the service in exact agreement with the provisional arrangement. And concerning the sailing of a part of the ships to the French harbor of Cette, a Swiss interest which finds great favor in Holland, the ship owners entirely agreed as soon as France had guaranteed that the ships would not be detained in Cette also. For this service various vessels had been chartered. The chartering and sailing of all the ships experienced no serious delay on account of the said objections, while, for the rest, Germany had no influence whatsoever, nor did it attempt to gain any influence in the carrying out of the provisional arrangement which, moreover, only concerned the shipping between overseas countries; whatsoever really did prevent the carrying out of the provisional agreement was the extremely slow and sometimes missing overseas telegrams to and from the owners. The cause of this is still enveloped in mystery.

It is a fact that the greater part of the ships had been chartered under the provisional arrangement through the intervention of the so-called war trade board, and a part was already sailing to South America, but was again detained while en route by the American authorities while in the Pacific ocean. The vessels plying between the west coast of the United States and the Netherlands Indies continued to sail regularly without any direct or indirect interference on the part of the Dutch government. The vessels now taken in British ports, both in and outside of Europe and in the Portuguese port of St. Vincent, were prevented from sailing by the British and Portuguese authorities themselves.

The assertion that Holland was powerless under German compulsion to fulfill the provisional agreement is, as appears from the foregoing, contrary to the facts. The inaccurate information furnished the president of the United States appears unerring on a point of still greater importance, namely, where mention is made in the statement of the new requirement that the Dutch ships would have to sail through the danger zone and of the seizure following upon Holland's reply. After the inaccurate assertion that Holland was not able to fulfill the provisional arrangement, the statement says, without further ado, that on March 7 last Great Britain made a final proposal to Holland to which Holland replied with a counterproposal that was not acceptable. Really, so the statement continues, even if it had come to the effecting of an agreement, the Dutch government would practically not have been able to carry this out, therefore seizure was decided upon.

In this explanation is missing, however strange this may be, an extremely important link that is indispensable in order to put the matter in its true light. What did really take place? On Feb. 23 last, with a view to the threatened need of food here in this country by the summer, the Dutch government asked the American government for an advance of 100,000 tons of wheat on the quantity of

400,000 tons to be definitely fixed. On March 6 the associated governments replied, it is true, affirmatively with regard to the 100,000 tons, although regarding the 400,000 tons no definite answer was given, but to this apparent accommodation the objectionable condition was added that the associated governments should immediately obtain the disposal of the whole of that part of the Dutch mercantile marine that according to the London draft agreement, would eventually come to them on the conclusion of a definite arrangement. The Dutch government, being compelled to do so, intended to agree to this as soon as it could obtain the assurance that not only could it firmly rely upon the 100,000 tons advance but also on the full 400,000 tons of grain as an accepted basis for the definite arrangement. It was able to entertain this stipulation because it was definitely and expressly fixed at the conversations in London, and also since then, that the Dutch vessels would only sail outside of the danger zone and thus need not in any case perform war services for one of the contending parties which would not be compatible with neutrality.

Suddenly, on March 7 last, the London arrangement mentioned was broken when the agreement with us was withdrawn, which had been come to on the cardinal point—namely, that the ships of about 500,000 tons, to be given up in exchange for the advance of 100,000 tons of wheat, should not be used in the danger zone. The particularly objectionable character of this lay in the fact that allowing the use of Dutch vessels in the danger zone would lead to a breach of neutrality, not on account of the zone itself—this has nothing whatever to do with neutrality—but because it was clear that sailing through the zone, situated as it is around the associated countries of Europe, would mean at all events for a considerable part the transport of troops and munitions of war from America to her allies in Europe; while, moreover, the Dutch vessels if they were armed would run the chance of coming into armed conflict with German war vessels.

Holland as a neutral country could not allow that her ships should be used in the danger zone unless the associated governments were able to guarantee that they would not be armed and would not carry troops or war material. On the ground of the foregoing the argument used in the presidential statement, according to which seizure was necessary because Holland was not able to fulfill the obligation entered into, cannot be maintained. It is contrary to the actual facts of the case. The only correct presentation is this: The powers interested, felt themselves compelled, owing to the loss of ships, to supplement their tonnage by obtaining the use of a very considerable number of ships which did not belong to them but to Holland. It appeared to them that the Dutch government was not able to grant permission to its ships to sail for associated interests otherwise than upon conditions dictated by neutrality, but in the opinion of the interested governments not sufficiently in accord with their interests, hence they decided to proceed to the seizure of the Dutch mercantile marine, inasmuch as this was within their power.

The Dutch government considers itself obliged, especially in such serious circumstances as the present, to speak with great frankness; it is giving expression to the feeling of the whole of the Dutch people when it says that it sees in the seizure committed an act of violence against which it protests with all the force of its conviction and its injured national feeling. The statement in the president's declaration saying that this action offers Holland in a great measure the opportunity of providing itself with bread cereals is only apparently the case. After the experience obtained with regard to Dutch vessels in British and American ports it would really

be unwarrantable to allow other ships to sail to these ports without a proper guaranty that this experience would not be repeated.

The American government has always appealed to right and justice. It has always set itself up as the protector of small nations. That it now co-operates in a deed in diametrical opposition to these principles is a manner of acting which cannot be balanced by any expression of friendship or assurances of any mild application of the wrong committed.

SECRETARY LANSING REPLIES.

On April 13, in reply to the foregoing statement, Secretary of State Lansing issued the following memorandum:

The Netherlands government has issued a statement relative to the recent action of the government of the United States in putting into its service for the period of the present war emergency certain privately owned vessels of Netherlands registry lying within the territorial jurisdiction of the United States.

While this action is referred to as being indefensible from the standpoint of international law, the statement of the Netherlands government does not argue the question of legality. Nor is this government disposed to do so.

The practice of nations and the opinions of jurists on the right of a belligerent to utilize all vessels which come voluntarily and unconditionally within its jurisdiction are sufficiently well known to render citation of precedent and authority unnecessary.

But, as the Netherlands government itself suggests, our action must be subjected to a finer test than that of mere legality. It matters very little that our act be legal if, as alleged, it violates traditional friendship and is inconsistent with ideals of right and justice.

The Netherlands government first declares that the very presence of Dutch ships in our ports resulted from our detention of them with an unfriendly hand. While our right to refuse bunkers and cargo licenses is conceded, friendship, it is said, should have led to the granting of special privileges in favor of the subjects of a friendly state. Our own supply of bunker coal at seaboard has been inadequate for our pressing national needs. The cargoes which were demanded were largely of grain, of which our own reserves are all too low. The bunkers, if granted, would have served to carry this grain to the Netherlands where, as events have demonstrated, it was not then needed and where it would only have served to release equivalent foodstuffs for the enemy.

Such action upon our part, whatever its intention, would, in fact, have been an act beneficial to the enemy and having no relation to our friendship to the Netherlands. The owners of Dutch ships were, however, unwilling that their ships should perform any other services than those which it was clearly impossible for us to facilitate, and the ships of this maritime nation accordingly lay idle for many months and until the conclusion, on Jan. 25, 1918, of the temporary shipping agreement which was proposed by the Netherlands commissioners at London and accepted by the United States as a measure to restore to immediate activity that portion of the Netherlands mercantile fleet lying within our waters.

The statement of the Netherlands government seems to imply that this agreement was in fact lived up to by the Netherlands government, yet evidence to the contrary is found in the statement itself, which refers to German objections as having prevented performance by that government of what is erroneously referred to as America's demand, but what was in reality a Netherlands undertaking, that when a Dutch ship left the United States for the Netherlands a corresponding Dutch vessel should simultaneously leave the Netherlands for the United States. Had not the Netherlands government, under German threats of violence, which were a matter of common knowledge, felt unable to carry out

the temporary shipping agreement, it is inexplicable that the steamships Samarinda and Adonis would not have sailed for a Dutch port with their cargoes of foodstuffs, which under the agreement the Netherlands was to receive, and of which it was asserted her people were in direst need. Indeed, the statement of the Netherlands minister for foreign affairs made to parliament on March 12, 1918, if it is correctly reported to us, sets out in considerable detail Germany's objections, which prevented performance of this shipping agreement. As recently as March 14, 1918, after the Netherlands government had been informed that the situation had reached a point where the associated governments could see no alternative but requisitioning, a note was presented on behalf of the Netherlands government expressing the hope that Germany's objections might still be overcome, so as to permit at some future date complete performance of this agreement, which was to have been put into operation immediately and completely upon its conclusion nearly two months before.

One year ago the United States abandoned its neutrality and pledged its entire resources of life and treasure to insure the triumph of democracy over autocracy and to assist to save the world from the blight of militarism. As a result of a species of naval warfare directed against belligerents and neutrals alike which the Netherlands government has itself declared to be illegal, there has during this period existed a shortage of shipping which threatens to postpone at frightful cost the ultimate victory. This has created an emergency which in magnitude and significance has seldom if ever before been equaled. During this period there have been lying in ports of the United States and subject to its jurisdiction and control approximately 500,000 tons of ships of Netherlands registry. At any time within a year the United States might have exercised its right to put these ships into a service useful to it. Yet it forbore and for many months patiently negotiated first in Washington and then in London, until finally the temporary agreement of Jan. 25 was entered into. No sooner was this agreement concluded than it broke down under German threats of violence which overruled the will of the Netherlands government expressed therein. Then and then only did the United States take steps to accomplish through the exercise of its own right that which it was hoped could have been accomplished by agreement, and which the Netherlands government had been willing in part so to accomplish.

The action taken leaves available to the Netherlands government by far the greater part of its merchant marine and tonnage, which, according to estimates of its own officials, is ample for the domestic and colonial needs of the Netherlands. Shipping required for these needs will be free from detention on our part and will be facilitated by the supplying of bunkers. The balance is being put into a highly lucrative service, the owners receiving the remuneration and the associated governments assuming the risks involved. In order to insure to the Netherlands the future enjoyment of her merchant marine intact, not only will ships be returned at the termination of the existing war emergency, but the associated governments have offered to replace in kind rather than in money any vessels which may be lost by war or marine risk; 100,000 tons of bread cereal, which the German government when appealed to refused to supply, have been offered to the Netherlands by the associated governments out of their own inadequate supplies, and arrangements are being perfected to tender to the Netherlands government other commodities which they desire to promote their national welfare and for which they may freely send their ships.

The statement of the Netherlands government explicitly recognizes the traditional friend-

ship of the United States toward its country. It recognizes that we have heretofore sought to act in accordance with the dictates of right and justice, and to champion the interests of smaller nations. It should not, therefore, hastily be presumed that we have now abruptly repudiated that friendship and been false to those ideals. It is, in fact, difficult to believe that such a conclusion could be drawn from this exercise of our rights in a manner which scrupulously safeguards and indeed promotes the national interests of the Netherlands.

NORWEGIAN-AMERICAN TRADE AGREEMENT.

It was announced by the United States war trade board May 4, 1918, that a general commercial agreement between the United States and Norway had been signed by Vance C. McCormick, chairman of the war trade board, and Dr. Fridtjof Nansen, special representative of the Norwegian government. The agreement assured to Norway supplies to cover her estimated needs in so far as they could be covered without detriment to the war needs of the United States and its associates in the war, the understanding being that none of these supplies imported from the United States or its associates was to go to the central powers or to replace commodities going to those countries. The principal articles going to Norway are foodstuffs, including bread grains, fodder, starches, cocoa, coffee, tea, sirup, spices, fruit, sugar, pork and beef; oils and fats, rubber tires, silk yarns and tissues, cotton, wool and flax; metal working machinery, phosphate rock, hides, resin, tobacco, iron and steel, copper and lead.

Norway agreed to the unhampered export to the United States and its associates in the war of all Norwegian products not needed for home consumption, particularly of ores and minerals, chemical and metallurgical products, timber and wood products, fish and fish products. This covers the regular supply of nitrates, iron ore, metals used in hardening special process steel, timber for mine props, wood pulp and other exports, particularly for the European associates of the United States in the war.

COMMERCIAL AND SHIPPING AGREEMENTS WITH DENMARK.

On Sept. 17, 1918, Danish-American commercial and shipping agreements were concluded between the American war trade board and a special Danish mission in Washington. The agreements, which followed the same general lines as those earlier concluded with the two other Scandinavian powers, assured to Denmark a supply of various foodstuffs, metals, machinery, textiles, nonedible animal and vegetable products, chemicals, drugs and other commodities required for her needs in an aggregate quantity of well over 352,000 tons annually.

A number of vessels sufficient to carry the commodities home to Denmark were placed at the disposal of the Danish government.

No articles imported into Denmark under the provisions of the agreement are to be directly or indirectly exported from Denmark to the central powers nor to any neutral country where such exportation will directly or indirectly serve to release for export to Germany or her allies any article or commodity of whatever origin. Nor shall commodities which the United States or its associates in the war furnish Denmark be used in the production of any commodity to be exported to the central powers. A feature of the agreement was the encouragement and facilitation of inter-Scandinavian trade under which a considerable proportion of Denmark's exportable surplus will assist in satisfying the food needs of her neighbors, Norway and Sweden.

TRADE LEAGUE AFTER THE WAR.

July 14, 1918, Lord Robert Cecil, British undersecretary of state for foreign affairs, issued the following statement:

"I have been much interested in the series of addresses and discussions at the recent meetings of commercial associations in the United States, such as the chambers of commerce and the foreign trade council, regarding trade after the war. The tone of these discussions seems to show clearly a desire for settled arrangements for mutual help between all the nations now associated in the war against Germany. These are also our feelings in Britain, and I should like to make some acknowledgment of these recent utterances of prominent American commercial men by trying to describe roughly the state of British policy at this moment in regard to such matters.

"The resolutions of the Paris economic conference have been much discussed during the last two years. When they were written we had an alliance of eight nations, six of whom had suffered the immediate ravages of war. The world outside, including the United States with its vast resources, was neutral, and nominally, at any rate, the neutral world at the conclusion of peace would have sold its products where they would have fetched most money.

"To borrow the plain words of the recent interallied labor conference, all these vast resources would have gone to those who could pay most, not to those who would need most, so the Paris conference was a defensive agreement of those then engaged in the war to secure their own people against starvation and unemployment during the period of reconstruction, and to provide for the restoration to economic life of the ravaged territories of Belgium, Poland, Serbia, France, and Italy.

"These objects retain all their old importance. They are simple measures of self-preservation. It is, for example, still essential that we should forestall the aggressive efforts of the central powers to use their money power to snatch on the morning after the war the raw materials needed for the reconstruction of the peoples in the western and eastern theaters of war whom they have themselves despoiled.

"But, while the essential needs of ourselves and of the nations which are fighting with us the battle of liberty and justice remain unaltered, the alliance of eight has expanded into the association of twenty-four nations of which President Wilson spoke in his recent address to the Red Cross. It is no longer a question of forming some narrow defensive alliance, but of laying down the economic principles of the association of nations which is already in existence, and to membership of which we are committed.

"What are these principles to be? The president has stated them in memorable words.

"Each member of the association of nations may have to protect its citizens in one way or another after the war, but our aim must be a comprehensive arrangement of liberal intercourse with all members of the association by which each one of us, while preserving his own national security, may contribute to meet the needs and aid in the development of his fellow members. Nor, of course, can our arrangement for mutual assistance exclude all competition, though we are most anxious that co-operation should be the keynote of our commercial relations. Our feelings in this matter cannot be better described than in the words of James A. Farrell to the foreign trade council, namely:

"The sacrifices that are being cheerfully endured to-day by men engaged in foreign commerce in the necessary curtailment of their business through the conservation of shipping are an earnest of the elevation of method and of purpose which will control the conduct of our external trade in the future."

"There is but one obstacle to this economic

association of nations. That obstacle is Germany—the Germany described by President Wilson in the words which I have already quoted—a Germany living 'under ambitious and intriguing masters.' You have seen the provisions of her commercial treaties in the east, and with all the groups of peoples from the Arctic ocean to the Black sea. Her economic policy toward these groups is absolutely contrary to our principles. That policy began by systematic and lawless plundering in Poland, in the Ukraine, and elsewhere. Now everywhere she has legalized this plunder by placing the weaker nations under onerous commercial tribute to herself.

"On Lithuania she has imposed her coinage. From Roumania and the Ukraine she has exacted a guaranty of supplies irrespective of their own needs, and at flagrantly unjust rates of compensation. She has appropriated the natural resources of Roumania in the form of a lease to German corporations. On Russia, Finland, and the Ukraine she has imposed unfair and one sided tariff arrangements. The people of Finland, in fact, find now that their liberties have been bartered away in an agreement signed secretly in Berlin, and it is actually being proposed that thousands of Finns should be deported to work for German masters.

"Having established control over the Dardanelles and the Baltic, Germany has now brought under her own control the third great highway of European trade—the Danube—by destroying the international commission which had long become an established organ of European polity, and now, in order that there may not be any mistake as to the significance of these acts, her foreign minister has declared that this Roumanian treaty in particular will be made the precedent and foundation for the economic terms to be demanded by the central powers at the general peace. The significance of this declaration is evident from Kuchmann's own words that 'the damages Roumania will have to pay will amount to a very considerable sum in the long run, sums which perhaps do not very substantially differ from that which might presumably have been obtained by officially demanding a war indemnity.'"

TRIAL AND CONVICTION OF I. W. W. CONSPIRATORS.

William D. Haywood and ninety-nine other members of the labor organization known as "Industrial Workers of the World" were found guilty in the United States District court in Chicago, Aug. 17, 1918, of disloyal acts against the government. The defendants and a number of others were arrested in a nationwide raid made by secret service agents of the government Sept. 2, 1917, when great quantities of documents in the shape of letters, files and other printed and written matter revealing the propaganda of the organization were seized. The general headquarters of the society was in Chicago under the charge of William D. Haywood, the secretary-treasurer, and much of the information used against the defendants was found here.

Indictments were found Sept. 28, 1917, by the federal grand jury for the northern district of Illinois against 165 men and one woman, Elizabeth Gurley Flynn, under sections 6, 19 and 37 of the criminal code and under section 3 of the espionage act of June 15, 1917. The defendants were accused of violating the criminal code by conspiring against the government and also conspiring to injure citizens in their civil rights by means of sabotage and similar acts. They were further charged with violating the espionage act by discouraging enlistments in the army. The substance of the government's complaint against the I. W. W. was thus set forth by the prosecuting attorneys:

"Boiled down and stated in a few words the propaganda of these defendants consists in these assertions: We are going to take possession of the industries of this country—first, because we want them; second, because we need them; third, because we are in this crisis and we have the power to put it over. In addition there is running through all their endeavors a pronounced opposition to the support of the war, the teaching being that whatever can be done to make the power of the enemy greater or our own power of resistance less effective is a service to the organization."

The trial began April 1, 1918, with 114 defendants, a number having been granted "orders of separation," Miss Flynn being one of those not brought into court on this occasion. In the course of the hearing fourteen of the defendants were released by order of the court or at the request of the government. It took until May 2 to get a jury. The government completed its case June 19, after which the defense offered its evidence. On the part of the government there was much evidence submitted of sabotage in the lumber, grain, fruit, hop, mining and other industries in various parts of the country, but especially in the west. Evidence of draft resistance and evasion was presented, together with posters and documents circulated in opposition to the draft. The main point made by the defense was that the efforts of the I. W. W. were directed toward bettering working conditions and were not aimed at crippling the nation's war activities.

Judge Kenesaw M. Landis presided at the trial, in which the government was represented by Frank K. Nebeker and Claude R. Porter. The attorneys for the defendants were George Vandever and William Cleary. Sentence was passed upon the defendants on Aug. 30, the penalties imposed ranging from a few days in the county jail to twenty years in the federal prison at Leavenworth, Kas. The sentences were grouped as follows:

Maximum of Twenty Years.

Penalty—Maximum sentence, twenty years. First count, six years and \$5,000; second count, ten years and \$5,000; third count, two years and \$5,000; fourth count, twenty years and \$5,000.

Those sentenced—15:

William D. Haywood.	Carl Ahlteen.
George Andreychine.	Forrest Edwards.
Ralph H. Chaplin.	Leo Laukki.
Aurelio Vicente Azura.	C. L. Lambert.
Richard Brazier.	Vladimir Lossieff.
Walter T. Nef.	Charles Rothfiser.
James Rowan.	Sam Scarlett.
Manuel Rey.	

Maximum of Five Years.

Penalty—Maximum penalty five years. First count, five years and \$5,000; second count, two years and \$5,000; third count, two years and \$5,000; fourth count, five years and \$5,000.

Those sentenced—7:

William Moran.	H. F. Kane.
William Weyh.	Dave Ingar.
Joseph A. Oates.	Pierce C. Wetter.
John Avila.	

Maximum of Ten Years.

Penalty—Maximum, ten years. First count, six years and \$5,000; second count, ten years and \$5,000; third count, two years and \$10,000; fourth count, ten years and \$10,000.

Those sentenced—33:

C. W. Davis.	Grover H. Perry.
C. H. Rice.	Vincent St. John.
Albert B. Prasher.	John Walsh.
Fred Jaakkola.	Archie Sinclair.
Fred Johanson.	Peter Green.
G. J. Bourg.	James Slovik.
Stanley J. Clark.	Charles Bennett.
Edward F. Doree.	J. H. Byers.
Jack Law.	John I. Turner.
J. A. MacDonald.	John Martin.

Joseph J. Gordon.
Charles Ashleigh.
Dan Buckley.
Alexander Cournos.
Ben Fletcher.
Bert Lorton.
Francis Miller.

Don Sheridan.
James P. Thompson.
John Pancer.
Sigfried Stenberg.
Ed Hamilton.
John Baldazza.

Maximum of Five Years.

Penalty—Maximum five years. First count, five years and \$5,000; second count, five years and \$5,000; third count, two years and \$10,000; fourth count, five years and \$10,000.

Those sentenced—26:

Arthur Boose.	M. Levine.
J. T. ("Red") Doran.	Joe Graber.
C. R. Griffin.	Olin B. Anderson.
Frank Westerlund.	W. H. Lewis.
Harrison George.	Joe McCarty.
Harry Lloyd.	Ted Fraser.
Pete McEvoy.	John M. Foss.
James Phillips.	William Tanner.
V. V. O'Hare.	Ray S. Fanning.
Charles H. MacKinnon.	Clyde Hough.
Louis Parenti.	James Elliott.
Charles Plahn.	James H. Manning.
Herbert Mahler.	Herbert McCutcheon.

Maximum of One Year.

Penalty—Maximum, one year and one day. First count, one year and one day and \$5,000; second count, one year and one day and \$5,000; third count, one year and one day and \$10,000; fourth count, one year and one day and \$10,000.

Those sentenced—12:

Fred Nelson.	Roy A. Brown.
Walter Smith.	George Hardy.
Charles Jacobson.	J. R. Basket.
R. J. Bobba.	Ray Corder.
Anson E. Soper.	George Speed.
Charles McWhirt.	Charles Jacobs.

Meyer Friedkin and Glen Roberts were sentenced to ten days in the county jail on each of the four counts, the sentences to run concurrently.

Final disposition of a few other cases was deferred. Those sentenced to prison were taken to Leavenworth Sept. 7.

MAINTENANCE OF INTERNATIONAL LAW.

The following statement was adopted at a meeting of the executive council of the American Society of International Law in Washington, D. C., April 27, 1918:

"The executive council of the American Society of International Law considers that the very existence of international law is now at issue.

"The committee on annual meeting has therefore refrained from calling the members of the society from the active work on which most of them are engaged to meet for the discussion of questions of law. The only great question of international law today is whether that law shall continue to exist.

"Upon that subject the American Society of International Law reaffirms the clear and unvarying support of the United States for the rule of law, expressed in the recognition of international law in the federal constitution, in the decisions of its highest court and in the utterances of its chief magistrates and statesmen.

"Mr. Webster, while secretary of state, made this announcement:

"Every nation, on being received, at her own request, into the circle of civilized governments, must understand that she not only attains rights of sovereignty and the dignity of national character, but that she binds herself to the strict and faithful observance of all those principles, laws and usages which have obtained currency among civilized states and which have for their object the mitigation of the miseries of war."

"President Cleveland, in his special message of 1893, addressed to the congress of the United States, said:

"The law of nations is founded upon reason and justice, and the rules of conduct governing individual relations between citizens or subjects of a civilized state are equally applicable as between enlightened nations. The considerations that international law is without a court for its enforcement and that obedience to its commands practically depends upon good faith instead of upon the mandate of a superior tribunal only give additional sanction to the law itself and brand any deliberate infraction of it not merely as a wrong but as a disgrace. A man of true honor protects the unwritten word which binds his conscience more scrupulously, if possible, than he does the bond a breach of which subjects him to legal liabilities, and the United States, in aiming to maintain itself as one of the most enlightened nations, would do its citizens a gross injustice if it applied to its international relations any other than a high standard of honor and morality."

"The council would call attention to the fact that the entire diplomatic and consular service of all nations operates under the control and protection of international law. That, therefore, all the vast interests within the charge of these agencies must be left unserved and unadministered if the beneficent provisions of international law are abandoned or disregarded. They further venture to call attention to the fact that more than two-thirds of the surface of the globe is covered by the high seas; that no law is current thereon except international law; that noble branch of law which President Wilson, on April 2, 1917, addressing the congress of the United States, declared had its origin in the attempt to set up some law which would be respected and observed upon the seas, where no nation had right of dominion and where lay the free highways of the world." "By painful stage after stage," he said, "has that law been built up with meager enough results indeed after all was accomplished that could be accomplished, but always with a clear view at least of what the heart and conscience of mankind demanded."

"To say no more than has been said as to international relations upon land, if this one law and common rule which guards the traffic of the seas is allowed to lapse in that vast and preponderant domain, no measure of right and justice, no rule of humanity or restraint will remain, only the desolating condition which the Vulgate ascribes to hell, 'ubi nullus ordo sed sempiternus horror inhabitat.'"

"Therefore, those just and wise doctrines by which international relations are guided, humanized and controlled cannot be debilitated or abandoned. Therefore, they must be taught by our scholars, learned by our rising youth, declared and defined by our courts, announced by our congress, enlarged by our treaties and enforced by our chief executive. "Therefore, at need, our army upon the land and our navy upon the sea, with a spirit and devotion which have never declined, must maintain and defend them, not for the good of this nation or this time alone, but for the good of all nations and all men, now and forevermore."

The following were present when the above statement was adopted:

- Hon. Elihu Root, president of the society.
- Dr. David Jayne Hill, former assistant secretary of state and ambassador to Germany.
- Hon. Chandler P. Anderson, former counselor for the department of state.
- Hon. John Barrett, director-general of the Pan-American union.
- Charles Henry Butler, former reporter of the Supreme court of the United States.
- Charles Noble Gregory of the bar of the District of Columbia.

Prof. Charles Cheney Hyde of Northwestern university.

Prof. John H. Latane of Johns Hopkins university.

Prof. William R. Manning of the University of Texas.

Hon. A. J. Montague, representative in congress from Virginia.

Maj. James Brown Scott, United States reserves.

Alpheus H. Snow of the bar of the District of Columbia.

Prof. George G. Wilson of Harvard university.

DEATH OF MAN WHO CAUSED THE WAR.

Gavrilo Prinzip, the man who killed Archduke Francis Ferdinand, heir apparent to the throne of Austria-Hungary, and thereby precipitated the great European war, died in a fortress near Prague, Bohemia, April 30, 1918, from tuberculosis. The archduke and his wife were in Sarajevo, Bosnia, on a visit June 28, 1914, when they were assassinated. Prinzip fired two explosive bullets from a revolver, the first striking the duchess of Hohenberg, the archduke's morganatic wife, in the abdomen, and the second taking effect in the neck of the archduke. Both bullets caused death in a short time. Prinzip, who was a student, was sentenced to twenty years in prison. Four others, who were arrested in connection with the crime or with a previous attempt to kill the archduke, were executed. Ten were given various terms in prison for conspiracy.

Prinzip and most of the others were Serbians or Serbian in sympathy who resented the annexation of Bosnia to Austria-Hungary. The fact that the conspiracy was laid in Serbia led the Austrians to make demands upon Serbia to which that nation could not accede. Austria-Hungary declared war on Serbia, whereupon Russia threatened to intervene. Then Germany declared war on Russia and set the whole of Europe aflame.

MATERIALS REQUIRED FOR ONE AIRPLANE.

The following figures, compiled by the signal corps, show the materials necessary for a single airplane of the more simple type, and exclusive of all the materials necessary for the engine:

Nails.....	4,326
Screws.....	3,377
Steel stampings.....	921
Forgings.....	798
Turnbuckles.....	276
Veneer.....square feet..	57
Wire.....feet..	3,262
Varnish.....gallons..	11
Dope.....gallons..	59
Aluminum.....pounds..	65
Rubber.....feet..	34
Linen.....square yards..	201
Spruce.....feet..	244
Pine.....feet..	58
Ash.....feet..	31
Hickory.....feet..	1 1/2

EXPLOSION IN GILLESPIE SHELL LOADING PLANT.

The shell loading plant of T. A. Gillespie & Co., at Morgan, N. J., near Perth Amboy, said to be the largest of its kind in the world, was partly destroyed by a series of explosions beginning at 7:40 p. m., Oct. 4, 1918. Of the 700 structures used by the concern 325 were destroyed. The first explosion occurred in the No. 1 unit of the six-inch plant, where seventy-six men were employed. Of these, so far as could be learned, sixty-four were killed, though only thirty-five bodies were recovered. The total damage to the plant and its contents, consisting largely of trinitrotoluol, was estimated by army officers at between \$15,000,000 and \$20,000,000. The cause of the explosion was not determined.

PEACE DISCUSSIONS AND WAR AIMS.

LLOYD GEORGE ON WAR AIMS OF ALLIES.

Premier Lloyd George, addressing the trade union conference in London, Jan. 5, 1918, said:

"When the government invite organized labor in this country to assist them to maintain the might of their armies in the field, its representatives are entitled to ask that any misgivings and doubts which any of them may have about the purpose to which this precious strength is to be applied should be definitely cleared. And what is true of organized labor is equally true of all citizens in this country, without regard to grade or vocation.

"When men by the million are being called upon to suffer and die, and vast populations are being subjected to sufferings and privations of war on a scale unprecedented in the history of the world, they are entitled to know for what cause or causes they are making the sacrifice.

"It is only the clearest, greatest, and justest of causes that can justify the continuance, even for one day, of this unspeakable agony of the nation, and we ought to be able to state clearly and definitely not only the principles for which we are fighting, but also their definite and concrete application to the war map of the world.

"We have arrived at the most critical hour in this terrible conflict, and before any government takes a fateful decision as to the conditions under which it ought either to terminate or to continue the struggle, it ought to be satisfied that the conscience of the nation is behind these conditions, for nothing else can sustain the effort which is necessary to achieve a righteous end to this war.

"I have, therefore, during the last few days, taken special pains to ascertain the view and attitude of representative men of all sections of thought and opinion in the country.

"Last week I had the privilege not merely of perusing the declared war aims of the labor party, but also of discussing in detail with labor leaders the meaning and intention of that declaration.

"I have also had opportunity of discussing this same momentous question with Mr. Asquith and Viscount Grey. Had it not been that the nationalist leaders are in Ireland, engaged in endeavoring to solve the tangled problem of Irish self-government, I should have been happy to exchange views with them, but Mr. Redmond, speaking on their behalf, has, with his usual lucidity and force, in many of his speeches made clear what his ideas are as to the object and purpose of the war. I have also had an opportunity of consulting certain representatives of the great dominions overseas.

"I am glad to be able to say, as a result of these discussions, that, although the government are alone responsible for the actual language I purpose using, there is a national agreement as to the character and purpose of our war aims and peace conditions, and in what I say to you to-day, and through you to the world, I can venture to claim that I am speaking not merely the mind of the government, but of the nation and of the empire as a whole.

"We may begin by clearing away some misunderstandings and stating what we are not fighting for.

"We are not fighting a war of aggression against the German people. Their leaders have persuaded them that they are fighting a war of self-defense against a league of rival nations, bent on the destruction of Germany. That is not so. The destruction or disruption of Germany or the German people has never been a war aim with us from the first day of this war to this day.

"Most reluctantly, and, indeed, quite unprepared for the dreadful ordeal, we were forced to join in this war, in self-defense of the violated public law of Europe and in vindication of the most solemn treaty obligations on

which the public system of Europe rested and on which Germany had ruthlessly trampled in her invasion of Belgium.

"We had to join in the struggle or stand aside and see Europe go under and brute force triumph over public right and international justice.

"It was only the realization of that dreadful alternative that forced the British people into the war, and from that original attitude they have never swerved. They have never aimed at a break-up of the German people or the disintegration of their state or country. Germany has occupied a great position in the world. It is not our wish or intention to question or destroy that position for the future, but rather to turn her aside from hopes and schemes of military domination.

"Nor did we enter this war merely to alter or destroy the imperial constitution of Germany, much as we consider that military and autocratic constitution a dangerous anachronism in the twentieth century. Our point of view is that the adoption of a really democratic constitution by Germany would be the most convincing evidence that her old spirit of military domination has indeed died in this war and would make it much easier for us to conclude a broad, democratic peace with her. But, after all, that is a question for the German people to decide.

"We are not fighting to destroy Austria-Hungary or to deprive Turkey of its capital or the rich lands of Asia Minor and Thrace which are predominantly Turkish.

"It is now more than a year since the president of the United States, then neutral, addressed to the belligerents a suggestion that each side should state clearly the aims for which they were fighting.

"We and our allies responded by the note of Jan. 10, 1917. To the president's appeal the central empires made no reply, in spite of many adjurations, both from their opponents and from neutrals, they have maintained complete silence as to the objects for which they are fighting. Even on so crucial a matter as their intention with regard to Belgium they have uniformly declined to give any trustworthy indication.

"On Dec. 25, last, however, Count Czernin, speaking on behalf of Austria-Hungary and her allies, did make a pronouncement of a kind. It is, indeed, deplorably vague.

"We are told that it is not the intention of the central powers to appropriate forcibly any occupied territories or to rob of its independence any nation which has lost its political independence during the war.

"It is obvious that almost any scheme of conquest and annexation could be perpetrated within the literal interpretation of such a pledge. Does it mean that Belgium, Serbia, Montenegro and Roumania, will be independent and as free to pursue their own destinies as Germany or any other nation? Or does it mean that all manner of interferences and restrictions, political and economical, incompatible with the status and dignity of free and self-respecting people are to be imposed? If this is the intention, then there will be one kind of independence for the great nation and an inferior kind of independence for the small nation.

"We must know what is meant, for equality of right among the nations, small as well as great, is one of the fundamental issues this country and her allies are fighting to establish in this war.

"Reparation for the wanton damage inflicted on Belgian towns and villages and their inhabitants is emphatically repudiated. The rest of the so-called offer of the central powers is almost entirely a refusal of all concessions. All suggestions about the autonomy of subject nationalities are ruled out of the peace terms altogether. The question whether any form of self-government is to be given to the

Arabs, Armenians or Syrians is declared to be entirely a matter for the sublime porte. A pious wish for the protection of minorities, 'in so far as it is practically realizable,' is the nearest approach to liberty which the central powers' statesmen venture to make.

"On one point only are they perfectly clear and definite. Under no circumstances will the German demand for the restoration of the whole of Germany's colonies be departed from. All principles of self-determination, or, as our earlier phrase goes, government by the consent of the governed, here vanish into thin air.

It is impossible to believe that any edifice of permanent peace could be erected on such a foundation as this. Mere lip-service to the formula of no annexation and no indemnities, or the right of self-determination is useless. Before any negotiations can even be begun the central powers must realize the essential facts of the situation.

"The days of the treaty of Vienna are long past. We can no longer submit the future of European civilization to the arbitrary decisions of a few negotiators, trying to secure by chicanery or persuasion the interests of this or that dynasty or nation.

"The settlement of the new Europe must be based on such grounds of reason and justice as will give some promise of stability. Therefore it is that we feel that government with the consent of the governed must be the basis of any territorial settlement in this war. For that reason also, unless treaties be upheld, unless every nation is prepared, at whatever sacrifices, to honor the national signature, it is obvious that no treaty of peace can be worth the paper on which it is written.

"The first requirement, therefore, always put forward by the British government and their allies has been the complete restoration, political, territorial and economic, of independence of Belgium and such reparation as can be made for the devastation of its towns and provinces.

"This is no demand for a war indemnity, such as that imposed on France by Germany in 1871. It is not an attempt to shift the cost of warlike operations from one belligerent to another, which may or may not be defensible. It is no more and no less than an insistence that before there can be any hope for stable peace this great breach of the public law of Europe must be repudiated and so far as possible repaired.

"Reparation means recognition. Unless international right is recognized by insistence on payment for injury, done in defiance of its canons, it can never be a reality.

"Next comes the restoration of Serbia, Montenegro and the occupied parts of France, Italy and Roumania. The complete withdrawal of the allied (Teutonic) armies, and the reparation for injustice done is a fundamental condition of permanent peace.

"We mean to stand by the French democracy to the death in the demand they make for a reconsideration of the great wrong of 1871, when, without any regard to the wishes of the population, two French provinces were torn from the side of France and incorporated in the German empire.

"This sore has poisoned the peace of Europe for half a century, and, until it is cured, healthy conditions will not have been restored. There can be no better illustration of the folly and wickedness of using a transient military success to violate national right.

"I will not attempt to deal with the question of the Russian territories now in German occupation. The Russian policy since the revolution has passed so rapidly through so many phases that it is difficult to speak without some suspension of judgment as to what the situation will be when the final terms of European peace come to be discussed.

"Russia accepted war with all its horrors because, true to her traditional guardianship of the weaker communities of her race, she stepped in to protect Serbia from a plot

against her independence. It is this honorable sacrifice which not merely brought Russia into the war, but France as well.

"France, true to the conditions of her treaty with Russia, stood by her ally in a quarrel which was not her own. Her chivalrous respect for her treaty led to the wanton invasion of Belgium and the treaty obligations of Great Britain to that little land brought us into the war.

"The present rulers of Russia are now engaged, without any reference to the countries whom Russia brought into the war, in separate negotiations with their common enemy. I am indulging in no reproaches. I am merely stating the facts with a view to making it clear why Great Britain cannot be held accountable for decisions taken in her absence and concerning which she has not been consulted or her aid invoked.

"No one who knows Prussia and her designs upon Russia can for a moment doubt her ultimate intention. Whatever phrases she may use to delude Russia, she does not mean to surrender one of the fair provinces or cities of Russia now occupied by her forces. Under one name or another (and the name hardly matters) those Russian provinces will henceforth be in reality a part of the dominions of Prussia. They will be ruled by the Prussian sword in the interests of the Prussian autocracy, and the rest of the people of Russia will be partly enticed by specious phrases and partly bullied by the threat of continued war against an impotent army into a condition of complete economic and ultimate political enslavement to Germany.

"We all deplore the prospect. The democracy of this country means to stand to the last by the democracies of France and Italy and all our other allies. We shall be proud to stand side by side with the new democracy of Russia. So will America and so will France and Italy. But if the present rulers of Russia take action which is independent of their allies we have no means of intervening to arrest the catastrophe which is assuredly befalling their country. Russia can only be saved by her own people.

"We believe, however, that an independent Poland, comprising all those genuinely Polish elements who desire to form a part of it, is an urgent necessity for the stability of western Europe.

"Similarly, though we agree with President Wilson that a break-up of Austria-Hungary is no part of our war aims, we feel that unless genuine self-government on true democratic principles is granted to those Austro-Hungarian nationalities who have long desired it, it is impossible to hope for a removal of those causes of unrest in that part of Europe which have so long threatened the general peace.

"On the same grounds we regard as vital the satisfaction of the legitimate claims of the Italians for union with those of their own race and tongue. We also mean to press that justice be done to the men of Roumanian blood and speech in their legitimate aspirations. If these conditions are fulfilled Austria-Hungary would become a power whose strength would conduce to the permanent peace and freedom of Europe instead of being merely an instrument to the pernicious military autocracy of Prussia that uses the resources of its allies for the furtherance of its own sinister purposes.

"Outside of Europe we believe that the same principles should be applied. While we do not challenge the maintenance of the Turkish empire in the home lands of the Turkish race with its capital at Constantinople, the passage between the Mediterranean and the Black sea being internationalized and neutralized, Arabia, Armenia, Mesopotamia, Syria and Palestine are, in our judgment, entitled to a recognition of their separate national conditions.

"What the exact form of that recognition in each particular case should be need not

here be discussed beyond stating that it would be impossible to restore to their former sovereignty the territories to which I have already referred.

"Much has been said about the arrangements we have entered into with our allies on this and on other subjects. I can only say that as the new circumstances, like the Russian collapse and the separate negotiations, have changed the conditions under which those arrangements were made, we are, and always have been, perfectly ready to discuss them with our allies.

"With regard to the German colonies, I have repeatedly declared that they are held at the disposal of a conference whose decision must have primary regard to the wishes and interests of the native inhabitants of such colonies. None of those territories are inhabited by Europeans. The governing consideration, therefore, must be that the inhabitants should be placed under the control of an administration acceptable to themselves, one of whose main purposes will be to prevent their exploitation for the benefit of European capitalists or governments.

"The natives live in their various tribal organizations under chiefs and councils who are competent to consult and speak for their tribes and members and thus to represent their wishes and interests in regard to their disposal. The general principle of national self-determination is, therefore, as applicable in their cases as in those of the occupied European territories.

"The German declaration that the natives of the German colonies have through their military fidelity in war shown their attachment and resolve under all circumstances to remain with Germany is applicable not to the German colonies generally but only to one of them, and in that case, German East Africa, the German authorities secured the attachment, not of the native population as a whole, which is and remains profoundly anti-German, but only of a small warlike class, from whom their askaris, or soldiers, were selected. These they attached to themselves by conferring on them a highly privileged position as against the bulk of the native population, which enabled these askaris to assume a lordly and oppressive superiority over the rest of the natives.

"By this and other means they secured the attachments of a very small and insignificant minority, whose interests were directly opposed to those of the rest of the population and for whom they have no right to speak. The German treatment of the native populations in their colonies has been such as amply to justify their fear of submitting the future of those colonies to the wishes of the natives themselves.

"Finally there must be reparation for the injuries done in violation of international law. The peace conference must not forget our seamen and the services they have rendered to the outrages they have suffered for the common cause of freedom.

"One omission we notice in the proposal of the central powers which seems to us especially regrettable. It is desirable and essential that the settlement after this war shall be one which does not in itself bear the seed of future war. But that is not enough. However wisely and well we may make territorial and other arrangements, there will still be many subjects of international controversy. Some, indeed, are inevitable.

"Economic conditions at the end of the war will be in the highest degree difficult owing to the diversion of human effort to warlike pursuits. There must follow a world shortage of raw materials, which will increase the longer the war lasts, and it is inevitable that those countries which have control of raw materials will desire to help themselves and their friends first. Apart from this, whatever settlement is made will be suitable only to the

circumstances under which it is made, and as those circumstances change, changes in the settlement will be called for.

"So long as the possibility of a dispute between nations continues—that is to say, so long as men and women are dominated by impassioned ambition and war is the only means of settling a dispute—all nations must live under a burden not only of having from time to time to engage in it but of being compelled to prepare for its possible outbreak.

"The crushing weight of modern armaments, the increasing evil of compulsory military service, the vast waste of wealth and effort involved in warlike preparation—these are blots on our civilization, of which every thinking individual must be ashamed. For these and other similar reasons we are confident that a great attempt must be made to establish, by some international organization, an alternative to war as a means of settling international disputes.

"After all, war is a relic of barbarism, and, just as law has succeeded violence as a means of settling disputes between individuals, so we believe that it is destined ultimately to take the place of war in the settlement of controversies between nations.

"If then, we are asked what we are fighting for, we reply, as we have often replied, we are fighting for a just and a lasting peace, and we believe that before permanent peace can be hoped for three conditions must be fulfilled: First, the sanctity of treaties must be re-established; secondly, a territorial settlement must be secured, based on the right of self-determination or the consent of the governed, and, lastly, we must seek, by the creation of some international organization, to limit the burden of armaments and diminish the probability of war. On these conditions its peoples are prepared to make even greater sacrifices than those they have yet endured."

PRESIDENT WILSON GIVES WAR AIMS.

President Wilson appeared before a joint session of the houses of congress Jan. 8, 1918, and delivered the following address:

"Gentlemen of the Congress: Once more, as repeatedly before, the spokesmen of the central empires have indicated their desire to discuss the objects of the war and the possible bases of a general peace. Parleys have been in progress at Brest-Litovsk between Russia and representatives of the central powers, to which the attention of all the belligerents has been invited for the purpose of ascertaining whether it may be possible to extend these parleys into a general conference with regard to terms of peace and settlement. The Russian representatives presented not only a perfectly definite statement of the principles upon which they would be willing to conclude peace, but also an equally definite program of the concrete application of these principles.

"The representatives of the central powers, on their part, presented an outline of settlement which, if much less definite, seemed susceptible of liberal interpretation until their specific program of practical terms was added. That program proposed no concessions at all either to sovereignty of Russia or to the preferences of the population with whose fortunes it dealt, but meant, in a word, that the central empires were to keep every foot of territory their armed forces had occupied—every province, every city, every point of vantage—as a permanent addition to their territories and their power.

"It is a reasonable conjecture that the general principles of settlement which they at first suggested originated with the more liberal statesmen of Germany and Austria, the men who have begun to feel the force of their own people's thought and purpose, while the concrete terms of actual settlement came from the military leaders, who have no thought but to keep what they have got.

"The negotiations have been broken off. The Russian representatives were sincere and in earnest. They cannot entertain such proposals of conquest and domination.

"The whole incident is full of significance. It is also full of perplexity. With whom are the Russian representatives dealing? For whom are the representatives of the central empires speaking? Are they speaking for the majorities of their respective parliaments or for the minority parties—that military and imperialistic minority which has so far dominated their whole policy and controlled the affairs of Turkey and of the Balkan states, which have felt obliged to become their associates in this war?

"The Russian representatives have insisted, very justly, very wisely, and in the true spirit of democracy, that the conferences they have been holding with the Teutonic and Turkish statesmen should be held within open, not closed, doors, and all the world has been audience as was desired.

"To whom have we been listening, then? To those who speak the spirit and intention of the resolutions of the German reichstag of the 9th of July last, the spirit and intention of the liberal leaders and parties of Germany, or to those who resist and defy that spirit and intention and insist upon conquest and subjugation? Or are we listening in fact to both unreconciled and in open and hopeless contradiction? These are very serious and pregnant questions. Upon the answer to them depends the peace of the world.

"But whatever the results of the parleys at Brest-Litovsk, whatever the confusions of counsel and of purpose in the utterances of the spokesmen of the central empires, they have again attempted to acquaint the world with their objects in the war and have again challenged their adversaries to say what their objects are, and what sort of settlement they would deem just and satisfactory. There is no good reason why that challenge should not be responded to, and responded to with the utmost candor. We do not wait for it. Not once, but again and again we have laid our whole thought and purpose before the world, not in general terms only but each time with sufficient definition to make it clear what sort of definite terms of settlement must necessarily spring out of them.

"Within the last week Mr. Lloyd George has spoken with admirable candor and in admirable spirit for the people and government of Great Britain. There is no confusion of counsel among the adversaries of the central powers, no uncertainty of principle, no vagueness of detail. The only secrecy of counsel, the only lack of fearless frankness, the only failure to make definite the statement of the objects of the war lies with Germany and her allies. The issues of life and death hang upon these definitions. No statesman who has the least conception of his responsibility ought for a moment to permit himself to continue this tragical and appalling outpouring of blood and treasure unless he is sure beyond a peradventure that the objects of the vital sacrifice are part and parcel of the very life of society and that the people for whom he speaks think them right and imperative as he does. And there is, moreover, a voice calling for these definitions of principle and of purpose which is, it seems to me, more thrilling and more compelling than any of the many moving voices with which the troubled air of the world is filled. It is the voice of the Russian people. They are prostrate and all but helpless, it would seem, before the grim power of Germany, which has hitherto known no relenting and no pity. Their power, apparently, is shattered, and yet their soul is not subservient.

"They will not yield either in principle or in action. The conception of what is right, of what it is humane and honorable for them to accept, has been stated with a frankness, a

largeness of view, a generosity of spirit and a universal human sympathy which must challenge the admiration of every friend of mankind; and they have refused to compound their ideals or desert others that they themselves may be safe.

"They call to us to say what it is that we desire, in what, if in anything, our purpose and our spirit differ from theirs; and I believe that the people of the United States would wish me to respond with utter simplicity and frankness.

"Whether their present leaders believe it or not, it is our heartfelt desire and hope that some way may be opened whereby we may be privileged to assist the people of Russia to attain their utmost hope of liberty and ordered peace.

"It will be our wish and purpose that the processes of peace, when they are begun, shall be absolutely open and that they shall involve and permit henceforth no secret understandings of any kind. The day of conquest and aggrandizement is gone by; so is also the day of secret covenants entered into in the interest of particular governments and likely at some unlooked for moment to upset the peace of the world.

"It is this happy fact, now clear to the view of every public man whose thoughts do not still linger in an age that is dead and gone, which makes it possible for every nation whose purposes are consistent with justice and the peace of the world to avow now or at any other time the objects it has in view.

"We entered this war because violations of right had occurred which touched us to the quick and made the life of our own people impossible unless they were corrected and the world secured once for all against their recurrence. What we demand in this war, therefore, is nothing peculiar to ourselves. It is that the world be made fit and safe to live in, and particularly that it be made safe for every peace loving nation which, like our own, wishes to live its own life, determine its own institutions, be assured of justice and fair dealing by the other peoples of the world as against force and selfish aggression.

"All the peoples of the world are in effect partners in this interest, and for our own part we see very clearly that unless justice be done to others it will not be done to us. The program of the world's peace, therefore, is our program, and that program, the only possible program as we see it, is this:

No Private Understandings.

"I. Open covenants of peace, openly arrived at, after which there shall be no private international understandings of any kind, but diplomacy shall proceed always frankly and in the public view.

Freedom of Seas.

"II. Absolute freedom of navigation upon the seas outside territorial waters, alike in peace and in war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants.

No Economic Barriers.

"III. The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the nations consenting to the peace and associating themselves for its maintenance.

Reduce National Armaments.

"IV. Adequate guaranties given and taken that national armaments will be reduced to the lowest point consistent with domestic safety.

Colonial Claims.

"V. A free, open minded and absolutely impartial adjustment of all colonial claims, based upon a strict observance of the principle that in determining all such questions of sovereignty the interests of the populations concerned must have equal weight with the

equitable claims of the government whose title is to be determined.

Russian Territory.

"VI. The evacuation of all Russian territory and such a settlement of all questions affecting Russia as will secure the best and freest co-operation of the other nations of the world in obtaining for her an unhampered and unembarrassed opportunity for the independent determination of her own political development and national policy and assure her of a sincere welcome into the society of free nations under institutions of her own choosing, and, more than a welcome, assistance also of every kind that she may need and may herself desire. The treatment accorded Russia by her sister nations in the months to come will be the acid test of their good will of their comprehension of her needs as distinguished from their own interests and of their intelligent and unselfish sympathy.

Restoration of Belgium.

"VII. Belgium, the whole world will agree, must be evacuated and restored, without any attempt to limit the sovereignty which she enjoys in common with all other free nations. No other single act will serve as this will serve to restore confidence among the nations in the laws which they have themselves set and determined for the government of their relations with one another. Without this healing act the whole structure and validity of international law is forever impaired.

Alsace-Lorraine to France.

"VIII. All French territory should be freed and the invaded portions restored and the wrong done to France by Prussia in 1871 in the matter of Alsace-Lorraine, which has unsettled the peace of the world for nearly fifty years, should be righted in order that peace may once more be made secure in the interest of all.

New Frontiers for Italy.

"IX. A readjustment of the frontiers of Italy should be effected along clearly recognizable lines of nationality.

Autonomy in Austria-Hungary.

"X. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development.

Roumania, Serbia and Montenegro.

"XI. Roumania, Serbia and Montenegro should be evacuated; occupied territories restored; Serbia accorded free and secure access to the sea, and the relations of the several Balkan states to one another determined by friendly counsel along historically established lines of allegiance and nationality; and international guarantees of the political and economic independence and territorial integrity of the several Balkan states should be entered into.

Autonomy in Turkey.

"XII. The Turkish portions of the present Ottoman empire should be assured a secure sovereignty, but the other nationalities which are now under Turkish rule should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development, and the Dardanelles should be permanently opened as a free passage to the ships and commerce of all nations under international guarantees.

For an Independent Poland.

"XIII. An independent Polish state should be erected which should include the territories inhabited by indisputably Polish populations, which should be assured a free and secure access to the sea and whose political and economic independence and territorial integrity should be guaranteed by international covenant.

League of Nations.

"XIV. A general association of nations must be formed under specific covenants for

the purpose of affording mutual guarantees of political independence and territorial integrity to great and small states alike.

"In regard to these essential rectifications of wrong and assertions of right we feel ourselves to be intimate partners of all the governments and peoples associated together against the imperialists. We cannot be separated in interest or divided in purpose. We stand together until the end.

"For such arrangements and covenants we are willing to fight, and to continue to fight until they are achieved, but only because we wish the right to prevail and desire a just and stable peace, such as can be secured only by removing the chief provocations to war, which this program does remove.

"We have no jealousy of German greatness and there is nothing in this program that impairs it. We grudge her no achievement or distinction of learning or of pacific enterprise such as have made her record very bright and very enviable. We do not wish to injure her or to block in any way her legitimate influence or power. We do not wish to fight her either with arms or with hostile arrangements of trade if she is willing to associate herself with us and the other peace loving nations of the world in covenants of justice and law and fair dealing. We wish her only to accept a place of equality among the peoples of the world—the new world in which we now live—instead of a place of mastery.

"Neither do we presume to suggest to her any alteration or modification of her institutions. But it is necessary, we must frankly say, and necessary as a preliminary to any intelligent dealings with her on our part, that we should know whom her spokesmen speak for when they speak to us, whether for the reichstag majority or for the military party and the men whose creed is imperial domination.

"We have spoken now, surely, in terms too concrete to admit of any further doubt or question. An evident principle runs through the whole program I have outlined. It is the principle of justice to all peoples and nationalities and their right to live on equal terms of liberty and safety with one another, whether they be strong or weak.

"Unless this principle be made its foundation no part of the structure of international justice can stand. The people of the United States could act upon no other principle, and to the vindication of this principle they are ready to devote their lives, their honor and everything that they possess.

"The moral climax of this the culminating and final war for human liberty has come, and they are ready to put their strength, their own highest purpose, their own integrity and devotion to the test."

HERTLING ON GERMAN PEACE TERMS.

Count von Hertling, the German chancellor, made a speech in the reichstag Jan. 24, 1918, in which he replied to the peace terms set forth in the addresses of Premier Lloyd George and President Wilson. In substance he said: "Gentlemen: You have acquainted yourselves with the speech of Premier Lloyd George and the proposals of President Wilson. We now must ask ourselves whether these speeches and proposals breathe a real and earnest wish for peace. They contain certain principles for a general world peace to which we also assent and which might form the starting point and aid negotiations.

"When, however, concrete questions came into the question—points which, for the Teutonic allies are of decisive importance—their peace will is less observable. Our enemies do not desire to destroy Germany, but they cast covetous eyes on parts of our allies' lands. They speak with respect of Germany's position, but their conception, ever afresh, finds expression as if we were the guilty who must do penance and promise improvement.

"Thus speaks the victor to the vanquished: he who interprets all our former expressions of a readiness for peace as merely a sign of weakness.

"The leaders of the entente must first renounce this standpoint and this deception. In order to facilitate this, I would like to recall what the position really is. They may take it from me that our military position was never so favorable as it now is. Our highly gifted army leaders face the future with undiminished confidence in victory. Throughout the whole army, in the officers and the men, lives unbroken the joy of battle.

"I will remind you of the words I spoke Nov. 29 in the reichstag. Our repeatedly expressed willingness for peace and the spirit of reconciliation revealed by our proposals must not be regarded by the entente as a license permitting the indefinite lengthening of the war. Should our enemies force us to prolong the war, they will have to bear the consequences resulting from it.

"If the leaders of the enemy powers really are inclined toward peace, let them revise their program once again, or, as Premier Lloyd George said, proceed to reconsideration.

"If they come forward with fresh proposals we will examine them carefully, because our aim is no other than the re-establishment of a lasting general peace. But this lasting general peace is not possible so long as the integrity of the German empire and the security of her vital interests and the dignity of our fatherland are not guaranteed. Until that time we must quietly stand by each other and wait.

"As to our purpose, gentlemen, we are all one.

"Regarding methods and 'moralities' there may be differences of opinion, but let us shove all those differences. Let us not fight about formulas, which always fall short in the mad course of world events, but above the dividing line of party controversies let us keep our eyes on the mutual aim—the welfare of the fatherland. Let us hold together the government and the nation, and victory will be ours. A good peace will and must come."

Negotiations with Russia.

Chancellor von Hertling referred to the negotiations with the Russians at Brest-Litovsk, saying he held fast to the hope that a good conclusion would be arrived at. He continued:

"Our negotiations with the Ukrainian representatives are in a more favorable position. Here, too, difficulties have yet to be overcome, but the prospects are favorable. We hope shortly to reach conclusions with Ukraine which will be in the interests of both and which will be economically advantageous.

"The Russians last month proposed to issue an invitation to all belligerents to participate in the negotiations. Russia submitted certain proposals of a very general character.

"At that time we accepted the proposal to invite the belligerents to take part in the negotiations—on the condition, however, that the invitation should have a definite period for its acceptance. At 10 o'clock on the evening of Jan. 4 the period expired.

"No answers had come and as a result we were no longer under obligation and had a free hand for separate peace negotiations with Russia. Neither were we longer bound, of course, by the general peace proposals submitted to us by the Russian delegation.

Reply to Lloyd George.

"Instead of the reply which was expected but which was not forthcoming, two declarations were made by enemy statesmen—Premier Lloyd George's speech and President Wilson's speech.

"I willingly admit that Mr. Lloyd George altered his tone. He no longer indulges in

abuse and appears desirous of again demonstrating his ability as a negotiator, which I had formerly doubted. I cannot go so far, however, as many opinions which had been expressed in neutral countries which would read in this speech of Mr. Lloyd George a serious desire for peace, and even a friendly disposition.

"It is true he declares he does not desire to destroy Germany and never desired to destroy her. He has even words of respect for our political, economic and cultural position. But other utterances also are not lacking, and the idea continually comes to the surface that he has to pronounce judgment on Germany, charging her with being guilty of all possible crimes.

"That is an attitude with which we can have nothing to do, and in which we can discover no trace of a serious purpose to attain peace. We are to be the guilty ones, over whom the entente is now sitting in judgment. That compels me to give a short review of the situation and the events preceding the war in the risk of repeating what long ago was said. * * *

"And Alsace-Lorraine, of which Lloyd George speaks again? He speaks of the wrong Germany did in 1871 to France, Alsace-Lorraine—you need not be told, but abroad they appear still to be ignorant of things—Alsace-Lorraine composes, as is known, for the most part, purely German regions which by a century long of violence and illegality were severed from the German empire, and until finally in 1779 the French revolution swallowed up the last remnant, Alsace and Lorraine then became French provinces.

"When, in the war of 1870, we demanded back the districts which had been criminally wrested from us, that was not conquest of foreign territory, but, rightly and properly speaking, what to-day is called disannexation, and this disannexation was then expressly recognized by the French national assembly, the constitutional representative of the French people at that time, March 29, 1871, by a large majority of votes.

Wilson Changes Tone.

"I now come to President Wilson. Here, too, I recognize that the tone appears to have changed. The unanimous rejection of Mr. Wilson's attempt, in reply to the pope's note, to sow discord between the German government and the German people has had its effect.

"This unanimous rejection might of itself lead Mr. Wilson on the right path. A beginning to that end has perhaps been made, for now there is at any rate no longer talk about oppression of the German people by an autocratic government, and the former attacks on the house of Hohenzollern have not been repeated.

"I shall not enlarge upon the distorted representation of German policy which is contained in Mr. Wilson's message, but will deal in detail with the points which Mr. Wilson lays down there, not less than fourteen points, in which he formulates his peace program, and I pray your indulgence in dealing with these as briefly as possible.

"The first point is the demand that there shall be no more secret international agreements. History shows it is we above all others who would be able to agree to the publicity of diplomatic documents. I recall that our defensive alliance with Austria-Hungary was known to the whole world from 1888, while the offensive agreement of the enemy states first saw the light of publicity during the war through the revelations of the secret Russian archives.

"In his second point Mr. Wilson demands freedom of shipping on the seas in war and peace. This also is demanded by Germany as the first, and one of the most important requirements for the future. Therefore there is here no difference of opinion.

"It would, however, be highly important for the freedom of shipping in future if strongly

fortified naval bases on important international routes, such as England has at Gibraltar, Malta, Aden, Hongkong, the Falkland islands, and many other places, were removed.

"Point 3—We, too, are in thorough accord with the removal of economic barriers which interfere with trade in superfluous manner. We, too, condemn economic war, which would inevitably bear within it causes of future warlike complications.

"Point 4—Limitation of armaments: As already declared by us, the idea of limitation of armaments is entirely discussable. The financial position of all European states after the war might most effectively promote a satisfactory solution. It is therefore clear that an understanding might be reached without difficulty on the first four points of Mr. Wilson's program.

"I now come to the fifth point—settlement of all colonial claims and disputes. Practical realization of Mr. Wilson's principles in the realm of reality will encounter some difficulties in my case. I believe that for the present it may be left for England, which has the greatest colonial empire, to make what she will of this proposal of her ally. This point of the program also will have to be discussed in due time, on the reconstitution of the world's colonial possessions, which we also demand absolutely.

"Point 6—Evacuation of Russian territory: Now that the entente has refused within the period agreed upon by Russia and the quadruple alliance to join in the negotiations, I must, in the name of the latter, decline to allow any subsequent interference.

"We are dealing here with questions which concern only Russia and the four allied powers. I adhere to the hope that with recognition of self-determination for the peoples on the western frontier of the former Russian empire good relations will be established, both with these peoples and with the rest of Russia, for whom we wish most earnestly a return of order, peace and conditions guaranteeing the welfare of the country.

"Point 7—Belgium: My predecessors in office repeatedly declared that at no time did the annexation of Belgium to Germany form a point in the program of German policy. The Belgian question belongs to those questions the details of which are to be settled by negotiation at the peace conference. I must adhere to the standpoint hitherto always adopted and refuse the removal in advance of the Belgian affair from the entire discussion.

"Point 8—The occupied parts of France are a valuable pawn in our hands. Here, too, forcible annexation forms no part of the official German policy. The conditions and methods of procedure of the evacuation, which must take account of Germany's vital interests, are to be agreed upon between Germany and France.

"I can only again expressly accentuate the fact that there can never be a question of dismemberment of imperial territory. Under no fine phrases of any kind shall we permit the enemy again to take from us territory of the empire which with ever increasing intimacy has linked itself to Germanism, which has in highly gratifying manner ever and increasingly developed in an economic respect, and of whose people more than 87 per cent speak the German mother tongue.

"The questions dealt with by Mr. Wilson under points 9, 10, and 11 touch both the Italian frontier question and questions of the future development of the Austro-Hungarian monarchy and the future of the Balkan states; questions in which, for the greater part, the interests of our ally, Austria-Hungary, preponderate.

"Where German interests are concerned we shall defend them most energetically. But I may leave the answer to Mr. Wilson's proposals on these points in the first place to

the Austro-Hungarian foreign minister. Close contact with the allied dual monarchy forms the kernel of our present policy and must be the guiding line in the future.

"Loyal comradeship in arms, which has stood the test so brilliantly in war time, must continue to have its effect in peace. We shall thus on our part do everything for the attainment of peace by Austria-Hungary which takes into account her just claims.

"The matters touched upon by Mr. Wilson in point 12 concern our loyal, brave ally, Turkey. I must in no wise forestall her statesmen in their attitude. The integrity of Turkey and the safeguarding of her capital, which is connected closely with the question of the straits, are important and vital interests of the German empire only."

BELGIUM'S REPLY TO POPE.

Belgium's reply to the peace note of Pope Benedict XV., in August, 1917, was made public Jan. 23, 1918. The reply was accompanied by a personal letter dated Dec. 27, 1917, from King Albert of Belgium to the pope, reading as follows:

"Very Holy Father: I have taken note, with lively sympathy and interest, of the message your holiness was good enough to send to the heads of the belligerent countries the first of August, and have hastened to submit it to my government, which has studied it with most serious and deferential attention. The result of that study has been recorded in a note which I am happy to communicate to your holiness.

"In associating myself with the wishes of the holy see that a just and durable peace may promptly put an end to the evils from which humanity, and particularly the Belgian people, so rudely tried, are suffering, I beg your holiness to believe in my filial and respectful attachment.

ALBERT."

Text of Reply.

The note of the Belgian government follows: "The royal government, as soon as it received the message of your holiness to the heads of the belligerents, hastened to reply that it would study with the greatest deference the propositions the document exposed in such elevating language.

"At the same time it desired particularly to express its lively and profound gratitude for the particular interest the holy father manifested in the Belgian nation, and of which the document was new and precious proof.

"At the outset of his message the holy father took pains to declare he had forced himself to maintain perfect impartiality toward all the belligerents, which renders more significant the judgment of his holiness when he concluded in favor of the total evacuation of Belgium and the re-establishment of its full independence and also recognized the right of Belgium for reparation for damages and the cost of the war.

"Already in his consistorial allocution of Jan. 22, 1915, the holy father had proclaimed before the world that he reproved injustice and he condescended to give the Belgian government the assurance that in formulating that reprobation it was the invasion of Belgium he had directly in view.

"The honest people of all countries will rejoice with the Belgian government that the injustice of which Belgium was the victim and the necessity for reparation have been proclaimed and that the highest moral authority of Christendom remains watchful amidst the passion and conflicts of men.

"It was because of the gratitude felt on this account, which was augmented by the numerous charitable acts of the holy father in favor of so many Belgians, victims of the violence of the enemy, that the royal government has examined into the possibility of contributing in the measures depending upon it toward the realization of the double desire which inspires the pontifical message: To hasten the end of

the present war and render a return of similar catastrophes impossible by the adoption of guaranties destined to assure the supremacy of right over force.

"At the beginning of September the royal government informed his holiness that it must reserve decision regarding its action on the propositions contained in the message until the powers at war with Belgium had clearly made known their war aims. It added that in any case Belgium would make no pronouncement on general peace conditions and the reorganization of international relations except in full accord with the powers guaranteeing its independence, that have done honor to their obligations toward her and whose arms fight with hers for the cause of right.

"Nothing has modified the situation that existed at the moment the royal government made known that point of view to his holiness.

"However, Belgium seizes eagerly the occasion furnished it by his holiness to repeat before the civilized world what it wrote nearly a year ago to President Wilson:

"Before the German ultimatum Belgium aspired only to live on good terms with all its neighbors. She practiced with scrupulous loyalty toward each of them the duties imposed by this neutrality.

"How was she recompensed by Germany for the confidence she showed in her? If there is a country that has the right to say it took up arms to defend its existence it assuredly is Belgium. She desires passionately that an end be brought to the unheard of sufferings of its population, but she would have kept only a peace that would assure her at the same time equitable reparation and security and guaranties for the future."

"The integrity of Belgium, the territory of the mother country and colonies, political, economic and military independence without condition or restriction, reparation for damage suffered and the guaranties against a renewal of the aggression of 1914—such remain the indispensable conditions of a just peace so far as concerns Belgium.

"Any settlement that would not recognize them would shake the very foundations of justice, since it would forevermore be established that in international domains the violation of right creates a claim for its author and may become a source of profit.

"Since the royal government a year ago formulated its conditions, it permits itself to recall that the reichstag voted resolutions called peace resolutions. The chancellors and ministers of foreign affairs have followed each other in the German empire, and more recently in the central empires, and have published notes replying to the message of his holiness, but never a word has been pronounced and never a line written clearly recognizing the indisputable rights of Belgium that his holiness has not ceased to recognize and proclaim."

COUNT CZERNIN'S PEACE VIEWS.

Count Ottokar Czernin, the Austro-Hungarian minister of foreign affairs, made a speech before the Austrian delegations in the reichsrath Jan. 24, 1918, explaining the stand of the dual monarchy toward the peace aims as set forth by President Wilson and Premier David Lloyd George. He said in part:

"Although I am under no delusion and know that the fruit of peace cannot be matured in twenty-four hours, nevertheless I am convinced that it is now maturing, and that the question whether or not an honorable general peace can be secured is merely a question of resistance.

"President Wilson's peace offer confirms me in this opinion. Naturally an offer of this kind cannot be regarded as a matter acceptable in every detail, for that obviously would render any negotiations superfluous.

"I think there is no harm in stating that I regard the recent proposals of President Wil-

son as an appreciable approach to the Austro-Hungarian point of view, and that to some of them Austria-Hungary joyfully could give her approval. But she must first lay down this principle—that in so far as these propositions concern her allies, whether in the case of Germany's possession of Belgium or in the case of Turkey, Austria-Hungary, faithful to her engagements to fight to the end in defense of her allies, will defend the possessions of her war allies as she would her own. That is the standpoint of our allies, in regard to which there is perfect reciprocity."

Count Czernin declared he must politely but categorically refuse advice as to the manner in which Austria and Hungary should manage their internal administration, and he asserted that there was not a more democratic parliament in the world than the Austrian parliament.

Referring to President Wilson's peace program, Count Czernin said that he had no objection to the suppression of secret diplomacy, although he doubted whether that method was in every case the most practical or rapid way to arrive at results. The public discussion of diplomatic treaties might, for example, in the case of economic agreements, make impossible the conclusion of such agreements, which are nothing but commercial transactions and might increase friction between two states.

Count Czernin said as to the second point in President Wilson's peace aims, freedom of the seas, the president had responded to the views of all and that he (Czernin) absolutely and entirely supported this paragraph.

Regarding paragraph three in President Wilson's proposals—the removal of economic barriers and the establishment of equality of trade conditions—Count Czernin said:

"This article, which pronounces in a formal manner hostility against a future economic war, is just and reasonable."

On the subject of Italy, Serbia, Montenegro and Roumania Count Czernin repeated what he already had said to the Hungarian delegation.

"I refuse to place a premium on the military adventures of our enemy," said the minister. "I refuse to make our enemies, who obstinately persist in wishing to wage war until a final victory by one side, concessions by which the monarchy would permanently suffer and which would give them an infinite advantage in being able to drag on the war relatively without risk."

Count Czernin then invited President Wilson to use his great influence to make the entente allies declare on their side the conditions on which they were ready to speak.

Count Czernin proceeded: "We also are supporters of an independent Polish state which would include all territories and populations which indisputably are Poles. On this point also we believe we should quickly come to an understanding with President Wilson.

"Finally, in his idea of a league of peoples the president probably will meet with no opposition in the monarchy. We, therefore, are in agreement in the main. Our views are identical not only on the broad principles regarding a new organization of the world after the war but also on several concrete questions, and differences which still exist do not appear to me to be so great that a conversation regarding them would not lead to enlightenment and a rapprochement.

"This situation, which doubtless arises from the fact that Austria-Hungary on the one side and the United States on the other, are composed of states whose interests are least at variance with one another, tempts one to ask if an exchange of ideas between the two powers could not be the point of departure for a personal conversation between all states which have not yet joined in peace negotiations."

He then declared again his wish for a "free Poland." He said: "The people of Poland must

freely and without being influenced in any way settle their own destiny."

WILSON TO HERTLING AND CZERNIN.

Replying to the peace speeches of Chancellor von Hertling of Germany and Foreign Minister Czernin on Jan. 24 President Wilson appeared before congress Feb. 11 and spoke as follows:

"Gentlemen of the Congress:

"On Jan. 8 I had the honor of addressing you on the object of the war as our people conceive them. The prime minister of Great Britain had spoken in similar terms on Jan. 5. To these addresses the German chancellor replied on the 24th and Count Czernin for Austria on the same day. It is gratifying to have our desire so promptly realized that all exchanges of views on this great matter should be made in the hearing of all the world.

"Count Czernin's reply, which is directed chiefly to my own address on Jan. 8, is uttered in a very friendly tone.

"He finds in my statement a sufficiently encouraging approach to the views of his own government to justify him in believing that it furnishes a basis for a more detailed discussion of purposes by the two governments. He is represented to have intimated that the views he was expressing had been communicated to me beforehand and that I was aware of them at the time he was uttering them, but in this I am sure he was misunderstood. I had received no intimation of what he intended to say. There was, of course, no reason why he should communicate privately with me. I am quite content to be one of his public audience.

"Count von Hertling's reply is, I must say, very vague and very confusing. It is full of equivocal phrases and leads it is not clear where. But it is certainly in a very different tone from that of Count Czernin and apparently of an opposite purpose. It confirms, I am sorry to say, rather than removes, the unfortunate impression made by what we had learned of the conferences at Brest-Litovsk. His discussion and acceptance of our general principles lead him to no practical conclusion.

"He refuses to apply them to the substantive items which must constitute the body of any final settlement. He is jealous of international action and of international counsel. He accepts, he says, the principle of public diplomacy, but he appears to insist that it be confined, at any rate in this case, to generalities, and that the several particular questions of territory and sovereignty, the several questions upon whose settlement must depend the acceptance of peace by the twenty-three states now engaged in the war, must be discussed and settled, not in general council but severally by the nations most immediately concerned by interest or neighborhood.

"He agrees that the seas should be free, but looks askance at any limitation to that freedom by international action in the interest of the common order. He would without reserve be glad to see economic barriers removed between nation and nation, for that could in no way impede the ambitions of the military party with whom he seems constrained to keep on terms. Neither does he raise objection to a limitation of armaments. That matter will be settled of itself, he thinks, by the economic conditions which must follow the war. But the German colonies, he demands, must be returned without debate. He will discuss with no one but the representatives of Russia what dispositions shall be made of the peoples and the lands of the Baltic provinces; with no one but the government of France the 'conditions' under which French territory shall be evacuated; and only with Austria what shall be done with Poland.

"In the determination of all questions affecting the Balkan states he defers, as I understand him, to Austria and Turkey; and with regard to the agreements to be entered into concerning the non-Turkish peoples of

the present Ottoman empire to the Turkish authorities themselves. After a settlement all around, effected in this fashion, by individual barter and concession, he would have no objection, if I correctly interpret his statement, to a league of nations which would undertake to hold the new balance of power steady against external disturbances.

"It must be evident to every one who understands what this war has wrought in the opinion and temper of the world that no general peace, no peace worth the infinite sacrifices of these years of tragical suffering, can possibly be arrived at in any such fashion.

"The method the German chancellor proposes is the method of the congress of Vienna. We cannot and will not return to that. What is at stake now is the peace of the world. What we are striving for is a new international order based upon broad and universal principles of right and justice—not mere peace of shreds and patches. Is it possible that Count von Hertling does not see that, does not grasp it, is, in fact, living in his thought in a world dead and gone? Has he utterly forgotten the reichstag resolutions of the 19th of July or does he deliberately ignore them? They spoke of the conditions of a general peace, not of national aggrandizement or of arrangements between state and state. The peace of the world depends upon the just settlement of each of the several problems to which I adverted in my recent address to the congress. I, of course, do not mean that the peace of the world depends upon the acceptance of any particular set of suggestions as to the way in which those problems are to be dealt with. I mean only that these problems, each and all, affect the whole world; that unless they are dealt with in a spirit of unselfish and unbiased justice, with a view to the wishes, the natural connections, the racial aspirations, the security and peace of mind of the peoples involved, no permanent peace will have been attained.

"They cannot be discussed separately or in corners. None of them constitutes a private or separate interest from which the opinion of the world may be shut out. Whatever affects the peace affects mankind, and nothing settled by military force, if settled wrong, is settled at all. It will presently have to be reopened.

"Is Count von Hertling not aware that he is speaking in the court of mankind, that all the awakened nations of the world now sit in judgment on what every public man of whatever nation may say on the issues of a conflict which has spread to every region of the world? The reichstag resolutions of July themselves frankly accepted the decisions of that court. There shall be no annexations, no contributions, no punitive damages. Peoples are not to be handed about from one sovereignty to another by an international conference or an understanding between rivals and antagonists. National aspirations must be respected, peoples may now be dominated and governed only by their own consent.

"Self-determination' is not a mere phrase; it is an imperative principle of action, which statesmen will henceforth ignore at their peril. We cannot have general peace for the asking or by the mere arrangement of a peace conference. It cannot be pieced together out of individual understandings between powerful states. All the parties to this war must join in the settlement of every issue anywhere involved in it, because what we are seeking is a peace that we can all unite to guarantee and maintain and every item of it must be submitted to the common judgment whether it be right or fair, an act of justice rather than a bargain between sovereigns.

"The United States has no desire to interfere in European affairs or to act as arbiter in European territorial disputes. She would disdain to take advantage of any internal weakness or disorder to impose her own will

upon another people. She is quite ready to be shown that the settlements she has suggested are not the best or the most enduring. They are only her own provisional sketch of principles and of the way in which they should be applied.

"But she entered this war because she was made a partner, whether she would or not, in the sufferings and indignities inflicted by the military masters of Germany against the peace and security of mankind, and the conditions of peace will touch her as nearly as they will touch any other nation to which is entrusted a leading part in the maintenance of civilization. She cannot see her way to peace until the causes of this war are removed, its renewal rendered as nearly as may be impossible.

"The war had its roots in the disregard of the rights of small nations and of nationalities which lacked the union and the force to make good their claim to determine their own allegiances and their own forms of political life. Conventions must now be entered into which will render such things impossible for the future; and those conventions must be backed by the united force of all the nations that love justice and are willing to maintain it at any cost. If territorial settlements and the political relations of great populations which have not the organized power to resist are to be determined by the contracts of the powerful governments which consider themselves most directly affected as Count von Hertling proposes why may not economic questions also? It has come about in the altered world in which we now find ourselves that justice and the rights of peoples affect the whole field of international dealing as much as access to raw materials and fair and equal conditions of trade.

"Count von Hertling wants the essential bases of commercial and industrial life to be safeguarded by common agreement and guaranty, but he cannot expect that to be conceded him if the other matters to be determined by the articles of peace are not handled in the same way as items in the final accounting.

"He cannot ask the benefit of common agreement in the one field without according it in the other. I take it for granted that he sees that separate and selfish compacts with regard to trade and the essential materials of manufacture would afford no foundation for peace. Neither, he may rest assured, will separate and selfish compacts with regard to provinces and peoples.

"Count Czernin seems to see the fundamental elements of peace with clear eyes and does not seek to obscure them. He sees that an independent Poland made up of all the indisputably Polish peoples who lie contiguous to one another is a matter of European concern and must, of course, be conceded; that Belgium must be evacuated and restored no matter what sacrifices and concessions that may involve and that national aspirations must be satisfied even within his own empire in the common interest of Europe and mankind. If he is silent about questions which touch the interest and purpose of his allies more nearly than they touch those of Austria only, it must of course be because he feels constrained, I suppose, to defer to Germany and Turkey in the circumstances.

"Seeing and conceding as he does the essential principles involved and the necessity of candidly applying them, he naturally feels that Austria can respond to the purpose of peace as expressed by the United States with less embarrassment than could Germany. He would probably have gone much further had it not been for the embarrassments of Austria's alliances and of her dependence upon Germany.

"After all, the test of whether it is possible for either government to go any further in this comparison of views is simple and obvious.

"The principles to be applied are these:

"1. That each part of the final settlement must be based upon the essential justice of that particular cause and upon such adjustments as are most likely to bring a peace that will be permanent.

"2. That peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game, even the great game, now forever discredited, of the balance of power; but that—

"3. Every territorial settlement involved in this war must be made in the interest and for the benefit of the populations concerned and not as a part of any adjustment or compromise of claims among rival states; and

"4. That all well defined national aspirations shall be accorded the utmost satisfaction that can be accorded them without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and consequently of the world.

A general peace erected on such foundations can be discussed. Until such a peace can be secured we have no choice, but to go on. So far as we can judge these principles that we regard as fundamental are already everywhere accepted as imperative except among the spokesmen of the military and annexationist party in Germany. If they have anywhere else been rejected, the objectors have not been sufficiently numerous or influential to make their voices audible. The tragical circumstance is that this one party in Germany is apparently willing and able to send millions of men to their death to prevent what all the world now sees to be just.

"I would not be a true spokesman of the people of the United States if I did not say once more that we entered this war upon no small occasion and that we never can turn back from a course chosen upon principle. Our resources are in part mobilized now, and we shall not pause until they are mobilized in the entirety. Our armies are rapidly going to the fighting front and will go more and more rapidly.

"Our whole strength will be put into this war of emancipation—emancipation from the threat and attempted mastery of selfish groups of autocratic rulers—whatever the difficulties and present partial delays.

"We are indomitable in our power of independent action and can in no circumstance consent to live in a world governed by intrigue and force. We believe that our own desire for a new international order under which reason and justice and the common interests of mankind shall prevail is the desire of enlightened men everywhere. Without that new order the world will be without peace and human life will lack tolerable conditions of existence and development. Having set our hand to the task of achieving it we shall not turn back.

"I hope that it is not necessary for me to add that no word of what I have said is intended as a threat. That is not the temper of our people. I have spoken thus only that the whole world may know the true spirit of America—that men everywhere may know that our passion for justice and for self-government is no mere passion of words, but a passion which, once set in action, must be satisfied.

"The power of the United States is a menace to no nation or people. It will never be used in aggression or for the aggrandizement of any selfish interest of our own. It springs out of freedom and is for the service of freedom."

LLOYD GEORGE ON HERTLING-CZERNIN VIEWS.

Speaking in the house of commons, Feb. 12, 1918, Premier Lloyd George said:

"The government stands by the considered declaration of war aims which I made on

behalf of my colleagues to the trade union representatives early this year. I read with profound disappointment the replies given to President Wilson's speech and to one which I delivered on behalf of the government by the German chancellor and Count Czernin. It is perfectly true that, as far as the tone is concerned, there was a deal of difference between the Austrian and German speeches; but I wish I could believe there was a difference in the substance.

"I cannot altogether accept that interpretation of Count Czernin's speech. It was extraordinarily civil and friendly in tone, but when you come to the real substance of the demand put forward by the allies it was adamant.

"Mesopotamia, Palestine and Arabia were put in exactly the same category as Belgium. They were apparently to be restored to the Turks on the same terms as Germany was to restore Belgium. When you come to the demands of Italy, Count Czernin said that certain offers had been made before the war to Italy, and they were now withdrawn as far as the Slavonic population of Austria was concerned.

"It was a purely polite statement to President Wilson and to others that it was none of their business to inquire. There was not a single definite question dealt with about which Count Czernin did not present a most resolute refusal to discuss any terms which might be regarded as possible terms of peace.

"When you come to the German reply, it is very difficult for any one to believe that Count von Hertling could be even serious about some of the demands which were put forward.

"What was his answer to the very moderate terms put forward by the allies? His answer was that Great Britain was to give up her coaling stations throughout the world, and he named half a dozen. That demand was put forward for the first time, and I confess that I think it was the last demand that Germany ought decently to have put forward. These coaling stations have been as accessible to the German as to British ships in the past.

"The German fleet has always received most hospitable treatment at all these coaling stations, and in 1913 something like fifty to sixty German men-of-war and transports visited these stations, where they received exactly the same treatment as British men-of-war. The same thing applies to German merchant ships.

"This demand is the best possible proof that the German empire, or those who at present are in control of it, are not in the mood to discuss reasonable terms of peace with the allies. I regret it profoundly, but it is no use crying peace when there is no peace. These terms were examined carefully, with a real desire to find something in them which indicated that the central powers were coming somewhere near a basis of agreement. I confess that that examination of these two speeches proved profoundly disappointing to those who are sincerely anxious to find a real and genuine desire for peace in them.

"The action of Germany in reference to Russia proves that all her declarations about no annexations and no indemnities have no real meaning. No answer has been given in regard to Belgium which any one can regard as satisfactory. There is no reference to Poland or the legitimate claims of France for the restoration of her lost provinces, and no word is said about the men of the Italian race and tongue who are now under Austrian rule.

"As to Turkey, there was nothing said by either Count von Hertling or Count Czernin indicating that they are prepared to recognize the rights of the allies in regard either to Mesopotamia or Turkey. There was nothing but pure denial of those rights.

"Until there is some better proof than is contained in these speeches that the central powers are prepared to consider the war aims of the allies it will be our regrettable duty to make all preparations necessary in order to establish international right in the world."

HERTLING TO WILSON.

Speaking in the reichstag, Feb. 25, 1918, Count von Hertling, the imperial German chancellor, said:

"The reichstag has a right to receive an explanatory statement in regard to the foreign situation and the attitude of the government concerning it. I will meet the obligation arising therefrom, even though I entertain certain doubts as to the utility and success of dialogues carried on by ministers and statesmen of belligerent countries.

"Mr. Runciman in the house of commons recently expressed the opinion that we would get much nearer peace if, instead of this, responsible representatives of the belligerent powers would come together in an intimate meeting for discussion. I can only agree with him that that would be the way to remove numerous intentional and unintentional misunderstandings and compel our enemies to state our words as they are meant, and on their part also to show their colors.

"I cannot at any rate, discover that the words which I spoke here on two occasions were received in hostile countries objectively and without prejudice. Moreover, discussion in an intimate gathering alone could lead to understanding on many individual questions which can really be settled only by compromise.

"It has been repeatedly said that we do not contemplate retaining Belgium, but that we must be safeguarded from the danger of a country with which we desire after the war to live in peace and friendship becoming the object or the jumping off ground of enemy machinations. If, therefore, a proposal came from the opposing side, for example from the government in Havre, we should not adopt an antagonistic attitude, even though the discussion at first might only be unbinding.

"Meanwhile it does not appear as if Mr. Runciman's suggestion has a chance of assuming tangible shape, and I must adhere to the existing methods of dialogue across the channel and ocean.

"Adopting this method, I readily admit that President Wilson's message of Feb. 11 represents, perhaps, a small step toward a mutual rapprochement. I, therefore, pass over the preliminary and excessively long declarations in order to address myself immediately to the four principles which, in President Wilson's opinion, must be applied in a mutual exchange of views.

"The first clause says that each part of the final settlement must be based upon the essential justice of that particular case and upon such adjustments as are most likely to bring a peace that will be permanent.

"Who would contradict this? The phrase coined by the great father of the church, Augustine, fifteen hundred years ago—'Justitia fundamentum regnorum'—is still valid to-day. Certain it is that only peace based in all its parts on the principles of justice has a prospect of endurance.

"The second clause expresses the desire that peoples and provinces shall not be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game, even the great game now forever discredited, of the balance of power.

"This clause, too, can be unconditionally assented to. Indeed, one wonders that the president of the United States considered it necessary to emphasize it anew. This clause contains a polemic against conditions long vanished, views against cabinet politics and cabinet wars, against mixing state territory

and princely and private property, which belong to a past that is far behind us.

"I do not want to be discourteous, but when one remembers the earlier utterances of President Wilson one might think that he is laboring under the illusion that there exists in Germany an antagonism between an autocratic government and a mass of people without rights.

And yet President Wilson knows—as, at any rate, the German edition of his book on 'The State' proves—German political literature, and he knows, therefore, that with us princes and government are the highest members of the nation as a whole, organized in the form of a state, the highest members, with whom the final decision lies. But, seeing that they also, as the supreme organs, belong to the whole, the decision is of such a nature that only the welfare of the whole is the guiding line for a decision to be taken. It may be useful expressly to point this out to President Wilson's countrymen.

"Then, finally, at the close of the second clause, the game of the balance of power is declared to be forever discredited. We, too, can only gladly applaud. As is well known, it was England who invented the principle of the maintenance of the balance of power, in order especially to apply it when one of the states on the European continent threatened to become too powerful for her. It was only another expression for England's domination.

"The third clause, according to which every territorial settlement involved in this war must be made in the interest and for the benefit of the populations concerned, and not as part of any mere adjustment or compromise of claims among rival states, is only the application of the foregoing in a definite direction, or a deduction from it, and is, therefore, included in the assent given to that clause.

"Now, in the fourth clause, he demands that all well defined national aspirations shall be accorded the utmost satisfaction that can be accorded them without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and, consequently, of the world. Here, also, I can give assent in principle, and I declare, therefore, with President Wilson, that a general peace on such a basis is discussable.

"Only one reservation is to be made. These principles must not be proposed by the president of the United States alone, but they must be also recognized definitely by all states and nations. President Wilson, who reproaches the German chancellor with a certain amount of backwardness, seems to me in his flight of ideas to have hurried far in advance of existing realities.

"Certainly a league of nations erected upon justice and mutual unselfish appreciation, a condition of humanity in which war, together with all that remains of the earliest barbarism, should have completely disappeared and in which there should be no bloody sacrifices, no self-mutilation of peoples, no destruction of laboriously acquired cultural values—that would be an aim devoutly to be desired.

"But that aim has not yet been reached. There does not yet exist a court of arbitration set up by all nations for the safeguarding of peace in the name of justice. When President Wilson incidentally says that the German chancellor is speaking to the court of the entire world I must, as things stand today, in the name of the German empire and her allies, decline this court as prejudiced, joyfully as I would greet it if an impartial court of arbitration existed and gladly as I would co-operate to realize such ideals.

"Unfortunately, however, there is no trace of a similar state of mind on the part of the leading powers in the entente. England's war aims, as recently expressed in Lloyd George's speeches, are still thoroughly imperialistic and

want to impose on the world a peace according to England's good pleasure. When England talks about peoples' right of self-determination she does not think of applying the principle to Ireland, Egypt or India."

Declaring that the new German operations against Russia were taken at the request of the populations to restore order and that they did not aim at conquests, the chancellor continued:

"Our war aims from the beginning were the defense of the fatherland, the maintenance of our territorial integrity and the freedom of our economic development. Our warfare, even where it must be aggressive in action, is defensive in aim. I lay special stress upon that just now in order that no misunderstandings shall arise about our operations in the east.

"After the breaking off of peace negotiations by the Russian delegation, Feb. 10, we had a free hand as against Russia. The sole aim of the advance of our troops, which was begun seven days after the rupture, was to safeguard the fruits of our peace with Ukraine. Aims of conquest were in no way a determining factor. We were strengthened in this by the Ukrainians' appeal for support in bringing about order in their young state against the disturbances carried out by the bolsheviks.

"If further military operations in other regions have taken place, the same applies to them. They in no way aim at conquest. They are solely taking place at the urgent appeals and representations of the populations for protection against atrocities and devastation by red guards and other bands. They have, therefore, been undertaken in the name of humanity. They are measures of assistance and have no other character. It is a question of creating peace and order in the interest of peaceable populations.

"We do not intend to establish ourselves, for example, in Estonia or Livonia. In Courland and Lithuania our chief object is to create organs of self-determination and self-administration. Our military action, however, has produced a success far exceeding the original aim.

"News was received yesterday that Petrograd had accepted our conditions and sent its representatives to Brest-Litovsk for further negotiations. Accordingly our delegates traveled thither last evening. It is possible that there will still be dispute about the details, but the main thing has been achieved. The will to peace has been expressly announced from the Russian side, while the conditions have been accepted and the conclusion of peace must ensue within a very short time.

"To safeguard the fruits of our peace with Ukraine, our army command drew the sword. Peace with Russia will be the happy result.

"Peace negotiations with Roumania began at Bukharest yesterday. It appeared necessary that Secretary von Kuehlmann should be present there during the first days when the foundations were laid. Now, however, he will presumably soon go to Brest-Litovsk.

"It is to be remembered regarding negotiations with Roumania that we are not taking part in them alone and are under obligation to champion the interests of our allies, Austria-Hungary, Bulgaria and Turkey, and to see to it that a compromise is arranged there regarding any divergent desires that will possibly give rise to difficulties, but these difficulties will be overcome.

"With regard to Roumania, too, the guiding principle will be that we must, and desire to, convert into friends the states with which on the basis of the success of our army we now conclude peace.

"I will say a word regarding Poland, in behalf of whom the entente and President Wilson have recently appeared specially to interest themselves, as a well known country liberated from oppressive dependence on czar-

ist Russia by the united forces of Germany and Austria-Hungary for the purpose of establishing an independent state, which, in unrestricted development of its national culture, shall at the same time become a pillar of peace in Europe.

"The constitutional problem—in the narrower sense, the question what constitution the new state shall receive—could not, as is easily understood, be immediately decided, and is still in the stage of exhaustive discussions between the three countries concerned.

"A fresh difficulty has been added to the many difficulties which have in this connection to be overcome, difficulties especially in the economic domain in consequence of the collapse of old Russia. This difficulty results from the delimitation of the frontier between the new state and adjacent Russian territory.

"For this reason the news of peace with the Ukraine at first evoked great uneasiness in Poland. I hope, however, that, with good will and proper regard to the ethnographical conditions, a compromise on the claims will be reached. The announced intention to make a serious attempt in this direction has greatly calmed Polish circles.

"In the regulation of the frontier question only what is indispensable on military grounds will be demanded on Germany's part.

"The entente are fighting for the acquisition of portions of Austro-Hungarian territory by Italy and for the severance of Palestine, Syria and Arabia from the Turkish empire. England has particularly cast an eye on portions of Turkish territory. She has suddenly discovered an affection for the Arabians, and she hopes, by utilizing the Arabians, to annex fresh territories to the British empire, perhaps by the creation of a protectorate dependent upon British domination.

"That the colonial wars of England are directed at increasing and rounding out the enormous British possessions, particularly in Africa, has been repeatedly stated by British statesmen.

"In the face of this policy, entente statesmen dare to represent Germany as the disturber of peace, who, in the interest of world peace, must be confined within the narrowest bounds. By a system of lies and calumny they endeavor to instigate their own people and neutral countries against the central powers and to disturb neutral countries with the specter of the violation of neutrality by Germany.

"Regarding the intrigues recently carried on in Switzerland, we never thought, nor will we think, of assailing Swiss neutrality. We are much indebted to Switzerland. We express gratitude to her, Holland, the Scandinavian countries and Spain, who, by her geographical position, is exposed to especial difficulties, and no less to the extra-European countries which have not entered the war, for their manly attitude in that, despite all temptations and oppressions, they preserve their neutrality.

"The world yearns for peace and desires nothing more than that the sufferings of war under which it groans should come to an end. But the governments of the enemy states contrive ever anew to stir the war fury among their peoples.

"A continuation of the war to the utmost was, so far as has transpired, the most recent watchword issued by the conference of Versailles, and in the English premier's speeches it again finds loud echo.

"There are, however, other voices to be heard in England; it is to be hoped that these voices will multiply.

"The world now stands before the final decision. Either our enemies will decide to conclude peace—they know on what conditions we are ready to begin a discussion—or they will continue the insanity by their criminal war of conquest.

"Our people will hold out further, but the blood of the fallen, the agonies of the mutilated, and the distress and sufferings of the peoples will fall on the heads of those who insistently refuse to listen to the voice of reason and humanity."

BALFOUR TO HERTLING.

In the British house of commons, Feb. 27, 1918, Arthur J. Balfour, secretary of state for foreign affairs, replying to the speech made by Chancellor von Hertling before the reichstag Feb. 25, said in part:

"I am convinced that I should be doing an injury to the cause of peace if I encouraged the idea that there is any use in beginning these verbal negotiations until something like a general agreement is apparent in the distance and until the statesmen of all the countries see their way to that broad settlement which, it is my hope, will bring peace to the sorely troubled world."

Mr. Balfour, regarding the doctrine of the balance of power, said that until German militarism had become a thing of the past and there was in existence a hall, or court, armed with executive powers making the weak as safe as the strong, it would never be possible to ignore the principles underlying the struggle for the balance of power.

The chancellor's attitude concerning Belgium, Mr. Balfour said, was completely unsatisfactory and his lip service to President Wilson's propositions was not exemplified in German practice.

Secretary Balfour justified his previous attitude on the ground that Chancellor von Hertling and Count Czernin spoke after a conference and agreement.

He said that Richard Holt, radical M. P., whose amendment to the address to the throne expressing regret concerning the decision of the Versailles conference was defeated by the house of commons two weeks ago, appeared to be the only person in the world who considered Chancellor von Hertling's references to Belgium satisfactory.

"Many questions must be settled at the peace conference," Mr. Balfour continued, "but the question of Belgium is the best touchstone of the honesty of purpose of central European diplomacy and especially of German diplomacy. There is only one course for the offending nation in this case—namely, unconditional restoration and reparation.

"When was Belgium the jumping off ground of enemy machinations and why should Germany suppose it is going to be?

"Belgium has been the victim, not the author, of these crimes, and why should she be punished because Germany is guilty? Germany always had in mind new territorial, commercial or military conditions which would prevent Belgium taking an independent place among the nations, which Germany and ourselves were pledged to preserve. What we have to consider is how far Von Hertling's lip service to President Wilson's four propositions really is exemplified by German practice."

The foreign secretary then analyzed the four propositions and Von Hertling's attitude concerning them, as well as the chancellor's frame of mind regarding Alsace-Lorraine. He continued:

"I could understand a German's taking a different view to the view of the French, British, Italian or American government, but not a German discussing the principles of essential justice and saying: 'There is no question of Alsace-Lorraine to go before a peace conference.'

"Regarding President Wilson's second proposition we have had within the last few weeks a specimen of how Von Hertling interprets in action the principle he so glibly approves in theory. To take one instance only, the cession of Polish territory to the Ukraine. We would like to know how the Germans

came to make this gross violation of their principle.

"Coming to the third proposition, Von Hertling says, with justice, that the doctrine of the balance of power is a more or less antiquated doctrine. He further accuses England of being the upholder of that doctrine for purposes of aggrandizement. That is a profoundly unhistorical method of looking at the question. Great Britain has fought time and again for the balance of power, because only by fighting could Europe be saved from the domination of one overbearing and aggressive nation.

"If Von Hertling really wants to make the balance of power antiquated, he can do it by inducing his countrymen to abandon that policy of ambitious domination which overshadows the world at this moment.

"I return to President Wilson's third and fourth principles. Consider for a moment how Von Hertling desires to see the principle that the interest and benefit of the populations concerned should be considered in peace arrangements. He mentions three countries he wishes to see restored to Turkey—namely, Armenia, Palestine and Mesopotamia.

"Does any one think that it would be to the interest and benefit of the populations concerned? Von Hertling accuses us of being animated with purely ambitious designs when we invaded Mesopotamia and captured Jerusalem. I suppose he would say that Russia was similarly moved when she occupied Armenia. But when Turkey went to war she picked a quarrel with us for purely ambitious purposes. She was promised by Germany the possession of Egypt. Would the interest and happiness of the population of Egypt be best conserved by Turkish conquest of Egypt?

"The Germans in the search for the greatest happiness of these populations would have restored Egypt to the worst rule the world has ever known. They would have destroyed Arab independence and abandoned Palestine to those who had rendered it sterile all these centuries.

"How could any one preach seriously profession of faith about the interests of populations after this evidence of the manner in which Von Hertling desires to see it carried out? If the reichstag had any sense of humor it must surely have smiled when it heard the chancellor dealing in that spirit with the dominating doctrine of every important German statesman, soldier and German thinker for two generations at least.

"So much for the four principles which Mr. Holt says Von Hertling accepts and which he thinks the British government is backward in not accepting. I hope my short analysis may have convinced them that there are two sides to that question.

"I cannot, however, leave Von Hertling without making some observation upon the Russian policy which he defines. That also is a demonstration of German methods. He tells us the recent arrangements with Russia were made on the urgent appeal of the populations for protection against the red guard and other bands, and, therefore, undertaken in the name of humanity. We know that the east is the east and the west is the west and that the German policy of the west is entirely different from the German policy of the east.

"The German policy in the east recently has been directed toward preventing atrocities and devastation in the interest of humanity, while German policy in the west is occupied entirely in performing atrocities and devastations.

"Why this difference of treatment of Belgium on one side and other populations on the other? I know of no explanation except that Germany pursues her methods with remorseless insistency and alters or varies the excuse she gives for her policy.

"If she invades Belgium, it is military ne-

cessity; if Courland, it is in the interest of humanity. It is impossible to rate very high the professions of humanity, international righteousness and equity in regard to those populations which figure so largely in the speeches. I am quite unable to understand how anybody can get up in the reichstag and claim that Germany is waging a defensive war."

Secretary Balfour then contrasted the different methods pursued by Germany and Great Britain in the expansion of their empires, and asserted that Germany's policy has been more deliberately ambitious than that of any nation since Louis XIV.

"We can listen to Von Hertling's criticism with perfect equanimity," he added, "and we are ready to stand our trial at the bar of history. How could conversations take place if Von Hertling's speech represented the extreme high water mark of German concessions?"

"Does Mr. Holt really think that if Von Hertling were able to carry out those conversations on the basis of the doctrines contained in his speech the conversations could end in anything but defeat? Does Mr. Holt not think that conversations which begin and end in discord are worse than no conversations at all?"

COUNT CZERNIN'S PEACE SPEECH ON APRIL 2.

Count Czernin, Austro-Hungarian minister of foreign affairs, speaking to a delegation from the Vienna city council April 2, 1918, said:

"With the conclusion of peace with Roumania the war in the east ended. Before, however, turning to individual peace treaties and discussing them in detail, I would like to revert to the declaration of the president of the United States, in which he replied to the speech delivered by me on Jan. 24.

"In many parts of the world President Wilson's speech was interpreted as an attempt to drive a wedge between Vienna and Berlin. I do not believe that, because I have too high an opinion of the president of the United States and his outlook as a statesman to believe him capable of such a way of thinking. President Wilson is no more able to ascribe dishonorable action to us than we to him.

"President Wilson does not desire to separate Vienna from Berlin, and he knows, too, that that would be impossible. Perhaps President Wilson says to himself, however, that Vienna is more favorable soil for sowing the seed for a general peace. Perhaps he says to himself that the Austro-Hungarian monarchy has the good fortune to possess a ruler who sincerely and honestly desires a general peace, but who will never commit a breach of faith or conclude a dishonorable peace, and that behind the emperor-king there are 55,000,000 people.

"President Wilson says also, perhaps, to himself that this united mass represents a force which is not to be underestimated and that this honest and strong desire for peace which binds the monarchs, governments and peoples of both states is capable of being the bearer of that great idea in the service of which he has placed himself."

Referring to his last speech, Count Czernin explained the misunderstanding of his remark that the text was already in the president's possession by declaring that he had previously arranged for the text to be telegraphed to Washington from an unofficial source in a neutral country, in order to prevent any misunderstanding or distortion. It subsequently transpired, however, that the text only arrived at its destination some days later. Nevertheless, he said, the object was attained. He then continued:

"I can only say that I esteem it highly that the German chancellor, in his excellent speech of Feb. 25, took the words out of my

mouth by declaring that the four principles developed in President Wilson's speech of Feb. 11 formed the basis upon which a general peace could be discussed. I am in entire agreement with this.

"The four points laid down by the president are a suitable basis on which to begin the discussion for a general peace. Whether, however, the president will succeed in his endeavors to rally his allies on this basis or not is a question.

"God is my witness that we have tried everything possible to avoid a fresh offensive, but the entente would not have it thus.

"Some time before the western offensive began M. Clemenceau addressed to me an inquiry whether and upon what basis I was prepared to negotiate. In agreement with Berlin I immediately replied that I was prepared to negotiate and that as far as France was concerned the only obstacle I could see in the way of peace was the French desire for Alsace-Lorraine.

"The reply from Paris was that it was impossible to negotiate on this basis. Thereupon there was no choice left.

"The colossal struggle in the west has already broken out. Austro-Hungarian and German troops are fighting shoulder to shoulder, as they fought in Russia, Serbia, Roumania and Italy. We are fighting together for the defense of Austria-Hungary and Germany. The aspirations of France and Italy are Utopias which will be terribly avenged.

"Come what may, we shall not sacrifice Germany's interests any more than she will leave us in the lurch. We are not fighting for imperialistic or annexationist ends for ourselves or for Germany, but we shall go forward to the last for our defense, for our existence as a state and for our future.

"The first breach in the will of our enemies for war has been made by the peace negotiations with Russia. It was a break-through of the peace idea. It is evidence of childish dilettantism to overlook the inner connection between the various conclusions of peace. The constellation of enemy powers in the east resembled a net—when one mesh was severed the others gave way.

"The Ukrainian peace led to peace with Russia, and Roumania, becoming isolated, was obliged to conclude peace. We had to begin with Ukraine both on technical and material grounds. The blockade had to be broken, and the future will show that the conclusion of peace with Ukraine was a blow at the heart of the rest of our enemies.

"The peace concluded with Roumania, it is calculated, will be the starting point of friendly relations. The slight frontier rectifications which we receive are not annexations. Wholly uninhabited regions, they serve solely for military protection. To those who insist that these rectifications fall under the category of annexations and accuse me of inconsistency, I reply that I have publicly protested against holding out a license to our enemies which would assure them against the dangers of further adventure.

"From Russia I did not demand a single meter, but Roumania neglected the favorable moment.

"The protection of mercantile shipping in the lower Danube guarding the iron gate is guaranteed by the extension of the frontier to the heights of Turnu-Severin, by leasing for thirty years a valuable wharf near this town, together with a strip along the river bank at an annual rental of 1,000 lei, and finally by obtaining the leasing rights to the islands of Ostrovo, Marcorobu and Simearu, and the transfer of the frontier several kilometers southward in the region of the Petroseny coal mine, which better safeguards our possessions in the Szurdok pass coal basin.

"Nagy-Szeben and Fogaras will receive a new security frontier of an average width of

from fifteen to eighteen kilometers at all passes of importance, as, for instance, Predeal, Bodz, Gyimes, Bekas and Tolgyes. The new frontier has been so far removed to Roumanian ground as military reasons required.

"The rectification east of Czernowitz has protected the city against future attacks.

"At the moment when we are successfully endeavoring to renew friendly and neighborly relations with Roumania, it is unlikely that we would open old wounds, but every one knows the history of Roumania's entrance into the war and will admit that it was my first duty to protect the monarchy against future surprises of a similar kind.

"I consider the safest guaranty for the future international agreements to prevent war. In such agreements, if they are framed in binding form, I should see much stronger guaranties against surprise attacks by neighbors than in frontier rectifications. But I thus far, except in the case of President Wilson, have been unable to discover among any of our enemies serious inclination to accept this idea. However, despite the small degree of approval this idea receives, I consider that it will nevertheless be realized.

"Calculating the burdens with which the states of the world will emerge from this war, I vainly ask myself how they will cover military expenditure if competition in armaments remains unrestricted. I do not believe that it will be possible for the states after this war adequately to meet the increased requirements due to the war. I think, rather, that financial conditions will compel the states to enter into a compromise regarding the limitations of armaments.

"This calculation of mine is neither idealistic nor fantastic, but is based upon reality in politics in the most liberal sense of the word. I, for my part, would consider it a great disaster if in the end there should be failure to achieve general agreements regarding the diminution of armaments.

"It is obvious that in the peace with Roumania we shall take precautions to have our interests in the question of grain, food supply and petroleum fully respected. We shall further take precautions that the Catholic church and our schools receive the state of protection they need, and we shall solve the Jewish question. The Jew shall henceforth be a citizen with equal rights in Roumania.

"The irredentist propaganda, which has produced so much evil in Hungary, will be restrained, and, finally, precautions will be taken to obtain indemnification for the injustice innocently suffered by many of our countrymen owing to the war.

"We shall strive by means of a new commercial treaty and appropriate settlement of the railway and shipping questions to duly protect our economic interests in Roumania.

"Roumania's future lies in the east. Large portions of Bessarabia are inhabited by Roumanians, and there are many indications that the Roumanian population there desires close union with Roumania. If Roumania will adopt a frank, cordial, friendly attitude toward us we will have no objections to meeting those tendencies in Bessarabia. Roumania can gain much more in Bessarabia than she lost in the war."

The minister said he was anxious that the rectifications of the frontier should not leave any embitterment behind, and expressed the opinion that Roumania in her own interest must turn to the central powers.

"In concluding peace with Roumania and Ukraine," he continued, "it has been my first thought to furnish the monarchy with foodstuffs and raw materials. Russia did not come into consideration in this connection owing to the disorganization there."

"We agreed with Ukraine that the quantity of grain to be delivered to the central powers should be at least 1,000,000 tons. Thirty cars of grain and peas are now en route, 600

cars are ready to be transported, and these transports will be continued until the imports are organized and can begin regularly. Larger transports are rendered possible by the peace with Roumania, which enables goods to be sent from Odessa to Danube ports.

"We hope during May to undertake the first large transport from Ukraine. While I admit that the imports from Ukraine are still small and must be increased, nevertheless our food situation would have been considerably worse had this agreement not been concluded.

"From Roumania we will obtain a considerable surplus of last year's harvest. Moreover, about 400,000 tons of grain, peas, beans and fodder must be transported via the Danube. Roumania must also immediately provide us with 800,000 sheep and 100,000 pigs, which will improve our meat supply slightly.

"It is clear from this that everything will be done to obtain from the exploitation of the regions which peace has opened for us in the east whatever is obtainable. The difficulties of obtaining these supplies from Ukraine are still considerable, as no state of order exists there. But with the good will of the Ukrainian government and our organization we will succeed in overcoming the difficulties. An immediate general peace would not give us further advantages, as all Europe to-day is suffering from lack of food-stuffs. While the lack of cargo space prevents other nations from supplying themselves, the granaries of Ukraine and Roumania remain open to the central powers."

Replying to the annexationists, Count Czernin said:

"The forcible annexation of foreign peoples would place difficulties in the way of a general peace, and such an extension of territories would not strengthen the empire. On the contrary, considering the grouping of the monarchy, they would weaken us, what we require are not territorial annexations, but economic safeguards for the future.

"We wish to do everything to create in the Balkans a situation of lasting calm. Not until the collapse of Russia did there cease to exist the factor which hitherto made it impossible for us to bring about a definite state of internal peace in the Balkans.

"We know the desire for peace is very great in Serbia, but Serbia has been prevented by the entente powers from concluding it. Bulgaria must receive from Serbia certain districts inhabited by Bulgarians. We, however, have no desire to destroy Serbia. We will enable Serbia to develop, and we would welcome closer economic relations with her.

"We do not desire to influence the future relations between the monarchy and Serbia and Montenegro by motives conflicting with friendly, neighborly relations. The best state of egoism is to come to terms with a beaten neighbor which leads to this. My egoism regarding Austria-Hungary is that after being conquered militarily our enemies must be conquered morally. Only then is victory complete, and in this respect diplomacy must complete the work of the armies.

"Since I came into office I have striven only after one aim—namely, to secure an honorable peace for the monarchy and to create a situation which will secure to Austria-Hungary future free development, and, moreover, to do everything possible to insure that this terrible war will be the last one for time out of mind. I have never spoken differently. I do not intend to go begging for peace or to obtain it by entreaties or lamentations, but to enforce it by our moral right and physical strength. Any other tactics I consider would contribute to the prolongation of the war.

"I must say, to my regret, that during the last few weeks and months much has been spoken and done in Austria that prolongs the war. Those who are prolonging the war are

divided into various groups according to their motives and tactics. There are, first, those who continuously beg for peace. They are despicable and foolish. To endeavor to conclude peace at any price is despicable, for it is unmanly, and it is foolish because it continuously feeds the already dying aggressive spirit of the enemy. The desire for peace of the great masses is natural as well as comprehensible, but the leaders of the people must consider that certain utterances produce abroad just the opposite effect from what they desire.

"Firmly relying on our strength and the justice of our cause, I have already concluded three moderate but honorable peace treaties. The rest of our enemies also begin to understand that we have no other desire than to secure the future of the monarchy and of our allies, and that we intend to enforce this and can and will enforce it. I shall unswervingly prosecute this course and join issue with any one who opposes me.

"The second group of war prolongers are the annexationists. It is a distortion of fact to assert that Germany has made conquest in the east. Lenin's anarchy drove the border people into the arms of Germany. Is Germany to refuse this involuntary choice of foreign border states?

"The German government has a little desire for oppressions as we, and I am perfectly convinced that neither annexationists nor weaklings can prevent forever a moderate and honorable peace. They delay it, but they cannot prevent it.

"The hopes of our enemies of final victory are not merely based on military expectations and the blockade. They are based to a great extent on our interior political conditions and on certain political leaders, not forgetting the Czechs. Recently we were almost on the point of entering into negotiations with the western powers, when the wind suddenly veered round and, as we know with certainty, the entente decided it had better wait, as parliamentary and political events in our country justified the hope that the monarchy would soon be defenseless."

Count Czernin attacked the Czech leaders and Czech troops who, he declared, "criminally fight against their own country," and appealed to the people to be united against this "high treason."

The government, he said, was quite ready to proceed to the revision of the constitution, but this would not be helped by those who hoped through the victory of the entente to gain their ends.

"If we expel this poison," he declared, "a general honorable peace is nearer than the public imagines, but no one has the right to remain aside in this last decisive struggle."

DENIED BY CLEMENCEAU.

Commenting upon Count Czernin's statement that France had sought to enter into peace negotiations with Austria-Hungary Premier Clemenceau merely said that "Czernin lied." It was subsequently explained that Count Revertata, an Austrian, and his distant relative, Count Armand, a Frenchman, had met in Switzerland at the former's invitation, but that nothing resembling authorized peace negotiations had occurred. Count Armand was connected with the intelligence department of the French war department.

On the evening of April 11 the following note was made public by the French government:

"Once caught in the cogwheels of lying, there is no means of stopping. Emperor Charles, under Berlin's eye, is taking on himself the lying denials of Count Czernin and thus compels the French government to supply the proof.

"Herewith is the text of an autograph letter communicated on March 31, 1917, by Prince Sixtus de Bourbon, the emperor of Austria's brother-in-law, to President Poincare and communicated immediately, with the prince's consent, to the French premier.

"My Dear Sixtus: The end of the third year of this war, which has brought so much mourning and grief into the world, approaches. All the peoples of my empire are more closely united than ever in the common determination to safeguard the integrity of the monarchy at the cost even of the heaviest sacrifices.

"Thanks to their union, with the generous co-operation of all nationalities, my empire and monarchy have succeeded in resisting the gravest assaults for nearly three years. Nobody can question the military advantages secured by my troops, particularly in the Balkans.

"France, on her side, has shown force, resistance, and dashing courage which are magnificent. We all unreservedly admire the admirable bravery which is traditional to her army and the spirit of sacrifice of the entire French people.

"Therefore, it is a special pleasure to me to note that, although for the moment adversaries, no real divergence of views or aspirations separates many of my empire from France, and that I am justified in hoping that my keen sympathy for France, joined to that which prevails in the whole monarchy, will forever avoid a return of the state of war, for which no responsibility can fall on me.

"With this in mind, and to show in a definite manner the reality of these feelings, I beg you to convey privately and unofficially to President Poincaré that I will support by every means and by exerting all my personal influence with my allies France's just claims regarding Alsace-Lorraine.

"Belgium should be entirely re-established in her sovereignty, retaining entirely her African possessions without prejudice to the compensations she should receive for the losses she has undergone.

"Serbia should be re-established in her sovereignty, and, as a pledge of our good will, we are ready to assure her equitable natural access to the Adriatic and also wide economic concessions in Austria-Hungary.

"On her side, we will demand, as primordial and essential conditions, that Serbia cease in the future all relation with and suppress every association or group whose political object aims at the disintegration of the monarchy, particularly the Serbian political society Narodni Ochrana; that Serbia loyally and by every means in her power prevent any kind of political agitation, either in Serbia or beyond her frontiers, in the foregoing direction and give assurance thereof under the guarantee of the entente powers.

"The events in Russia compel me to reserve my ideas with regard to that country until a legal definite government is established there.

"Having thus laid my ideas clearly before you, I would ask you in turn, after consulting with these two powers, to lay before me the opinion first of France and England with a view to thus preparing the ground for an understanding on the basis of which official preliminary negotiations could be taken up and reach a result satisfactory to all.

"Hoping that thus we will soon be able together to put a limit to the sufferings of so many millions of men and families now plunged in sadness and anxiety, I beg to assure you of my warmest and most brotherly affection. CHARLES."

The note adds: "Count Czernin, having recognized by his note of April 8 the existence of this negotiation due to the initiative of a personage of a rank far above his," the Austrian government now is summoned to give an explanation of the 'attempt' avowed by it and of the details of the conversation of its delegates."

EMPEROR CHARLES DENIES IT.

An official statement giving the text of a telegram from Emperor Charles to Emperor William relative to the claim of Premier Clemenceau that the former recognized the claims

of France to Alsace-Lorraine was issued on the same day (April 11) in Vienna. The statement reads:

"I accuse M. Clemenceau of piling up lies to escape the web of lies in which he is involved, making the false assertion that I in some manner recognized France's claims to Alsace-Lorraine as just.

"I indignantly repel the assertion. At the moment when Austro-Hungarian cannon are firing alongside of the German artillery on the western front no proof is necessary that I am fighting for your provinces."

HERTLING ON GERMAN PEACE VIEWS.

Speaking before the German reichstag July 11, 1918, Chancellor von Hertling said:

"I maintain the standpoint of the imperial reply to the peace note of Pope Benedict. The pacific spirit which inspired this reply has also inspired me. At the time, however, I added that this spirit must not give our enemies free conduct for an interminable continuation of the war.

"What have we lived to see, however? While for years there can have been no doubt whatever of our willingness to hold out our hand toward an honorable peace, we have heard until these last few days inciting speeches delivered by enemy statesmen. President Wilson wants war until we are destroyed, and what Mr. Balfour, the British secretary of state for foreign affairs, has said must really drive the flush of anger to the cheeks of every German.

"We feel for the honor of our fatherland, and we cannot allow ourselves to be constantly and openly insulted in this manner, and behind these insults is the desire for our destruction. As long as this desire for our destruction exists we must endure, together with our faithful nation.

"I am also convinced—I know it—that in the widest circles of our nation the same serious feeling exists everywhere. As long as the desire for our destruction exists we must hold out, and we will hold out, with confidence in our troops, in our army administration and our magnificent nation, which bears so wonderfully these difficult times with their great privations and continuous sacrifices.

"In the direction of our policy nothing will be changed. If, in spite of these hostile statements by these statesmen, any serious efforts or a paving of the way to peace were to show themselves anywhere, then, quite certainly, we would not adopt a negative attitude from the very beginning, but we would examine these seriously meant—I say expressly seriously—efforts immediately with scrupulous care.

"Naturally it is not sufficient when some agent or other approaches us and says to us: 'I can bring about peace negotiations then and there.' But it is necessary for the appointed representatives of the enemy powers, duly authorized by their governments, to give us to understand that discussions are possible, discussions which for the time being naturally will be within a limited circle.

"But the statesmen who have spoken up to the present time have not said a word about such possibilities. When such possibilities manifest themselves and when serious inclinations toward peace show themselves on the other side then we will immediately go into them. That is to say, we will not reject them—and we will speak, to begin, within a small circle.

"I also can tell you that this standpoint is not merely my own standpoint but that it is shared emphatically by the chief of the army administration. The chief of the army administration also does not conduct war for the sake of war, but has said to me that as soon as a serious desire for peace manifests itself on the other side we must follow it up.

"You will be interested to know how we are working on this standpoint and certain problems will appear which the present time forces

upon us. Exhaustive discussions took place regarding these questions July 1 and 2 at general headquarters, under the presidency of the kaiser.

"Naturally, I can only announce here quite generally the lines which were laid down at that time. Regarding the east, we stand on the basis of the peace of Brest-Litovsk and we wish to see this peace carried out in a loyal manner. That is the wish of the German imperial administration and it is supported in this by the chief of the army administration.

"However, the difficulty of the execution of the peace of Brest-Litovsk does not lie on our side, but in the fact that conditions in Russia are still exceedingly uncertain. We are inclined to believe in the loyalty of the present Russian government, and especially in the loyalty of the representative of the Russian government in Berlin.

"But we may not, and cannot, assume unconditionally that the present Russian government has the power to carry through everywhere the loyal promises made to us. We do not at all wish to create difficulties for the present Russian government, but, as conditions now are, there are incessant developments and endless frictions in the frontier region. However, our principle is that we stand on the basis of peace made at Brest-Litovsk and we will carry out this peace loyally and will deal loyally with the present government.

"They are still under the depressing influence of a terrible crime in Moscow. The murder of our ambassador there was an act in violation of international law than which a worse could never cry to heaven.

"All indications point to the fact that the accused deed was instigated by the entente allies in order to involve us in fresh war with the present Russian government—a state of things which we are most anxious to avoid. We do not want fresh war with Russia. The present Russian government desires peace and needs peace, and we are giving her our support in this peaceful disposition and aim.

"On the other hand, it is true that political currents of very varied tendencies are circulating in the Russian empire—movements having the most diverse aims, including the monarchist movement of the constitutional democrats and the movements of the social revolutionaries. We will not commit ourselves to any political counter-current, but are giving careful attention to the course Russia is steering."

BARON VON BURIAN'S PEACE VIEWS.

Baron von Burian, the Austro-Hungarian foreign minister, made a report July 16, 1918, to the Austrian and Hungarian premiers in which he said:

"There is hardly any difference between the general principles enunciated by the statesmen of both belligerents. President Wilson's four new points of July 4 shall not, apart from certain exaggerations, arouse our opposition.

"On the contrary, we are able to approve them heartily to a great extent. Nobody would refuse homage to this genius, and nobody would refuse his co-operation. This, however, is not the main point, but it is what can also be understood in the interests of mankind. Both groups should certainly honestly attempt to clear this up and settle it by mutual agreement, but not in the same manner as, for instance, our peace treaties in the east were judged.

"None of the belligerent states need ever come into the position of Russia and Roumania.

"If they, nevertheless, represent the peace treaties as a warning of our treatment of a defeated enemy we do not consider the reproach justified.

"The fact is that all our opponents were invited to join in those peace negotiations, and they could have contributed their share in bringing them to a different issue. But now,

when it is too late, their criticism stands on weak grounds, for there is no legal right which would have entitled them to condemn the peace conditions which were acceptable to the contracting parties or which could not be avoided.

"If we sum up all that has been said on the enemy's side in regard to their war aims we recognize three groups of aspirations which are being set forth to justify the continuation of bloodshed so that the ideals of mankind may be realized:

"The freedom of all nations, which are to form a league of nations and which in future shall settle their differences by arbitration and not by arms, is to reign.

"The domination of one nation by another nation is to be excluded.

"Various territorial changes are to be carried out at the expense of the central powers.

"These annexationist aims, though variously shaped, are generally known.

"The intention, however, also exists, especially in regard to Austria-Hungary, to carry out her internal disintegration for the purpose of the formation of new states. Finally our opponents demand our atonement because we dared to defend ourselves—and successfully—against their attacks. Our ability to defend ourselves is termed militarism and must therefore be destroyed.

"Territorial aims are, in fact, the only things now separating the different belligerent groups.

"For the great interests of humanity and for the justice, freedom, honor and peace of the world, as set forth in the laws of modern political conception, regarding which we need not accept any advice, we also are ready to fight.

"If our enemies continuously demand atonement for wrong done and restitution, then this is a claim which we could urge with more justification against them, because we have been attacked and the wrong done to us must be redressed.

"The enemy's obstinacy regarding his territorial demands regarding Alsace-Lorraine, Trieste, the Trentino and the German colonies appears to be insurmountable. There lies the limit of our readiness for peace. We are prepared to discuss everything except our own territory.

"The enemy not only wants to cut from Austria-Hungary what he would like for himself, but the inner structure, that of the monarchy itself, too, is to be attacked and the monarchy dissolved, if possible, into component parts.

"Our opponents start from a completely mechanical misjudgment of the character of the Austro-Hungarian monarchy and prefer in their satisfaction to overlook in the present difficult international problems the fact that these states with their various nationalities are no accidental structure, but a product of historical and ethnographical necessity, which carry in themselves the fundamental principle of life and race.

"They therefore possess, and this applies fully to Austria and Hungary, the necessary elasticity and adaptability to the changing events of the times and the ability to reform themselves according to the necessity of their standard of development and to solve all internal crises without uncalled for foreign interference.

"As has always been the case for centuries past, the states and races of the monarchy will settle their internal problems in agreement with their ruler. The monarchy resolutely declines foreign interference in any form, just as it does not meddle with the affairs of foreigners.

"Our enemy's inflammatory activity is not content with trying to stir up our races against one another, but it does not even scruple, by means of circulating monstrous and base calumnies, to sow distrust between the races of the monarchy and the hereditary dynasty."

GERMAN PEACE FEELERS.

When the powerful German offensive on the western front beginning March 21, 1918, failed the central powers began to put out various peace feelers, the substance of which was that if the allies would return the German colonies and permit Germany to retain the conquered Russian provinces and retain her old boundaries on the west—meaning the retention of Alsace and Lorraine—they could have peace. It was made plain in various ways that the central powers were in favor of peace by negotiation—a peace in which the allies, including Belgium, were to receive no indemnities and in which Germany and Austria were to retain the conquered territories in Russia and the indemnities imposed on Belgium, Roumania, Serbia, Montenegro, portions of France and Italy and Russia. For example, Chancellor von Hertling told the reichstag in the early part of August that Germany intended to keep Belgium until the allies fulfilled certain conditions, including the payment of indemnities and the re-establishment of Germany and Austria as before the war, plus the advantage obtained through the Russian and Roumanian peace treaties.

Following are brief extracts from utterances on the peace question by leaders representing the allies and the central powers prior to a direct proposal made by Austria-Hungary in September for a nonbinding peace conference.

Prime Minister Lloyd George, Aug. 7.—“You cannot have peace so long as those who made the war are still predominant in the councils of our chief enemy.”

Arthur J. Balfour, British secretary of state for foreign affairs, Aug. 8.—“The true obstacle to any legitimate peace is German militarism. The abyss separating the central powers from the allies is so deep as hardly to be plumbed and so wide as hardly to be bridged. An instrument so powerful for universal evil as a great colonial empire should not be given to Germany at the end of the war.”

Dr. Wilhelm Solf, German colonial secretary, Aug. 20.—“Belgium shall rise again after the war as an independent state, vassal to no one. Nothing stands in the way of the restoration of Belgium but the enemy's will to war. The entente is again waging war for plunder and glory.”

Lord Robert Cecil, assistant British secretary for foreign affairs, Aug. 23.—“Dr. Solf wants us to believe that German rulers have been converted to the idea of a league of nations, to some better international system. We see no hope of any such scheme unless preceded by victory and the acknowledgment by Germany that its whole militarist system has been a profound and disastrous crime.”

Senator Henry Cabot Lodge of Massachusetts, republican leader in the United States senate, Aug. 23.—“The Germans, repulsed and losing, will undoubtedly resort to their other weapon, which they have used more than once during this war with terrible effect. They will begin an insidious and poisonous peace propaganda.”

“As this war is utterly different from any other war the world has ever known, so must the peace which concludes it be utterly different from any peace which the world has ever known. It cannot be a peace of bargain, of give and take, and of arrangement. No peace that satisfies Germany in any degree can ever satisfy us. It cannot be a negotiated peace. It must be a dictated peace and we and our allies must dictate it.”

Emperor William, to German bishops, Aug. 24.—“Let us strengthen in our people a recognition of the dangers threatening from our enemies, a firm determination to overcome all that is burdensome and a strong faith in the Lord's help and in our strength. Then, I am convinced, Germany will be invincible and the future will be ours.”

Count von Hertling, Imperial German chancellor, to Catholic Students' union, Aug. 31.—“The army command regards the military sit-

uation with complete calm and confidence, even if it has been obliged for strategical reasons to withdraw our lines at several points. * * * We implore the Almighty, who hitherto has so clearly stood by us, that we may not have to wait too long for the day when our adversaries shall perceive that they cannot destroy us.”

Count von Hertling to constitutional committee of the Prussian upper house, Sept. 5.—“With this serious question [franchise reform] the protection and preservation of the crown and the dynasty are at stake.”

Emperor William in message to municipality of Munich, Sept. 5.—“The German people understands the difficulty of the present decisive battles against an enemy filled with hatred, jealousy and the will to destruction, but has unanimously decided to devote all its strength to defend against the assaults of its enemies its sacred soil and its kultur which it has won in peaceful war.”

Admiral von Hintze, German foreign secretary, to journalists and diplomatic corps in Vienna, Sept. 6.—“Just as peace came in the east so it will come in the west. Though it perhaps will take some time, we need not be discouraged by the enemy's cries of victory.”

Baron Stephan Burian, Austro-Hungarian foreign minister, in address to visiting German newspaper men, Sept. 10.—“We desire to the best of our ability to contribute to a mutual understanding and help pave the way for conciliation.”

Premier Lloyd George in speech at Manchester, England, Sept. 12.—“There is no compromise between freedom and tyranny, no compromise between light and darkness. * * * This must be the last war.”

Baron von Hussarek, Austrian foreign minister, Sept. 12.—“Under the glorious Hapsburg scepter for centuries Austria has become a state of strength which will enable it to offer strong resistance to all attempts to break it up.”

Emperor William, speaking to Krupp munition workers at Essen, Sept. 12.—“The German swords are raised, hearts are strong and muscles are taut. On to battle against everything that stands against us, no matter how long it lasts, so help us God!”

Friedrich von Payer, German imperial vice-chancellor, Sept. 12.—“There will be no peace of conquest. * * * We cannot hand over Poland to Russia nor can we assist in having Finland again placed under the Russian yoke. We cannot leave to their fate the border states which lie on the German frontier and the Baltic.”

AUSTRIA MAKES PEACE PROPOSAL.

On the afternoon of Sept. 14 the following official communication from the Austro-Hungarian government was handed to the representatives of the entente in Bern, Switzerland. It was also presented at Berlin, Sofia and Constantinople and at the same time was brought to the attention of neutral powers:

“An objective and conscientious examination of the situation of all the belligerent states no longer leaves doubt that all peoples, on whatever side they may be fighting, long for a speedy end to the bloody struggle. Despite this natural and comprehensible desire for peace, it has not so far been possible to create those preliminary conditions calculated to bring the peace efforts nearer to realization and bridge the gap which at present still separates the belligerents from one another. A more effective means must, therefore, be considered whereby the responsible factors of all the countries can be offered an opportunity to investigate the present possibilities of an understanding.”

“The first step which Austria-Hungary, in accord with her allies, undertook on Dec. 12, 1916, for the bringing about of peace, did not lead to the end hoped for. The grounds for this lay assuredly in the situation at that time.

In order to maintain in their peoples the war spirit, which was steadily declining, the allied governments had by the most severe means suppressed any discussion of the peace idea. And so it came about that the ground for a peace understanding was not properly prepared. The natural transition from the wildest war agitation to a condition of conciliation was lacking.

"It would, however, be wrong to believe the peace step we then took was entirely without result. Its fruits consist of something which is not to be overlooked—that the peace question has not since vanished from the order of the day. The discussions which have been carried on before the tribunal of public opinion have disclosed proof of the not slight differences which to-day still separate the warring powers in their conception of peace conditions. Nevertheless, an atmosphere has been created which no longer excludes the discussion of the peace problem.

"Without optimism it at least assuredly may be deduced from the utterances of responsible statesmen that the desire to reach an understanding and not to decide the war exclusively by force of arms is also gradually beginning to penetrate into allied states, save for some exceptions in the case of blinded war agitators, which are certainly not to be estimated lightly.

"The Austro-Hungarian government is aware that after the deep reaching convulsions which have been caused in the life of the peoples by the devastating effects of the world war it will not be possible to re-establish order in the tottering world at a single stroke. The path that leads to the restoration of peaceful relations between the peoples is cut by hatred and embitterment. It is toilsome and wearisome, yet it is our duty to tread this path—the path of negotiations—and if there are still such responsible factors as desire to overcome the opponent by military means and to force the will to victory upon him, there can, nevertheless, no longer be doubt that this aim, even assuming that it is attainable, would first necessitate a further sanguinary and protracted struggle.

"But even a later victorious peace will no longer be able to make good the consequences of such a policy—consequences which will be fatal to all the states and peoples of Europe. The only peace which would righteously adjust the still divergent conceptions of the opponents would be a peace desired by all the peoples.

"With this consciousness, and in its unswerving endeavor to work in the interests of peace, the Austro-Hungarian government now again comes forward with a suggestion with the object of bringing about a direct discussion between the enemy powers.

"The earnest will to peace of wide classes of population of all the states who are jointly suffering through the war—the indisputable rapprochement in individual controversial questions—as well as the more conciliatory atmosphere that is general, seems to the Austro-Hungarian government to give a certain guaranty that a fresh step in the interests of peace, which also takes account of past experiences in this domain, might at the present moment offer the possibility of success.

"The Austro-Hungarian government has, therefore, resolved to point out to all the belligerents, friend and foe, a path considered practicable by it and to propose to them jointly to examine in a free exchange of views whether those prerequisites exist which would make the speedy inauguration of peace negotiations appear promising. To this end the Austro-Hungarian government has to-day invited the governments of all the belligerent states to a confidential and unbinding discussion at a neutral meeting place and has addressed to them a note drawn up in this sense.

"This step has been brought to the knowledge of the holy see in a special note and an appeal thereby made to the pope's interest in peace. Furthermore, the governments of the

neutral states have been acquainted with the step taken. The constant close accord which exists between the four allied powers warrants the assumption that the allies of Austria-Hungary, to whom the proposal is being sent in the same manner, share the views developed in the note."

The official telegram proceeds to say that the note has been drawn up in French and runs as follows:

"The peace offer which the powers of the quadruple alliance addressed to their opponents on Dec. 12, 1916, and the conciliatory basic ideas which they have never given up, signify, despite the rejection which it experienced, an important stage in the history of this war. In contrast to the first two and a half years, the question of peace has from that moment been the center of European eye, of world discussion, and dominates it in ever increasing measure.

"Almost all the belligerent states have in turn again and again expressed themselves on the question of peace, its prerequisites and conditions. The line of development of this discussion, however, has not been uniform and steady. The basic standpoint changed under the influence of the military and political position, and hitherto, at any rate, it has not led to a tangible general result that could be utilized.

"It is true that, independent of all these oscillations, it can be stated that the distance between the conceptions of the two sides has on the whole grown somewhat less; that despite the indisputable continuance of decided and hitherto unbridged differences, a partial turning from many of the most extreme concrete war aims is visible, and a certain agreement upon the relative general basic principles of a world peace manifests itself. In both camps there is undoubtedly observable a wide classes of the population a growth of the will to peace and understanding.

"Moreover, a comparison of the reception of the peace proposal of the powers of the quadruple alliance on the part of their opponents with the later utterances of responsible statesmen of the latter, as well as of the nonresponsible but in a political respect no wise unimportant personalities, confirms this impression.

"While, for example, the reply of the allies to President Wilson made demands which amounted to the dismemberment of Austria-Hungary, to a diminution and a deep internal transformation of the German empire, and the destruction of Turkish European ownership—these demands, the realization of which was based on the supposition of an overwhelming victory, were later modified in many declarations from official entente quarters, or in part were dropped.

"Thus, a declaration made in the British house of commons a year ago, Secretary Balfour expressly recognized that Austria-Hungary must itself solve its internal problems and that no one could impose a constitution upon Germany from the outside.

"Premier Lloyd George declared at the beginning of this year that it was not one of the allies' war aims to partition Austria-Hungary, to rob the Ottoman empire of its Turkish provinces or to reform Germany internally.

"It may also be considered symptomatic that in December, 1917, Mr. Balfour categorically repudiated the assumption that British policy had ever engaged itself for the creation of an independent state out of the territories on the left bank of the Rhine.

"The central powers leave it in no doubt that they are only waging a war of defense for the integrity and the security of their territories.

"Far more outspoken than in the domain of concrete war aims has the rapprochement of conceptions proceeded regarding those guiding lines upon the basis of which peace shall be concluded and the future order of Europe and the world built up. In this direction President Wilson in his speeches of Feb. 12 and July 4

of this year has formulated principles which have not encountered contradiction on the part of his allies and the far reaching application of which is likely to meet with no objection on the part of the powers of the quadruple alliance also, presupposing that this application is general and reconcilable with the vital interests of the states concerned.

"It is true, it must be remembered, that an agreement on general principles is insufficient, but that there remains the further matter of reaching an accord upon their interpretation and their application to individual concrete war and peace questions.

"To an unprejudiced observer there can be no doubt that in all the belligerent states, without exception, the desire for a peace of understanding has been enormously strengthened: that the conviction is increasingly spreading that the further continuance of the bloody struggle must transform Europe into ruins and into a state of exhaustion that will mar its development for decades to come—and this without any guaranty of thereby bringing about that decision by arms which has been vainly striven after by both sides in four years filled with enormous sacrifices, sufferings and exertions.

"In what manner, however, can the way be paved for an understanding and an understanding finally attained? Is there any serious prospect whatever of reaching this aim by continuing the discussion of the peace problem in the way hitherto followed?

"We have not the courage to answer the latter question in the affirmative. The discussion from one public tribune to another as has hitherto taken place between statesmen of the various countries was really only a series of monologues. I lacked, above everything, directness. Speech and counterspeech did not fit into each other. The speakers spoke over one another's head.

"On the other hand were the publicity and the ground of these discussions, which robbed them of the possibility of fruitful progress. In all public statements of this nature a form of eloquence is used which reckons with the effect at great distances and on the masses.

"Consciously or unconsciously, however, one thereby increases the distance of the opponent's conception, produces misunderstandings which take root and are not removed and makes the frank exchange of ideas more difficult. Every pronouncement of leading statesmen is directly after its adversary and before the authoritative quarters of the opposite side can reply to it made the subject of passionate or exaggerated discussion of irresponsible elements. But anxiety lest they should endanger the interests of their arms by unfavorably influencing feeling at home and lest they prematurely betray their own ultimate intentions also causes the responsible statesmen themselves to strike a higher tone and stubbornly to adhere to extreme standpoints.

"If, therefore, an attempt is made to see whether the basis exists for an understanding calculated to deliver Europe from the catastrophe of the suicidal continuation of the struggle, then, in any case, another method should be chosen which render possible a direct verbal discussion between the representatives of the governments, and only between them.

"The opposing conceptions of individual belligerent states would likewise have to form the subject of such a discussion, for mutual enlightenment, as well as the general principles that shall serve as the basis for peace and the future relations of the states to one another, and regarding which, in the first place, an accord can be sought with prospect of success.

"As soon as an agreement was reached on the fundamental principle, an attempt would have to be made in the course of the discussions concretely to apply them to individual peace questions and thereby bring about their solution.

"We venture to hope that there will be no

objection on the part of any belligerent to such an exchange of views. The war activities would experience no interruption. The discussions, too, would only go so far as was considered by the participants to offer a prospect of success. No disadvantages would rise therefrom for the states represented. Far from harming, such an exchange of views could be useful to the cause of peace.

"What did not succeed the first time can be repeated, and perhaps it has already at least contributed to the clarification of views. Mountains of old misunderstandings might be removed and many new things perceived. Streams of pent-up human kindness would be released, in the warmth of which everything essential would remain, and, on the other hand, much that is antagonistic, to which excessive importance it still attributed, would disappear.

"According to our conviction all the belligerents jointly owe it to humanity to examine whether now, after so many years of a costly but undecided struggle, the entire course of which points to an understanding, it is possible to make an end to the terrible strapple.

"The royal and imperial government would like, therefore, to propose to the governments of all the belligerent states to send delegates to a confidential and unbinding discussion on the basic principles for the conclusion of peace, in a place in a neutral country and at a near date that would yet have to be agreed upon—delegates who were charged to make known to one another the conception of their governments regarding those principles, and to receive analogous communications, as well as to request and give frank and candid explanations on all those points which need to be precisely defined.

"The royal and imperial government has the honor to request the government of _____, through the kind mediation of your excellency, to bring this communication to the knowledge of the government of _____.
[The names of the intermediate government and of that addressed in the particular note dispatched are left blank.]

President Wilson Says No.

On Sept. 16, as soon as he had read the Austro-Hungarian peace note, President Wilson through Secretary of State Lansing made the following reply:

"Sir: I have the honor to acknowledge the receipt of your note, dated Sept. 16, communicating to me a note from the imperial government of Austria-Hungary, containing a proposal to the governments of all the belligerent states to send delegates to a confidential and unbinding discussion on the basic principles for the conclusion of peace. Furthermore, it is proposed that the delegates would be charged to make known to one another the conception of their governments regarding these principles and to receive analogous communications as well as to request and give frank and candid explanations on all those points which need to be precisely defined.

"In reply, I beg to say that the substance of your communication has been submitted to the president, who now directs me to inform you that the government of the United States feels that there is only one reply which it can make to the suggestion of the imperial Austro-Hungarian government. It has repeatedly and with entire candor stated the terms upon which the United States would consider peace and can and will entertain no proposal for a conference upon a matter concerning which it has made its position and purpose so plain."

"The Austrian note was delivered to Secretary Lansing by W. A. Ekengren, the Swedish minister in Washington, and the president's reply was transmitted through the same channel.

Britain and France Reply.

Both Great Britain and France returned replies similar in effect to that made by President Wilson. A. J. Balfour, British foreign secretary, said: "This cynical proposal of the

Austrian government is not a genuine attempt to obtain peace. It is an attempt to divide the allies." Premier Clemenceau, in the French chamber of deputies, on Sept. 18, also made an informal reply to the Austrian note in which he said: "No transaction is possible between crime and right." His speech was made the formal reply of the republic.

Belgium Rejects Separate Peace.

It was learned on Sept. 15 that Germany had made a separate peace proposal to Belgium in which it was provided that Belgium should remain neutral to the end of the war, that the entire economic and political independence of the country should be reconstituted, that the old prewar commercial treaties between Belgium and Germany should be put into effect after the war, that Belgium should use her good offices with the allies to secure the return of the German colonies and that the Flemish minority should not be penalized for aiding the German invaders. It was announced Sept. 18 that the Belgian government, after consulting the allies, had decided to refuse without elaboration the offer made by Germany.

Germany Accepts Austrian Offer.

On Sept. 20 the German ambassador in Vienna presented Germany's reply to the Austro-Hungarian peace note. It was as follows:

"The undersigned imperial ambassador has the honor to make the following reply to the highly esteemed note of the royal and imperial foreign minister:

"The summings of the Austro-Hungarian government to all belligerent states to enter into confidential unbinding discussion in a neutral country of the fundamental principles for the conclusion of peace corresponds to the spirit of peace, readiness and conciliatoriness which the responsible statesmen of the quadruple alliance and authorized representatives of the allied [Germanic] peoples have again and again announced. The reception which previous similar steps met with from our enemies was not encouraging.

"The imperial government, however, follows the new attempt to bring the world nearer to the just and lasting peace which it desires, with the sincere and earnest wish that the statement of the Austro-Hungarian government, inspired by profound conciliatory feeling and noble humanity, will this time evoke the desired echo.

"In the name of the imperial government the undersigned has the honor to declare that Germany is ready to participate in the proposed exchange of ideas."

NO PEACE BY COMPROMISE.

In opening the fourth liberty loan campaign Sept. 27, 1918, President Wilson, speaking in the Metropolitan opera house in New York, N. Y., said:

"My fellow Citizens: I am not here to promote the loan. That will be done—ably and enthusiastically done—by the hundreds of thousands of loyal and tireless men and women who have undertaken to present it to you and to our fellow citizens throughout the country, and I have not the least doubt of their complete success, for I know their spirit and the spirit of the country.

"My confidence is confirmed, too, by the thoughtful and experienced co-operation of the bankers here and everywhere, who are lending their invaluable aid and guidance.

"I have come, rather, to seek an opportunity to present to you some thoughts which I trust will serve to give you, in perhaps fuller measure than before, a vivid sense of the great issues involved in order that you may appreciate and accept, with added enthusiasm and grave significance, the duty of supporting the government by your men and your means to the utmost point of sacrifice and self-denial.

"No man or woman who has really taken in

what this war means can hesitate to give to the very limit of what they have, and it is my mission here to-night to try to make it clear once more what the war really means. You will need no other stimulation or reminder of your duty.

"At every turn of the war we gain a fresh consciousness of what we mean to accomplish by it. When our hopes and expectations are most excited we think more definitely than before of the issues that hang upon it and of the purposes which must be realized by means of it. For it has positive and well defined purposes which we did not determine and which we cannot alter.

"No statesman or assembly created them; no statesman or assembly can alter them. They have arisen out of the very nature of circumstances of the war. The most that statesmen or assemblies can do is to carry them out or be false to them. They were perhaps not clear at the outset, but they are clear now.

"The war has lasted more than four years and the whole world has been drawn into it. The common will of mankind has been substituted for the particular purposes of individual states. Individual statesmen may have started the conflict, but neither they nor their opponents can stop it as they please.

"It has become a people's war, and peoples of all sorts and races, of every degree of power and variety of fortune, are involved in its sweeping processes of change and settlement. We came into it when its character had become fully defined and it was plain that no nation could stand apart or be indifferent to its outcome.

"Its challenge drove to the heart of everything we cared for and lived for. Our brothers from many lands, as well as our own murdered dead under the sea, were calling to us, and we responded, fiercely, of course.

"The air was clear about us. We saw things in their full, convincing proportions as they were, and we have seen them with steady eyes and unchanging comprehension ever since. We accepted the issues of the war as facts, not as any group of men, either here or elsewhere, had defined them, and we can accept no outcome which does not squarely meet and settle them.

"Those issues are these:

"Shall the military power of any nation or group of nations be suffered to determine the fortunes of peoples over whom they have no right to rule, except the right of force?

"Shall strong nations be free to wrong weak nations and make them subject to their purpose and interest?

"Shall peoples be ruled and dominated, even in their own internal affairs by arbitrary and irresponsible force, or by their own will and choice?

"Shall there be a common standard of right and privilege for all peoples and nations, or shall the strong do as they will and the weak suffer without redress?

"Shall the assertion of right be haphazard and by casual alliance, or shall there be a common concert to oblige the observance of common rights?

"No man, no group of men, chose these to be the issues of the struggle. They are the issues of it, and they must be settled—by no arrangement or compromise or adjustment of interests, but definitely and once for all and with a full and unequivocal acceptance of the principle that the interest of the weakest is as sacred as the interest of the strongest.

"This is what we mean when we speak of a permanent peace, if we speak sincerely, intelligently and with a real knowledge and comprehension of the matter we deal with.

"We are all agreed that there can be no peace obtained by any kind of bargain or compromise with the governments of the central empires because we have dealt with them already and have seen them deal with other governments that were parties to this struggle, at Brest-Litovsk and Bukharest.

"They have convinced us that they are without honor and do not intend justice. They observe no covenants, accept no principle but force and their own interest. We cannot 'come to terms' with them. They have made it impossible.

"The German people must by this time be fully aware that we cannot accept the word of those who forced this war upon us. We do not think the same thoughts or speak the same language of agreement.

"It is of capital importance that it should also be explicitly agreed that no peace shall be obtained by any kind of compromise or abatement of the principles we have avowed as the principles for which we are fighting. There should exist no doubt about that.

"I am, therefore, going to take the liberty of speaking with the utmost frankness about the practical implications that are involved in it.

"If it be in deed and in truth the common object of the governments associated against Germany and of the nations whom they govern, as I believe it to be, to achieve by the coming settlements a secure and lasting peace, it will be necessary that all who sit down at the peace table shall come ready and willing to pay the price—the only price—that will procure it; and ready and willing also to create in some virile fashion the only instrumentality by which it can be made certain that the agreements of the peace will be honored and fulfilled.

"That price is impartial justice in every item of the settlement, no matter whose interest is crossed, and not only impartial justice but also the satisfaction of the several peoples whose fortunes are dealt with. That indispensable instrumentality is a league of nations formed under covenants that will be efficacious.

"Without such an instrumentality, by which the peace of the world can be guaranteed, peace will rest in part upon the word of outlaws, and only upon that word. For Germany will have to redeem her character, not by what happens at the peace table but by what follows.

"And, as I see it, the constitution of that league of nations and the clear definition of its objects must be a part—in a sense the most essential part—of the peace settlement itself. It cannot be formed now. If formed now it would be merely a new alliance confined to the nations associated against a common enemy. It is not likely that it could be formed after the settlement.

"It is necessary to guarantee the peace, and the peace cannot be guaranteed as an afterthought. The reason, to speak in plain terms again, why it must be guaranteed is that there will be parties to the peace whose promises have proved untrustworthy, and means must be found in connection with the peace settlement itself to remove that source of insecurity. It would be folly to leave the guaranty to the subsequent voluntary action of the governments we have seen destroy Russia and deceive Roumania.

"But these general terms do not disclose the whole matter. Some details are needed to make them sound less like a thesis and more like a practical program. These, then, are some of the particulars, and I state them with the greater confidence because I can state them authoritatively as representing this government's interpretation of its own duty with regard to peace:

"First, the impartial justice meted out must involve no discrimination between those to whom we wish to be just and those to whom we do not wish to be just. It must be a justice that plays no favorites and knows no standard but the equal rights of the several peoples concerned.

"Second, no special or separate interest of any single nation or any group of nations can be made the basis of any part of the settlement which is not consistent with the common interests of all.

Third, there can be no leagues or alliances, or special covenants and understandings, within the general and common family of the league of nations.

"Fourth, and more specifically, there can be no special, selfish economic combinations within the league and no employment of any form of economic boycott or exclusion except as the power of economic penalty by exclusion from the markets of the world may be vested in the league of nations itself as a means of discipline and control.

"Fifth, all international agreements and treaties of every kind must be made known in their entirety to the rest of the world.

"Special alliances and economic rivalries and hostilities have been the prolific source in the modern world of the plans and passions that produce war. It would be an insincere as well as an insecure peace that did not exclude them in definite and binding terms.

"The confidence with which I venture to speak for our people in these matters does not spring from our traditions merely and the well known principles of international action which we have always professed and followed. In the same sentence in which I say that the United States will enter into no special arrangements or understandings with particular nations, let me say also that the United States is prepared to assume its full share of responsibility for the maintenance of the common covenants and understandings upon which peace must henceforth rest.

"We still read Washington's immortal warning against 'entangling alliances' with full comprehension and an answering purpose. But only special and limited alliances entangle, and we recognize and accept the duty of a new day in which we are permitted to hope for a general alliance which will avoid entanglements and clear the air of the world for common understandings and the maintenance of common rights.

"I have made this analysis of the international situation which the war has created, not, of course, because I doubted whether the leaders of the great nations and peoples with whom we are associated were of the same mind and entertained a like purpose, but because the air every now and again gets darkened by mists and groundless doubtings and mischievous perversions of counsel, and it is necessary once and again to sweep all the irresponsible talk about peace intrigues and weakening morale and doubtful purpose on the part of these in authority utterly, and if need be unceremoniously, aside and say things in the plainest words that can be found, even when it is only to say over again what has been said before quite as plainly if in less unvarnished terms.

"As I have said, neither I nor any other man in governmental authority created or gave form to the issues of this war. I have simply responded to them with such vision as I could command. But I have responded gladly and with a resolution that has grown warmer and more confident as the issues have grown clearer and clearer.

"It is now plain that there are issues which no man can pervert unless it be willfully. I am bound to fight for them and happy to fight for them as time and circumstance have revealed them to me as to all the world. Our enthusiasm for them grows more and more irresistible as they stand out in more and more vivid and unmistakable outline.

"And the forces that fight for them draw into closer and closer array, organize their millions into more and more unconquerable might, as they become more and more distinct to the thought and purpose of the peoples engaged.

"It is the peculiarity of this great war that while statesmen have seemed to cast about for definitions of their purpose and have sometimes seemed to shift their ground and their point of view the thought of the mass of men whom statesmen are supposed to instruct and lead has grown more and more unclouded.

more and more certain of what it is that they are fighting for.

"National purposes have fallen more and more into the background and the common purpose of enlightened mankind has taken their place. The counsels of plain men have become on all hands more simple and straightforward and more unified than the counsels of sophisticated men of affairs, who still retain the impression that they are playing a game of power and playing for high stakes. That is why I have said that this is the people's war, not a statesman's. Statesmen must follow the clarified common thought or be broken.

"I take that to be the significance of the fact that assemblies and associations of many kinds made up of plain workaday people have demanded, almost every time they came together, and are still demanding, that the leaders of their governments declare to them plainly what it is—exactly what it is—that they were seeking in this war, and what they think the items of the final settlement should be.

"They are not yet satisfied with what they have been told. They still seem to fear that they are getting what they ask for only in statesmen's terms—only in the terms of territorial arrangements and divisions of power, and not in terms of broad visioned justice and mercy and peace and the satisfaction of those deep seated longings of oppressed and distracted men and women and enslaved peoples that seem to them the only things worth fighting a war for that engulfs the world.

"Perhaps statesmen have not always recognized this changed aspect of the whole world of policy and action. Perhaps they have not always spoken in direct reply to the questions asked because they did not know how searching those questions were and what sort of answers they demanded.

"But I, for one, am glad to attempt the answer again and again, in the hope that I may make it clearer and clearer that my one thought is to satisfy those who struggled in the ranks and are, perhaps, above all others, entitled to a reply whose meaning no one can have any excuse for misunderstanding if he understands the language in which it is spoken or can get some one to translate it correctly into his own.

"And I believe that the leaders of the governments with which we are associated will speak, as they have occasion, as plainly as I have tried to speak. I hope that they will feel free to say whether they think that I am in any degree mistaken in my interpretation of the issues involved or in my purpose with regard to the means by which a satisfactory settlement of those issues may be obtained.

"Unity of purpose and of counsel is as imperatively necessary in this war as was unity of command on the battle field, and with perfect unity of purpose and counsel will come assurance of complete victory. It can be had in no other way.

"Peace drives' can be effectively neutralized and silenced only by showing that every victory of the nations associated against Germany brings the nations nearer the sort of peace which will bring security and reassurance to all peoples and make the recurrence of another such struggle of pitiless force and bloodshed forever impossible, and that nothing else can. Germany is constantly intimating the terms she will accept, and always finds that the world does not want terms. It wishes the final triumph of justice and fair dealing."

GERMANY ASKS FOR PEACE.

Dr. Count Georg von Hertling, chancellor of the German empire, resigned Sept. 30, 1918, and was succeeded Oct. 3 by Prince Maximilian of Baden. On Oct. 5 the new chancellor appeared before the reichstag and delivered an address in which he outlined his policies and announced that a note had been sent to President Wilson asking for a peace parley. The prince said:

"In accordance with the imperial decree of Sept. 30 the German empire has undergone a basic alteration of its political leadership.

"As successor to Count Georg von Hertling, whose services in behalf of the fatherland deserve the highest acknowledgment, I have been summoned by the emperor to lead the new government. In accordance with the governmental method now introduced I submit to the reichstag, publicly and without delay, the principles upon which I propose to conduct the grave responsibilities of the office.

"These principles were firmly established by the agreement of the federated governments and the leaders of the majority parties in this honorable house before I decided to assume the duties of chancellor. They contain, therefore, not only my own confession of political faith but that of an overwhelming portion of the German people's representatives—that is, of the German nation, which has constituted the reichstag on the basis of a general, equal, and secret franchise and according to their will.

"Only the fact that I know the conviction and will of the majority of the people are back of me has given me strength to take upon myself conduct of the empire's affairs in this hard and earnest time in which we are living.

"One man's shoulders would be too weak to carry alone the tremendous responsibility which falls upon the government at present. Only if the people take active part in the broadest sense of the word in deciding their destinies, in other words, if responsibility also extends to the majority of their freely elected political leaders, can the leading statesman confidently assume his part of the responsibility in the service of folk and fatherland.

"My resolve to do this has been especially lightened for me by the fact that prominent leaders of the laboring class have found a way in the new government to the highest offices of the empire. I see therein a sure guaranty that the new government will be supported by the firm confidence of the broad masses of the people, without whose true support the whole undertaking would be condemned to failure in advance.

"Hence, what I say to-day I say not only in my own name and those of my official helpers but in the name of the German people.

"The program of the majority parties, upon which I take my stand, contains, first, an acceptance of the answer of the former imperial government to Pope Benedict's note of Aug. 1, 1916, and an unconditional acceptance of the reichstag resolution of July 19, the same year. It further declares willingness to join a general league of nations based on the foundation of equal rights for all, both strong and weak.

"It considers the solution of the Belgian question to lie in the complete rehabilitation (wiederherstellung) of Belgium, particularly of its independence and territorial integrity. An effort shall also be made to reach an understanding on the question of indemnity.

"The program will not permit the peace treaties hitherto concluded to be a hindrance to the conclusion of a general peace.

"Its particular aim is that popular representative bodies shall be formed immediately on a broad basis in the Baltic provinces, in Lithuania, and Poland. We will promote the realization of necessary preliminary conditions thereof without delay by the introduction of civilian rule. All these lands shall regulate their constitutions and their relations with neighboring peoples without external interference.

"In the matter of international policies I have taken a clear stand through the manner in which the formation of the government was brought about. Upon my motion leaders of the majority parties were summoned for direct advice. It was my conviction, gentlemen, that unity of imperial leadership should

be assured not only through mere schismatic party allegiance by the different members of the government. I considered almost still more important the unity of ideas.

For Peace of Justice.

"I proceeded from this viewpoint, and have, in making my selections, laid greatest weight on the fact that the members of the new imperial government stand on a basis of a just peace of justice, regardless of the war situation, and that they have openly declared this to be their standpoint at the time when we stood at the height of our military successes.

"I am convinced that the manner in which imperial leadership is now constituted, with co-operation of the reichstag, is not something ephemeral, and that when peace comes a government cannot again be formed which does not find support in the reichstag and does not draw its leaders therefrom.

"The war has conducted us beyond the old multifarious and disrupted party life which made it so difficult to put into execution a uniform and decisive political wish. The formation of a majority means the formation of a political will, and an indisputable result of the war has been that in Germany for the first time great parties have joined together in a firm, harmonious program and have thus come into position to determine for themselves the fate of the people.

"This thought will never die. This development will never be retraced, and I trust so long as Germany's fate is ringed about by dangers, those sections of the people outside the majority parties and whose representatives do not belong to the government will put aside all that separates us and will give the fatherland what is the fatherland's.

"This development necessitates an alteration of our constitution's provisions along the lines of the imperial decree of Sept. 30, which shall make it possible that those members of the reichstag who entered the government will retain their seats in the reichstag. A bill to this end has been submitted to the federal states and will immediately be made the object of their consideration and decision.

"Gentlemen, let us remember the words spoken by the emperor on Aug. 4, 1914, which I permitted myself to paraphrase last December at Karlsruhe: 'There are, in fact, parties, but they are all German parties.'

"Political developments in Prussia, the principal German federal state, must proceed in the spirit of these words of the emperor, and the message of the king of Prussia promising the democratic franchise must be fulfilled quickly and completely. I do not doubt also that those federal states which still lag behind in the development of their constitutional conditions will resolutely follow Prussia's example.

"For the present, as the example of all belligerent states demonstrates, the extraordinary powers which a condition of siege compels cannot be dispensed with, but close relations between the military and civilian authorities must be established which will make it possible that in all not purely military questions, and hence especially as to censorship and right of assemblage, the attitude of the civilian executive authorities shall make itself heard, and that final decision shall be placed under the chancellor's responsibility.

"To this end the order of the emperor will be sent to the military commanders. With Sept. 30, the day of the decree, began a new epoch in Germany's internal history. The internal policy whose basic principles are therein laid down is of deciding importance on the question of peace or war.

"The striking force which the government has in its strivings for peace depends on whether it has behind it the united, firm, and unshakable will of the people. Only when our enemies feel that the German people

stand united back of their chosen leaders—then only can words become deeds.

"At the peace negotiations the German government will use its efforts to the end that the treaties shall contain provisions concerning the protection of labor and insurance of laborers, which provisions shall oblige the treaty making states to institute in their respective lands within a prescribed time a minimum of similar or at least equally efficient institutions for the security of life and health as for the care of laborers in the case of illness, accident, or invalidism.

"Of direct importance are the conclusions which the government in the brief span of its existence has been able to draw from the situation in which it finds itself, and to apply practically to the situation.

"More than four years of the bloodiest struggle against a world of numerically superior enemies are behind us, years full of the hardest battles and most painful sacrifices. Nevertheless, we are of strong heart and full of confident faith in our strength, resolved to bear still heavier sacrifices for our honor and freedom and for the happiness of our posterity.

"We remember with deep and warm gratitude our brave troops who, under splendid leadership, have accomplished almost superhuman deeds throughout the whole war and whose past deeds are a sure guaranty that the fate of us all will also in future be in good and dependable hands in their keeping. For months a continuous, terrible, and murderous battle has been raging in the west. Thanks to the incomparable heroism of our army, which will live as an immortal, glorious page in the history of the German people for all times, the front is unbroken.

"This proud consciousness permits us to look to the future with confidence. But just because we are inspired by this feeling and the conviction that it is also our duty to make certain that the blood struggle be not protracted for a single day beyond the moment when a close of the war seems possible to us which does not affect our honor, I have, therefore, not waited until to-day to take a step to further the idea of peace.

"Supported by the consent of all duly authorized persons in the empire, and by consent of all our allies acting in concert with us, I sent on the night of Oct. 4-5, through the mediation of Switzerland, a note to the president of the United States in which I requested him to take up the bringing about of peace and to communicate to this end with all the belligerent states.

"The note will reach Washington to-day or to-morrow. It is directed to the president of the United States because he, in his message to congress, Jan. 8, 1918, and in his later proclamations, particularly in his New York speech of Sept. 27, proposed a program for a general peace which we can accept as a basis for negotiations.

"I have taken this step not only for the salvation of Germany and its allies, but of all humanity, which has been suffering for years through the war.

In Accord with President.

"I have taken it also because I believe the thoughts regarding the future well-being of the nation which were proclaimed by Mr. Wilson are in accord with the general ideas cherished by the new German government and with it the overwhelming majority of our people.

"So far as I am personally concerned in earlier speeches to other assemblages my hearers will testify that the conception which I hold of a future peace has undergone no change since I was intrusted with the leadership of the empire's affairs.

"I see, hence, no distinction whatever between the national and international mandates of duty in respect of peace. For me the deciding factor is solely that all participants

shall with equal honesty acknowledge these mandates as binding and respect them as is the case with me and with other members of our new government.

"And so, with an inner peace, which my clear conscience as a man and as a servant of the people gives me, and which rests at the same time upon firm faith in this great and true people—this people capable of every devotion—and upon their glorious armed power, I await the outcome of the first action which I have taken as the leading statesman of the empire.

"Whatever this outcome may be, I know it will find Germany firmly resolved and united either for an upright peace, which rejects every selfish violation of the rights of others, or for a closing of the struggle for life and death to which our people would be forced without our own fault if the answer to our note by the powers opposed to us should be dictated by a will to destroy us.

"I do not despair over the thought that this second alternative may come. I know the greatness of the mighty powers yet possessed by our people, and I know that the incontrovertible conviction that they were only fighting for our life as a nation would double these powers.

"I hope, however, for the sake of all mankind, that the president of the United States will receive our offer as we meant it. Then the door would be opened to a speedy, honorable peace of justice and reconciliation for us as well as for our opponents."

TEXT OF PEACE NOTE.

The note referred to in the foregoing address was addressed to President Wilson and was sent through the Swiss government. The text follows:

"The German government requests the president of the United States to take in hand the restoration of peace, acquaint all the belligerent states of this request, and invite them to send plenipotentiaries for the purpose of opening negotiations.

"It accepts the program set forth by the president of the United States in his message to congress on Jan. 8 and in his later pronouncements, especially his speech of Sept. 27, as a basis for peace negotiations.

"With a view to avoiding further bloodshed, the German government requests the immediate conclusion of an armistice on land and water and in the air."

EMPEROR WILLIAM OFFERS PEACE.

Emperor William issued the following proclamation, dated Oct. 6, to the German army and navy:

"For months past the enemy, with enormous exertions and almost without pause in the fighting, has stormed against our lines. In weeks of the struggle, often without repose, you have had to persevere and resist a numerically far superior enemy. Therein lies the greatness of the task which has been set for you and which you are fulfilling. Troops of all the German states are doing their part and are heroically defending the fatherland on foreign soil. Hard is the task.

"My navy is holding its own against the united enemy naval forces and is unwaveringly supporting the army in its difficult struggle.

"The eyes of those at home rest with pride and admiration on the deeds of the army and the navy. I express to you the thanks of myself and the fatherland.

"The collapse of the Macedonian front has occurred in the midst of the hardest struggle. In accord with our allies I have resolved once more to offer peace to the enemy, but I will only extend my hand for an honorable peace. We owe that to the heroes who have laid down their lives for the fatherland, and we make that our duty to our children.

"Whether arms will be lowered is a question.

Until then we must not slacken. We must, as hitherto, exert all our strength unwearily to hold our ground against the onslaught of our enemies.

"The hour is grave, but trusting in your strength and in God's gracious help, we feel ourselves to be strong enough to defend our beloved fatherland. WILHELM."

PRESIDENT WILSON'S REPLY.

In response to Germany's peace note of Oct. 6 Secretary of State Robert Lansing, at the direction of President Wilson, transmitted the following through the Swiss charge d'affaires in Washington:

Department of State, Oct. 8, 1918.

"Sir: I have the honor to acknowledge, on behalf of the president, your note of Oct. 6, inclosing a communication from the German government to the president, and I am instructed by the president to request you to make the following communication to the imperial German chancellor:

"Before making reply to the request of the imperial German government, and in order that that reply shall be as candid and straightforward as the momentous interests involved require, the president of the United States deems it necessary to assure himself of the exact meaning of the note of the imperial chancellor.

"Does the imperial chancellor mean that the imperial German government accepts the terms laid down by the president in his address to the congress of the United States on the 8th of January last, and in subsequent addresses, and that its object in entering into discussions would be only to agree upon the practical details of their application?

"The president feels bound to say with regard to the suggestion of an armistice that he would not feel at liberty to propose a cessation of arms to the governments with which the government of the United States is associated against the central powers so long as the armies of those powers are upon their soil.

"The good faith of any discussion would manifestly depend upon the consent of the central powers immediately to withdraw their forces everywhere from invaded territory.

"The president also feels that he is justified in asking whether the imperial chancellor is speaking merely for the constituted authorities of the empire who have so far conducted the war.

"He deems the answer to these questions vital from every point of view."

"Accept, sir, the renewed assurances of my high consideration. ROBERT LANSING."

GERMANY "ACCEPTS" WILSON TERMS.

On Sunday evening, Oct. 14, the following reply, dated Oct. 12, from the German government to President Wilson's note of interrogation was received by wireless in Washington and forwarded to the chief executive, who was in New York city. On Monday forenoon, Oct. 14, an official copy of the reply was handed to Secretary Lansing at the state department. It read:

"In reply to the questions of the president of the United States of America the German government hereby declares:

"The German government has accepted the terms laid down by President Wilson in his address of Jan. 8, and in his subsequent addresses, as the foundation of a permanent peace of justice.

"Consequently its object in entering into discussions would be only to agree upon practical details of the application of those terms.

"The German government believes that the governments of the powers associated with the government of the United States also take the position taken by President Wilson in his address. The German government, in accordance with the Austro-Hungarian government, for the purpose of bringing about an armistice, declares itself ready to comply with the proposi-

tions of the president in regard to evacuation. "The German government suggests that the president may occasion the meeting of a mixed commission for making the necessary arrangements concerning the evacuation.

"The present German government, which has undertaken the responsibility for this step toward peace, has been formed by conferences and in agreement with the great majority of the reichstag.

"The chancellor, supported in all of his actions by the will of this majority, speaks in the name of the German government and of the German people.

"SOLF, State Secretary of Foreign Office."

WILSON REFUSES ARMISTICE.

Promptly on the afternoon of Oct. 14 President Wilson sent the following reply to the German armistice proposal:

"State Department, Oct. 14, 1918.

"Sir: In reply to the communication of the German government dated the 12th inst., which you handed me to-day, I have the honor to request you to transmit the following answer:

"The unqualified acceptance by the present German government and by a large majority of the German reichstag of the terms laid down by the president of the United States of America in his address to the congress of the United States on the 8th of January, 1918, and in his subsequent addresses justifies the president in making a frank and direct statement of his decision with regard to the communications of the German government of the 8th and 12th of October, 1918.

"It must be clearly understood that the process of evacuation and the conditions of an armistice are matters which must be left to the judgment and advice of the military advisers of the government of the United States and allied governments, and the president feels it his duty to say that no arrangement can be accepted by the government of the United States which does not provide absolutely satisfactory safeguards and guaranties of the maintenance of the present military supremacy of the armies of the United States and of the allies in the field. He feels confident that he can safely assume that this will also be the judgment and decision of the allied governments.

"The president feels that it is also his duty to add that neither the government of the United States nor, he is quite sure, the governments with which the government of the United States is associated as a belligerent, will consent to consider an armistice so long as the armed forces of Germany continue the illegal and inhumane practices which they still persist in. At the very time that the German government approaches the government of the United States with proposals of peace its submarines are engaged in sinking passenger ships at sea, and not the ships alone but the very boats in which their passengers and crews seek to make their way to safety; and in their present enforced withdrawal from Flanders and France the German armies are pursuing a course of wanton destruction which has always been regarded as in direct violation of the rules and practices of civilized warfare. Cities and villages, if not destroyed, are being stripped of not only all they contain but often of their very inhabitants. The nations associated against Germany cannot be expected to agree to a cessation of arms while acts of inhumanity, spoliation and desolation are being continued, which they justly look upon with horror and with burning hearts.

"It is necessary, also, in order that there may be no possibility of misunderstanding, that the president should very solemnly call the attention of the government of Germany to the language and plain intent of one of the terms of peace which the German government has now accepted. It is contained in the address of the president delivered at Mount Vernon on the 4th of July last. It is as follows:

" "The destruction of every arbitrary power anywhere that can separately, secretly and of its single choice disturb the peace of the world; or, if it cannot be presently destroyed, at least its reduction to virtual impotency."

"The power which has hitherto controlled the German nation is of the sort here described. It is within the choice of the German nation to alter it. The president's words just quoted naturally constitute a condition precedent to peace, if peace is to come by the action of the German people themselves. The president feels bound to say that the whole process of peace will, in his judgment, depend upon the definiteness and the satisfactory character of the guaranties which can be given in this fundamental matter. It is indispensable that the governments associated against Germany should know beyond peradventure with whom they are dealing."

"The president will make a separate reply to the royal and imperial government of Austria-Hungary.

"Accept, sir, the renewed assurances of my high consideration. ROBERT LANSING."

GERMANY'S REPLY TO AMERICA.

On Oct. 22 the Swiss charge d'affaires in Washington, Frederick Oederlin, transmitted to Secretary Lansing the original text and also an English translation of a communication dated Oct. 20, 1918, from the German government. The official translation follows:

"In accepting the proposal for an evacuation of the occupied territories the German government has started from the assumption that the procedure of this evacuation and of the conditions of an armistice should be left to the judgment of the military advisers and that the actual standard of power on both sides in the field has to form the basis for arrangements safeguarding and guaranteeing this standard. The German government suggests to the president to bring about an opportunity for fixing the details. It trusts that the president of the United States will approve of no demand which would be irreconcilable with the honor of the German people and with opening a way to a peace of justice.

"The German government protests against the reproach of illegal and inhumane actions made against the German land and sea forces and thereby against the German people. For the covering of a retreat, destructions will always be necessary and are in so far permitted by international law. The German troops are under the strictest instructions to spare private property and to exercise care for the population to the best of their ability. Where transgressions occur in spite of these instructions the guilty are being punished.

"The German government further denies that the German navy in sinking ships has ever purposely destroyed lifeboats with their passengers. The German government proposes with regard to all these charges that the facts be cleared up by neutral commissions. In order to avoid anything that might hamper the work of peace, the German government has caused orders to be dispatched to all submarine commanders precluding the torpedoing of passenger ships, without however, for technical reasons, being able to guarantee that these orders will reach every single submarine at sea before its return.

"As the fundamental condition for peace, the president characterizes the destruction of every arbitrary power that can separately, secretly and of its own single choice disturb the peace of the world. To this the German government replies: Hitherto the representation of the people in the German empire has not been endowed with an influence on the formation of the government. The constitution did not provide for a concurrence of the representation of the people in decisions on peace and war. These conditions have just now undergone a fundamental change. The new government has been formed in com-

plete accord with the wishes of the representation of the people, based on the equal, universal, secret, direct franchise. The leaders of the great parties of the reichstag are members of this government. In future no government can take or continue in office without possessing the confidence of the majority of the reichstag. The responsibility of the chancellor of the empire to the representation of the people is being legally developed and safeguarded. The first act of the new government has been to lay before the reichstag a bill to alter the constitution of the empire so that the consent of the representation of the people is required for decisions on war and peace. The permanence of the new system is, however, guaranteed not only by constitutional safeguards, but also by the unshakable determination of the German people, whose vast majority stands behind these reforms and demands their energetic continuance.

"The question of the president, with whom he and the governments associated against Germany are dealing, is, therefore, answered in a clear and unambiguous manner by the statement that the offer of peace and an armistice has come from a government which, free from arbitrary and irresponsible influence, is supported by the approval of the overwhelming majority of the German people.

"SOLE"

"State Secretary of Foreign Affairs.

"Berlin, Oct. 20, 1918."

WILSON CALLS FOR SURRENDER.

To the foregoing note President Wilson returned the following reply Oct. 23:

"From the secretary of state to the charge d'affaires ad interim in charge of German interests in the United States:

"Department of State, Oct. 23, 1918.—Sir: I have the honor to acknowledge the receipt of your note of the 22d transmitting a communication under date of the 20th from the German government and to advise you that the president has instructed me to reply thereto as follows:

"Having received the solemn and explicit assurance of the German government that it unreservedly accepts the terms of peace laid down in his address to the congress of the United States on the 8th of January, 1918, and the principles of settlement enunciated in his subsequent addresses, particularly the address of the 27th of September, and that it desires to discuss the details of their application and that this wish and purpose emanated, not from those who have hitherto dictated German policy and conducted the present war on Germany's behalf, but from ministers who speak for the majority of the reichstag and for an overwhelming majority of the German people; and having received also the explicit promise of the present German government that the humane rules of civilized warfare will be observed both on land and sea by the German armed forces, the president of the United States feels that he cannot decline to take up with the governments with which the government of the United States is associated the question of an armistice.

"He deems it his duty to say again, however, that the only armistice he would feel justified in submitting for consideration would be one which should leave the United States and the powers associated with her in a position to enforce any arrangements that may be entered into and to make a renewal of hostilities on the part of Germany impossible.

"The president has, therefore, transmitted his correspondence with the present German authorities to the governments with which the government of the United States is associated as a belligerent, with the suggestion that, if those governments are disposed to effect peace upon the terms and principles indicated, their military advisers and the military advisers

of the United States be asked to submit to the governments associated against Germany the necessary terms of such an armistice as will fully protect the interests of the peoples involved and insure to the associated governments the unrestricted power to safeguard and enforce the details of the peace to which the German government has agreed, provided they deem such an armistice possible from the military point of view.

"Should such terms of armistice be suggested, their acceptance by Germany will afford the best concrete evidence of her unequivocal acceptance of the terms and principles of peace from which the whole action proceeds.

"The president would deem himself lacking in candor did he not point out in the frankest possible terms the reason why extraordinary safeguards must be demanded. Significant and important as the constitutional changes seem to be which are spoken of by the German foreign secretary in his note of the 20th of October, it does not appear that the principle of a government responsible to the German people has yet been fully worked out or that any guaranties either exist or are in contemplation that the alterations of principle and of practice now partially agreed upon will be permanent.

"Moreover, it does not appear that the heart of the present difficulty has been reached. It may be that future wars have been brought under the control of the German people, but the present war has not been; and it is with the present war that we are dealing.

"It is evident that the German people have no means of commanding the acquiescence of the military authorities of the empire in the popular will; that the power of the king of Prussia to control the policy of the empire is unimpaired; that the determining initiative still remains with those who have hitherto been the masters of Germany.

"Feeling that the whole peace of the world depends now on plain speaking and straightforward action, the president deems it his duty to say, without any attempt to soften what may seem harsh words, that the nations of the world do not and cannot trust the word of those who have hitherto been the masters of German policy, and to point out once more that, in concluding peace and attempting to undo the infinite injuries and injustices of this war, the government of the United States cannot deal with any but veritable representatives of the German people who have been assured of a genuine constitutional standing as the real rulers of Germany.

"If it must deal with the military masters and the monarchical autocrats of Germany now, or if it is likely to have to deal with them later in regard to the international obligations of the German empire, it must demand, not peace negotiations, but surrender. Nothing can be gained by leaving this essential thing unsaid."

"Accept, sir, the renewed assurances of high consideration.

"ROBERT LANSING.

"Mr. Frederick Oederlin, Charge d'Affaires of Switzerland."

AUSTRIA-HUNGARY ASKS FOR PEACE.

On Oct. 19, 1918, Secretary Lansing made public the following note received through W. A. F. Ekengren, Swedish minister to the United States, from the Austro-Hungarian government:

"Legation of Sweden, Washington, D. C., Oct. 7, 1918.

"(Translation.)

"Excellency: By order of my government I have the honor confidentially to transmit herewith to you the following communication of the imperial and royal government of Austria-Hungary to the president of the United States of America:

"The Austro-Hungarian monarchy, which has waged war always and solely as a defensive war and repeatedly given documentary evidence of its readiness to stop the shedding of blood and to arrive at a just and honorable peace, hereby addresses itself to his lordship the president of the United States of America and offers to conclude with him and his allies an armistice on every front on land, at sea and in the air, and to enter immediately upon negotiations for a peace for which the fourteen points in the message of President Wilson to congress of Jan. 8, 1918, and the four points contained in President Wilson's address of Feb. 12, 1918, should serve as a foundation in which the viewpoints declared by President Wilson in his address of Sept. 27, 1918, will also be taken into account."

"Be pleased to accept, etc.

W. A. F. EKENGREN.

"His excellency, Mr. Robert Lansing, secretary of state of the United States, Washington."

PRESIDENT REFUSES ARMISTICE.

President Wilson on Oct. 19 replied through Secretary Lansing to the foregoing note as follows:

"I have the honor to acknowledge the receipt of your note of the 7th instant in which you transmit a communication of the imperial and royal government of Austria-Hungary to the president. I am now instructed by the president to request you to be good enough through your government to convey to the imperial and royal government the following reply:

"The president deems it his duty to say to the Austro-Hungarian government that he cannot entertain the present suggestions of that government because of certain events of utmost importance which, occurring since the delivery of his address of the 8th of January last, have necessarily altered the attitude and responsibility of the government of the United States.

"Among the fourteen terms of peace which the president formulated at that time occurred the following:

"10. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and assured, should be accorded the freest opportunity of autonomous development."

"Since the sentence was written and uttered to the congress of the United States the government of the United States has recognized that a state of belligerency exists between the Czecho-Slovaks and the German and Austro-Hungarian empires and that the Czecho-Slovak national council is a de facto belligerent government, clothed with proper authority to direct the military and political affairs of the Czecho-Slovaks. It has also recognized in the fullest manner the justice of the nationalistic aspirations of the Jugo Slavs for freedom.

"The president is, therefore, no longer at liberty to accept that mere 'autonomy' of these peoples as a basis of peace, but is obliged to insist that they, and not he, shall be the judges of what action on the part of the Austro-Hungarian government will satisfy their aspirations and their conception of their rights and destiny as members of the family of nations."

"Accept, sir, the renewed assurances of my highest consideration. ROBERT LANSING."

WILSON REFERS GERMANY TO FOCH.

On Nov. 5 Secretary of State Lansing, by direction of President Wilson, sent the following note to the German government through the Swiss legation in Washington:

"In my note of Oct. 23, 1918, I advised you that the president had transmitted his correspondence with the German authorities to the governments with which the government of the United States is associated as a belligerent, with the suggestion that, if those

governments were disposed to accept peace upon the terms and principles indicated, their military advisers and the military advisers of the United States be asked to submit to the governments associated against Germany the necessary terms of such an armistice as would fully protect the interests of the peoples involved and insure to the associated governments the unrestricted power to safeguard and enforce the details of the peace to which the German government had agreed, provided they deem such an armistice possible from the military point of view.

"The president is now in receipt of a memorandum of observations by the allied governments on this correspondence, which is as follows:

"The allied governments have given careful consideration to the correspondence which has passed between the president of the United States and the German government. Subject to the qualifications which follow, they declare their willingness to make peace with the government of Germany on the terms of peace laid down in the president's address to congress of January, 1918, and the principles of settlement enunciated in his subsequent addresses. They must point out, however, that clause 2, relating to what is usually described as the freedom of the seas, is open to various interpretations, some of which they could not accept. They must, therefore, reserve to themselves complete freedom on this subject when they enter the peace conference.

"Further, in the conditions of peace laid down in his address to congress on Jan. 8, 1918, the president declared that invaded territories must be restored as well as evacuated and freed; the allied governments feel that no doubt ought to be allowed to exist as to what this provision implies. By it they understand that compensation will be made by Germany for all damage done to the civilian population of the allies and their property by the aggression of Germany by land, by sea, and from the air."

"I am instructed by the president to say that he is in agreement with the interpretation set forth in the last paragraph of the memorandum above quoted. I am further instructed by the president to request you to notify the German government that Marshal Foch has been authorized by the government of the United States and the allied governments to receive properly accredited representatives of the German government and to communicate to them the terms of an armistice. ROBERT LANSING."

TERMS ASKED FOR BY GERMANY.

Germany's reply to the foregoing communication by President Wilson was made public Oct. 27 and was as follows:

"The German government has taken cognizance of the answer of the president of the United States.

"The president is aware of the far-reaching changes which have been carried out and are being carried out in the German constitutional structure, and that peace negotiations are being conducted by a people's government in whose hands rests, both actually and constitutionally, the power to make the deciding conclusions. The military powers are also subject to it.

"The German government now awaits proposals for an armistice, which shall be the first step toward a just peace, as the president has described it in his proclamation.

"S.O.L.F."

AUSTRIA ACCEPTS ALL TERMS.

On Oct. 28 Count Julius Andrássy, the new Austro-Hungarian foreign minister, sent the following reply to President Wilson through the Swedish government:

"In reply to the note of President Wilson of the 19th of this month, addressed to the Austro-Hungarian government, and giving the decision of the president to speak directly with the Austro-Hungarian government on the question of an armistice and of peace, the Austro-Hungarian government has the honor to declare that equally with the preceding proclamations of the president it adheres also to the same point of view contained in the last note upon the rights of the Austro-Hungarian peoples, especially those of the Czecho-Slovaks and the Jugo Slavs.

"Consequently, Austria-Hungary accepting all the conditions the president has laid down for the entry into negotiations for an armistice and peace, no obstacle exists, according to the judgment of the Austro-Hungarian government, to the beginning of these negotiations.

"The Austro-Hungarian government declares itself ready, in consequence, without awaiting the result of other negotiations, to enter into negotiations upon peace between Austria-Hungary and the states in the opposing group and for an immediate armistice upon all Austro-Hungarian fronts.

"It asks President Wilson to be so kind as to begin overtures on this subject."

ASKS IMMEDIATE PEACE.

On Oct. 29 Austria-Hungary, through Count Andrássy, sent the following note to Secretary of State Lansing:

SURRENDER CONDITIONS IMPOSED BY ALLIES.

BULGARIAN ARMISTICE TERMS.

Armistice terms were signed by representatives of the Bulgarian government and Gen. Franchet d'Espèrey, representing the allies, in Saloniki Sunday night, Sept. 29, 1918. The armistice was of a purely military character and contained no provisions of a political character. The terms, speaking generally, were:

Bulgaria agrees to evacuate all the territory she now occupies in Greece and Serbia, to demobilize her army immediately, and surrender all means of transport to the allies.

Bulgaria also will surrender her boats and control of navigation on the Danube and concede to the allies free passage through Bulgaria for the development of military operations.

All Bulgarian arms and ammunition are to be stored under the control of the allies, to whom is conceded the right to occupy all important strategic points.

TURKISH ARMISTICE TERMS.

The terms of the armistice signed at Mudros Oct. 30, 1918, by Rear-Admiral Calthorpe for the allies, and the Turkish plenipotentiaries were as follows:

1. The opening of the Dardanelles and the Bosphorus and access to the Black sea. Allied occupation of the Dardanelles and Bosphorus forts.

2. The positions of all mine fields, torpedo tubes and other obstructions in Turkish waters are to be indicated and assistance given to sweep or remove them, as may be required.

3. All available information concerning mines in the Black sea is to be communicated.

4. All allied prisoners of war and Armenian interned persons and prisoners are to be collected in Constantinople and handed over unconditionally to the allies.

5. Immediate demobilization of the Turkish army, except such troops as are required for surveillance on the frontiers and for the maintenance of internal order. The number of effectives and their disposition to be determined later by the allies after consultation with the Turkish government.

6. The surrender of all war vessels in Turkish waters or waters occupied by Turkey.

"Immediately after having taken direction of the ministry of foreign affairs and after the dispatch of the official answer to your note of Oct. 18, 1918, by which you were able to see that we accept all the points and principles laid down by President Wilson in his various declarations, and are in complete accord with the efforts of President Wilson to prevent future wars and to create a league of nations, we have taken preparatory measures in order that Austrians and Hungarians may be able, according to their own desire and without being in any way hindered, to make a decision as to their future organization and to rule it.

"Since the accession to power of Emperor-King Charles his immovable purpose has been to bring an end to the war. More than ever this is the desire of the sovereign of all the Austro-Hungarian peoples, who acknowledge that their future destiny can only be accomplished in a pacific world, by being freed from all disturbances, privations, and sorrows of war.

"This is why I address you directly, Mr. Secretary of State, praying that you will have the goodness to intervene with the president of the United States in order that in the interest of humanity, as in the interest of all those who live in Austria-Hungary, an immediate armistice may be concluded on all fronts and for an overture that immediate negotiations for peace will follow."

These ships will be interned in such Turkish port or ports as may be directed, except such small vessels as are required for police and similar purposes in Turkish territorial waters.

7. The allies to have the right to occupy any strategic points in the event of any situation arising which threatens the security of the allies.

8. Free use by allied ships of all ports and anchorages now in Turkish occupation and denial of their use by the enemy. Similar conditions are to apply to Turkish mercantile shipping in Turkish waters for the purposes of trade and the demobilization of the army.

9. Allied occupation of the Taurus tunnel system.

10. Immediate withdrawal of Turkish troops from northern Persia to behind the prewar frontier already has been ordered and will be carried out.

11. A part of Transcaucasia already has been ordered to be evacuated by Turkish troops. The remainder to be evacuated if required by the allies after they have studied the situation.

12. Wireless, telegraph and cable stations to be controlled by the allies. Turkish government messages to be excepted.

13. Prohibition against the destruction of any naval, military or commercial material.

14. Facilities are to be given for the purchase of coal, oil, fuel and naval material from Turkish sources after the requirements of the country have been met.

15. The surrender of all Turkish officers in Tripolitania and Cyrenaica to the nearest Italian garrison. Turkey agrees to stop supplies and communication with these officers if they do not obey the order to surrender.

16. The surrender of all garrisons in Hedjaz, Assir, Yemen, Syria and Mesopotamia to the nearest allied commander.

17. The use of all ships and repair facilities at all Turkish ports and arsenals.

18. The surrender of all ports occupied in Tripolitania and Cyrenaica, including Misurata, to the nearest allied garrison.

19. All Germans and Austrians, naval, military or civilian, to be evacuated within one month from Turkish dominion, and those in remote districts as soon after that time as may be possible.

20. Compliance with such orders as may be

conveyed for the disposal of equipment, arms and ammunition, including the transport of that portion of the Turkish army which is demobilized under clause 5.

21. An allied representative to be attached to the Turkish ministry of supplies in order to safeguard allied interests. This representative to be furnished with all aid necessary for this purpose.

22. Turkish prisoners are to be kept at the disposal of the allied powers. The release of Turkish civilian prisoners and prisoners over military age is to be considered.

23. An obligation on the part of Turkey to cease all relations with the central powers.

24. In case of disorder in the six Armenian vilayets the allies reserve to themselves the right to occupy any part of them.

25. Hostilities between the allies and Turkey shall cease from noon, local time, Thursday, the 31st of October, 1918.

TERMS OF AUSTRIAN ARMISTICE.

The terms of the Austrian armistice as announced by the state department in Washington, D. C., Nov. 4, 1918, were:

Military Clauses.

1. The immediate cessation of hostilities by land, sea and air.

2. Total demobilization of the Austro-Hungarian army and immediate withdrawal of all Austro-Hungarian forces operating on the front from the North sea to Switzerland. Within Austro-Hungarian territory, limited as in clause 3 below, there shall only be maintained as an organized military force (1) reduced to prewar effectives [effectiveness].

Half the divisional corps and army artillery and equipment shall be collected at points to be indicated by the allies and United States of America for delivery to them, beginning with all such material as exists in the territories to be evacuated by the Austro-Hungarian forces.

3. Evacuation of all territories invaded by Austria-Hungary since the beginning of the war.

Withdrawal within such periods as shall be determined by the commander in chief of the allied forces on each front of the Austro-Hungarian army behind a line fixed as follows:

From Pic Umbrail to the north of the Stelvio it will follow the crest of the Rhetian Alps up to the sources of the Adige and Eisach, passing thence by Mounts Reschan and Brenner and the heights of Oetz and Zoalfer.

The line then turns south, crossing Mount Toblach and meeting the present frontier in the Carnic Alps.

It follows this frontier up to Mount Tarvis and after Mount Tarvis the watershed of the Julian Alps by the Col of Predil, Mount Mangart, the Tricorno (Terziou) and the watershed of the Cols di Podberdo, Podlanišoam and Idrit.

From this point the line turns southeast toward the Schneeberg, excludes the whole basin of the Save and its tributaries.

From Schneeberg it goes down toward the coast in such a way as to include Castua, Matuzia and Volosca in the evacuated territories.

It will also follow the administrative limits of the present province of Dalmatia, including to the north of Lisarica and Trivanja and to the south territory limited by a line from the [Semigrand?] of Cape Planca to the summits of the watersheds eastward, so as to include in the evacuated area all the valleys and water courses flowing toward Seborica, such as the Cicola, Kerka, Butisnica and their tributaries.

It will also include all the islands in the north and west of Dalmatia from Premuda, Seive, Ulbo, Scherda, Maon, Paga and Puntadura in the north up to Meleda in the south, embracing Santandrea, Bua, Lisa, Lesnia, Tercola, Curzola, Cazza and Lagosta, as well as the neighboring rocks and islets and passages, only excepting the islands of Great and Small Zirona, Bua, Solta and Brazza.

All territory thus evacuated [shall be occupied by the forces?] of the allies and of the United States of America.

All military and railway equipment of all kinds, including coal belonging to or within those territories [to be?] left in situ and surrendered to the allies, according to special orders given by the commander in chief of the forces of the associated powers on the different fronts.

No new destruction, pillage or requisition to be done by enemy troops in the territories evacuated by them and occupied by the forces of the associated powers.

4. The allies shall have the right of free movement over all roads and rail and waterways in Austro-Hungarian territory and of the use of the necessary Austrian and Hungarian means of transportation.

The armies of the associated powers shall occupy such strategic points in Austria-Hungary at times as they may deem necessary to enable them to conduct military operations or to maintain order.

They shall have the right of requisition on payment for the troops of the associated powers [wherever?] they may be.

5. Complete evacuation of all German troops within fifteen days not only from the Italian and Balkan fronts, but from all Austro-Hungarian territory.

Internment of all German troops which have not left Austria-Hungary within the date.

6. The administration of the evacuated territories of Austria-Hungary will be intrusted to the local authorities, under the control of the allied and associated armies of occupation.

7. The immediate repatriation without reciprocity of all allied prisoners of war and interned subjects and of civil populations evacuated from their homes, on conditions to be laid down by the commander in chief of the forces of the associated powers on the various fronts.

Sick and wounded who cannot be removed from evacuated territory will be cared for by Austro-Hungarian personnel, who will be left on the spot with the medical material required.

Naval Conditions.

1. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all Austro-Hungarian ships.

Notification to be made to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marine of the allied and associated powers, all questions of neutrality being waived.

2. Surrender to allies and the United States of fifteen Austro-Hungarian submarines completed between the years 1910 and 1918 and of all German submarines which are in or may hereafter enter Austro-Hungarian territorial waters.

All other Austro-Hungarian submarines to be paid off and completely disarmed and to remain under the supervision of the allies and the United States.

3. Surrender to allies and United States with their complete armament and equipment of three battle ships, three light cruisers, nine destroyers, twelve torpedo boats, one mine layer, six Danube monitors, to be designated by the allies and the United States of America.

All other surface warships, including river craft, are to be concentrated in Austro-Hungarian naval bases to be designated by the allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the allies and the United States of America.

4. Freedom of navigation to all warships and merchant ships of allied and associated powers to be given in the Adriatic and up the River Danube and its tributaries in the territorial waters and territory of Austria-Hungary.

The allies and associated powers shall have the right to sweep up all mine fields and

obstructions and the positions of these are to be indicated.

In order to insure the freedom of navigation on the Danube, the allies and the United States of America shall be empowered to occupy or to dismantle all fortifications or defenses works.

5. The existing blockade conditions set up by the allied and associated powers are to remain unchanged and all Austro-Hungarian merchant ships found at sea are to remain liable to capture, save exceptions which may be made by a commission nominated by the allies and the United States of America.

6. All naval aircraft are to be concentrated and impounded in Austro-Hungarian bases to be designated by the allies and the United States of America.

7. Evacuation of all the Italian coasts and of all ports occupied by Austria-Hungary outside their national territory and the abandonment of all floating craft, naval material, equipment and materials for inland navigation of all kinds.

8. Occupation by the allies and the United States of America of the land and sea fortifications and the islands which form the defenses and of the dockyards and arsenal at Pola.

9. All merchant vessels held by Austria-Hungary belonging to the allies and associated powers to be returned.

10. No destruction of ships or of material to be permitted before evacuation, surrender or restoration.

11. All naval and mercantile marine prisoners of the allied and associated powers in Austro-Hungarian hands to be returned without reciprocity.

GERMAN ARMISTICE TERMS REVEALED TO CONGRESS BY PRESIDENT.

President Wilson personally appeared before a joint session of congress on Monday Nov. 11, 1918, and made an address in which he revealed the terms of the armistice imposed upon Germany by the allies. He said:

"Gentlemen of the Congress: In these anxious times of rapid and stupendous change it will in some degree lighten my sense of responsibility to perform in person the duty of communicating to you some of the larger circumstances of the situation with which it is necessary to deal.

"The German authorities who have, at the invitation of the supreme war council, been in communication with Marshal Foch, have accepted and signed the terms of armistice which he was authorized and instructed to communicate to them. Those terms are as follows:

Military Clauses.

"Article 1. Cessation of operations by land and in the air six hours after the signature of the armistice.

"Article 2. Immediate evacuation of invaded countries, Belgium, France, Alsace-Lorraine, Luxemburg, so ordered as to be completed within fourteen days from the signature of the armistice. German troops which have not left the above mentioned territories within the period fixed will become prisoners of war. Occupation by the allied and United States forces jointly will keep pace with evacuation in these areas. All movements of evacuation and occupation will be regulated in accordance with a note annexed to the stated terms.

Article 3. Repatriation, beginning at once and to be completed within fourteen days, of all inhabitants of the countries above mentioned, including hostages and persons under trial or convicted.

"Article 4. Surrender in good condition by the German armies of the following equipment: Five thousand guns (2,500 heavy, 2,500 field), 30,000 machine guns, 3,000 minewarfer (mine throwers), 2,000 airplanes (fighters, bombers, first D-73s and night bombing machines). The above to be delivered in situ to the allied and the United States troops in accordance with the detailed conditions laid down in the annexed note.

"Article 5. Evacuation by the German armies of the countries on the left bank of the Rhine. These countries on the left bank of the Rhine shall be administered by the local authorities under the control of the allied and United States armies of occupation. The occupation of these territories will be determined by allied and United States garrisons holding the principal crossings of the Rhine—Mayence, Coblenz, Cologne—together with bridgeheads at these points in thirty kilometer radius on the right bank and by garrisons similarly holding the strategic points of the regions. A neutral zone shall be reserved on the right of the Rhine between the stream and a line drawn parallel to it forty kilometers to the east from the frontier of Holland to the parallel of Gernsheim and as far as practicable a distance of thirty kilometers from the east of the stream from this parallel upon the Swiss frontier. Evacuation by the enemy of the Rhine lands shall be so ordered as to be completed within a further period of eleven days, in all nineteen days after the signature of the armistice. All movements of evacuation and occupation will be regulated according to the note annexed."

Here the president interrupted his reading to remark that there evidently had been an error in transmission, as the arithmetic was very bad. The "further period" of eleven days is in addition to the fourteen days allowed for evacuation of invaded countries, making twenty-five days given the Germans to get entirely clear of the Rhine lands.

"Article 6. In all territory evacuated by the enemy there shall be no evacuation of inhabitants; no damage or harm shall be done to the persons or property of the inhabitants. No destruction of any kind to be committed. Military establishments of all kinds shall be delivered intact, as well as military stores of food, munitions, equipment not removed during the periods fixed for evacuation. Stores of food of all kinds for the civil population, cattle, etc., shall be left in situ. Industrial establishments shall not be impaired in any way and their personnel shall not be moved. Roads and means of communication of every kind, railroads, waterways, main roads, bridges, telegraphs, telephones, shall be in no manner impaired.

"Article 7. All civil and military personnel at present employed on them shall remain. Five thousand locomotives, 50,000 wagons and 10,000 motor lorries in good working order, with all necessary spare parts and fittings, shall be delivered to the associated powers within the period fixed for the evacuation of Belgium and Luxemburg. The railways of Alsace-Lorraine shall be handed over within the same period, together with all prewar personnel and material. Further material necessary for the working of railways in the country on the left bank of the Rhine shall be left in situ. All stores of coal and material for the upkeep of permanent ways, signals and repair shops left entire in situ and kept in an efficient state by Germany during the whole period of armistice. All barges taken from the allies shall be restored to them. A note appended regulates the details of these measures.

"Article 8. The German command shall be responsible for revealing all mines or delaying fuses disposed on territory evacuated by the German troops, and shall assist in their discovery and destruction. The German command shall also reveal all destructive measures that may have been taken (such as poisoning or polluting of springs, wells, etc.), under penalty of reprisals.

"Article 9. The right of requisition shall be exercised by the allies and the United States armies in all occupied territory. The upkeep of the troops of occupation in the Rhineland (excluding Alsace-Lorraine) shall be charged to the German government.

"Article 10. An immediate repatriation without reciprocity according to detailed conditions which shall be fixed, of all allied and United States prisoners of war. The allied

powers and the United States shall be able to dispose of these prisoners as they wish.

"Article 11. Sick and wounded who cannot be removed from evacuated territory will be cared for by German personnel, who will be left on the spot with the medical material required.

"Article 12. All German troops at present in any territory which before the war belonged to Russia, Roumania or Turkey shall withdraw within the frontiers of Germany as they existed on Aug. 1, 1914.

"Article 13. Evacuation by German troops to begin at once and all German instructors, prisoners and civilians, as well as military agents, now on the territory of Russia (as defined before 1914) to be recalled.

"Article 14. German troops to cease at once all requisitions and seizures and any other undertaking with a view to obtaining supplies intended for Germany in Roumania and Russia (as defined on Aug. 1, 1914).

"Article 15. Abandonment of the treaties of Bukharest and Brest-Litovsk and of the supplementary treaties.

"Article 16. The allies shall have free access to the territories evacuated by the Germans on their eastern frontier, either through Danzig or by the Vistula, in order to convey supplies to the populations of those territories or for any other purpose.

"Article 17. Unconditional capitulation of all German forces operating in East Africa within one month.

"Article 18. Repatriation, without reciprocity, within a maximum period of one month, in accordance with detailed conditions hereafter to be fixed, of all civilians interned or deported who may be citizens of other allied or associated states than those mentioned in clause 3, paragraph 19, with the reservation that any future claims and demands of the allies and the United States of America remain unaffected.

"Article 19. The following financial conditions are required:

"Reparation for damage done. While such armistice lasts no public securities shall be removed by the enemy which can serve as a pledge to the allies for the recovery or reparation for war losses. Immediate restitution of the cash deposit in the National Bank of Belgium and in general immediate return of all documents, specie, stocks, shares, paper money, together with plans for the issue thereof, touching public or private interests in the invaded countries. Restitution of the Russian and Roumanian gold yielded to Germany or taken by that power. This gold to be delivered in trust to the allies until the signature of peace.

Naval Conditions.

"Article 20. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all German ships. Notification to be given to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marines of the allied and associated powers, all questions of neutrality being waived.

"Article 21. All naval and mercantile marine prisoners of war of the allied and associated powers in German hands to be returned without reciprocity.

"Article 22. Surrender to the allies and the United States of America of 160 German submarines (including all submarine cruisers and mine laying submarines), with their complete armament and equipment in ports which will be specified by the allies and the United States of America. All other submarines to be paid off and completely disarmed and placed under the supervision of the allied powers and the United States of America.

"Article 23. The following German surface warships, which shall be designated by the allies and the United States of America, shall forthwith be disarmed and thereafter interned in neutral ports, or, at the want of them, in allied ports, to be designated by the allies

and the United States of America and placed under the surveillance of the allies and the United States of America, only caretakers being left on board—namely: Six battle cruisers, ten battle ships, eight light cruisers (including two mine layers), fifty destroyers of the most modern type. All other surface warships (including motor craft) are to be concentrated in German naval bases to be designated by the allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the allies and the United States of America. All vessels of the auxiliary fleet (trawlers, motor vessels, etc.) are to be disarmed.

"Article 24. The allies and the United States of America shall have the right to sweep up all mine fields and obstructions laid by Germany outside German territorial waters, and the positions of these are to be indicated.

"Article 25. Freedom of access to and from the Baltic to be given to the naval and mercantile marines of the allied and associated powers. To secure this, the allies and the United States of America shall be empowered to occupy all German forts, fortifications, batteries, and defense works of all kinds in all the entrances from the Cattegat into the Baltic, and to sweep up all mines and obstructions within and without German territorial waters without any question of neutrality being raised, and the positions of all such mines and obstructions are to be indicated.

"Article 26. The existing blockade conditions set up by the allies and associated powers are to remain unchanged, and all German merchant ships found at sea are to remain liable to capture.

"Article 27. All naval aircraft are to be concentrated and immobilized in German bases to be specified by the allies and the United States of America.

"Article 28. In evacuating the Belgian coasts and ports, Germany shall abandon all merchant ships, tugs, lighters, cranes, and all other harbor materials, all materials for inland navigation, all aircraft and all materials and stores, all arms and armaments, and all stores and apparatus of all kinds.

"Article 29. All Black sea ports are to be evacuated by Germany; all Russian war vessels of all descriptions seized by Germany in the Black sea are to be handed over to the allies and the United States of America; all neutral merchant vessels seized are to be released; all warlike and other materials of all kinds seized in those ports are to be returned and German materials as specified in clause 28 are to be abandoned.

"Article 30. All merchant vessels in German hands belonging to the allied and associated powers are to be restored in ports to be specified by the allies and the United States of America without reciprocity.

"Article 31. No destruction of ships or of materials to be permitted before evacuation, surrender or restoration.

"Article 32. The German government will notify the neutral governments of the world, and particularly the governments of Norway, Sweden, Denmark and Holland, that all restrictions placed on the trading of their vessels with the allied and associated countries, whether by the German government or by private German interests, and whether in return for specific concessions, such as the export of shipbuilding materials or not, are immediately canceled.

"Article 33. No transfers of German merchant shipping of any description to any neutral flag are to take place after signature of the armistice.

"Article 34. The duration of the armistice is to be thirty days, with option to extend. During this period, on failure of execution of any of the above clauses, the armistice may be denounced by one of the contracting parties on forty-eight hours' previous notice.

"Article 35. This armistice to be accepted or refused by Germany within seventy-two hours of notification.

War at an End.

"The war thus comes to an end; for, having accepted these terms of armistice, it will be impossible for the German command to renew it.

It is not now possible to assess the consequences of this great consummation. We know only that this tragical war, whose consuming flames swept from one nation to another until all the world was on fire, is at an end and that it was the privilege of our own people to enter it at its most critical juncture in such fashion and in such force as to contribute in a way of which we are all deeply proud to the great result.

"We know, too, that the object of the war is attained; the object upon which all free men had set their hearts, and attained with a sweeping completeness which even now we do not realize.

"Armed imperialism, such as the men conceived who were, but yesterday the masters of Germany, is at an end; its illicit ambitions engulfed in black disaster. Who will now seek to revive it? The arbitrary power of the military caste of Germany, which once could secretly and of its own single choice disturb the peace of the world, is discredited and destroyed.

"And more than that—much more than that—has been accomplished. The great nations which associated themselves to destroy it have now definitely united in the common purpose to set up such a peace as will satisfy the longing of the whole world for disinterested justice, embodied in settlements which are based upon something much better and much more lasting than the selfish competitive interests of powerful states.

"There is no longer conjecture as to the objects the victors have in mind. They have a mind in the matter, not only, but a heart also. Their avowed and concerted purpose is to satisfy and protect the weak as well as to accord their just rights to the strong.

"The humane temper and intention of the victorious governments has already been manifested in a very practical way. Their representatives in the supreme war council at Versailles have by unanimous resolution assured the people of the central empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives; and steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium.

"By the use of the idle tonnage of the central empires it ought presently to be possible to lift the fear of utter misery from their oppressed populations and set their minds and energies free for the great and hazardous tasks of political reconstruction which now face them on every hand. Hunger does not breed reform; it breeds madness and all the ugly distempers that make an ordered life impossible.

"For, with the fall of the ancient governments which rested like an incubus upon the people of the central empires, has come political change not merely, but revolution; and revolution which seems as yet to assume no final and ordered form, but to run from one fluid change to another, until thoughtful men are forced to ask themselves with what governments, and of what sort, are we about to deal in the making of the covenants of peace.

"With what authority will they meet us and with what assurance that their authority will abide and sustain securely the international arrangements into which we are about to enter? There is here matter for no small anxiety and misgiving. When peace is made, upon whose promises and engagements besides our own is it to rest?

"Let us be perfectly frank with ourselves and admit that these questions cannot be satisfactorily answered now or at once. But the moral is not that there is little hope of

an early answer that will suffice. It is only that we must be patient and helpful and mindful above all of the great hope and confidence that lie at the heart of what is taking place.

"Excesses accomplish nothing. Unhappy Russia has furnished abundant recent proof of that. Disorder immediately defeats itself. If excesses should occur, if disorder should for a time raise its head, a sober second thought will follow and a day of constructive action, if we help and do not hinder.

"The present and all that it holds belongs to the nations and the peoples who preserve their self-control and the orderly processes of their governments; the future to those who prove themselves the true friends of mankind.

"To conquer with arms is to make only a temporary conquest; to conquer the world by earning its esteem is to make permanent conquest. I am confident that the nations that have learned the discipline of freedom and that have settled with self-possession to its ordered practice are now about to make conquest of the world by the sheer power of example and of friendly helpfulness.

"The peoples who have but just come out from under the yoke of arbitrary government and who are now coming at last into their freedom will never find the treasures of liberty they are in search of if they look for them by the light of the torch. They will find that every pathway that is stained with the blood of their own brothers leads to the wilderness, not to the seat of their hope.

"They are now face to face with their initial tests. We must hold the light steady until they find themselves. And in the meantime, if it be possible, we must establish a peace that will justly define their place among the nations, remove all fear of their neighbors and of their former masters, and enable them to live in security and contentment when they have set their own affairs in order.

"I for one do not doubt their purpose or their capacity. There are some happy signs that they know and will choose the way of self-control and peaceful accommodation. If they do we shall put our aid at their disposal in every way that we can. If they do not we must await with patience and sympathy the awakening and recovery that will assuredly come at last."

AMENDED BY MARSHAL FOCH.

Before presenting the armistice terms to the German plenipotentiaries Marshal Foch had amended, as he was authorized to do, some of the articles. Following were the changes:

"Article 3. Fifteen days instead of fourteen are allowed for the repatriation, beginning at once, of all the inhabitants removed from invaded countries, including hostages and persons under trial or convicted.

"Article 4, providing for the surrender of munitions and equipment, reduces the number of machine guns to be delivered from 30,000 to 25,000, the number of airplanes from 2,000 to 1,700.

"Article 5, providing for the evacuation by the Germans of the countries on the left bank of the Rhine, stipulates that these countries shall be administered by the local troops of occupation instead of by the local authorities under the control of the allied and United States armies, and the occupation is to be 'carried out by' instead of 'determined by' allied and United States garrisons holding strategic points and the principal crossings of the Rhine. Thirty-one days instead of twenty-five are allowed for completion of the evacuation.

"Article 6, providing that no damage or harm shall be done to persons and property in territory evacuated by the Germans, has a sentence added specifically stipulating that no person shall be prosecuted for offenses of participation in war measures prior to the signing of the armistice.

"Article 7, providing for the abandonment or

delivery in good order to the associated powers of all roads and means of communication and transportation in evacuated territory, calls for 150,000 wagons [railroad cars] instead of 50,000; 5,000 motor lorries instead of 10,000, and requires that all civil and military personnel at present employed on such means of communication and transportation, including waterways, shall remain. Thirty-one instead of twenty-five days are allowed for handing over the materials. Thirty-six days are allowed for the handing over of the railways of Alsace-Lorraine, together with the prewar personnel.

"Article 8. Forty-eight hours is given the German command to reveal destructive measures, such as polluted springs and wells, and to reveal and assist in discovering and destroying mines or delayed action fuses on evacuated territory. No time limit was fixed originally.

"Article 9, providing for the right of requisition by the United States and allied armies in occupied territory, has the clause added, 'subject to regulation of accounts with those whom it may concern.'

"Article 10, providing for the repatriation without reciprocity of all allied and United States prisoners of war, including persons under trial or convicted, has the following added: 'This condition annuls the previous conventions on the subject of the exchange of prisoners of war, including the one of July, 1918, in course of ratification. However, the repatriation of German prisoners of war interned in Holland and in Switzerland shall continue as before. The repatriation of German prisoners of war shall be regulated at the conclusion of the preliminaries of peace.'

"Article 12, providing for the withdrawal of German troops from territory which belonged before the war to Russia, Roumania and Turkey, is rewritten. Territory which belonged to Austria-Hungary is added to that from which the Germans must withdraw immediately, and as to territory which belonged to Russia it is provided that the German troops now there shall withdraw within the frontiers of Germany 'as soon as the allies, taking into account the internal situation of those territories, shall decide that time for this has come.'

"Article 15. 'Renunciation' is substituted for 'abandonment' in stipulating that the treaties of Bukharest and Brest-Litovsk are nullified.

"Article 16, providing free access for the allies into evacuated territory through the German eastern frontier, is changed so as to declare such access is for the purpose of conveying supplies to the populations and for the purpose of maintaining order, instead of 'or for any other purpose.'

"Article 17, originally providing for the 'unconditional capitulation' within one month of all German forces operating in East Africa, is substituted by a clause requiring only evacuation by all German forces operating in East Africa within a period to be fixed by the allies.

"Article 18, providing for the repatriation of all civilians belonging to the allies or associated powers other than those enumerated in article 3, is amended to eliminate a reservation that any future claims or demands by the allies and the United States shall remain unaffected.

"Article 22, providing for the surrender of 160 German submarines, is changed to read 'all submarines now existing,' with the added stipulation that 'those which cannot take the sea shall be disarmed of the material and personnel and shall remain under the supervision of the allies and the United States.' Further provisions are added requiring that all the conditions of the article shall be carried into effect within fourteen days; that submarines ready for sea shall be prepared to leave German ports immediately upon orders by wireless and the remainder at the earliest possible moment.

"Article 23, providing for the disposition of

German surface warships, has additional clauses requiring that vessels designated for internment shall be ready to leave German ports within seven days upon directions by wireless and that the military armament of all vessels of the auxiliary fleet shall be put on shore.

"Article 26, providing that the allied blockade remain unchanged, has this sentence added: 'The allies and the United States should give consideration to the provisioning of Germany during the armistice to the extent recognized as necessary.'

"Article 28, providing conditions of evacuation of the Belgian coast (from which the Germans actually had been driven before the armistice was signed), was changed in minor particulars.

"Article 34, providing that the duration of the armistice shall be thirty days and that if its clauses are not carried into execution it may be renounced upon forty-eight hours' warning, has the following added: 'It is understood that the execution of articles 3 and 18 shall not warrant the denunciation of the armistice on the ground of insufficient execution within a period fixed, except in the case of bad faith in carrying them into execution. In order to assure the execution of this convention under the best conditions, the principle of a permanent international armistice commission is admitted. This commission shall act under the authority of the allied military and naval commanders in chief.'

Signatures.

The additions and changes closed with this: 'This armistice has been signed the 11th of November, 1918, at 5 o'clock [French time]. F. Foch, R. E. Wemyss, Erzberger, A. Oberndorff, Winterfeldt, Vanselow.'

Asks Early Conference.

Immediately after the signing of the armistice terms Dr. Solf, the German foreign secretary, sent the following appeal to the American secretary of state, Robert Lansing:

'The armistice being concluded, the German government requests the president of the United States to arrange for the opening of peace negotiations.

'For the purpose of their acceleration the German government proposes first of all to take into view the conclusion of a preliminary peace and asks for a communication as to what place and at what time the negotiations might begin.

'As there is a pressing danger of famine, the German government is particularly anxious for the negotiations to begin immediately.'

President Promises Food.

To the foregoing appeal Secretary Lansing returned the following reply through the Swiss legation, Nov. 14:

'I have the honor to acknowledge the receipt of your note of to-day, transmitting to the president the text of a cable inquiring whether this government is ready to send food stuffs into Germany without delay if public order is maintained in Germany and an equitable distribution of food is guaranteed.

'I should be grateful if you would transmit the following reply to the German government:

'At a joint session of the two houses of congress on Nov. 11 the president of the United States announced that the representatives of the associated governments in the supreme war council at Versailles have, by unanimous resolution, assured the peoples of the central empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives; and that steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium.

'Furthermore, the president expressed the opinion that, by the use of the idle tonnage of the central empires, it ought presently to

be possible to lift the fear of utter misery from their oppressed population and set their minds and energies free for the great and hazardous tasks of political reconstruction which now face them on every hand.

"Accordingly, the president now directs me to state that he is ready to consider favorably the supplying of foodstuffs to Germany and to take up the matter immediately with

the allied governments, provided he can be assured that public order is being and will continue to be maintained in Germany, and that an equitable distribution of food can be clearly guaranteed.

"Accept, sir, the renewed assurances of my highest consideration."
"ROBERT LANSING."

DEVELOPMENTS IN RUSSIA.

When on Nov. 7, 1917, the control of Russian affairs passed from the hands of Alexander Kerensky and the more moderate of the revolutionists into those of the bolsheviks and Leon Trotsky, it was announced that the new government would propose an immediate and just peace without annexations and without indemnities. On Nov. 22 Leon Trotsky, "commissioner" of foreign affairs, notified the representatives of foreign governments that an armistice would be sought on all fronts. It had, as a matter of fact, been proposed to the central powers before the representatives of the allies were notified. The allied diplomats protested, but were told that their action was offensive to the government. Negotiations for an armistice were opened Dec. 1 between representatives of Russia, Germany, Austria-Hungary, Turkey and Bulgaria at the headquarters of the German commander in Brest-Litovsk. On Dec. 5 a ten days' suspension of hostilities was agreed to, and on Dec. 16 a formal armistice agreement was signed, to continue from Dec. 17, 1917, to Jan. 14, 1918. The armistice could be terminated by giving a seven days' notice on the twenty-first day, and if such notice was not given it would continue in force automatically. It further provided that there was to be no regrouping of forces for further offensives.

The peace negotiations proper were begun on Saturday, Dec. 22, 1917, and were continued with some interruptions until Feb. 10, 1918. The delegates representing the various powers taking part were:

Germany—Dr. Richard von Kuehlmann, minister of foreign affairs; Herr von Rosenberg, Baron von Hock, Gen. Hoffmann and Maj. Brinckmann.

Austria-Hungary—Count Ottokar Czernin, minister of foreign affairs; Baron von Mercy, Freiherr von Wisser, Count Collerda, Count Osaky, Field Marshal von Chisseries, Lieut. Plany and Maj. von Gluise.

Bulgaria—M. Popoff, minister of justice; M. Coseff, M. Stoyanovich, Col. Gantjeff and Dr. Anastasoff.

Turkey—Nesim Bey, former minister of foreign affairs; Hakki Pasha, Hekmit Bey and Gen. Zekki Pasha.

Russia—M. Joffe, M. Kamenoff, Admirals: Altwater, Gen. Tumorri, Col. Rokki, Col. Zenlett and Capt. Lipsky.

The delegations underwent some changes in the course of the negotiations, Leon Trotsky himself appearing for Russia, M. Radoslavoff for Bulgaria and Talaat Pasha for Turkey. Bavaria was represented by Count Podewils-Durnitz, and the Ukraine by M. Bolubowsch. Prince Leopold of Bavaria, as commander in chief of the German forces in the east, welcomed the delegates. The conference was opened by Hakki Pasha and Dr. von Kuehlmann was chosen as presiding officer. Russia presented fifteen demands as her terms for making peace. These were:

1. Evacuation of Russian territory occupied by Germany, with autonomy for Poland, Lithuania and the Lettish district.

2. Autonomy for Turkish Armenia.

3. Settlement of Alsace-Lorraine question by plebiscite.

4. Restoration of Belgium, with indemnity from an international fund.

5. Restoration of Serbia and Montenegro with similar indemnity.

6. Contested Balkan territories to be autonomous pending plebiscite.

7. Restoration of Rumanian territory; Dobrogea to be autonomous.

8. Trent and Trieste to be autonomous pending plebiscite.

9. Restoration of German colonies.

10. Restoration of Persia and Greece.

11. Neutralization of all maritime straits and of Suez and Panama canals.

12. Renunciation of indemnities; restitution of levies.

13. Renunciation of commercial boycotts.

14. Peace to be arranged by delegates, without secret treaties.

15. Gradual disarmament, militia to take place of standing armies.

TEUTONIC PROPOSALS.

On Dec. 25 Count Czernin, on behalf of the Teutonic alliance, presented counterproposals, substantially as follows:

1. Germany will be ready as soon as peace is concluded with Russia and the Russian armies are demobilized, to evacuate her present positions in occupied Russian territory, in so far as no different inferences result from the second article.

2. The Russian government having proclaimed to all peoples living within the Russian nation the right of self-determination, including complete reparation, takes cognizance of the decisions expressing the will of the people demanding a full state of independence and separation from the Russian nation for Poland, Lithuania, Courland and portions of Esthonia and Livonia. As in these districts the question of evacuation is not such as provided for in article 1, a special commission shall fix the time and other details in conformity with the Russian idea of the necessary ratification by a plebiscite on broad lines and without any military pressure of the already existing proclamation of separation.

3. Treaties in force before the war to become effective if not in conflict with changes resulting from the war.

4. None of the contracting parties to discriminate against the subjects, merchant ships or goods of the other parties.

5. Economic war to cease with the conclusion of peace. For the interchange of goods an organization shall be effected by mixed commissions to be formed as soon as possible.

6. Instead of the treaty of commerce and navigation of 1894-1904, which is abrogated, a new treaty will accord with new conditions.

7. During at least twenty years the parties will grant one another the rights of the most favored nation in commerce and navigation.

8. Russia agrees that the administration of the mouth of the Danube shall be entrusted to a European Danube commission representing the countries bordering on the Danube and the Black sea. Above Braila the administration is to be in the hands of the countries bordering on the river.

9. Military laws limiting the private rights of Germans in Russia and of Russians in Germany are abolished.

10. The contracting parties are not to demand payment of war expenditures, damages or requisitions.

11. Each party is to pay for damage done within its own limits by acts against international law.

12. Prisoners of war to be exchanged as soon as possible.

13. Interned civilians to be sent home at once without expense to them.

14. Russian subjects of German descent may within ten years emigrate to Germany with the right to liquidate or transfer their property.

15. Merchantmen in ports at beginning of war to be returned or paid for.

16. Diplomatic and consular relations to be resumed as soon as possible.

GERMAN TERMS REJECTED.

The foregoing terms were submitted by the Russian delegates to the soviet council of workmen and soldiers in Petrograd. That body in an announcement made public Jan. 2, 1918, declared that the Teutonic terms recognized in principle the conclusion of a peace without annexation or indemnities and thus established a basis for further parleying. However, attention was called to the fact that the German government refused to admit the right of oppressed nations and colonies seized before the beginning of the war in 1914 to dispose of their own destiny, and also to the fact that the Teutonic governments refused to guarantee immediately and irrevocably the removal of their troops from the occupied countries of Poland, Lithuania and Courland and parts of Livonia and Estonia. "We now declare," continued the statement, "that the Russian revolution remains faithful to the policy of internationalism. We defend the right of Poland, Lithuania and Courland to dispose of their own destiny actually and freely."

The chairman of the Russian delegation sent an official telegram to the Teutonic allies Jan. 2 requesting that the negotiations be transferred to neutral soil, preferably to Stockholm. This request was immediately denied by the German government. At a subsequent session the central powers withdrew the proposals they had presented Dec. 25 on the ground that the allies had refused to consider them within the ten days fixed as the limit.

On Jan. 10, 1918, after a hitch caused by the refusal of the central powers to evacuate the occupied Russian provinces, the negotiations were resumed with Minister Trotzky, Mme. Bithenko, M. Joffe, M. Kameneff, M. Pokrovsky and three councilors representing Russia, and Dr. von Kuchmann, Count Czernin, Gen. Hoffmann, Talaat Bey and M. Kadoslawoff representing the central powers. The Ukraine was represented by M. Bolubowsch, who announced that he was empowered by his country to act independently of the Russian delegates. The second session did not last long. The discussions became acrimonious, especially in dealing with bolshevik propaganda in Germany and Austria, the question of the return of deported Poles, Lithuanians and others before the matter of self-determination by the occupied provinces was settled, and the attitude of the Teutons on annexations. Gen. Hoffmann, who told the Russians that they spoke "as if they stood victorious in our countries and could dictate conditions," bluntly announced that the German supreme army command must refuse to evacuate Courland, Lithuania, Riga and the Moon Islands. The conference broke up Jan. 14 without a date being set for its renewal. However, the delegates remained in Brest-Litovsk, Trotzky insisting that the negotiations should continue although even at this time Lenin and his followers in Petrograd argued that it would be better to end the conference and prepare for a renewal of the war.

In the meantime the central powers and the representatives of the Ukrainian "people's republic" continued their negotiations, and on Jan. 21 it was announced that they had agreed on the principles of a separate peace treaty by which economic and diplomatic relations

were to be instituted at once. The peace treaty was signed Feb. 9.

Leon Trotzky and the other Russian delegates asked for delay so as to give them time to submit the German terms to a general congress of soldiers' and workmen's delegates in Petrograd, and this request was granted. This congress gave Trotzky authority to continue the Brest-Litovsk negotiations with a free hand. He returned to Brest-Litovsk Jan. 29, but little was heard of the parley there until suddenly it was announced in a dispatch dated Sunday, Feb. 10, that Russia had declared the state of war to be at an end. The dispatch read:

"The president of the Russian delegation at to-day's sitting states that, while Russia was desisting from signing a formal peace treaty, it declared the state of war to be end'd with Germany, Austria-Hungary, Turkey and Bulgaria, simultaneously giving orders for the complete demobilization of the Russian forces on all fronts."

This announcement caused an outburst of joy in Germany and Austria-Hungary where it was interpreted by many to mean that a general peace with all the allies would be signed. It was not until some days later that it was discovered that the rejoicing had been somewhat premature.

On Feb. 12 the Russian official wireless bureau gave out the appended statement as to the reasons for Trotzky's action in declaring the war at an end without the signing of a peace pact:

"The peace negotiations are at an end. The German capitalists, bankers and landlords, supported by the silent co-operation of the English and French bourgeoisie, submitted to our comrades, members of the peace delegation at Brest-Litovsk, conditions such as could not be subscribed to by the Russian revolution."

"The governments of Germany and Austria possess countries and peoples vanquished by force of arms. To this authority the Russian people, workmen and peasants could not give its acquiescence. We could not sign a peace which would bring with it sadness, oppression and suffering to millions of workmen and peasants."

"But we also cannot, will not, and must not continue a war begun by czars and capitalists, in alliance with czars and capitalists. We will not and must not continue to be at war with Germans and Austrians—workmen and peasants like ourselves."

"We are not signing a peace of landlords and capitalists. Let the German and Austrian soldiers know who are placing them in the field of battle and let them know for what they are struggling. Let them know also that we refuse to fight against them."

"Our delegation, fully conscious of its responsibility before the Russian people and the oppressed workers and peasants of other countries, declared on Feb. 10, in the name of the council of the people's commissaires of the government of the federal Russian republic to the governments of the peoples involved in the war with us and of the neutral countries, that it refused to sign an annexation treaty. Russia, for its part, declares the present war with Germany and Austria-Hungary, Turkey, and Bulgaria at an end."

"Simultaneously, the Russian troops received an order for complete demobilization on all fronts."

GERMANY ACTS QUICKLY.

This sort of conclusion to the peace parley, which placed Germany in a ridiculous position, did not suit Emperor William and his advisers and measures were at once taken to bring the bolshevik government to terms. Military operations were resumed and on Feb. 18, it was announced that the Germans had crossed the Dvina river. The city of Dvinsk was captured without resistance, while

farther south an army under Gen. Alexander von Linsingen captured Lutsk. In the meantime the bolsheviks had become involved in fighting with the Roumanian forces and also with the troops of the People's republic of the Ukraine. The country was virtually in a state of civil war. On Feb. 21, after the bolsheviks had announced their willingness to conclude peace, Dr. von Kuehlmann announced that Germany would renew the negotiations, but only on the following conditions:

"Both to declare the war ended,

"All regions west of the line indicated at Brest-Litovsk to the Russian delegation, which formerly belonged to Russia, to be no longer under the territorial protection of Russia. In the region of Dvinsk this line must be advanced to the eastern frontier of Courland.

"The former attachment of these regions to the Russian state must in no case involve for them obligations toward Russia. Russia renounces every claim to intervene in the internal affairs of these regions.

"Germany and Austria-Hungary have the intention to define further the fate of these regions in agreement with their populations.

"Germany is ready, after the completion of Russian demobilization to evacuate the regions which are east of the above line. So far as it is not stated otherwise, Livonia and Esthonia must immediately be cleared of Russian troops and red guards.

"Livonia and Esthonia will be occupied by German police until the date when the constitution of the respective countries shall guarantee their social security and political order. All inhabitants who were arrested for political reasons must be released immediately.

"Russia will conclude peace with the Ukrainian People's republic. Ukraine and Finland will be immediately evacuated by Russian troops and red guards.

"Russia will do all in its power to secure for Turkey the orderly return of its Anatolian frontiers. Russia recognizes the annulment of the Turkish capitulation.

"The complete demobilization of the Russian army, inclusive of the detachments newly formed by the present government, must be carried out immediately.

"Russian warships in the Black sea, the Baltic sea, and the Arctic ocean must immediately either be sent to Russian harbors and kept there until the conclusion of peace or be disarmed. Warships of the entente which are in the sphere of Russian authority must be regarded as Russian ships.

"Merchant navigation of the Black sea and Baltic sea must be renewed, as stated in the armistice treaty. The clearing away of mines is to begin immediately. The blockade of the Arctic ocean is to remain in force until the conclusion of a general peace.

"The Russo-German commercial treaty of 1914 must be enforced again. In addition, there must be a guaranty for the free export without tariff of ores and the immediate commencement of negotiations for the conclusion of a new commercial treaty, with a guaranty of the most favored nation treatment, at least until 1925, even in the case of the termination of the provisorium, and finally, the sanction of all clauses corresponding to paragraph 11 of clauses 3, 4 and 15 of the Ukraine peace treaty.

"Legal and political relations are to be regulated in accordance with the decision of the first version of the German-Russian convention. So far as action on that decision has not yet been taken, especially with respect to indemnities for civil damages, this must be in accordance with the German proposal. And there must be indemnification with expenses for war prisoners, in accordance with the Russian proposal.

"Russia will permit and support so far as she can German commissions for war prisoners, civil prisoners and war refugees.

"Russia promises to put an end to every

propaganda and agitation, either on the part of the government or on the part of persons supported by the government, against members of the quadruple alliance and their political and military institutions, even in localities occupied by the central powers.

"The above conditions must be accepted within forty-eight hours. The Russian plenipotentiaries must start immediately for Brest-Litovsk and sign at that place within three days a peace treaty which must be ratified within two weeks."

While Dr. von Kuehlmann was laying down these terms to the bolshevik chiefs the Germans were steadily pressing toward the east on a wide front, carrying everything before them and reaping a rich harvest of guns and other war booty. Only here and there did the red guards offer a little resistance; practically the Teuton advance was unopposed. Minsk, Rovno, Reval, Pskov and other important places quickly fell into the hands of the Germans. They approached to within less than 100 miles of Petrograd and caused a general exodus of officials and civilians from that city. On Feb. 24 a new peace delegation left Petrograd for Brest-Litovsk. It consisted of M. Karakhan, M. Zinovieff, M. Alexieff and M. Sokolokoff. After a few sittings, over which Minister von Rosenberg, assistant to Dr. von Kuehlmann, presided, the peace conference ended March 3, when the Russian delegates agreed to the German terms and signed the political treaty, fearing that if they delayed further other and more onerous conditions would be added.

RUSSIAN PEACE TREATY.

Following are the articles of the treaty of peace signed by the bolshevik government of Russia and the representatives of the central powers:

1. The central powers and Russia declare the state of war between them to be terminated, and are resolved henceforth to live in peace and friendship with one another.

2. The contracting nations will refrain from all agitation or provocation against other signatory governments, and undertake to spare the populations of the regions occupied by the powers of the quadruple entente.

3. The regions lying west of the line agreed upon by the contracting parties and formerly belonging to Russia, shall no longer be under Russian sovereignty. It is agreed that the line appears from the appended map, No. 1, which, as agreed upon, forms an essential part of the peace treaty. The fixing of the line in the west will be settled by the German-Russian mixed commission. The regions in question will have no obligation whatever toward Russia arising from their former relations thereto. Russia undertakes to refrain from all interference in the internal affairs of these territories and to let Germany and Austria determine the future fate of these territories in agreement with their populations.

4. Germany and Austria agree, when a general peace is concluded and Russian demobilization is fully completed, to evacuate the regions east of the line designated in article 3. No. 1, in so far as article 6 does not stipulate otherwise. Russia will do everything in her power to complete as soon as possible the evacuation of the Anatolian provinces and their orderly return to Turkey. The districts of Erivan, Kars and Batum will likewise without delay be evacuated by Russian troops. Russia will not interfere in the reorganization of the constitutional or international conditions of these districts, but leave it to the populations of the districts to carry out the reorganization, in agreement with the neighboring states, particularly Turkey.

5. Russia will without delay carry out the complete demobilization of her army, including the forces newly formed by the present government. Russia will further transfer her warships to Russian harbors and leave them

there until a general peace or immediately disarm. Warships of states continuing in a state of war with the quadruple alliance will be treated as Russian warships in so far as they are within Russian control.

The barred zone in the Arctic continues in force until the conclusion of peace. An immediate beginning will be made of the removal of mines in the Baltic and in so far as Russian power extends in the Black sea. Commercial shipping is free in these waters and will be resumed immediately. A mixed commission will be appointed to fix further regulations, especially for the announcement of routes, for merchant ships. Shipping routes are to be kept permanently free from floating mines.

6. Russia undertakes immediately to conclude peace with the Ukrainian People's republic and to recognize the peace treaty between this state and the powers of the quadruple alliance. Ukraine territory will be immediately evacuated by the Russian troops and the Russian red guard. Russia will cease all agitation or propaganda against the government or the public institutions of the Ukrainian People's republic.

Estonia and Livonia will likewise be evacuated without delay by the Russian troops and the Russian red guard.

The eastern frontier of Estonia follows in general the line of the Narova river. The eastern frontier of Livonia runs in general through Peipus lake and Pskov lake to the southwesterly corner of the latter; then over Lubahn [Luban] lake in the direction of Lievenhof, on the Dyvna.

Estonia and Livonia will be occupied by a German police force until security is guaranteed by their own national institutions and order in the state is restored. Russia will forthwith release all arrested or deported inhabitants of Estonia and Livonia and guarantee the safe return of deported Estonians and Livonians.

Finland and the Aland islands will also forthwith be evacuated by the Russian troops and the red guard and Finnish ports by the Russian fleet and Russian naval forces.

So long as the ice excludes the bringing of Russian warships to Russian ports, only small detachments will remain behind on the warships. Russia to cease all agitation or propaganda against the government or the public institutions in Finland.

The fortifications erected on the Aland islands are to be removed with all possible dispatch. A special agreement is to be made between Germany, Russia, Finland, and Sweden regarding the permanent nonfortification of these islands as well as regarding their treatment in military, shipping, and technical respects. It is agreed that at Germany's desire the other states bordering on the Baltic are also to be given a voice in the matter.

7. Starting from the fact that Persia and Afghanistan are free and independent states, the contracting parties undertake to respect their political and economic independence and territorial integrity.

8. Prisoners of war on both sides will be sent home.

9. The contracting parties mutually renounce indemnification of war costs—that is to say, state expenditures for carrying on the war, as well as indemnification for war damages—that is to say, those damages which have arisen from them and their subjects in the war regions through military measures, inclusive of all requisitions undertaken in the enemy country.

10. Diplomatic and consular relations between the contracting parties will be resumed immediately after the ratification of the peace treaty. Special agreements are reserved relative to the admittance of the respective consuls.

11. The prescriptions contained in Appendices 2 to 5 shall govern the economic rela-

tions between the powers of the quadruple alliance and Russia—namely appendix 2 for German-Russian, appendix 3 for Austro-Hungarian-Russian, appendix 4 for Bulgarian-Russian, and appendix 5 for Turkish-Russian relations.

12. The restoration of public and private relations, the exchange of prisoners of war, interned civilians, the amnesty question, as well as the treatment of merchant ships which are in enemy hands, will be regulated by separate treaties with Russia, which shall form an essential part of the present peace treaty, and as far as is feasible shall enter into force at the same time.

13. For the interpretation of this treaty the German and Russian text is authoritative for the relations between Germany and Russia; for the relations between Austria-Hungary and Russia, the German, Hungarian and Russian text; for the relations between Bulgaria and Russia, the Bulgarian-Russian text; for the relations between Turkey and Russia, the Turkish and Russian text.

14. The present peace treaty will be ratified. Instruments of ratification must be exchanged as soon as possible in Berlin. The Russian government undertakes at the desire of one of the quadruple alliance to exchange ratifications within two weeks. The peace treaty enters into force on its ratification, in so far as its articles, appendices, or supplementary treaties do not prescribe otherwise.

WILSON MESSAGE TO SOVIETS.

The treaty was referred by the Russian authorities to a congress of soviets held in Moscow March 14-16, and was ratified by that body by a vote of 704 to 261. Three days before the opening of the congress President Wilson sent the following message, which was read when the members had assembled:

"May I not take advantage of the meeting of the congress of the soviets to express the sincere sympathy which the people of the United States feel for the Russian people at this moment when the German power has been thrust in to interrupt and turn back the whole struggle for freedom and substitute the wishes of Germany for the purpose of the people of Russia?"

"Although the government of the United States is unhappily not now in a position to render the direct and effective aid it would wish to render, I beg to assure the people of Russia, through the congress, that it will avail itself of every opportunity to secure for Russia once more complete sovereignty and independence in her own affairs and full restoration to her great role in the life of Europe and the modern world.

"The whole heart of the people of the United States is with the people of Russia in the attempt to free themselves forever from autocratic government and become the masters of their own life."

RESPONSE FROM THE CONGRESS.

President Wilson's message was received with apparent sympathy when it was read and the following response was made:

"The all-Russian congress of soviets expresses its appreciation to the American people and first of all the laboring and exploited classes in the United States for the message sent by President Wilson to the congress of soviets at this time when the Russian socialist soviet republic is living through most difficult trials.

"The Russian republic uses the occasion of the message from President Wilson to express to all people, who are dying and suffering from the horrors of this imperialistic war, its warm sympathy and firm conviction that the happy time is near when the laboring masses in all bourgeois countries will throw off the capitalist yoke and establish a socialist state of society, which is the only one capable of assuring a permanent and just peace, as well as the culture and well being of all who toil."

ALLIES DENOUNCE RUSSIAN PEACE.

The following statement was issued through the foreign office in London March 18, 1918, at the close of a two days' conference of the allies' supreme war council, in which Gen. Bliss and Vice-Admiral Sims represented the United States:

"The prime ministers and foreign ministers of the entente assembled in London feel it to be their bounden duty to take note of the political crimes which under the name of a German peace have been committed against the Russian people.

"Russia was warned. Forgetting that for four years Germany had been fighting against the independence of nations and the rights of mankind, the Russian government, in a mood of singular credulity, expected to obtain by persuasion that 'democratic peace' which it had failed to obtain by war.

"The results were that the intermediate armistice had not expired before the German command, though pledged not to alter the disposition of its troops, transferred them en masse to the western front, and so weak did Russia find herself that she dared to raise no protest against this flagrant violation of Germany's pledged word.

"What followed was of like character, when 'the German peace' was translated into action. It was found to involve the invasion of Russian territory, the destruction or capture of all Russia's means of defense and the organization of Russian lands for Germany's profit, a proceeding which did not differ from 'annexation' because the word itself was carefully avoided.

"Meanwhile, those very Russians who had made military operations impossible found diplomacy impotent. Their representatives were compelled to proclaim that, while they refused to read the treaty presented to them, they had no choice but to sign it; so they signed it, not knowing whether in its true significance it meant peace or war, nor measuring the degree to which Russian national life was reduced by it to a shadow.

"For us of the entente governments the judgment which the free peoples of the world will pass on these transactions would never be in doubt. Why waste time over German pledges when we see that at no period in her history of conquest—not when she overran Silesia nor when she partitioned Poland—had she exhibited herself so cynically as a destroyer of national independence, the implacable enemy of the rights of man and the dignity of civilized nations?

"Poland, whose heroic spirit has survived the most cruel of national tragedies, is threatened with a fourth partition, and, to aggravate her wrongs, devices by which the last trace of her independence is to be crushed are based on fraudulent promises of freedom.

"What is true of Russia and Poland is no less true of Roumania, overwhelmed like them in a flood of merciless passion for domination.

"Peace is loudly advertised, but under the disguise of verbal professions lurk the brutal realities of war and the untempered rule of a lawless force.

"Peace treaties such as these we do not and cannot acknowledge. Our own ends are very different. We are fighting, and mean to continue fighting, in order to finish once for all with this policy of plunder and to establish in its place the peaceful reign of organized justice.

"As incidents of this long war unroll themselves before our eyes, more and more clearly do we perceive that the battles for freedom are everywhere interdependent; that no separate enumeration of them is needed, and that in every case the single but all sufficient appeal is to justice and right.

"Are justice and right going to win?
 "In so far as the issue depends on battles yet to come, the nations whose fate is in the balance may surely put their trust in the armies which, even under conditions more difficult than the present, have shown themselves more than equal, to the great cause entrusted to their valor."

COST OF GERMAN PEACE TO RUSSIA.

It was announced by the commissaire of commerce in Petrograd April 19 that, under the terms of the peace treaty with the central powers Russia had lost more than 200,000 square miles of territory, one-third of her total railway mileage, 73 per cent of the total iron production, 89 per cent of the coal production, 268 sugar refineries, 918 textile factories, 374 breweries, 133 tobacco factories, 1,685 distilleries, 244 chemical factories, 615 paper mills, 1,073 machine factories and 1,800 sawmills.

DISORDER REIGNS IN RUSSIA.

The peace treaty with the Germanic powers was obnoxious to all factions in Russia, but the bolshevists were bound to see it carried into effect and tried to do so. There was strong opposition in the Caucasus, in Siberia and many other parts of the former empire. Fighting occurred in the Ukraine and in Siberia in March, the antifolshevist forces in Siberia being led by Gen. Semenov, with a small force of Cossacks.

German troops landed in Finland on Feb. 21, and on March 1 a treaty was signed providing for the evacuation of Finland by the Russians. The Aland islands were seized by the Germans March 3. On March 7 it was announced that a treaty of peace had been signed between Finland and Germany.

Leon Trotzky asked for ten American officers to aid in raising a new volunteer army and also asked for help in the reorganization of the railway system. Under the circumstances the request could not be complied with. The Transcaucasian constituent assembly on March 21 refused to ratify the peace treaty with Germany. The Armenians and Georgians also refused to recognize the cession of territory made under the Brest-Litovsk treaty. On April 9 the province of Kazan proclaimed an independent republic by the congress of peasants in that region.

Finding themselves unsafe in Moscow, which had been made the capital of the bolshevist government, the diplomatic representatives of most of the allied and neutral nations left the country. Some of them only went as far as Volodga, 300 miles northeast of Moscow, late in March. The American ambassador, Mr. Francis, went with them. Later they went to Archangel.

JAPAN AND BRITAIN ACT.

Owing to the menacing condition of things in Siberia, and especially the presence there of numerous German and Austrian prisoners, who were aiding the bolshevists, it was felt that allied interests in the far east were in grave danger. Japan and Britain early considered the matter of intervention, though it was regarded as a delicate matter, as Russian friendship was desired. Nothing was done until some Japanese subjects were killed in Vladivostok and allied property was endangered on account of the prevalence of looting and general anarchy. Then on April 5 two companies of Japanese marines and fifty armed British sailors were landed in Vladivostok. Some American marines were also landed. On April 11 the consular corps in the city announced that the landing had become necessary on account of the anarchy in the port and that the troops would be withdrawn as soon as order was restored. M. Tchicherin, the bolshevist commissaire for foreign affairs, protested vigorously against the landing, even threatening to declare war, but he took no other action.

The situation both in Siberia and in the Murmansk region in northern Russia continued disquieting not only to Japan but to the allies and the United States. It was recognized that Japan and the United States were in the best position to take action, especially in Siberia, and it was finally decided, after many exchanges of views, that they should extend aid to Russia in restoring order by sending armed forces to Vladivostok. President Wilson studied the question carefully and after arriving at a decision imparted it to Great

Britain, France, Italy and Japan. These nations approved in principle the line of action proposed.

PRESIDENT WILSON'S PLAN.

On Aug. 3 the president, through Acting Secretary of State Frank L. Polk, issued the following statement:

"In the judgment of the government of the United States—a judgment arrived at after repeated and very searching considerations of the whole situation—military intervention in Russia would be more likely to add to the present sad confusion there than to cure it, and would injure Russia, rather than help her out of her distresses. Such military intervention as has been most frequently proposed, even supposing it to be efficacious in its immediate object of delivering an attack upon Germany from the east, would, in its judgment, be more likely to turn out to be merely a method of making use of Russia than to be a method of serving her. Her people, if they profited by it at all, could not profit by it in time to deliver them from their present desperate difficulties, and their substance would meantime be used to maintain foreign armies, not to reconstitute their own or to feed their own men, women and children. We are bending all our energies now to the purpose, the resolute and confident purpose, of winning on the western front, and it would, in the judgment of the government of the United States, be most unwise to divide or dissipate our forces.

"As the government of the United States sees the present circumstances, therefore, military action is admissible in Russia now only to render such protection and help as is possible to the Czecho-Slovaks against the armed Austrian and German prisoners who are seeking their way out, and to aid any efforts at self-government or self-defense in which the Russians themselves may be willing to accept assistance. Whether from Vladivostok or from Murmansk and Archangel, the only present object for which American troops will be employed will be to guard military stores which may subsequently be needed by Russian forces and to render such aid as may be acceptable to the Russians in the organization of their own self-defense.

"With such objects in view, the government of the United States is now co-operating with the governments of France and Great Britain in the neighborhood of Murmansk and Archangel. The United States and Japan are the only powers which are just now in a position to act in Siberia in sufficient force to accomplish even such modest objects as those that have been outlined. The government of the United States has, therefore, proposed to the government of Japan that each of the two governments send a force of a few thousand men to Vladivostok, with the purpose of operating as a single force in the occupation of Vladivostok and the safeguarding, so far as it may, the country to the rear of the westward moving Czecho-Slovaks, and the Japanese government has consented.

"In taking this action the government of the United States wishes to announce to the people of Russia in the most public and solemn manner that it contemplates no interference with the political sovereignty of Russia, no intervention in her internal affairs—not even in the local affairs of the limited areas which her military forces may be obliged to occupy—and no impairment of her territorial integrity, either now or hereafter, but that what we are about to do has as its single and only object the rendering of such aid as shall be acceptable to the Russian people themselves in their endeavors to regain control of their own affairs, their own territory and their own destiny. The Japanese government, it is understood, will issue a similar assurance.

"These plans and purposes of the government of the United States have been communicated to the governments of Great Britain, France and Italy, and those governments have advised the department of state that they as-

sent to them in principle. No conclusion that the government of the United States has arrived at in this important matter is intended, however, as an effort to restrict the actions or interfere with the independent judgment of the governments with which we are now associated in the war.

"It is also the hope and purpose of the government of the United States to take advantage of the earliest opportunity to send to Siberia a commission of merchants, agricultural experts, labor advisers, Red Cross representatives and agents of the Young Men's Christian association accustomed to organizing the best methods of spreading useful information and rendering educational help of a modest kind in order in some systematic way to relieve the immediate economic necessities of the people there in every way for which an opportunity may open. The execution of this plan will follow and will not be permitted to embarrass the military assistance rendered to the Czecho-Slovaks.

"It is the hope and expectation of the government of the United States that the governments with which it is associated will, wherever necessary or possible, lend their active aid in the execution of these military and economic plans."

STATEMENT FROM JAPAN.

The following declaration was published in the Official Gazette in Tokyo, Japan, Aug. 2:

"The Japanese government, actuated by sentiments of sincere friendship toward the Russian people, have always entertained most sanguine hopes of the speedy re-establishment of order in Russia, and of the healthy, untrammelled development of her national life.

"Abundant proof, however, is now afforded that the central European empires, taking advantage of the defenseless and chaotic condition in which Russia has momentarily been placed, are consolidating their hold on that country and are steadily extending their activities to Russia's eastern possessions. They have persistently interfered with the passage of Czecho-Slovak troops through Siberia. In the forces now opposing these valiant troops, German and Austro-Hungarian prisoners are freely enlisted, and they practically assume a position of command.

"The Czecho-Slovak troops, aspiring to secure a free and independent existence for their race and loyally espousing the common cause of the allies, justly command every sympathy and consideration from the cobelligerents, to whom their destiny is a matter of deep and abiding concern.

"In the presence of the danger to which the Czecho-Slovak troops actually are exposed in Siberia at the hands of the Germans and Austro-Hungarians, the allies have naturally felt themselves unable to view with indifference the untoward course of events, and have been ordered to proceed to Vladivostok.

"The government of the United States, equally sensible of the gravity of the situation, recently approached the Japanese government with proposals for the early dispatch of troops to relieve the pressure weighing upon the Czecho-Slovak forces. The Japanese government, being anxious to fall in with the desire of the American government, has decided to proceed at once to make disposition of suitable forces for the proposed mission, and a certain number of these troops will be sent forthwith to Vladivostok.

"In adopting this course, the Japanese government remains constant in its desire to promote relations of enduring friendship, and it reaffirms its avowed policy of respecting the territorial integrity of Russia and of abstaining from all interference in her internal politics. It further declares that upon the realization of the objects above indicated it will immediately withdraw all Japanese troops from Russian territory and will leave wholly unimpaired the sovereignty of Russia in all its phases, whether political or military."

SIBERIAN EXPEDITIONARY FORCES.

The American troops as well as the Japanese were under the command of Gen. Kikuzo Otani. His chief of staff was Gen. Mitsuye Yui and staff officers, Gen. Toru Takenouchi, Maj.-Gen. Nakashima and Maj.-Gen. Inagaki. On Aug. 7 Gen. March, chief of staff, announced that Maj.-Gen. William S. Graves would be the commanding officer of the American expeditionary force in Siberia. It was also announced that the expedition would be relatively small. The 27th and 31st regular regiments of 1,200 men each and commanded respectively by Col. Henry D. Stryker and Col. Elnore F. Taggart, were the first troops sent, as they were stationed in the Philippines. They began disembarking at Vladivostok on Aug. 15 and were received with enthusiasm by all except the bolshevist elements of the population. About an equal number of Japanese had landed a few days before and were already acting in conjunction with the Czecho-Slovak forces. On the 19th the American troops paraded in Vladivostok. They created a favorable impression on the other allied troops who warmly received them. There was a distinct atmosphere of passive hostility on the part of a majority of the native population, owing to the predominance of the bolshevist element, but there was no open demonstration.

In the vicinity of the Czecho-Slovak headquarters, where friendly Russians had congregated, there were repeated outbursts of cheering, and the women threw flowers and waved American flags. All the allies were represented in the reviewing stand by military officers and naval guards.

The Japanese general, Kikuzo Otani, commander of the entente allied forces in Siberia, took charge of his command on Aug. 19. This fact was announced at general council of the allied commanders. The spirit of fullest co-operation was manifested by the council, the officers assuring Gen. Otani that they were proud to serve under him.

The various elements retained their identity as separate units concerning matters of administration and supply, but were subject to orders from the generalissimo regarding strategy and military operations.

The first fight in which the American troops took part was on the Ussuri river front on Aug. 27, when they and their allies won a victory over the bolshevist forces. Many other skirmishes occurred.

LANDING AT ARCHANGEL.

It was officially announced by Chief of Staff March on Sept. 1, that American troops had landed at Archangel to assist the other allied forces there in the campaign for the re-establishment of order in northern Russia. The route by which these troops were sent was not revealed, but it was assumed that they had started from English camps, where many American soldiers had been undergoing training. A dispatch from Archangel, dated Sept. 4, announced that American troops had arrived safely at Archangel. Many of them could speak the Russian language fluently. Most of the troops were from states where the winters are like those in Russia. Their voyage was quick and tranquil.

The troops saw active service almost immediately, and throughout September, October and November had many engagements with the bolsheviks, being almost invariably successful both in offensive and defensive actions. The fighting along the Dvina river was especially severe, gunboats being used by both sides.

Protection of allied stores sent to the old Russian government from seizure by bolshevist forces was the first motive of the allies' landing on the northern coast. Afterward it was found that it was a good strategic point from which to attack the bolshevist government, with which all of the allies had broken relations.

ASSASSINATIONS IN RUSSIA.

There were many assassinations in Russia in the course of the year. Most of them were

committed by the bolshevist authorities, who were especially eager to put as many of the moderate socialists and well to do persons out of the way as possible. Scores of shootings occurred in Petrograd, Moscow and other places daily. On the other hand, attempts were made on the lives of Lenin and Trotzky repeatedly, the former being seriously wounded on one occasion and having narrow escapes on others. On Aug. 30 in Moscow he was shot by Dora Kaplan, a girl belonging to the social revolutionary party. One of his lungs was penetrated by a bullet and for a time it was thought he would die. He, however, gradually recovered. His assailant was so badly mauled by his sympathizers that she had to be taken to a hospital. Her fate was not made known, but it is presumed that she was executed.

GERMAN AMBASSADOR KILLED.

Count von Mirbach, German ambassador to Russia, was killed by social revolutionaries July 6, 1918, in Moscow. Count Mirbach, Privy Councillor Riesel and Lieut. Mueller were seated with the two Russians at a marble table in the middle of a room in the German embassy. On one side were the Germans and on the other the Russians. All were seated in low leather chairs, which was an advantage for the Russians, as they were thus able to get their weapons ready while their victims, leaning back in their chairs, offered an easy target. During the conversation the Russians began to turn over the pages of their documents as though in search of some missing paper, and the attention of the Germans was thus distracted by this pause. While Count Mirbach and his colleagues imagined that the Russians were examining the documents they had drawn out their weapons under the cover of the table. They then sprang up with revolvers and began firing, one Russian aiming at Count Mirbach, the other at the two other Germans. Count Mirbach was hit in the back of the head. On hearing the shots people hurried in from the neighboring rooms, and the Russians thereupon took to flight, but before jumping out of the window each of them hurled a hand grenade. Only one exploded, the splinters of which hit Count Mirbach, killing him immediately.

The killing was somewhat differently described by Premier Lenin, who telegraphed to M. Toffe, the Russian minister in Berlin, as follows:

"Two unknown men entered the German embassy at 2 o'clock this afternoon, having documents from a special committee. They threw a bomb in Count von Mirbach's office, wounding him so severely that he died.

"Representatives of the government immediately visited the embassy and expressed indignation at the act, which they considered as a political maneuver to provoke trouble. The government is taking every measure to discover the murderers and bring them before a special revolutionary tribunal.

"The measures have been taken to protect the government and citizens. I request the government requests you to express to the German government the Russian government's indignation and convey its sympathy to the family of the late count."

The German government, which at this time was more concerned about events on the western front than with Russian affairs, accepted Lenin's assurances and took no action. Dr. Karl Helfferich was appointed to succeed Count von Mirbach, but he found the perils of Moscow so grave that he quickly returned to Germany. Some 200 social revolutionists were excited for participating in the assassination of Ambassador von Mirbach. Among them were Alexandrovich, Katz-Kamkov and Miss Spiridonova, all noted revolutionary leaders.

ASSASSINATION OF VON EICHORN.

Field Marshal von Eichhorn, German commander in the Ukraine, was killed by a bomb thrown by a socialist in the streets of Kiev.

July 30, 1918. The bomb was thrown from a passing cab while the commander was driving to his headquarters from the Casino, by a 23 year old social revolutionist from Moscow named Boris Danskio. Danskio, captured, admitted that the central committee of the social revolutionists of the left in Moscow provided him with a revolver, a bomb and money.

A Berlin official dispatch regarding the field marshal's death said that after he had received severe wounds on the left side heart trouble set in, and the means applied to strengthen the heart gave only temporary relief. Capt. von Dressler, his adjutant, it was announced, died from loss of blood.

From the very beginning Von Eichhorn treated the Ukrainians as slaves whose only reason for living was to see that Germany obtained enough food from the land. His first measure was to force the peasants under the most severe penalties to cultivate the land for the Germans' benefit. His last was to fix a price for corn which would enable the Germans to obtain bread more cheaply but which would absolutely ruin the Ukraine peasants and landlords.

The climax was reached when he had two popular members of the first Ukraine government arrested and sentenced to various terms of imprisonment on charges of plotting against Germany. German journalists who traveled through the Ukraine returned to Berlin warning that the Germans were more hated there than anywhere in the world.

Boris Danskio, the assassin, was executed, according to advices from Kiev. The sentence was pronounced by a German military court.

NICHOLAS II. SHOT BY BOLSHEVIKI.

The former emperor of Russia, Nicholas II, was summarily executed by the Ural regional council of the bolshevist organization at 5 o'clock on the morning of July 16, 1918, in Ekaterinburg, a town in the government of Perm on the Asiatic side of the Ural mountains. He had been transferred from Tobolsk, Siberia, in May, with his wife, his daughter Marie and a number of former court officials. His other three daughters and his heir, Alexis, remained in Tobolsk. The excuse given for the killing of the former czar was that Ekaterinburg was threatened by the approach of Czecho-Slovak troops and that a counter-revolutionary plot had been discovered, the purpose of which was to remove the prisoner from the authority of the council. The president of this organization, therefore, ordered Nicholas Romanoff shot and the decree was

carried out. It is said that the former monarch's last words were: "Spare my wife and my unhappy, innocent children. May my blood preserve Russia from ruin."

No authentic information as to the fate of the former empress and her children had been made public up to Dec. 1, 1918. It was generally taken for granted that they had also been put to death by the bolsheviks.

BRITISH ATTACHE KILLED.

The British embassy in Petrograd was sacked by bolsheviks on Aug. 31, 1918, and Capt. Cromie, the British attache, who tried to defend it, was murdered and his body barbarously mutilated.

AMERICA CONDEMNS TERRORISM.

In view of the state of terrorism inaugurated in Russia by the bolshevist authorities, Robert Lansing, the secretary of state, sent on Sept. 21, 1918, the following telegram to all American ambassadors and ministers in the allied and neutral countries:

"This government is in receipt of information from reliable sources revealing that the peaceable Russian citizens of Moscow, Petrograd and other cities are suffering from an openly avowed campaign of mass terrorism and are subject to wholesale executions. Thousands of persons have been shot without even a form of trial; ill administered prisons are filled beyond capacity and every night scores of Russian citizens are recklessly put to death, and irresponsible bands are venting their brutal passions in the daily massacre of untold innocents."

"In view of the earnest desire of the people of the United States to befriend the Russian people and lend them all possible assistance in their struggle to reconstruct their nation upon principles of democracy and self-government, and acting therefore solely in the interest of the Russian people themselves, this government feels that it cannot be silent or refrain from expressing its horror at this existing state of terrorism. Furthermore it believes that in order successfully to check the further increase of the indiscriminate slaughter of Russian citizens all civilized nations should register their abhorrence of such barbarism."

"You will inquire therefore, whether the government to which you are accredited will be disposed to take some immediate action, which is entirely divorced from the atmosphere of belligerency and the conduct of war, to impress upon the perpetrators of these crimes the aversion with which civilization regards their present wanton acts."

BOLSHEVIKI AND BOLSHEVISM.

In the "War Encyclopedia" issued by the committee on public information in Washington, D. C., "bolsheviki" is defined as a Russian word meaning "belonging to the majority." It was originally applied to the left or radical wing of the Russian socialist democratic party. In 1905, at the time when a split in the party occurred, the radicals, led by Nikolai Lenin, were in the majority or "bolshinsto," and hence called themselves maximalists or bolsheviki, meaning the majority faction. The moderates, similarly, are called minimalists or "mensheviki." The social democratic party is composed mainly of industrial workers. The other socialist party of Russia, the social revolutionary party, is made up chiefly of peasants. In this party also a division occurred into a more or less radical wing, and in the summer of 1917 the more radical faction, finding themselves in agreement with Lenin on all points except the agrarian policy, adopted the name bolsheviki and began to work for the most part in alliance with their radical brethren of the social democratic party against the moderates, or minimalists, of both the old parties.

Source of Bolsheviki Power.

Louis Edgar Browne, staff correspondent of The Chicago Daily News in Russia, sent a

series of illuminating cables to his paper in April, 1918, from which the following extracts are taken. They throw light on the source of the bolshevik power and explain why, in the face of worldwide opposition, they remained in the saddle when all predicted that they would speedily be unseated:

"Three years ago visionaries in the allied nations dreamed that Berlin would fall before the Russian steam roller. To-day the same visionaries, now pessimists, condemn Russia as a quitter among the nations, not seeing in this vast country a future aid in the world war for democracy. The majority of newspaper readers in the allied countries probably suspect or believe that the Russian soviet government sold out to Germany and that the soviet leaders are paid agents of the kaiser. These are equally fatuous ideas.

"False interpretations of facts and rumors that are cabled to the various allied countries regarding the revolution have confused and misled many students of political movements, whose judgment of the situation has been accepted as final. Thus there exists a tendency in the allied countries to abandon Russia as a hopeless liability, such action being excused by frequent reiteration of the theory that the soviet leaders are German agents.

"In the last six months no definite policy toward Russia that might have been adopted by

the allies would have changed Russia from a bad liability to a substantial asset. Now six months' disastrous revolutionary adventure have put a new complexion on the situation.

Aroused by German Duplicity.

"We in Russia who are actually in contact with the soviet government discern the possibility of Russia's again becoming a contributing member of the allies' coalition. We see the soviet government a real power with a firm grip on the internal situation. We see the soviet government furious because of the shameful peace Germany forced upon it. We see the soviet's growing resentment against Germany. We feel the sentiment of the Russian people harden against Germany. We see this resentment crystallizing in Russia's efforts to create a revolutionary army and the hurried evacuation of munitions to depots beyond the Volga in preparation for the expected resumption of German attacks.

"Above all we feel the new revolutionary spirit which was aimed at Germany which spirit is the direct result of the growing conviction of the Russian masses that Germany menaces the existence of free Russia. We realize that the Russian debacle was a catastrophe to the allies and that it prolonged the war. This is ample reason for assisting Russia to recover some of her lost prestige.

Faults of Kerensky Government.

"When the American missions began co-operating with Alexander Kerensky two glaring faults were disclosed in the provisional government.

"First—That government was built on the foundations of the old regime. This meant that the new socialistic order was trying to utilize the bars of bureaucracy.

"Second—The provisional government was utterly unable to organize the country's food supply. Although American investigation proved that Russia had sufficient food to feed herself, the cumbersome routine of the autocracy proved too inflexible to meet the demands of the revolution. Wherever Kerensky turned he found hostility; whatever he tried to do met with passive resistance which was as effective as active opposition.

Bureaucracy Fought Kerensky.

"The allies' military and technical units complained of lack of progress. A member of the American railway mission said: 'We cannot help the Russians if they will not help themselves.' Kerensky's government stirred up the inertia of the old regime, but the machinery was slowing down. The inability of the provisional government to handle the food situation was largely due to the rottenness of the governmental mechanism, and it furnished all of Kerensky's enemies with a common target for attack. Better co-operation was necessary, but the corrupt bureaucracy did not respond to Kerensky's efforts.

"Kerensky's position was made more difficult by the war speculators. The American mission found the food prices entirely disproportionate to the cost of other commodities. Prices of manufactured articles were inflated to ten or a dozen times the normal prices, while the price of food was arbitrarily decreed at thrice its normal value. Result: The peasants refused to exchange foodstuffs for currency because of the distortion of the normal relative values. They preferred to barter grain for a absolutely needed manufactured articles, hoarding their surplus grain.

Shorn of Power by Soviet.

"If Kerensky had actually possessed the power he might have oiled up the old machine and solved the food difficulty. But Kerensky was without power. The soviet had usurped it. Visible at every turn, alternately leading and frustrating the provisional government was the soviet. It was virile and active, although as yet openly unobtrusive. The soviet's power was the direct result of gigantic propaganda that had already won over with timeworn formulas large groups of soldiers and the peasant masses.

"Whenever Kerensky's duma moved it encountered the solid substance of the soviet power. A class invariably resulted and the soviet invariably won. "Then America entered the game. This was in August, 1917.

American Red Cross at Work.

"America sent a Red Cross mission to Russia, which under the force of circumstances erected its office into a political mission. This unofficial effort mitigated the mistake which all the allies made regarding the new Russia. For purposes of war the various allied nations selected as their representatives in Russia men who, through temperament and training, were fitted to work in harmony with the czar's autocratic regime. The revolution came and practically none of these representatives was replaced by a man more in tune with the situation. The old representatives of the allies were as much out of sympathy with the new soviet order as were the supporters of the overthrown autocracy.

"The American Red Cross mission—now almost wholly a political mission—realized that when the czar fell the fundamental bond of Russian life was lost and there existed no common unity of patriotism to hold Russia together. The Russian people lived for the czar and warred for the czar. The ideals of patriotism crystallized in the czar's person. Some new bond was essential. It was necessary to create patriotism or something representing patriotism throughout Russia were scores of groups acting individually, with no apparent desire for cohesion.

Vision of American Mission.

"The American mission believed that attempts to re-establish the old bond were foredoomed to failure, because under it only about 6 per cent of the population had a real stake in the nation, while since the revolution 90 per cent had tasted freedom and ownership. There existed a solid mass of 15,000,000 soldiers against the re-establishment. Thus the Korniloff, Kaledines and Alexieff moves were destined to failure, although this was better realized after a few bitter experiences.

"Russia's need of a new bond suggested to the American mission a definite course of action—namely, amalgamation and continued co-operation of the political and military elements of the new Russia as a preliminary essential; then the inauguration of a vast educational campaign seeking to create a new patriotic unity in an ideal of 'a free Russia, land for the peasants, freeholds and firesides.' Nothing could be done without the coalition of the military and political elements, which had been growing more estranged. Consequently the Korniloff plot was hatched.

Leaf from French Revolution.

"The plan interested the American mission. The Korniloff-Kerensky amalgamation was first to solve the food problem, which furnished the main basis of attack against the Kerensky government, and then co-operate in educating the soldiers and peasants as to Germany's true character. It was hoped that the effort would culminate in the creation of a Russian revolutionary army the counterpart in spirit of the French revolutionary army.

"On Aug. 15, 1917, members of the American Red Cross mission attended a conference, at which Kerensky, Savinkoff, Nekrassoff and Skobeloff discussed with them the details of a coup d'etat to effect an amalgamation of the Korniloff and Kerensky forces. The next day Kerensky, Korniloff and the American mission met in the winter palace and further discussed details of the plan. All urged its speedy execution, as the soviet's attacks because of the food situation and also the soviet's peace campaign were rapidly undermining the positions of both Kerensky and the allies in Russia.

"Kerensky and Korniloff agreed to join forces and co-operate with the United States. They agreed to meet the pressing food difficulty by appointing M. Batolin food dictator. Batolin was the Russian wheat magnate whose wizard-

like foresight and almost superhuman powers of organization enabled him to become probably the largest single human factor in Russia's industrial and commercial life, despite the handicap of his birth in a peasant's hovel.

Hoover Was to Be a Factor.

"The tentative economic agreement between Russia and America proposed that Mr. Hoover and other allied food specialists should be brought into the conference. America was to export to Russia certain foodstuffs in exchange for platinum and other metals, beet seed, flax and hides. Kerensky and Korniloff agreed jointly to sign a proclamation to this effect guaranteeing a permanent food supply to the Russian people and using America's name. They were to conduct a ruthless campaign against speculators, invoking the death penalty, if necessary. Both Kerensky and Korniloff were hopeful. They laid great stress on the necessity of America's co-operation.

"Despite the urgent need of immediate action, the plan hung fire until the American mission, recognizing the soviet's rapidly rising power, advised Korniloff and Kerensky to abandon the plan entirely. Korniloff and Kerensky obstinately refused. Then came their attempt. As a coup d'état a more miserable fiasco was never seen. Everything went wrong. But the failure was no mystery. It was the soviet which, learning of the plot, sprang into activity, showing unsuspected depths of organization.

Soviet's Coup Well Planned.

"Overnight the soviet's power became a factor of equal consideration with that of the provisional government. This was not accidental. It was the culmination of weeks of untiring and skillful leadership. The Kerensky-Korniloff plot and the soviet counterplot popped simultaneously. Kronstadt sailors hurried to Petrograd under the thin pretext of guarding Kerensky. The sailors surrounded the winter palace, virtually held Kerensky a prisoner and forced him to repudiate his pledges to Korniloff. They forced him to sign a decree denouncing Korniloff as a counter-revolutionary. The movement was crushed in twenty-four hours.

"The soviet's maneuvers opened a new phase of the situation which disclosed Kerensky's lack of power. They made plain the fact that Kerensky was running a socialistic government with the machinery of an autocracy and was thus building on a false foundation. A wholly socialistic organization was striving to overthrow both Kerensky and Korniloff. On the one hand Kerensky talked the old world politics and diplomacy of the allies; on the other he shouted the most radical and excited views of the Russian masses. The two things did not mix. The opposition was the soviet conducting revolutionary, socialistic, antiwar propaganda. Its formula, 'peace, land and bread,' was sweet music to the Russian ear, being just what it wanted to hear.

Captivated Army of 15,000,000.

"Kerensky's declaration, 'We will fight until the bitter end,' did not stand a show. Psychologically the arguments of the soviet agitators captivated the Russian masses. The Russian soldiers fought Germany because the czar was ordered. The czar was gone. Where was there reason for fighting any further? Consequently the soviet's formula, 'Peace for the soldiers,' appealed to 15,000,000 soldiers.

"'No annexations and no contributions,' was a formula so often reiterated that it was finally accepted as a beautiful principle. The soldiers said: 'We have our villages on the Volga. There is land enough for all. Why should we take Constantinople? It does not belong to us and we do not want it.'

"The formula 'The land to the peasants,' appealed to the masses. The soviet told the soldiers: 'The revolution gave you land; go and take it.' Ever present in the soldier's mind was the fear that unless he went home he might be overlooked when the land was divided. The soviet made the most of this argument.

"Industries to the Workmen."

"As a corollary to 'The land to the peasants' there was 'The industries to the workmen.' In all the soviet so worked upon the soldiers and the peasant workmen that all of them believed that because the czar was deposed further need of waging the czar's war did not exist and also that the fruits of the revolution should immediately be enjoyed in full.

"Logical western minds found it easy to answer this fallacious reasoning. The masses of western Europe understood that behind the victorious German bayonets lurked the old order for Russia, with its dungeons, its misery and its brutality. They understood that a German victory meant the return of the landed aristocrats, barons and grand dukes. Western Europe was fully conscious of the dreadful German menace to democratic culture. But the simple Russian soldier, nothing but an illiterate Russian peasant clad in khaki, applied primitive, not practical, tests. He reasoned: 'Why should we fight our German brother, who is forced to fight by his kaiser war lord just as the czar forced us to fight? We have overthrown our oppressor. We will tell them how it was done. They will overthrow their kaiser and we will live happily side by side—two great peoples enjoying full freedom.'

American Mission to the Rescue.

"The American mission decided that swift educational work on a larger scale than ever before attempted was necessary to teach the Russian masses the fatuity of this beautiful dream. It was hoped to put an X-ray on Germany and show the Russian masses that if Germany were victorious the new freedom would be displaced by the re-establishment of the old order and also that German victory would restore the newly acquired land to the hands of the nobles. The American mission decided that the old revolutionary group led by Mme. Breshovskaya, 'the grandmother of the revolution,' with Tchaikowsky and Lazereff was the best medium for conducting an educational campaign.

"The plan contemplated thousands of speakers lecturing in the armies and the villages on the subject of the German menace; millions of pamphlets in simple Russian and intelligible to the smallest village scribes; posters, placards and colored cartoons scattered broadcast.

"This educational campaign was to answer the soviet's slogan, 'Peace for the soldier, land to the peasants, factories to the workmen and bread for all.' The soviet was spending millions on its own propaganda. It employed thousands of speakers and issued tons of printed matter.

Plan for Vast Publicity Campaign.

"The American mission asked the American government for \$1,000,000 immediately and \$3,000,000 a month indefinitely for the purpose of combating the soviet propaganda. Previously Elihu Root had recommended \$10,000,000 or publicity.

"Six weeks after the American mission's request Washington sent to Russia a branch of the committee on public information, which proceeded to tell the Russians how many airplanes America was building, how great an army America expected to raise and how America was certain ultimately to win the war. Neither America nor the allies ever made one serious attempt to combat the soviet's peace propaganda and to explain to the Russian people why Germany really menaced their newly won freedom. Seventy per cent of the Russian masses are uneducated, according to western standards. No one ever told the Russian masses about the German menace. How can we expect them to understand it except through experience? It seemed as though the allied representatives were completely oblivious to the growing power of the soviet.

"Meanwhile the soviet's power was strengthening and the soviet formulas undermined the allied influence. Kerensky became weaker and weaker. The allied political and military mis-

sions, except the American Red Cross and political mission, completely misunderstanding the situation, charged Kerensky with ruining the army and misusing the allies' confidence.

Allies' Stiff Note to Kerensky.

"It will be remembered that on the eve of Kerensky's downfall the allied ambassadors, excepting the American ambassador, who had received no instructions, presented Kerensky with a stiff note of protest, amounting almost to an ultimatum, against conditions in Russia. This note is a part of the secret treaty publications. The allies hindered and persecuted Kerensky, whereas an active effort to explain why Germany menaced Russia might have frustrated the narcotic effect of the soviet's formulas.

"Three days before the soviet's coup d'etat was delivered a conference was held. Kerensky met the allied military representatives in the rooms of the American mission. He declared that he commanded the support of four Petrograd regiments, perhaps enough to defeat the soviet forces, but Kerensky refused to remain in power unless he was assured by the allies of full support for the Russian policy which Kerensky himself dictated. He was tired of telling the allies what they insisted on hearing through the mouth of the silver-tongued Terestchenko while he himself was telling the Russian people something quite different.

"Instead of discussing a concrete plan for downing the soviet, the military representatives indulged in a general denunciation of the policy of the provisional government and each painful detail of the Tarnopol and Riga retreats. Kerensky admitted all these charges, but he did not see how he could have changed events.

No Constructive Action Taken.

"Every attempt to reach an understanding resulted in mutual recrimination. The meeting lasted two hours, and despite the urgent pressure of the American mission not a single constructive action was taken. Allied missions favored supporting Kaledines and Alexieff as against Kerensky. They scouted the possibility that the soviet might overthrow the provisional government. Yet this virile soviet organization had swept before it every military unit, village and community into which it penetrated. It had overcome obstacle after obstacle, defeated Korniloff, gained the support of the majority of the bayonets at the front and assumed control of the Baltic and Kronstadt fleets.

"The allied military missions hardly sensed this power. Yet Kerensky reiterated the necessity of the allies' trusting him to deal exclusively with the Russian situation. Kerensky's demand was not answered.

Flight of Kerensky.

"Then came the blow. In five days all was over and Kerensky fled, a hunted fugitive. The allies then faced a new situation. The soviet controlled the government, the rifles and the masses. The soviet's program pledged Russia to the formula of peace. The soviet had what Kerensky never had—power—the reason being that the soviet promised the Russian people just what the Russian people wanted, namely, peace, land and bread. How to utilize this new situation as a factor in winning the world war for the allies became the burning problem of the day.

"When the soviet power seized the Petrograd government in November 1917 the ambassadors from the entente countries were torn between two desires. The stronger was to remain in Russia, wholly ignoring the soviet government and anxiously awaiting its downfall; the weaker was to quit Russia altogether. Not one realized the necessity of utilizing or co-operating with the soviet for the purposes of the world war.

"Among all the allied institutions in Russia only one little group understood the situation—namely, the American Red Cross mission. It realized that the soviet was not then

a positive factor in the struggle against Germany, but it also realized that the soviet was so secure in its position that not even the concentrated efforts of all the other political elements in Russia could seriously threaten the soviet government's hold on Russia.

"This small American unit was then unable to swing the allied policy of the old diplomats sent to Russia. The latter were equipped to negotiate with the czar and could not accommodate themselves to the changed conditions. They failed to understand that the soviet power had come to stay.

Predicted Early End of Soviet.

"Two of the ambassadors told me: 'The soviet is unable to last longer than ten days.' Ten days passed, yet the soviet was secure. After two months the diplomats were still whispering: 'The soviet will last only a couple of weeks more.' The allied diplomatic and military group even attempted to expedite the soviet's downfall.

"The military chief wrote notes to Doukhonin, Alexieff and other leaders of the opposition to the soviet. The allied militarists supported Roumania and the Ukraine, both sold out to Germany. They flirted with the Finnish white guards. France even recognized the white guard government—German soldiers are now fighting side by side with these white guards.

"The little Red Cross group from the United States saw the soviet as an unpleasant but a necessary evil and began to co-operate with it. The Red Cross weathered attack after attack. Diplomats and militarists alike condemned the overtures to the soviet government.

"Now, in the sixth month of the soviet rule, there exists just one lane of approach to the soviet government, and that is through the American Red Cross. The allies appear at this time to be anxious to talk to Lenin and Trotzky. Tentative overtures are made daily. Britain has withdrawn her embassy and substituted as her official representative a young liberal, Lockhart. Though not a diplomat, he recognizes the permanency of the soviet power and the necessity of co-operation with it. Already he has recovered some of the lost ground. He is not entangled with the old regime and consequently the soviet leaders trust him and co-operate with him.

"But it was the American Red Cross that made possible any resumption of negotiations with the soviet. To-day it is the only allied institution in Russia that the soviet really trusts. It is about the only allied institution that since November has not been actively interested in some scheme seeking to accomplish the soviet's downfall.

What the Soviet Is.

"Originally there existed differences between the bolsheviki and the soviet. To-day these terms are practically synonymous. The bolsheviki utilized the soviet organization until they became one with it. In order to grasp what the soviet power in Russia really means one must define 'What is the soviet?'

"The soviet organization extends deep into Russian life. Literally, the soviet means the council of common usage; it means a village council. Thus the modern Russian soviet's origin is the ancient village mir.

Where Soviet Gets Its Power.

"Russia's present official title is 'The Russian Socialistic Federated Republic of Soviets.' The present day Russian soviet government is really only the executive committee of a vast number of local village, town and city soviets in which there exists a real sound democratic idea of majority rule. The village soviets hold local elections and select members to attend the all-Russian congress of soviets. This congress chooses the government. It was such an organization that ratified the Russo-German peace.

"The bolsheviki were extreme socialists. They perfected the organization of a central clear-

ing house for these thousands of soviets. They used this organization to spread their propaganda and go on over to their point of view 95 per cent of the soldiers and 80 per cent of the peasant masses. The soviet program was impossibly radical. It proposed impractical reforms. The bolshevist ideas are the narrow outgrowth of sixty years of forced, secret revolutionary work.

Soviet Is Largely Atheistic.

"We can hardly expect these revolutionists to possess modern ideals, when they saw mostly only the seamy side of the czar's regime. Already a century before the soviet, revolutionary workers became atheists. The soviet is largely atheistic in tendency. The Russian church was so bound up with the czar that the masses say, 'The church belonged to the czar. It was the czar's instrument. We do not trust the czar.'

"But, regardless of their atheism and their fatuous, impossible reasoning, the bolsheviks swept the country completely, coming to dominate the national organization of the village soviets. And in sweeping the country the bolshevik became one with the soviet. The conservative representatives of allied countries reasoned that the bolsheviks, now the soviet leaders, were simply hired agents of Germany. They knew that Lenin came through Germany in a sealed car. They said that Trotzky was notoriously anti-British. They declared that the soviet program was 'made in Berlin.'

"Lenin did come to Russia through Berlin. The bolshevik did perhaps accept money from Germany. They explain that by saying, 'We would accept money from the devil himself in aid of our cause. There exists an old saying that you may give fanatic money, but you cannot buy him. Germany undoubtedly regrets Lenin's passage through Berlin; certainly the Germans regret the money given to the bolshevik propaganda which threatens to boomerang back on Austria. Lenin did not utter a single new word of extreme socialism. He and his associates made use of the most radical ready made arguments available because, knowing the psychology of the Russian masses, they understood that the arguments, 'Peace, land, bread and factory control,' would appeal to 93 per cent of the mass, because the individuals of this mass never before owned even their own souls.

Formula Not Made in Berlin.

"Perhaps Germany crystallized things by urging bolshevik work in Russia, but the bolshevik formula was never made in Berlin. The 'land for the peasants' is a reiteration of the Fourier-Proudhon scheme based on the idea that 'all land belongs to the tillers of the soil,' proposed in France in 1842. 'Control of industries by the workman' is only the Piert program of 1876 and 'Peace for the soldier' is the formula of the international published in the communist manifesto of 1884 which expounded the theory that the autocratic ruling classes made wars to allay discontent at home and also for the purposes of imperialistic exploitation and the acquisition of foreign territories."

PAID AGENTS OF GERMANY.

The committee on public information in Washington, D. C., in September, 1918, printed a long and elaborate report made by Edgar Sisson, the committee's special representative in Russia during the winter of 1917-1918. This was later issued in pamphlet form with the following introduction, which sufficiently explains the character of the report: "The committee on public information publishes herewith a series of communications between the German imperial government and the Russian government and the bolshevist government.

"These documents show that the present heads of the bolshevist government—Lenin and Trotzky and their associates—are German agents.

"They show that the bolshevist revolution was arranged for by the German great general staff and financed by the German Imperial bank and other German financial institutions.

"They show that the treaty of Brest-Litovsk was a betrayal of the Russian people by the German agents. Lenin and Trotzky; that a German picked commander was chosen to 'defend' Petrograd against the Germans; that German officers have been secretly received by the bolshevist government as military advisers, as spies upon the embassies of Russia's allies, as officers in the Russian army and as directors of the bolshevist military, foreign and domestic policy. They show, in short, that the present bolshevist government is not a Russian government at all, but a German government, acting solely in the interests of Germany and betraying the Russian people, as it betrays Russia's natural allies, for the benefit of the imperial German government alone.

Workmen Betrayed.

"And they show also that the bolshevist leaders, for the same German imperial ends, have equally betrayed the working classes of Russia whom they pretend to represent.

"The documents are some seventy in number. Many are originals, annotated by bolshevist officials. The others are photographs of originals, showing annotations. And they corroborate a third set of typewritten circulars, of which only two originals are possessed, but all of which fit perfectly into the whole pattern of German intrigue and German guilt.

"The first document is a photograph of a report made to the bolshevist leaders by two of their assistants, informing them that in accordance with their instructions there had been removed from the archives of the Russian ministry of justice the order of the German Imperial bank 'allowing money to Comrades Lenin, Trotzky and others for the propaganda of peace in Russia,' and that at the same time 'all the books' of a bank in Stockholm had been 'advised' to conceal the payment of money to Lenin, Trotzky and their associates by order of the German Imperial bank. "This report is indorsed by Lenin, with his initials, for deposit in 'the secret department' of the bolshevist files. And the authenticity of the report is supported by document No. 2, which is the original of a report sent by a German general staff representative to the bolshevist leaders, warning them that he has just arrested an agent who had in his possession the original order of the German Imperial bank referred to in document No. 1 and pointing out that evidently at the proper time steps were not taken to destroy the above mentioned documents."

"Document No. 3 is the original protocol signed by several bolshevist leaders and dated Nov. 2, 1917, showing that 'on instructions of the representatives of the German general staff in Petrograd' and with the consent of the council of people's commissars, of which Trotzky and Lenin were the heads, two incriminating German circulars had also been taken from the department of secret service of the Petrograd district and given to the secret service department of the German general staff in Petrograd. On the bottom of the protocol the German adjutant acknowledges receipt of the two incriminating circulars with his cipher signature. And to complete the evidence the circulars are themselves penciled with the cipher signature of the head of the German secret service bureau.

"These two circulars apparently had been obtained by some Russian agent in Germany and transmitted to Russia. The German general staff evidently wished to get them back in order to destroy them. By the order of the German general staff and with the 'consent' of Lenin and Trotzky they are turned over to the Germans to be destroyed. Why? Because they are conclusive proof that on June 9, 1914, the German government was preparing for war, several weeks before the assassination of the Austrian archduke which was made the pretext for war.

"One circular is an order from the Ger-

man general staff, dated June 9, 1914, informing 'all industrial concerns' in Germany to open the sealed envelopes containing their 'industrial mobilization plans and registered forms,' so that they might be prepared for the war for which the excuse had not yet been found.

"The second circular is an order from the German general staff of the high sea fleet, dated Nov. 28, 1914, calling for the mobilization of 'all destructive agents and observers' in the United States and Canada for the purpose of preventing the sailing of ships from American ports to Russia, France and England. The order calls for explosions, strikes, 'delays, embroilments and difficulties,' and it recommends the employment of 'anarchists and escaped criminals' for the purpose.

"It is these damning proofs of a German conspiracy against the nations of Europe in June, 1914, and against the United States in November, 1914—that these that Lenin and Trotzky surrendered to the German secret service in Petrograd on order of 'the representatives of the German general staff in Petrograd.'

"And they surrender them in conformity with a working agreement between the bolshevist leaders and the German general staff, of which agreement a photograph is included in the series as document No. 5.

"It is dated October, 1917. It is from a division of the German general staff. It is addressed to the council of people's commissars, of which Lenin and Trotzky were the heads. It begins:

"In accordance with the agreement which took place at Kronstadt, in July of the present year, between officials of our general staff and leaders of the Russian revolutionary army and democracy, Messrs. Lenin and Trotzky, Rasolnikov and Dybenko, the Russian division of our general staff operating in Finland is ordering to Petrograd officers for the disposal of the information department of the staff. Among the officers named are Maj. Luberts, whose cipher signature is given as it appears on the two surrendered German circulars mentioned above (document No. 3) and Lieut. Hartwig, whose cipher signature is given as it appears on the receipt for the two circulars. And an indorsement on this letter from the German general staff records that the German officers assigned to Petrograd had appeared 'before the military revolutionary committee' and had 'agreed on conditions with regard to their mutual activities.'

"What their 'mutual activities' were to be is sufficiently indicated by document No. 7, which is a photograph of a letter signed in cipher by this Maj. Luberts and his adjutant, Lieut. Hartwig. They notify the bolshevist leaders on Jan. 12, 1918, that 'by order of the German general staff the German intelligence section 'has informed us of the names and the characteristics of the main candidates for re-election to the Russian bolshevist 'central executive committee,' and the general staff orders us to insist on the election of the following people. They add a list of Russian leaders satisfactory to the German general staff. The list is headed by Trotzky and Lenin. They were elected, and the rest of the present bolshevist executive committee was chosen from the same German list.

"Document 28 gives evidence of the quid pro quo. It is a photograph of a letter from the president of the German Imperial bank to the bolshevist commissar of foreign affairs. It is marked 'very secret' and dated Jan. 8, 1918. It says: 'Information has to-day been received by me from Stockholm that 50,000,000 rubles [\$25,000,000] of gold has been transferred to be put at the disposal of the people's commissars,' which is the title of the bolshevist leaders. 'This credit,' the letter continues, 'has been supplied to the Russian government in order to cover the cost of the keep of the red guards [the bolshevist revolutionary troops] and agitators in the country. The imperial government considers it appropriate to remind the council of people's commissars of the necessity of increasing their propaganda

in the country, as the antagonistic attitude of the south of Russia and Siberia to the existing government in Russia is troubling the German government.'

War Materials at Vladivostok.

"Four days later the same representative of the German Imperial bank sent another 5,000,000 rubles [\$2,500,000] to the same address to provide for the sending of a Russian revolutionary leader to Vladivostok, to get possession of the 'Japanese and American war materials' at that port, and if necessary to destroy them. A photograph of this letter is given as document No. 9.

"There were earlier payments, but probably none later than these. None was necessary. By this time the loot of an empire lay open to the bolshevists—and to the Germans.

"Most significant of all are two photographs of further communications from the German Imperial bank, given as documents Nos. 10 and 11. One is a letter addressed to the chairman of the council of people's commissars and the other is the 'resolution of a conference of representatives of the German commercial banks' received by the chairman of the bolshevist central executive committee and indorsed by his secretary. Together they give a complete synopsis of the terms on which Germany intends to have control of all Russian industries.

"For five years from the signing of peace, English, French and American capital in Russia is to be 'banished' and 'not to be allowed in the following industries: Coal, metallurgical, machine building, oil, chemical and pharmaceutical.' These industries are to be developed under the control of a 'supreme advisory organ consisting of ten Russian specialists, ten from the German industrial organizations and the German and Austrian banks.' Germany and Austria are to 'enjoy the unlimited privilege of sending into Russia mechanics and qualified workmen.' 'Other foreign mechanics and workmen * * * are not to be allowed to enter at all' for five years after the conclusion of peace between Russia and Germany. 'Private banks in Russia arise only with the consent' of the union of German and Austrian banks. And so forth.

Conspiracy Is Indorsed.

"And this conspiracy between German imperial capitalism and the pretended Russian reds is indorsed by a bolshevist leader, with the recommendation that it should be 'taken under advisement' and 'the ground prepared in the council of the workmen's and soldiers' deputies, in case the council of people's commissars will not accept these requests.

"Various details of the conspiracy between the bolshevist leaders and the German general staff are exposed in documents Nos. 16 to 29. These are photographs of letters which passed between the bolshevist leaders and the German general staff, or the German officers in Russia. Document No. 21 shows that on Nov. 1, 1917, when Russia was still regarded as an ally of Great Britain, France, and America, the German general staff was having 'the honor to request' the bolshevist leader to inform it 'at the earliest possible moment' concerning 'the quantity and storage place of the supplies which have been received from America, England and France, and also the units which are keeping guard over the military stores.'

"Document 18 shows the German general staff requiring the bolshevist leaders to send 'agitators to the camps of the Russian prisoners of war in Germany,' in order that they might 'secure spies to work against the English and French troops and to further 'peace propaganda.' And this is proposed by the German general staff as being 'according to the negotiations between the Russian and German peace delegations at Brest-Litovsk.'

"In document 22 the bolshevist leaders and the Germans are arranging to send 'agents-agitators and agents-destroyers' out of Vladivostok 'to ports of the United States, Japan and British colonies in eastern Asia.'

Passports for Germans.

"In document 16 Trotzky is providing fraudulent passports for German officers who are going to England, France and America as spies and enemy agents. And document 17 shows Trotzky indorsing a similar proposal: 'To be promptly executed. L. T.'"

"Three German submarines are to be sent to the Pacific on the Trans-Siberian railway by orders of the German high command in document No. 23. Lists of German and Russian spies watching the British, French and American embassies in Petrograd are given in document No. 25. And, finally, in document No. 15 the bolshevist leaders are warned that information concerning 'the connection of the German government with the bolshevist workers' has leaked out and that Russian troops are hearing of it.

"Letters are given to show how the bolshevist leaders and the German officers arranged for the assassination of Russian nationalist leaders (documents 35, 39 and 52), for the destruction of the Polish legionnaires in the Russian army (documents 40 to 42), for the disorganization of the Roumanian army and the deposing of the Roumanian king (document No. 37), for the substitution of officers satisfactory to Germany in command of Russian troops instead of patriotic Russian generals (documents 31 and 32), for the suppression of patriotic agitation among the Russian soldiers (documents 13 and 14), for an attack upon the Italian ambassador in Petrograd and the theft of his papers (documents 26 and 27), and for the employment of German soldiers in Russian uniforms

against the Russian national armies in the south (document No. 35).

"Several of the letters are indorsed by Trotzky. Even standing alone, they are complete proof that the bolshevist leaders were ruling as German agents in Russia and obeying German orders to act against all Germany's enemies and even against Russia itself.

Acted as German Agents.

"Moreover, these bolshevist leaders acted as German agents, by suppressing their own socialist revolution in the Russian provinces where their doctrines interfered with German plans of annexation. Document No. 46 is the original letter from the Petrograd intelligence bureau of the German general staff addressed to the bolshevist commissar of foreign affairs. It reads: 'According to instructions of the representative of our general staff, I have the honor once more to insist that you recall from Esthonia, Lithuania and Courland all agitators of the central executive committee of the council of workmen's and soldiers' deputies.' And in document No. 47 the general staff orders the bolshevists to 'cease the agitation in Esthonia which had finally led to the local German landlords being declared outlawed' and to 'take immediate steps for the restoration of the rights of the above mentioned German landlords.'

"Another group of letters (Nos. 33 to 36) shows how the Germans cheated the bolshevist leaders in their dealings with the Ukraine, and made a separate German peace with the anti-bolshevist leaders in that Russian province. And another group shows the Germans assisting both sides of the civil war in Finland (documents 38, 43 and 53)."

ROUMANIAN PEACE TREATY.

When the bolshevik government of Russia not only made peace with the central powers but attacked the Roumanian forces the position of the Balkan kingdom became hopeless and King Ferdinand's government was forced to seek a separate peace with Germany and her allies. Negotiations were begun Feb. 23, 1918, at Castle Buftea, near Bukharest, Roumania being represented by Premier Averescu, Germany by Foreign Secretary Dr. von Kuehlmann, Austria-Hungary by Foreign Minister Count Czernin and Bulgaria by Premier Radoslavoff. An armistice was arranged, and on March 5 a preliminary treaty of peace was signed. This provided for the ceding to the central allied powers the Dobrogea as far as the Danube, the frontier rectifications demanded by Austria-Hungary, demobilization of the army, the evacuation of Austro-Hungarian territory and support for the transport of troops of the central powers through Moldavia and Bessarabia to Odessa. On May 6, 1918, at Bukharest the following formal treaty of peace was signed by the representatives of Roumania and the central powers:

"1. Germany, Austria-Hungary, Bulgaria, and Turkey, on the one hand, and Roumania, on the other, declare the state of war ended and that the contracting parties are determined henceforth to live together in peace and friendship.

"2. Diplomatic and consular relations between the contracting parties will be resumed immediately after the ratification of the peace treaty. The admission of consuls will be reserved for a future agreement.

"3. The demobilization of the Roumanian army, which is now proceeding, will, immediately after peace is signed, be carried out according to the prescriptions contained in articles 4 and 7.

"4. The regular military bureau, the supreme military authorities, and all the military institutions will remain in existence as provided by the last peace budget. The demobilization of divisions 11 to 15 will be continued, as stipulated in the treaty of Focani, signed on March 8 last. Of the Roumanian divisions 1 to 10, the two infantry divisions now employed in Bessarabia, includ-

ing the Jaeger battalions, which are the remnants of dissolved Jaeger divisions, and including two cavalry divisions of the Roumanian army, will remain on a war footing until the danger arising from the military operations now being carried on in the Ukraine by the central powers cease to exist.

"All other Roumanian troops which did not exist in peace time will at the end of their term of active military service remain as in peace time. Reservists shall not be called up for training until a general peace has been concluded.

"5. Guns, machine guns, small arms, parks of horses and cars, and ammunition which are available owing to the reduction or the dissolution of the Roumanian units shall be given into the custody of the supreme command of the allied forces in Roumania until the conclusion of a general peace.

"6. The demobilized Roumanian troops to remain in Moldavia until the evacuation of the occupied Roumanian regions. Excepted from this provision are military bureaus and men mentioned in article 5, who are required for the supervision of the arms and material laid down in these regions. The men and reservist officers who have been demobilized can return to the occupied regions. Active and formerly active officers require in order to return to these regions permission of the chief army command of the allied forces.

"7. A general staff officer of the allied powers, with staff, will be attached to the Roumanian commander in chief in Moldavia and a Roumanian staff officer, with staff, will be attached as liaison officer to the chief command of the allied forces in the occupied Roumanian districts.

"8. The Roumanian naval forces will be left to their full complement and equipment, in so far as their crews, in accordance with article 9, are not to be limited, until affairs in Bessarabia are cleared, whereupon these forces are to be brought to the usual peace standard. Excepted herefrom are river forces required for the purposes of river police and naval forces on the Black sea.

"9. All men serving in the army and navy, who in peace time were employed in connec-

tion with harbors or shipping, shall, on demobilization, be the first to be dismissed in order that they may find employment in their former occupations.

"10. With regard to Dobrogea, which, according to paragraph 1 of the peace preliminaries, is to be ceded by Roumania, the following stipulations are laid down: (a) Roumania cedes again to Bulgaria, with frontier rectifications, Bulgarian territory that fell to her by virtue of the peace treaty concluded at Bukharest in 1913.

"A commission composed of representatives of the allied powers shall shortly after the signature of the treaty lay down and demarcate on the spot the new frontier line in Dobrogea. The Danube frontier between the regions ceded to Bulgaria and Roumania follows the river valley. Directly after the signature of the treaty further particulars shall be decided upon regarding the definition of the valley. Thus the demarcation shall take place in autumn, 1918, at low water level.

"11. [After stating that Roumania agrees that her frontiers shall undergo rectification in favor of Austria-Hungary as indicated on the map, the article continues]:

"Two mixed commissions, to be composed of equal numbers of representatives of the powers concerned, are immediately after the ratification of the peace treaty to fix a new frontier line on the spot.

"12. Property in the ceded regions of Roumania passes without indemnification to the states which acquire these regions."

Clause 4 deals with war indemnities of which article 13 declares that the contracting parties mutually renounce indemnification of their war costs, and special arrangements are to be made for the settlement of damages caused by the war. The fifth clause relates to the evacuation of occupied territories, embodied in articles 14 to 24, summed up as follows: The occupied Roumanian territories shall be evacuated at times to be later agreed upon. For the present, railways, posts, and telegraphs will remain under military administration and will, in accordance with proper agreements, be at the disposal of the authorities and population. As a general rule the Roumanian courts will resume jurisdiction in the occupied territories to their full extent.

"The allied powers will retain jurisdiction as well as the power of police supervision over those belonging to the army of occupation.

"The army of occupation right to requisition is restricted to corn, peas, beans, fodder, wool, cattle, and meat from the products of 1918 and, further, to timber, oil, and oil products, always observing proper regard for an orderly plan of procuring these commodities, as well as satisfying the home needs of Roumania.

"From the ratification of the treaty onward the army of occupation shall be maintained at the expense of Roumania."

Clause 6 covers regulations regarding navigation on the Danube.

"24. Roumania shall conclude a new Danube navigation act with Germany, Austria-Hun-

gary, Bulgaria and Turkey, regulating the legal position on the Danube from the point where it becomes navigable, with due regard for the prescriptions subsequently set forth under sections (a) to (d), and on condition that the prescriptions under section (b) shall apply equally for all parties to the Danube act. Negotiations regarding the new Danube navigation act shall begin at Munich as soon as possible after the ratification of the treaty."

The sections follow:

"(a) Under the name Danube mouth commission, the Europe Danube commission shall, under conditions subsequently set forth, be maintained as a permanent institution, empowered with the privileges and obligations hitherto appertaining to it for the river from Braila downward, inclusive of this port; the conditions to provide, among other things, that the commission shall henceforth only comprise representatives of states situated on the Danube or the European coasts of the Black sea. The commission's authority extends from Braila downward to the whole of the arms and mouths of the Danube and adjoining parts of the Black sea.

"(b) Roumania guarantees to the ships of the other contracting parties free navigation on the Roumanian Danube, including the harbors. Roumania shall levy no toll on ships or rafts of the contracting parties and their cargoes merely for the navigation of the river. Neither shall Roumania in the future levy on the river any tolls save those permitted by the new Danube navigation act."

Articles 25 and 26 deal with the Danube questions and provide that Germany, Austria-Hungary, Bulgaria, Turkey and Roumania are entitled to maintain warships on the Danube, which may navigate downstream to the sea and upstream as far as the upper frontier of ships' territory, but are forbidden intercourse with the shore of another state, or to put in there except under force majeure, or with the consent of the state.

The powers represented on the Danube mouth commission are entitled to maintain two light warships each as guardships at the mouth of the Danube.

Article 27 provides equal rights for all religious denominations, including Jews and Moslems, in Roumania, including the right to establish private schools.

Article 28 provides that diversity of religions does not affect legal, political, or civil rights of the inhabitants, and, pending ratification of the treaty, a decree will be proclaimed giving the full rights of Roumanian subjects to all those, such as Jews, having no nationality.

The remaining three articles provide that economic relations shall be regulated by separate treaties, coming into operation at the same time as the peace treaty. The same applies to the exchange of prisoners.

[It may be added that the armistice terms imposed by the allies on Germany, Nov. 11, 1918, provided for the cancellation of the foregoing treaty as well as other treaties made by Germany with the former allies of the entente.]

THE CAILLAUX TREASON CASE.

Joseph Caillaux, French premier in 1911 and on several different occasions minister of finance, was arrested in Paris, Jan. 14, 1918, on the charge of high treason. The basis of the charge was that he had been in communication with German agents and was the fountain source of the German propaganda in France. As early as January, 1914, the editor of *Le Figaro*, Gaston Calmette, accused M. Caillaux of making undue concessions to Germany in the Agadir affair and also of financial irregularities in which German financiers figured. On March 16 of that year, Mme. Caillaux went to the office of *Le Figaro* and

shot and killed M. Calmette. For this she was tried and acquitted. M. Caillaux then went into the pay department of the French army, but was soon in trouble. In November, 1914, he sailed for South America and spent most of the winter in Argentina. He returned to Europe in 1915. In 1916, he was in Italy with his wife and reports were then published that he was active in German propaganda there. The evidence of this came from apparently reliable sources.

In 1917 he came back to France and again became active in politics as a member of the chamber of deputies. His name was frequent-

ly mentioned in connection with the cases of the editors of the *Bonnet Rouge*, of Bolo Pasha and of others charged with being German agents. M. Malvy, minister of the interior, was accused of protecting instead of prosecuting the men accused of working for a separate peace with Germany. The Ribot and Painleve cabinets fell largely because they did not deal firmly enough with the plotters against the country. Then Georges Clemenceau became premier and at once there was a change in the attitude of the government. Searching investigations were made, resulting in discoveries which led the chamber of deputies to suspend the immunity of M. Caillaux and others from prosecution. This was done Dec. 12, 1917. Evidence in the shape of notes and other documents found in a safety deposit box in a bank in Florence, Italy, tended to show that Caillaux was planning to become premier of France on the policy of accepting defeat by Germany and then carrying out certain schemes of revenge against his enemies. Among other things he aimed to do was to make Gen. Sarrail his generalissimo. It will be recalled in this connection that late in 1917 Gen. Sarrail was recalled from his post as commander in chief of the allied forces in Macedonia.

Some of the strongest evidence against Caillaux was furnished by the American state department, which in its investigation of German activity in Argentina carried across the following telegrams sent by Count Bernstorff to his government on Feb. 4, 1915:

"No. 178. Buenos Aires telegraphs the following: No. 21. Caillaux has left Buenos Aires after a short stay and is going direct to France, evidently on account of the group undecipherable scandal, which he regards as a personal attack upon himself. He speaks contemptuously of the president and the rest of the French government, with the exception of Briand. He sees through the policy of England perfectly. He does not anticipate the complete overthrow of France. He sees in the war now a struggle for existence on the part of England. Although he spoke much of the 'indiscretions and clumsy policy' of the Wilhelmstrasse, and professed to believe in German atrocities, he has in essentials hardly changed his political orientation. Caillaux welcomed indirect courtesies from me, but emphasized the extreme caution which he is obliged to show, as the French government, he said, has watched him even here. He warns us against the excessive praise bestowed upon him by our papers, especially the *Neue Freie Presse*, and desired, on the other hand, that Mediterranean and Morocco agreement should be adversely criticized. Our praise injures his position in France. Caillaux's reception here was cool. His report about Brazil had nothing new. On his return to France he will, to begin with, reside in his constituency. He fears Paris and the fate of Jaures."

"BERNSTORFF."

"No. 202. Naval Attache to Admiralty Staff, Habana telegraphs: Tol, Rio de Janeiro, telegraphs steamer Araguaya left Buenos Aires Jan. 30. The captain is carrying important papers. Capture very desirable. Caillaux is on board. In case of capture, Caillaux should, in an unobtrusive way, be treated with courtesy and consideration. Can you inform our cruisers?"

BERNSTORFF."

On June 6, 1917, the German censorship issued the following notice to the German press: "For political reasons it is urgently requested that nothing be written about the former French prime minister, Caillaux, and that his name be not mentioned under any circumstances."

These notes were made public by the state department Jan. 16, 1918. On that day in Paris, France, Louis Loustalot, a member of the chamber of deputies, was arrested in connection with treason charges. Paul Comby, another alleged plotter, was arrested the day before.

BOLO PASHA TREASON CASE.

Paul Bolo Pasha, convicted of high treason against the republic of France in time of war was executed at Vincennes by a firing squad early on the morning of April 17, 1918. Just before the war began in 1914 Bolo was in the service of Abbas Hilmi, then khedive of Egypt, and for his work was given the title of pasha. In 1915 Bolo met Hilmi in Switzerland in company with the then German foreign minister, Gottlieb von Jagow, and an arrangement was made by which Bolo was to receive 10,000,000 marks (\$2,500,000) to be paid in installments for the purpose of influencing French newspapers in favor of peace with Germany. Of this sum about 4,000,000 marks (\$1,000,000) was paid through Swiss banks.

In the summer of 1916 Bolo bought the *Paris Journal* from Senator Humbert, paying 5,500,000 francs (\$1,100,000) for the property. This money was refunded to him after proceedings had been instituted against him on the charge of high treason. Senator Humbert subsequently became involved in the treason investigation and on Feb. 18 last was arrested. In February, 1916, Bolo came to America with \$2,000,000 from the Deutsche bank of Berlin, which he deposited in various banks presumably for propaganda in this country. His activities in the United States were known to the government and communicated to France through Ambassador Jusserand. On Sept. 29, 1917, Bolo Pasha, who had been under suspicion for some time and had been arrested, but allowed his liberty on bail, was locked up to await trial for high treason under a law against having "intelligence with the enemy." The proceedings, which were before a court-martial in Paris, began Feb. 4, 1918, and resulted in his conviction and sentence to death Feb. 14. His execution was delayed some days to enable him to make some additional revelations to the government.

WORK OF THE AMERICAN RED CROSS.

In its annual message of Oct. 23, 1918, signed by Henry P. Davison, chairman, the war council of the American Red Cross said in part:

"Since the beginning of the war you of the chapters have co-operated with the war council in conducting two war fund drives and one membership drive, in addition to the campaign on behalf of the Junior Red Cross. The total actual collections to date from the first war fund have amounted to more than \$115,000,000. The subscriptions to the second war fund amounted to upward of \$176,000,000. From membership dues the collections have amounted to approximately \$24,500,000.

"To the foregoing must be added the very large contributions of materials and time given by the millions of women throughout the country. For the period up to July 1, 1918, American Red Cross chapters, through their workrooms, had produced 490,120 refugees'

garments, 7,123,621 hospital supplies, 10,786,489 hospital garments, 10,134,501 knitted articles, 192,748,107 surgical dressings—a total of 221,282,838 articles, of an estimated aggregate value of at least \$44,000,000. These articles were largely the product of women's hands.

"By the terms under which the first Red Cross war fund was raised, the chapters were entitled to retain 25 per cent of the amount collected, in order to defray local expenses, to carry on their home service work, to purchase materials to be utilized in chapter production, and otherwise to meet the numerous calls made upon them. The chapters were thus entitled to retain nearly \$29,000,000. As a matter of fact, their actual retentions amounted to only about \$22,000,000. Out of collections from annual memberships the chapters have retained about \$11,000,000.

"From this total sum, therefore, of \$33,000,000 retained by the chapters, they have met all the oftentimes very heavy local demands upon them, and, in addition, have provided for use by national headquarters products valued at upward of \$44,000,000.

"The chapters have, in effect, returned to the war council not alone the \$33,000,000 retained out of the war fund and membership dues but, in value of actual product, an additional contribution of at least \$11,000,000.

"It will thus be seen that during the eighteen months which have elapsed since the United States entered the war the American people will have either paid in or pledged to the American Red Cross for its work of relief throughout the world, in money or in material values, a net total of at least \$325,000,000.

"The American Red Cross has a total membership of 20,648,103, and, in addition, 8,000,000 members in the Junior Red Cross—a total enrollment of more than one-fourth the population of the United States."

RED CROSS WAR FUND.

The following table shows the appropriations made by the Red Cross War Council from its appointment May 24, 1917, to Feb. 28, 1918:

<i>From War Fund.</i>	
Relief work—France.....	\$30,936,103.04
Belgium	2,086,131.00
Italy	3,588,826.00
Russia	1,243,845.07
Roumania	2,676,368.76
Serbia	875,180.76
Great Britain.....	1,885,750.75
Other foreign countries.....	3,576,300.00
For prisoners, etc.....	343,304.00
Personnel equipment.....	113,800.00
Total foreign relief.....	47,325,609.38
U. S. Relief—Army base hospitals.....	54,000.00
Navy base hospitals.....	32,000.00
Medical and hospital work...	531,000.00
Sanitary service.....	403,000.00
Camp service	6,451,150.86
Miscellaneous	1,118,748.41
Total U. S. relief	8,589,899.27
Restricted as to use by donor.	2,520,509.57
Capital for purchase of supplies	15,000,000.00
Cash advances for France and U. S.	4,286,000.00
Total from war fund.....	77,721,918.22

<i>From General Fund.</i>	
Headquarters administration ..	2,472,713.93
Divisional administration	1,943,896.99
Total from general fund.....	4,416,610.92
From miscellaneous funds.....	155,000.00

Total appropriations..... 82,293,529.14
Details of Special Appropriations.

It was announced by the war council of the American Red Cross in March, 1918, that it had appropriated \$1,193,125 as an additional contribution to the British Red Cross. The first contribution was made in October, 1917, and was \$1,000,000. Both of the sums were to be used for the relief of sick and wounded in hospitals, clearing stations, and on lines of communication within spheres of activity of the British Red Cross.

On April 3 the American Red Cross announced that it had divided among the department of France 5,000,000 francs (about \$1,000,000) to aid soldiers' families suffering most grievously in the war. The allotments were made in sums of 100 francs (\$20) to each family.

In recognition of the part played by Canada in the war for human liberty the American Red Cross on April 5 appropriated \$500,000 as

a gift to the Canadian Red Cross. The gift was made without restrictions but with the expressed hope that it would be found possible to use the contribution for the relief of the Canadian soldiers at the front.

On May 1 the American Red Cross presented 10,000,000 francs (\$2,000,000) to a committee directing the three great French societies for caring for the wounded—the French Red Cross, Les Femmes de France and Les Dames Francaises.

On behalf of the American Red Cross Maj. Robert Perkins, on June 24, presented 1,000,000 lire (\$200,000) to the Italian Red Cross for the benefit of needy families of Italian soldiers who took part in defeating the Austrian offensive in June, 1918.

PALESTINE RELIEF WORK.

Early in the spring of 1918 the American Red Cross made comprehensive plans for the relief of the people of the Holy Land who were released from the Moslem yoke through the capture by the British forces of Jerusalem. It sent to Palestine a commission headed by Dr. John H. Finley, commissioner of education for the state of New York, and fifty-seven others, including E. St. John Ward, Dr. Solomon Lowenstein and Theodore Waters, deputy commissioners, and Dr. Jesse K. Marsden, Charles E. Clark, William S. Dodd and Harry C. Hurd, chief surgeons. The war council appropriated \$390,000 as a beginning. The commission established four medical units to combat typhus, cholera and other diseases, with a fully equipped hospital, and distributed food and clothing in the devastated districts. The commission co-operated with the British Syria and Palestine relief fund and the American Armenian and Syrian relief committee.

STATUS OF RED CROSS IN ARMY.

The following general statement outlining certain activities of the American Red Cross was approved by the secretary of war and published Feb. 20, 1918:

1. To distribute sweaters, mufflers, helmets, socks, comfort kits, etc., and to receive the assistance and co-operation of all officers in making the distribution fair, equal and where most needed.

2. To render emergency relief of every kind upon the request or suggestion of an officer in charge. All officers are instructed to avail themselves of this assistance whenever, in their opinion, it is advisable. Officers should be none the less diligent in attempting to foresee the needs of their department in order that they may be supplied through regular government channels. All such requests must be approved by the commanding officer, who will cause a record to be kept of all such articles.

3. To relieve the anxiety and to sustain the morale of soldiers who are worried about their families at home and to promote the comfort and well-being of these families, authority is given to the American Red Cross to place one or more representatives of the home service bureau of the department of civilian relief at the service of the men of each division of the army wherever located. The soldiers should be informed through official orders of the presence of such representative or representatives and that the Red Cross is able and willing to serve both soldiers and their families when in need of any helpful service. This representative and his assistants will be accredited to the division commander and will be subject to his authority and to military laws and regulations. This representative of the Red Cross will have the status of an officer in the army and will be provided quarters when available. Such assistants and clerks as may be necessary will be provided by the American Red Cross and must be males. These assistants and clerks, if any, will have

the status of noncommissioned officers. All reports and correspondence of this officer will be subject to censorship of the commanding officer.

4. To conduct canteen service stations for furnishing refreshments to soldiers when traveling through the country, to furnish emergency relief to the sick and wounded when en route and see that they are conveyed to a hospital when necessary and requested by the commanding officer. All commanders of troop trains are advised of this emergency service and are authorized to avail themselves of it whenever, in their opinion, advisable.

5. A representative of the American Red Cross may be attached to each base hospital to furnish emergency supplies when called upon, to communicate with the families of patients, to render home service to patients and such other assistance as pertains to Red Cross work. The representative of the Red Cross so assigned, together with his assistants will be accredited to the commanding officer of the base hospital and will be subject to the same regulations as to status, privileges, assistants, and censorship as provided in preceding paragraph applying to the representatives of the Red Cross assigned to divisions.

6. In order to render the above outlined service to the best advantage the accredited chief officer representing the American Red Cross at division headquarters will be a field director.

7. Officials of the Red Cross assigned on duty with the military establishment, as outlined above, will be required to wear the regulation uniform of the American Red Cross, together with the insignia, etc., as approved by the secretary of war.

ALLIED WAR COUNCILS.

To secure unity of action in the war the allies in the fall of 1917 held a conference in Paris at which the following bodies were given authority to represent and act for the countries fighting the Germanic alliance:

SUPREME WAR COUNCIL.

The supreme war council consists of the premiers and one other cabinet minister from the principal belligerents, assisted by the military representatives of France, Britain, the United States and Italy. Its meeting place was fixed at Versailles, France.

NAVAL ALLIED COUNCIL.

The naval allied council consists of representatives of France, Great Britain, Italy, Japan and the United States, including the ministers of marine and chiefs of the naval staffs; has no fixed place of meeting.

COUNCIL FOR WAR PURCHASES AND FINANCE.

France, Great Britain, the United States and Italy are represented on the council for war purchases and finance, the name of which explains its purpose; meets alternately in Paris and London.

MARITIME TRANSPORT COUNCIL.

The maritime transport council consists of two ministers each from France, Great Britain and Italy and a representative from the United States. It supervises the operations of the allied transport at sea.

The personnel of the supreme war council was not the same at all the meetings, changes being made from time to time, especially in the military representatives. Early in 1918 the council consisted of the following:

For Great Britain—Premier Lloyd George and Maj.-Gen. Sir Henry Hughes Wilson.
For France—Premier Clemenceau, Foreign Minister Pichon, Gen. Ferdinand Foch and Gen. Maximo Weygand.
For Italy—Premier Orlando, Baron Sonnino, minister of foreign affairs, and Gen. Cadorna.

8. The commanding generals of all cantonments and national guard encampments and the commanding officers of all other encampments or organizations to which Red Cross representatives may be assigned in accordance with this order are authorized to furnish to the American Red Cross anything that they may request within reason, such as warehouses, offices, light, heat, telephones, etc., in order to enable them to properly carry on the work for which they are assigned.

Y. M. C. A. WAR EXPENDITURES.

The national war council of the Young Men's Christian association issued a financial statement Nov. 13, 1918, covering its operations from the beginning of the war to July 31, 1918. The statement given out by George W. Perkins, chairman of the finance committee, showed that the association had handled during the period \$54,354,034.04, of which more than \$400,000 represents interest earned on the contributions given to it.

On July 31 the Y. M. C. A. had still on hand a balance in excess of \$17,000,000. In the intervening period the demands of the work overseas had grown by leaps and bounds because of the vastly accelerated movement of troops, so that the balance on hand at that date had been entirely spent and had been succeeded by a deficit. In this intervening period Y. M. C. A. men and woman workers were sent abroad at the rate of very nearly 1,000 a month, and the number of buildings, restaurants, hotels, huts, tents, etc., operated for the American Expeditionary Forces in France increased from 895 to 1,500. (See also "Young Men's Christian Association," page 190, this volume.)

For the United States—Gen. Tasker H. Bliss, with Arthur H. Frazier of the Paris embassy in an unofficial capacity.

Later Gen. Weygand was succeeded by Gen. Belin, Gen. Cadorna by Gaetano Giardino and Maj.-Gen. Sir Henry Hughes Wilson by Gen. Sackville-West. What was called the "inter-allied war committee," consisting of military advisers to the council, was finally constituted as follows:

President—Gen. Belin, France.
Members—Gen. Sackville-West for Great Britain; Gen. Dibrolant for Italy and Gen. Tasker H. Bliss for the United States.

At an important meeting of the council held in May those present included David Lloyd George, Premier Orlando, Viscount Milner, Gen. Foch, Gen. Sackville-West, Gen. Bliss, Gen. Belin, Maj.-Gen. Henry H. Wilson, Field Marshal Haig, Gen. Pershing, Gen. Petain, Vice-Admiral Wemyss and Vice-Admiral de Bon. This was substantially the personnel for the remainder of the year until the meetings were held at which armistice terms were fixed for Austria-Hungary and Germany.

BRITISH WAR COUNCILS.

The War Cabinet.

David Lloyd George, prime minister and first lord of the treasury.
Earl Curzon, lord president of the council.
A. Bonar Law, chancellor of the exchequer.
Austen Chamberlain, without portfolio.
G. N. Barnes, without portfolio.
Lieut.-Gen. J. C. Smuts, without portfolio; member of war cabinet by special arrangement.

Imperial War Cabinet.

Lloyd George, Curzon, Law, Chamberlain and Barnes and the following representing the British colonies:
Sir Robert L. Borden, prime minister of Canada.
N. Rowell, president of the privy council, Canada.

W. M. Hughes, prime minister of Australia.
 J. Cook, minister of the navy, Australia.
 W. F. Massey, prime minister of New Zealand.
 Sir Joseph Ward, minister of finance, New Zealand.
 Lieut.-Gen. J. C. Smuts, minister for defense, Union of South Africa.
 H. Burton, minister of railways and harbors, Union of South Africa.
 W. F. Lloyd, prime minister of Newfoundland.
 Sir S. P. Sinha, member executive council, Bengal.
 Sir Bhupindar Singh, maharajah of Patiala.

Imperial War Conference.

Walter Long, secretary of state for the colonies, chairman.
 Sir Robert L. Borden, prime minister of Canada.
 A. Meighen, minister of the interior, Canada.
 J. A. Calder, minister of immigration and colonization, Canada.
 N. Rowell, president of privy council, Canada.

W. M. Hughes, prime minister of Australia.
 Joseph Cook, minister of the navy, Australia.
 W. F. Massey, prime minister of New Zealand.
 Joseph Ward, minister of finance, New Zealand.
 Lieut.-Gen. J. C. Smuts, minister for defense, Union of South Africa.
 H. Burton, minister of railways and harbors, Union of South Africa.
 W. F. Lloyd, prime minister of Newfoundland.
 E. S. Montagu, secretary of state for India.
 Sir Bhupindar Singh, maharajah of Patiala.
 Sir S. P. Sinha, member of executive council, Bengal.

In the foregoing executive and consultative bodies was centered the supreme military authority of Britain and her colonies in 1918 in conducting the war against the central empires and their allies. By means of these organizations it was possible to co-ordinate and unify all the resources and to make and carry out decisions having the approval and support of all parts of the empire.

WAR COUNCIL RESULTS.

The following official statement was issued in London Feb. 3, 1918:

"Meetings of the third session of the supreme war council were held at Versailles, France, Jan. 30 and 31, Feb. 1 and 2.

"In addition to the members of the supreme war council itself, namely, MM. Clemenceau and Pichon for France, Mr. Lloyd George and Lord Milner for Great Britain, Prof. Orlando and Baron Sonnino for Italy, and the military representatives of the supreme war council, Gens. Weygand, Wilson, Cadorna and Bliss, there were also present for the greater part of the purely military discussions the French and British chiefs of general staff, Gens. Foch and Robertson, the Italian minister of war, Gen. Alfieri, and the commanders in chief on the western front, Petain, Haig and Pershing.
 "A. H. Frazier, first secretary of the United States embassy at Paris, was present during the political discussions.

"The decisions taken by the supreme war council in pursuance of this contingent embrace not only a general military policy to be carried out by the allies in all the principal theaters of the war, but more particularly a closer and more effective co-ordination under the council of all the efforts of the powers engaged in the struggle against the central empires.

"The functions of the council itself were enlarged and the principles of unity of policy and action initiated at Rapallo in November last received still further concrete and practical development. On all these questions a complete agreement was arrived at after the fullest discussion with regard to both the policy to be pursued and to the measures for its execution.

"Under the circumstances the supreme war council decided that the only immediate task before them lay in the prosecution of the war with the utmost vigor and the closest and most effective co-operation of the military effort of the allies until such time as the pressure of that effort shall have brought about in the enemy governments and peoples a change of temper which would justify the hope of the conclusion of peace on terms which would not involve the abandonment, in the face of an aggressive and unrepentant militarism, of all the principles of freedom, justice and respect for the law of nations which the allies are resolved to vindicate.

"The supreme war council gave the most careful consideration to the recent utterances of the German chancellor and the Austro-Hungarian minister of foreign affairs, but was unable to find in them any real approximation to the moderate conditions laid down by all the allied governments. This conviction was only deepened by the impression made by the

contrast between the professed idealistic aims with which the central powers entered upon the present negotiations at Brest-Litovsk and their now openly disclosed plans of conquest and spoliation.

"The allies are united in heart and will, not by any hidden designs, but by their open resolve to defend civilization against an unscrupulous and brutal attempt at domination.

"This unanimity is confirmed by a unanimity no less complete, both as regards the military policy to be pursued and as regards measures needed for its execution which will enable them to meet the violence of the enemy's onset with firm and quiet confidence, with the utmost energy and with the knowledge that neither their strength nor their steadfastness can be shaken.

"The splendid soldiers of our free democracies have won their place in history by their immeasurable valor, and their magnificent heroism and the no less noble endurance with which our civilian populations are bearing their daily burden of trial and suffering testify to the strength of those principles of freedom which will crown the military success of the allies with the glory of a great moral triumph."

Defended by Lloyd George.

"The enlargement of the duties and powers of the Versailles council caused some criticism in England, especially as the jurisdiction of the British chief of staff, Gen. Sir William Robertson, was curtailed as a result. Premier Lloyd George on Feb. 12 in the house of commons defended the action taken at the conference, but declined to make the details public on the ground that it would divulge facts useful to the enemy. In another speech delivered in the house of commons Feb. 19 Lloyd George said that the general principles laid down at Versailles had been wholeheartedly agreed to by all present. "There was," he said, "agreement as to policy; there was agreement that there must be a central authority to exercise the supreme direction of that policy; there was agreement that authority must be allied authority, and there was complete agreement that the authority should have executive power."

"I hesitated for some time," said the premier a little later in his speech, "whether I should not read to the house of commons the very cogent document submitted by the American delegation, which put the case for the present proposal. It is one of the ablest documents ever submitted to a military conference. The only reason why I do not read it to the house is that it is mixed up with the plan of operations. If I should read the

document submitted by the Americans there would be no need to make a speech. The case is presented with irresistible power and logic." Lloyd George explained that Gen. Sir William Robertson, who had resigned as chief of staff on Feb. 16, had been offered the position of British representative at Versailles or the post he had held under the limitations fixed by the war council, but he had declined to accept either. The government, said Lloyd

George, had been anxious to retain the services of so distinguished a soldier, but it had been found impossible under the terms of the agreement reached at Versailles.

It had been feared that the controversy over the Versailles conference decision would lead to a cabinet crisis, but the house of commons was satisfied with the explanation made by the prime minister and no further action was taken.

AMERICA IN FULL CO-OPERATION WITH ALLIES.

The following summary of results accomplished by the special war mission led by Col. E. M. House, which visited Great Britain and France in November, 1917, was made public by the state department Jan. 2, 1918.

NAVAL.

"1. The formation of an interallied naval council to co-ordinate the operation of the naval forces of the United States and its associates in the war so that these forces may in the future be operated as one in the prosecution of the war on the sea and in conjunction with the land forces.

"2. An agreement between the British admiralty and the navy department putting into effect certain plans relating to the prosecution of the naval war against the submarines.

"3. The formation of a definite plan for the more active utilization of American naval forces in conjunction with those of nations engaged in the war against the central powers.

"4. Agreement with the British admiralty making it possible for American naval officers to keep fully informed of the operations and policy of the British admiralty, so that perfect co-operation between the navy department and that body is assured.

"5. Reorganization of American naval forces at French ports.

"6. The securing of a full and detailed picture of the naval problem in European waters.

MILITARY.

"1. After conferences extending over approximately thirty days with the chiefs of staff, members of the general staffs, and commanders in chief of the allied armies on the western front, as well as with the highest civil officials of the respective governments, the extent of the military effort to be aimed at by the United States was clearly determined.

"2. With this determination in mind, negotiations were carried on looking to the pooling of resources for the mutual advantage of all the countries engaged in the war against Germany. The contribution of the United States to this pooling arrangement was agreed upon. The contributions likewise of the countries associated with the United States were determined. This pooling arrangement guaranteed that full equipment of every kind would be available to all American troops sent to Europe during the year 1918.

"3. Unqualified support to the resolution adopted by the interallied conference looking to the creation of an allied advisory board charged with the duty of advising the shipping authorities of each nation concerning the allocation of tonnage, so as to permit the American military effort to be realized.

"4. Full survey made of problem of debarkation in Europe of American military forces and transportation of such forces and supplies to the bases of military operation.

"5. Arrangements made for the fullest co-operation between the United States, Great Britain and France in the production of military instruments and supplies of all kinds.

"6. Plans made for the proper organization under naval and military control of ports of debarkation of troops and discharge of cargoes, looking to the most economical utilization of tonnage.

"7. Participation in military deliberations of supreme war council as a step toward ef-

ficient and centralized unity of control of military operations.

DIPLOMATIC.

"1. Full and frank discussion between Col. House, as special representative of the government of the United States, and the heads of the British, French and Italian governments with regard to the war policy of the United States and her associates in the war.

"2. Participation by the members of the mission in a meeting of the British war cabinet, which conference a general and useful discussion was had concerning the needs of the allies and the extent of the assistance to be expected from the United States.

"3. Participation by the United States in an interallied war conference held in Paris on Nov. 29. At this conference all preliminary speeches were dispensed with, and within half an hour after the conference had been called to order by M. Clemenceau it had split into committees for work.

"4. Participation by the United States in a meeting of the supreme war council held at Versailles Dec. 1. Representatives of England, France, Italy and the United States there met as a first step toward securing unity of control of the armies on the western front. This meeting, the first of its kind, assures for the future unity of support on the part of the United States and the allies.

"5. First steps taken in the establishment of a more perfect liaison between the commanding generals of the United States and the allies.

FINANCE.

"1. Full detailed conferences with the financial representatives of Great Britain, France, Italy, Japan, Greece, Roumania and Russia for the purpose of ascertaining the extent of the financial effort necessary on the part of the United States in order properly to co-operate with these governments in making financial arrangements for the prosecution of the war against the central powers.

"2. Conferences with the representatives of the above mentioned countries for the purpose of perfecting the organization of an interallied council which is a priority board, whose duty it should be to consider the relative importance and urgency of the financial demands to be made by the concerted effort of the countries waging war against the central powers.

"3. Arrangements begun for the proper financing of purchases by the countries at war with Germany of supplies from neutral countries.

"4. Participation in the financial discussions of the interallied conference.

SHIPPING.

"1. Full and detailed reports were secured showing total loss of tonnage due to war risks and marine risks from Aug. 1, 1914, to Sept. 30, 1917.

"2. The estimated output of new tonnage by the allies during the year 1918 was ascertained.

"3. The proper employment of existing tonnage, so that the maximum utilization of such tonnage could be effected, was provided for in a resolution adopted by the interallied conference.

"4. The allies, considering that the means of maritime transport at their disposal, as well as the provisions which they dispose of,

should be utilized in common for the pursuit of the war, have decided to create an inter-allied organization for the purpose of co-ordinating their action to this effect and of establishing a common program, constantly kept up to date, enabling them, by the maximum utilization of their resources, to restrict their importations with a view of liberating the greatest amount of tonnage possible for the transportation of American troops.

"4. The whole question of the employment of neutral tonnage in line with the proposals made by neutral countries with respect to this tonnage was exhaustively discussed and plans looking to the favorable result of tonnage negotiations with neutral countries were substantially agreed upon.

"5. A survey was completed of the ports of debarkation of American troops and supplies, and plans were made looking to the more expeditious discharge of troops and cargoes, so as to permit the return of vessels to their home ports with the least possible delay.

WAR INDUSTRIES.

"1. A detailed study was made of the organization of the British ministry of munitions and the supply departments of the British admiralty and the British war office, and a complete analysis of the facts and figures in possession of these departments of the British government was made. The report embodying the results of the investigations contains a full statement of the methods in vogue in England for supplying the army and navy with munitions and other materials, and also statistics relating to the mutual co-operation necessary to be effected for the proper supplying of the armed forces of the countries waging war on the central powers.

"2. A survey was made of the system in practice in Great Britain relating to the letting of government contracts and the organization of industries throughout Great Britain.

"3. Attendance at the interallied conference in Paris and in particular at the meetings of the representatives of the several allied nations having to do with munitions questions.

"4. Full conferences with representatives of the United States ordnance department in France and representatives of British and French munitions departments stationed there, resulting in the embodying of conclusions in memoranda submitted to the war department.

WAR TRADE.

"1. Full and detailed conferences were held with the British, French and Italian representatives upon blockade matters and a complete understanding was obtained of the principles under which these countries were proceeding.

"2. A mass of information was obtained with reference to rationing requirements of Switzerland, Norway, Sweden, Denmark and Holland.

"3. An agreement between the war trade board and the Swiss society surveillance was agreed to and executed by the Swiss delegates and Mr. McCormick, the chairman of the war trade board.

"4. Arrangements were made for the participation of the United States in the deliberations of the permanent international commission on contingents sitting in Paris and on the interallied commission of Bern, Switzerland.

"5. Tentative plans subject to the approval of the war board were made for the appointment of representatives and staffs of the war trade board in London and Paris.

FOOD.

"1. A comprehensive and accurate estimate was obtained of the food in the possession of the allied nations and of the amounts that must be supplied by North America during the year ending Oct. 1, 1918. Cabled information had not been of a satisfactory nature and personal contact with the statistical boards and food administrations of the countries concerned was necessary in order that the necessary data could be made available.

"2. The curve of shipments of foodstuffs required from North America for the United Kingdom, France and Italy was fixed for the year ending 1918. It is believed that the program worked out in the conference with the several interallied executives dealing with supplies of foodstuffs will grant greater facilities for the distribution of foodstuffs at a lower cost in terms of tonnage and transportation.

"3. In order to permit the United States to visualize the problem of food control in North America plans were worked out whereby the governments of Great Britain, France and Italy agreed to put into effect a legalized and compulsory control of foodstuffs in these countries.

"4. The creation by the interallied conference in Paris of an international scientific committee on alimentation to consist of two representatives each of the United States, Great Britain, France and Italy. This committee to be in continuous session in Europe for the purpose of studying the alimentation of the allies. This committee to stand in an advisory capacity to the food administrations of the aforementioned countries.

"5. Dr. Taylor, the representative of the food administration on the mission, represented the United States department of agriculture in a conference held in Paris to consider the problems of food production in the allied countries during the year 1918. At this conference an interallied agricultural committee was established to consist of one delegate each from the United States, Great Britain, France and Italy to sit continuously in Europe and to act in an advisory capacity to the governments named."

PERSHING ANNIVERSARY MESSAGES.

CONGRATULATIONS EXCHANGED.

On June 13, 1918, the first anniversary of the arrival of Gen. Pershing in France, President Poincare sent messages of congratulation to President Wilson and to Gen. Pershing. Premier Clemenceau, Gen. Foch and Gen. Petain also sent messages of appreciation to the leader of the American expeditionary forces in France. In his message to President Wilson the French executive, after expressing his admiration for the work of the American army in France, said:

"The allies, owing to the Russian capitulation, are living through the most difficult hours of the war, but the rapid formation of new American units and the uninterrupted increase in overseas transportation are leading us with certainty toward the day when the equilibrium will be restored."

Wilson to Poincare.

To this President Wilson sent the following reply June 14:

"Your telegram of yesterday was certainly conceived in the highest and most generous spirit of friendship, and I am sure that I am expressing the feeling of the people of the United States as well as my own when I say that it is with increasing pride and gratification that they have seen their forces under Gen. Pershing more and more actively co-operating with the forces of liberation on French soil.

"It is their fixed and unalterable purpose to send men and materials in steady and increasing volume until any temporary inequality of force is entirely overcome and the forces of freedom are made overwhelming, for they are convinced that it is only by victory that peace can be achieved and the world's affairs settled upon a basis of enduring justice and right.

"It is a constant satisfaction to them to know that in this great enterprise they are in close and intimate co-operation with the people of France."

Poincare to Pershing.

In his message to Gen. Pershing President Poincare said:

"The anniversary of your arrival in France furnishes a happy occasion to address my warmest congratulations to you and the valiant troops which you command and who have so admirably conducted themselves in the recent battles. I beg you to receive the assurance of my best wishes for the continuation of their success."

Clemenceau to Pershing.

"On the anniversary of your arrival in France to take command of the American troops I wish, my dear general, to express to you once more the greatest admiration for the powerful aid brought by your army to the cause of the allies. With ever increasing numbers the American troops cover themselves with glory under your orders in barring the route of the invader. The day is coming when, thanks to the superb effort of your country and the valor of its persons, the enemy, losing the initiative of operations, will be forced to incline before the triumph of our ideal of justice and civilization."

Foch to Pershing.

"A year ago brought to us the American sword. To-day we have seen it strike. It is

the certain pledge of victory. By it our hearts are more closely united than ever."

Petain to Pershing.

"My Dear General: Your coming to French soil a year ago filled our country with enthusiasm and hope. Accept to-day the grateful homage of our soldiers for the daily increasing aid on the battle field brought by their American brothers in arms. The last battles, where the magnificent qualities of courage and military virtue of your troops were demonstrated in so brilliant a manner, are a sure guaranty of the future. The day is not far off when the great American army will play the decisive role to which history calls this army on the battle fields of Europe. Permit me, my dear general, to express to you on this anniversary day my entire confidence and assure you of my feelings of affectionate comradeship."

Pershing's Reply to Poincare.

"Allow me, sir, to thank you for the kind message you sent me on the occasion of the anniversary. The enthusiastic reception which Paris gave us a year ago has been extended since then to the American army by all your people. To-day our armies are united in affection and resolution, full of confidence for the final success which will crown this long struggle for liberty and civilization."

INTERNATIONAL CONGRATULATIONS.

On Nov. 21, 1918, the state department in Washington made public the following exchanges of telegrams:

With France.

Nov. 12, 1918.—M. Stephen Pichon, Minister of Foreign Affairs, Paris: At this supreme moment in the history of your nation, when a complete victory has been won over the most formidable of enemies, I desire to extend to you personally and on behalf of my government the most heartfelt congratulations of the American people and a sincere expression of the joy and admiration with which they are inspired by the valor of your armies and the steadfastness of your people. LANSING.

Paris, Nov. 13, 1918.—Mr. Robert Lansing, Secretary of State, Washington: I am deeply touched with your telegram. The share of America in the victory you are celebrating is so great that never will any Frenchman forget it. In the run of history, the ancient alliance of our two countries was once more sealed by brotherhood in arms. The Americans and French are united in these days of rejoicing as they were in the days of fighting. I beg you to convey to the federal government the thanks of France and of the government of the republic and to accept for yourself who always evinced so much sympathy with my country my sentiments of cordial friendship. S. PICHON.

With Great Britain.

Nov. 12, 1918.—Right Honorable Arthur J. Balfour, Secretary of State for Foreign Affairs, London: At the moment when innumerable difficulties have been surmounted and final and complete victory has been achieved, I desire to express to you the deep joy felt by the government and people of this country and their admiration for the steadfastness, energy and valor of the British nation throughout this momentous struggle.

ROBERT LANSING,
Secretary of State.

London, Nov. 13, 1918.—Secretary of State, Washington: Your generous message has given the utmost satisfaction to his majesty's government, and it will be read with profound appreciation throughout the British empire. We are proud to think that in the

cause of international freedom we, like our allies, have worked and suffered, fought and conquered side by side with the people of your great country. May this unity of ideals bind us ever closer together through all the generations to whom the great war will be no more than an ancient and glorious memory. BALFOUR.

With Italy.

The White House, Nov. 11, 1918.—His Majesty, Vittorio Emmanuele, King of Italy, Rome: In the name of the people of the United States and in my own I extend hearty congratulations on this your majesty's natal day, which happily is also a golden day for the world's peace and security, marking as it does the crowning point of the successful struggle of civilization against savagery. Well may the Italian people rejoice in the removal of danger and menace for the future and welcome the complete victory to which their valor and fidelity have so gloriously contributed. Such victories as this win their own just rewards in that they bring home to the victors a realizing sense of their responsibility to see to it that their sacrifices in the cause of the right shall assure for all time a new era of liberty, justice and prosperity for the peoples of the earth. WOODROW WILSON.

Rome, Quirinal, Nov. 16, 1918.—President Wilson, Washington, D. C.: I sincerely thank you for the cordial expression you were pleased to send me in the name of the American people, also on the occasion of my birthday. I fully appreciate the noble word with which you kindly greeted our victory. Italy, having worshipped right in the world and revived national unity in the name of the principles of freedom, will adhere to those ideals for which it carried on the bitter struggle now ended by well deserved triumph.

VITTORIO EMMANUELE.

Rome, Nov. 16, 1918.—His Excellency, the President, Woodrow Wilson, Washington, D. C.: With a joyful heart I salute the strong people of the United States of America in this era which marks for the liberated democracies the triumph of the ideals for which the great American nation under your will and firm

guidance. Mr. President, took up arms on the side of the peoples fighting for their independence and a more civilized future for all mankind. In the name of the people and soldiers of Italy I express to you and your noble nation the sentiments of earnest admiration and the fervent wish that the memory of the battles fought together may enhance the ties of lasting friendship between our people.

VITTORIO EMMANUELE.

Nov. 20, 1918.—His Majesty Victor Emmanuel, King of Italy, Rome, Italy: Your majesty's message of congratulation has given the deepest pleasure. I think that it is a cause for particular pride on the part of the people of the United States that they should have been able at the right time to assist in the great struggle in which Italy has so distinguished herself, and I am sure that I speak their heart in thanking your majesty with sincerest warmth for your message and in sending in return the heartfelt salutations of our own people.

WOODROW WILSON.

With Japan.

Tokyo, Nov. 13, 1918.—The President of the United States, Washington: At this juncture when the definite signature of an armistice has set the seal of success on the efforts of the allied arms I cannot forbear telegraphing to you the delight with which I share the satisfaction you must experience at this splendid vindication of the unconquerable persistence displayed by the allies in working together for the attainment of their great end. I would add a special note of admiration shared by all my people for the gallant alacrity and whole hearted efficiency with which the American people entered the arena and thereby so decisively contributed to the magnificent triumph.

YOSHIHITO.

The White House, Nov. 15, 1918.—His Imperial Majesty Yoshihito, Emperor of Japan, Tokyo: Your majesty's message has given us the sincerest pleasure, and I wish in reply to express to you the satisfaction which the people of the United States have felt in being associated with the gallant people of Japan in fighting for the cause of practical justice and genuine liberation of the world from the influence of selfish national policy.

WOODROW WILSON.

Tokyo.—Honorable Robert Lansing, Secretary of State, Washington: Accept my heartiest and warmest congratulations on the triumphant conclusion of an armistice which, we trust, will lead to a peace glorious for the forces of human civilization and fraught with happiness to the world. Such a fruition of the prolonged struggle will not have been too dearly purchased by all the precious lives of whose suffering and sacrifice we think with one universal pride to-day.

UCHIDA.

Nov. 15, 1918.—His Excellency Viscount Uchida, Minister of Foreign Affairs, Tokyo, Japan: I appreciate highly your telegram of congratulation on the triumph of the united strength of human civilization over the baneful forces which aimed to rule the world for themselves alone.

The difficulties which beset us have been overcome. The enemy has been vanquished, and unified as we are by the common ideals for which we have fought, and by the teachings of the trials and sufferings which we have shared, we can now turn with hopeful confidence to the work which remains to be done.

ROBERT LANSING,

Secretary of State.

With China.

Pekin, Nov. 13, 1918.—His Excellency President Woodrow Wilson, Washington: The people of China learn with great joy that the terms of the armistice have been accepted by Germany. Thus the cause of justice and freedom has been vindicated and its final triumph has been won by the allied arms. On behalf of my government and the people of China I hasten hereby to offer to your excellency, and, through you, to the people of the United States, my hearty congratulations and to express my confidence that at the peace conference, which no doubt will soon follow, the delegates of our two countries will continue to work hand in hand for the cause of freedom, justice and fair dealing.

HSU SHIH-CHANG.

The White House, Nov. 15, 1918.—His Excellency Hsu Shih-chang, President of China, Peking, China: Please accept my warmest thanks for your message. I know how ardently and sincerely the people of China are engaged on the side of justice and freedom and it is delightful to feel the influence of their supporting sentiment in these days when the purpose of the whole world must be turned to justice and lasting peace.

WOODROW WILSON.

With Panama.

Panama, Nov. 11, 1918.—His Excellency President Wilson, Washington: Allow me to congratulate your excellency and every American for the brilliant victory obtained by the allied cause with the signing by Germany of the armistice as the prelude of the final crushing of Prussian militarism and triumph of true democracy.

With the assurance of my highest consideration.

BELISARIO PORRAS.

The White House, Nov. 13, 1918.—Hon. Belisario Porras, President Republic of Panama, Panama: I greatly appreciate your excellency's generous message of yesterday and send my warmest greetings to the people of Panama in this time of triumph and relief.

WOODROW WILSON.

With Guatemala.

Guatemala, Nov. 14, 1918.—Honorable Secretary of State, Washington: The government and people of Guatemala most enthusiastically celebrate the splendid victory won by the United States and other allied nations in the noble struggle for justice and liberty. I have the honor in their name to offer to your excellency, the government and people of your friendly nation the most sincere felicitations and the sentiments of sympathy and admiration of Guatemala.

G. AGUIRRE,
Minister of Foreign Relations.

Nov. 16, 1918.—His Excellency G. Aguirre, Minister for Foreign Affairs, Guatemala: I appreciate highly your excellency's telegram giving expression to the joy felt in common by the government and people of Guatemala and the government and people of the United States over the armistice with Austria and Germany. We have now still greater grounds for rejoicing and the mutual interchange of congratulations, for final victory has been won and we can now look forward with confidence to the attainment of the high ideals which have been the inspiration of the powers which opposed the military autocracy of Germany.

ROBERT LANSING,

Secretary of State.

President Wilson to King Albert.

The following cable message dated at the white house Nov. 15, 1918, was sent to King Albert of Belgium by President Wilson:

"Never has a national holiday occurred at a more auspicious moment, and never have felicitations been more heartfelt than those which it is my high privilege to tender to your majesty on this day.

"When facing imminent destruction, Belgium by her self-sacrifice won for herself a place of honor among nations, a crown of glory, imperishable, though all else were lost.

"The danger is averted, the hour of victory come, and with it the promise of a new life, fuller, greater, nobler than has been known before.

"The blood of Belgium's heroic sons has not been shed in vain.

"WOODROW WILSON."

[The national holiday referred to in the president's message is that commemorating the signing of the treaty of London, Nov. 15, 1831, guaranteeing the neutrality of Belgium by Austria, Russia, Great Britain and Prussia—the treaty described by a German statesman in 1914 as merely "a scrap of paper."]

On the occasion of King Albert's entry into Brussels Nov. 22, 1918, President Wilson sent the following congratulatory cable to the Belgian ruler:

"At the moment that you re-enter Brussels at the head of your victorious army may I not express the great joy that it gives to me and to the American people to hail your return to your capital, making your final triumph in this war, which has cost your nation so much suffering but from which it will arise in new strength to a higher destiny?"

OTHER MESSAGES EXCHANGED.*King George to President Wilson.*

(Nov. 11, 1918.)

"At this moment of universal gladness I send you, Mr. President, and the people of your great republic a message of congratulation and deep thanks in my own name and that of the people of this empire.

"It is indeed a matter of solemn thanksgiving that the peoples of our two countries, akin in spirit as in speech, should to-day be united in this greatest of democracy's achievements. I thank you and the people of the United States for the high and noble part which you have played in this glorious chapter of history and freedom."

President Wilson to King George.

"Your generous and gracious message is most warmly appreciated, and you may rest assured that our hearts on this side of the Atlantic are the more completely filled with joy and satisfaction because we know the great partnership of interests and of sentiments to which we belong.

"We are happy to be associated in this time of triumph with the government and people upon whom we are so sure we can count for co-operation in the delicate and difficult tasks which remain before the high purposes of the war may be realized and established in the reign of equitable justice and lasting peace."

E. M. House to Lloyd George.

"Sincere congratulations. No one has done more to bring about this splendid victory than you."

Lloyd George to E. M. House.

"Many thanks for your generous telegram. Nothing contributed more to the victory than the prompt response of the president to the

appeal I made to him for American help in those critical days."

King George to President Wilson.

King George of England on the occasion of the anniversary of the entry of the United States into the war, April 6, 1918, sent the following message to President Wilson:

"On the occasion of the anniversary of the momentous decision of the United States to enter into this war for the safeguarding of international right and justice I desire to convey to you, Mr. President, and through you to the American people, the friendly greetings of the entire British nation.

"At this critical hour, when our enemies are sparing no sacrifice and are counting no cost to achieve victory, the French and British troops stand united, as never before, in their heroic resistance to these endeavors.

"They are buoyed up with the thought that the great democracy of the west, in the same spirit and with the same objects as their own, is putting forth every effort to throw its supreme force into the struggle which will once for all decide the destinies of the free nations of the earth.

"The gallant deeds of Americans on land and sea have already indicated to the enemy that his hope is vain. Every day that passes, as American troops pour in ever increasing numbers into France, diminishes the chances of his success.

"The American people may rest assured that the British empire, now tried by nearly four years of war, will cheerfully make yet further sacrifices. The thought that the United States, under your leadership, is with us heart and soul emboldens us in the determination, with God's help, finally to destroy the designs of the enemy and to re-establish on the earth the rule of right and justice."

Queen Alexandra to American Women.

On the same day Dowager Queen Alexandra sent the following message to the British ambassador, the earl of Reading, with the request that it be transmitted through the press to the women of the United States:

"As president of the British Red Cross society I wish to send to the women of our great ally the United States of America, a message of greeting upon the first anniversary of America's entry into the war. It is my earnest prayer that God in His merciful providence may guide and guard our righteous cause."

President Wilson to Italy.

On the occasion of the third anniversary of Italy's entrance into the war May 24, 1918, President Wilson sent the following message:

"I am sure I am speaking for the people of the United States in sending to the Italian people warm fraternal greetings upon this the anniversary of the entrance of Italy into this great war, in which there is being fought out once for all the irrepresible conflict between free self-government and the dictation of force.

"The people of the United States have looked with profound interest and sympathy upon the efforts and sacrifices of the Italian people, and are deeply and sincerely interested in the present and future security of Italy. They are glad to find themselves associated with a people to whom they are bound by so many personal and intimate ties in a struggle whose object is liberation, freedom, the rights of men and nations to live their own lives and determine their own fortunes; the rights of the weak as well as the strong, and the maintenance of justice by the irresistible force of free nations leagued together in the defense of mankind. With ever increasing resolution and force we shall continue to stand together in this sacred common cause. America salutes the gallant kingdom of Italy and bids her godspeed."

LIST OF SHIPS OF THE UNITED STATES NAVY.

NOTE—Abbreviations: T. S., twin screw; Tr. S., triple screw; S., screw. Where size of guns is expressed in inches, only main battery is given. Where size is expressed in pounds and under four inches vessels have only a secondary battery.

ADDITIONS TO THE NAVY.

The foregoing list of ships of the United States is identical with that printed in The Daily News Almanac and Year-Book for 1917, specific information as to ships built since then being withheld by the government. In a speech in the house of representatives Oct. 14, 1918, Lemuel P. P. Padgett, chairman of the house naval committee, made public many facts and figures relating to the United States navy not previously available outside of official circles. The data were obtained by the congressman from the chiefs of bureaus in the navy department. The bureau of construction and repair reported:

On April 1, 1917, there were building and authorized for the navy the following vessels:

Battle ships	12
Battle cruisers	5
Scout cruisers	7
Destroyers	27
Submarines	61
Fuel ships	2
Supply ship	1
Transport	1
Garboat	1
Hospital ship	1
Ammunition ship	1

Since the declaration of war (April 6, 1917) the following vessels have been contracted for or ordered built at navy yards:

Destroyers	253
Submarines	58
Mine sweepers	54
Sea-going tugs	27
Harbor tugs	46
Fabricated patrol vessels	112
Submarine chasers	447

Since the declaration of war the following vessels have been added to the navy:

Battle ships	2
Destroyers	30
Submarines	25
Mine sweepers	12
Supply ship	1
Transport	1
Sea-going tugs	2
Submarine chasers	405

In addition to the above, thirty-six interned German ships have been repaired and fitted for service; about 1,000 privately owned vessels (including eighty-three Dutch ships) have been purchased or chartered and have been or are being fitted for naval use, and orders are out to commission 112 more when they have been completed; about 107 vessels have been turned over to the navy by other government departments. Of the above mentioned vessels about 740 have been put into naval service proper, including offshore and inshore patrol work, troop-transport duty, fleet fueling or provisioning, hospital, and other service, and about 300 have been put into naval overseas transportation service. Congressman Padgett declared that the United States in October, 1918, had 1,800 vessels in full commission, or nearly six times as many as were on the naval lists in 1916.

NAVAL PERSONNEL.

Describing the growth of the navy in officers and men Mr. Padgett said:

"There are now 600,000 officers and men in the naval service, including marines—more than were in all the navies in the world when the European war began. Before the break with Germany, in January, 1917, the navy had a total of 53,000 officers and men and the marine corps fewer than 12,000. In the weeks following recruiting was active

and when the president, in March, issued the order for the increase to the full authorized strength recruits poured in, so that when a state of war was declared April 6, 1917, there were 64,680 enlisted men and 4,366 officers in the regular navy, totaling 69,046, and 13,266 enlisted men and 426 officers in the marine corps, totaling 13,692. Some 10,000 men had been enrolled in the naval reserve force, which a few months before had comprised only a few hundreds. The naval reserves were called into service; the naval militia, 10,000 officers and men, were mustered in as national naval volunteers; and the coast guard, with its 5,000, came under the operation of the navy for the period of the war, as provided by law. This gave us a total force of approximately 100,000 upon our entrance into the war."

The following table shows the strength of the various branches of the service in October, 1918:

Service.	Men.	Officers.	Total.
Regular navy.....	218,322	9,411	227,733
Naval reserve force.....	270,424	19,619	290,043
Marine corps.....	66,105	2,271	68,376
Coast guard.....	6,106	865	6,971

Total officers and men....560,957 31,966 592,923

WORK OF U. S. NAVY IN THE WAR.

Owing to the veil of secrecy thrown over the operations of the United States navy the wide scope of its work during the war is as yet not fully known. Much of its labor consisted, of course, in patrolling the coasts of the United States, Great Britain and France, and in conveying American troops to and from Europe. In this task the navy made a record which has never been equaled before in history. In European waters American battle ships, cruisers and smaller ships united with the British fleet and were at all times prepared to meet the enemy had he dared to offer battle.

In addition to this the American navy had an important part in the work of laying down mine barrages in the northern waters of the Atlantic ocean and the North sea. Several bases were established on the British coast for this work. On the continent the navy had a large personnel ashore with many stations on the western coast of France for the repair of ships and other purposes.

On returning from a visit to the American naval bases and stations overseas in the latter part of October, 1918, Assistant Secretary of the Navy Franklin D. Roosevelt made these facts known, adding:

"We are building a pipe line clear across Scotland through which oil can be pumped from the west to the east coast, thus saving a tremendous length of haulage in supplying vessels in that quarter with fuel oil.

"All the way from the Spanish border clear around to the English channel we have established aviation stations so spaced that the entire coast line is covered by seaplanes and dirigibles. Nearly all these stations, are located at out of the way points, some placed on uninhabited islands, others in fishing vessels on peninsulas. Labor was almost impossible to obtain, so these stations were built almost entirely by our own sailors. At each station there is an average of from 200 to 300 men. This aviation force and our patrol vessels have been doing such splendid work that for the past six months there have been practically no sinkings within fifty miles of the French coast. We have on one of the lakes close to the coast a large aviation school for bombing practice and the general training of aviators. At one point we have an immense assembly and repair base which employs over 5,000 men.

"In northern France, in co-operation with the British and the Belgians, we established what is known as the northern bombing group, composed of a number of aviation

units. This was organized originally for bombing submarine bases on the Belgian coast. It was in active operation all summer and did much to prevent the use of Zeebrugge and Ostend by the Germans. After the British had blockaded the entrance to those harbors Germans were prevented from clearing the channel because of the constant activity of these aviators, who daily and nightly dropped tons of explosives on the German submarine bases.

"We have a considerable naval force at Gibraltar which, acting in conjunction with the British, is not only patrolling the Atlantic in that vicinity, but is also active in the Mediterranean, escorting vessels going to and coming from Italy, Greece and Egypt. In Italy we have a flying school and several units on duty. In the Adriatic we have a large group of submarine chasers and other vessels at work. You know of the good work some of these did in the destruction of the Austrian naval base at Durazzo. They have been particularly active in mining operations and in the construction of the barrage across the Adriatic.

"In the Azores we have established a considerable base in conjunction with the Portuguese. An efficient patrol is maintained around the islands, and we have at the base repair facilities which are very useful for vessels touching at this convenient stepping stone on the way across the Atlantic.

"We have a large number of naval hospital units abroad. There is a hospital at every base, and in Scotland we have practically taken over an entire watering place, whose hotels and bathhouses have been converted into immense hospitals. There we not only care for our own sick and casualties, but also those of the British in that vicinity.

"There seems to be a very general misapprehension, in France as well as in this country, as to the part taken by our navy in transporting troops and supplies to France. Every troop transport that flies the United States flag is officered, manned and run by the United States navy. Much the larger portion of army supplies taken over in American vessels are in ships officered and manned by the navy."

NAVAL TRAINING STATIONS.

Regular naval training stations: Newport, R. I.; Norfolk, Va.; Great Lakes, Ill.; San Francisco, Cal.

Depots at which "general detail" men, including graduates of training stations, are further trained while awaiting assignment to ships: Portsmouth, N. H.; Boston, Mass. (Commonwealth pier); New York navy yards; Philadelphia navy yard; Charleston, S. C.; Pensacola, Fla.; Key West, Fla.; New Orleans, La.; Gulfport, Miss. (projected); San Diego, Cal.; Mare Island navy yard; Puget Sound navy yard.

Training establishments for reserves and national naval volunteers: Portsmouth (N. H.) navy yard; Bumkin Island, Boston harbor; Newport, R. I.; Bensonhurst, L. I.; Pelham Bay park, N. Y.; U. S. S. Iowa, Indiana, Massachusetts (Delaware river); Cape May, N. J.; steamship Bulgaria, Norfolk navy yard; Cherrystone Island, Va.; Charleston (S. C.) navy yard; Key West, near navy yard; New Orleans navy yard; Municipal dock, Los Angeles (San Pedro harbor); State university grounds, Seattle, Wash.; steamship Commodore and Grant Park camp, Chicago.

In addition men on active service at or operating from the numerous section headquarters of the naval defense districts may be considered undergoing training. A list of these district headquarters follows:

First district—Machias, Bar Harbor, Rockland, Bath, Portland, Portsmouth, Boston, Provincetown.

Second—Newport, New Bedford, New London.

Third—New Haven, Bridgeport, Port Jefferson, Montauk, Fort Lafayette, Whitestone, Fire Island, Sandy Hook.
 Fourth—Cape May City, Lewes.
 Fifth—Baltimore, Washington, Cape Charles City, Norfolk, Beaufort.
 Sixth—Wilmington, Georgetown, Charleston, Port Royal, Savannah, Brunswick, Ferdinand, Jacksonville.
 Seventh—St. Augustine, Miami, Knights Key, Key West, Dry Tortugas, Tampa.
 Eighth—Pensacola, New Orleans, Galveston.
 Twelfth—San Francisco, San Pedro, San Diego.
 Thirteenth—Astoria, Aberdeen, Puget Sound navy yard, Sitka.

MARINE CORPS TRAINING STATIONS.
 Recruit training stations—Marine barracks, Paris Island, S. C. (permanent); marine barracks, Mare Island, Cal. (permanent); marine barracks, Philadelphia, Pa. (temporary); marine barracks, Norfolk, Va. (temporary).
 Advanced training stations—Marine barracks,

Quantico, Va.; marine barracks, Norfolk, Va.; marine barracks, Philadelphia, Pa.; marine barracks, San Diego, Cal.; marine corps rifle range, Wintthrop, Md.
 Marine barracks, Quantico, Va.—A large tract of land was leased here soon after the beginning of the war and buildings have been constructed to accommodate about 6,500 men. The greater proportion of recruits from the training stations are transferred here, where they are organized into companies, regiments, etc., and more advanced training given under war conditions.
 Marine barracks, Philadelphia, Pa.—At this post are stationed organizations of the advanced base force, where the men are trained in technical branches, such as aviation, submarine mines, signal corps work, engineering, heavy guns, etc.
 Marine barracks, San Diego, Cal.—Companies organized on the west coast are sent to San Diego for advanced training.
 Marine barracks, Norfolk, Va.—Detachments for duty at sea are trained at this port.

OFFICERS OF THE NAVY AND MARINE CORPS.

Commander in Chief—President Woodrow Wilson.
 Secretary of the Navy—Josephus Daniels.
 Assistant Secretary of the Navy—Franklin D. Roosevelt.
 Chief of Naval Operations—Admiral William S. Benson.

GERMAN SHIPS IN UNITED STATES SERVICE.

When the United States declared war on Germany, April 6, 1917, the large number of German liners and merchant ships which had been interned in American ports were seized. All of them had been damaged more or less seriously, but repairs were effected as speedily as possible. The larger and faster ships, which were placed in commission as part of the navy, were given new names. The list follows:

German name.	American name.
Vaterland	U. S. S. Leviathan.
Amerika	U. S. S. America.
Andromeda	U. S. S. Bath.
Barbrossa	U. S. S. Mercury.
Breslau	U. S. S. Bridgeport.
Cincinnati*	U. S. S. Covington.
Frieda Leonhart	U. S. S. Astoria.
Friedrich der Grosse	U. S. S. Huron.
Geiert	U. S. S. Schurz.
George Washington	U. S. S. George Washington.
Grosser Kurfurst	U. S. S. Aolus.
Grunewald	U. S. S. Gen. George W. Goethals.
Hamburg	U. S. S. Powhatan.
Hermes	U. S. S. Hermes.
Hohenfelde	U. S. S. Long Beach.
Kiel	U. S. S. Camden.

German name.	American name.
Kaiser Wilhelm II.	U. S. S. Agamemnon.
Koenig Wilhelm II.	U. S. S. Madawaska.
Kronprinz Wilhelm	U. S. S. von Steuben.
Kronprinzessin Cecilie	U. S. S. Mount Vernon.
Liebenfels	U. S. S. Houston.
Locksun	U. S. S. Gulfport.
Neckar	U. S. S. Antisone.
Necaria	U. S. S. Pensacola.
Odenwald	U. S. S. Newport News.
Praesident	U. S. S. Kittery.
Praesident Grant	U. S. S. President Grant.
Praesident Lincoln*	U. S. S. President Lincoln.
Prinzess Irene	U. S. S. Pocahontas.
Prinz Eitel Friedrich	U. S. S. Dekalb.
Rhein	U. S. S. Susquehanna.
Rudolph Blumberg	U. S. S. Beaufort.
Saxonia	U. S. S. Savannah.
Staatssekretar Solf	U. S. S. Samoa.
Vogensen	U. S. S. Quincy.

Repaired by Shipping Board.

The ships taken over and repaired by the shipping board, with their German and American names, are as follows:

German name.	American name.
Allemania	Owasco.
O. J. D. Ahlers	Monticello.

German name.	American name.	German name.	American name.
Adamsturm	Actæon.	Loongmoon	Coosa.
Arnallas Vinnon	Chillicothe.	Lyeemoo	Quantico.
Atlas	(No name.)	Magdeburg	Neuse.
Armenia	(No name.)	Mark	Suwanee.
Arcadia	(No name.)	Mia	Oconee.
Andalusia	(No name.)	Mattador	Montauk.
Adelheid	(No name.)	Marudu	Yazoo.
Bulgaria	(No name.)	Nassovia	Isonomia.
Borneo	Nipsic.	Neptun	Minnow.
Bohemia	Artemis.	Ottawa	Muscoota.
Bochum	Montpelier.	Olivant	(No name.)
Bavaria	(No name.)	Ockenfels	Pequot.
Calabria	(No name.)	Prinz Eitel Friedrich (Hamburg-American Line)	Oswego.
Carl Diederichsen	Baritan.	Prinzess Alice	Matoika.
Clara Jebens	Tioqa.	Pennsylvania	Manasemond.
Clara Mennig	Yodkin.	Pisa	Ascutney.
Coblenz	Sachem.	Pongtong	Quinnebaug.
Constantia	(No name.)	Portonia	Yucca.
Dobek	Monongahela.	Prinz Joachim	Moccasin.
Darvel	Wamsutta.	Prinz Oskar	Orion.
Elmshorn	Casco.	Prinz Sigismund	Gen. Gorgas.
Elsass	Appelas.	Prinz Waldemar	Wacouta.
Esslingsen	Nyanza.	Pommern	Rappahannock.
Farn Geraux.	Farn Geraux.	Rajah	Rajah.
Gouverneur Jaeschke	Watoqa.	Rheatia	Black Hawk.
Holsatia	Tippecanoe.	Sachsen*	Gaaitahocchee.
Harburg	Pawnee.	Sachsenwald	Gen. Ernst.
Indra	Tonawanda.	Sambia	Tunica.
Johanne	Iosco.		
Köln	Amphion.		
Kurt	Mochulu.		

*Subsequently torpedoed and sunk. †Sunk in collision.

WARSHIP TONNAGE OF PRINCIPAL NAVAL POWERS.

Number and displacement of warships, built and building, of 1,500 or more tons, and of torpedo craft of more than fifty tons. From table prepared by the office of naval intelligence, United States navy department, July 1, 1914. Owing to the war in Europe no later official information relating to the navies of the belligerent powers is available. It may be noted that while some of these powers have lost many ships they have continued building new ones. Information, so far as permissible, is given elsewhere in this volume as to the present status of the United States navy.

LAW TO EXCLUDE ANARCHISTS.

The following bill to exclude and expel from the United States aliens who are members of anarchistic and similar classes was passed by congress and approved Oct. 16, 1918:

"Be it enacted, etc., That aliens who are anarchists; aliens who believe in or advocate the overthrow by force or violence of the government of the United States or of all forms of law; aliens who disbelieve in or are opposed to all organized government; aliens who advocate or teach the assassination of public officials; aliens who advocate or teach the unlawful destruction of property; aliens who are members of or affiliated with any organization that entertains a belief in, teaches, or advocates the overthrow by force or violence of the government of the United States or of all forms of law, or that entertains or teaches disbelief in or opposition to all organized government, or that advocates the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the government of the United States or of any other organized government, because of his or their official character, or that advocates or teaches the unlawful destruction of property shall be excluded from admission into the United States.

"Sec. 2. That any alien who, at any time after entering the United States, is found to have been at the time of entry or to have become thereafter, a member of any one of the classes of aliens enumerated in section 1 of this act, shall, upon the warrant of the secretary of labor, be taken into custody and deported in the manner provided in the immigration act of Feb. 5, 1917. The provisions of this section shall be applicable to the classes of aliens mentioned in this act irrespective of the time of their entry into the United States.

"Sec. 3. That any alien who shall, after he has been excluded and deported or arrested and deported in pursuance of the provisions of this act, thereafter return to or enter the United States or attempt to return to or to enter the United States shall be deemed guilty of a felony, and upon conviction thereof shall be punished by imprisonment for a term of not more than five years; and shall, upon the termination of such imprisonment, be taken into custody, upon the warrant of the secretary of labor, and deported in the manner provided in the immigration act of Feb. 5, 1917."

In a report recommending the adoption of the foregoing act the house committee on immigration and naturalization explained its purpose in this way:

"Under section 19 of the act of Feb. 5, 1917, aliens who were members of the anarchistic classes at the time of entering the United States cannot be deported after they have been in this country for five years; and it is only those who may be found advocating or teaching anarchy, or overthrow of government, or assassination of public officials, or unlawful destruction of property that can be deported at any time after entry. This limitation upon the power to deport has proved a serious handicap to the department of labor, as it has been found that many of the most implacable and seditious enemies of our government, especially since war was declared, are aliens of the anarchistic classes who have been here for more than five years. With a view to getting rid of such marplots it is desirable that the time limit shall be removed altogether, and that the law shall be retroactive as to such aliens, as section 2 of the bill now reported is."

NUMBER OF THE STARS.

According to the best astronomers the number of stars that can be seen by the unaided eye is only about 7,000. The number visible through the telescope has been estimated by J. E. Gore at 70,000,000 and by Profs. Newcomb and Young at 100,000,000.

UNITED STATES MILITARY ACADEMY.

West Point, N. Y.

The United States military academy is a school for the practical and theoretical training of cadets for the military service of the United States. When any cadet has completed the course of

four years satisfactorily he is eligible for promotion and commission as a second lieutenant in any arm or corps in the army in which there may be a vacancy, the duties of which he may have been judged competent to perform.

Appointments—Each congressional district and territory, including Porto Rico, Alaska and Hawaii, is entitled to have two cadets at the academy. The District of Columbia has two. Each state is also entitled to have four cadets from the state at large and eight are allowed from the United States at large. The president is also authorized to appoint not to exceed 180 men from the regular army and national guard who have served for one year. The total number in the academy in September, 1918, was 683. The appointments from a congressional district are made upon the recommendation of the representative in congress from that district and those from the state at large upon the recommendations of the senators of the state. The appointments for the United States at large are made by the president upon his own selection. The appointments from the District of Columbia are made on the recommendation of the district commissioners, and that from Porto Rico on the recommendation of the resident commis-

sioner. Appointments are made one year in advance of admission. For each candidate appointed two alternates should be nominated. Four cadets from the Philippines are admitted.

Examinations—On the second Tuesday in January of each year the candidate selected for appointment must appear for mental and physical examination before boards of army officers at such places as the war department may designate. Candidates who pass will be admitted to the academy on March 1 following.

Mental Requirements—Each candidate must show that he is well versed in algebra, to include quadratic equations and progressions, plane geometry, English grammar, composition and literature, descriptive and physical geography and general and United States history.

Physical Requirements—No candidate will be admitted who is under 16 or over 20 years of age, or less than five feet four inches in height at the age of 17, or five feet five inches at the age of 18 and upward, or who is deformed or afflicted with any disease or infirmity which would render him unfit for military service. Candidates must be unmarried.

Pay—The pay of a cadet is \$600 a year and one ration a day, or commutation therefor at 30 cents a day. The total is \$709.50, to begin with his admission to the academy. No cadet is allowed to receive money or other supplies from his parents or from any other person without the sanction of the superintendent.

Enlistment—Before receiving his warrant of appointment a candidate for admission is required to sign an agreement to serve in the army of the United States eight years from the time of his admission to the academy.

UNITED STATES NAVAL ACADEMY.

Annapolis, Md.

The United States naval academy is a school for the practical and theoretical training of young men for the naval service of the United States. The students are styled midshipmen. The course

of study is six years—four years at the academy and two years at sea—at the expiration of which time the examination for final graduation takes place. Midshipmen who pass are appointed to fill vacancies in the lower grade of the line of the navy and occasionally to fill vacancies in the marine corps and in certain of the staff corps of the navy.

Appointments—Five midshipmen are allowed for each senator, representative and delegate in congress, two for the District of Columbia, fifteen each year from the United States at large and 100 from enlisted men of the navy. The appointments from the District of Columbia and from enlisted men of the navy are made by the president. One midshipman is allowed from Porto Rico, who must be a native of that island. The appointment is made by the president on the recommendation of the governor of Porto Rico. Candidates must be actual residents of the districts from which they are nominated.

Examinations—Two examinations for the admission of midshipmen are held each year. The first is held on the third Tuesday in April under the supervision of the civil service commission at certain specified points in each state and territory. All those qualifying mentally, who are entitled to appointment in order of nomination, will be notified by the superintendent of the

naval academy when to report at the academy for physical examination, and if physically qualified will be appointed. The second and last examination is held on the third Tuesday in June at Annapolis, Md. Alternates are given the privilege of reporting for mental examination at the same time as the principals. Examination papers are all prepared at the academy and the examinations of candidates are finally passed upon by the academic board. Certificates from colleges and high schools will not be accepted in lieu of the entrance examinations at the naval academy.

Mental Requirements—Candidates will be examined in punctuation, spelling, arithmetic, geography, English grammar, United States history, world's history, algebra through quadratic equations and plane geometry (five books of Chauvenet's geometry or an equivalent).

Physical Requirements—All candidates must, at the time of their examination for admission, be between the ages of 16 and 20 years. A candidate is eligible for appointment the day he becomes 16 and is ineligible on the day he becomes 20 years of age. Candidates are required to be of good moral character, physically sound, well formed and of robust constitution. The height of candidates for admission must not be less than five feet two inches between the ages of 16 and 18 years, and not less than five feet four inches between the ages of 18 and 20 years. The minimum weight at 16 years is 105 pounds, with an increase of five pounds for each additional year or fraction of a year over one-half. Candidates must be unmarried.

Pay—The pay of a midshipman is \$600 a year, beginning at the date of his admission. Midshipmen must supply themselves with clothing, books, etc., the total expense of which amounts to \$280.64. Traveling expenses to the academy are paid by the government.

Enlistment—Each midshipman on admission is required to sign articles by which he binds himself to serve in the United States navy eight years (including his time of probation at the naval academy).

ARMY OF THE UNITED STATES.

Commander-in-Chief—President Woodrow Wilson.
 Secretary of War—Newton D. Baker.
 Assistant Secretary of War—William M. In-
 gram.
 Assistant Secretary—Benedict Crowell.
 Second Assistant Secretary—Edward R. Stet-
 tinus.
 Third Assistant Secretary—Frederick P. Kep-
 pel.
 Assistant and Chief Clerk—John C. Schofield.

GENERAL OFFICERS.

Generals.

John J. Pershing. Peyton C. March.
 Tasker H. Bliss.

Lieutenant-Generals.

Hunter Liggett. Robert L. Bullard.

Major-Generals, Etc.

The names of the major-generals and brig-
 adier-generals connected with the American
 1st army in France are given elsewhere. There
 was such a constant change in rank in the
 way of promotion in 1918 that it has been
 found impracticable to name all holding these
 ranks in the military service of the United
 States. Many of those advanced in rank for
 the emergency with the coming of peace
 will revert to their original rank if in the
 regular army.

CHIEFS OF BUREAUS, ETC.

Following is a list as it stood Nov. 13, 1918,
 of the officers and civilians who directed
 the complicated machinery of the war de-
 partment in motion during the most critical
 period of the war.

Adjutant-General—Maj. Gen. Peter C. Harris.
 Industrial Furlough Section—Darragh De
 Lancy, chief.
 Aircraft Production—John D. Ryan, director.
 Chemical Warfare Service—Maj.-Gen. W. L.
 Sibert, chief.
 Board of Review—Francis Blossom, chairman.
 Coast Artillery—Maj.-Gen. Frank W. Coe, chief.
 Construction Division—Brig.-Gen. Richard C.
 Marshall, chief.
 Depot Quartermaster—Col. L. C. Scherer.
 Engineer Corps—Maj.-Gen. W. M. Black, chief.
 Field Artillery—Brig.-Gen. Wm. J. Snow, chief.
 General Staff—Gen. Peyton C. March, chief.
 Principal Assistant—Maj.-Gen. Frank C. Mc-
 Intyre.
 Assistant Chief—Maj.-Gen. G. W. Goethals.
 Military Intelligence—Brig.-Gen. M. Churchill,
 chief.
 Morale Branch—Brig.-Gen. E. L. Munson,
 chief.
 Operations Division—Maj.-Gen. Henry Jervey,
 director.
 Executive Officer—Col. James G. Stease.
 Personnel Branch—Brig.-Gen. P. P. Bishop,
 in charge.
 Procurement Section—Lieut.-Col. Jay L.
 Benedict, chief.
 Purchase, Storage and Traffic Division—Maj.-
 Gen. George W. Goethals, director.
 Finance Division—Herbert M. Lord, director.
 Accounts Branch—Lieut.-Col. S. H. Wolfe.
 Administrative Branch—R. O. Kloeber.
 Disbursement Branch—Col. Perrin L. Smith.
 Deposits and Allotment Branch—Lieut.-Col.
 Edward Clifford.
 Finance Control Branch—George E. Frazer.
 Purchase and Storage—Brig.-Gen. R. E.
 Wood, director.
 Executive Officer—Lieut.-Col. B. L. Jacob-
 son.
 Statistical Division—Maj. E. J. Fowler.
 Surplus Stock Division—L. H. Hartman.
 Purchase Division—Maj.-Gen. Wm. Rose.
 Clothing and Equipage—Malcolm Donald,
 chief.
 General Supplies Division—W. A. Graham,
 chief.
 Machinery and Engineering Materials—Lieut.-
 Col. Earl Wheeler, chief.

Medical and Hospital Supplies Division—Col.
 C. R. Darnall, chief.
 Motors and Vehicles—Col. Fred Glover.
 Raw Materials—Col. George E. Warran, chief.
 Remount Purchase Division—Col. Letcher
 Hardeman.
 Requirements Division—Maj. J. R. Orton.
 Storage Division—Col. F. B. Wells, director.
 Administrative Division—W. R. De Field,
 chief.
 Domestic Distribution—Lieut.-Col. J. F.
 Plummer.
 Domestic Operations—Lieut.-Col. G. M. Mc-
 Connell.
 Overseas Distribution Division—Lieut.-Col.
 Tyssowski, chief.
 Port Operation Division—Col. G. E. Hum-
 phreys.
 Salvage Division—Philip E. Wrenn.
 Traffic Division (Embarkation)—Brig.-Gen.
 F. T. Hine.
 Inland Transport—H. M. Adams, director.
 Real Estate and Rental Board—Maj. C. F.
 Cooke.
 War Plans, Army War College—Brig.-Gen. Lytle
 Brown.
 Training and Instruction—Col. R. J. Fleming.
 Education and Special Training Committee—
 Col. R. I. Rees.
 Business Department—E. K. Hall, manager.
 Civilian Advisory Board—Dr. C. R. Mann,
 chairman.
 Educational Department—Dr. C. R. Mann,
 director.
 College Training Division—Dr. R. C. Mac-
 Lauren, director.
 War Aims Section—Dr. Frank Aydelotte.
 Vocational Training Division—C. R. Dovsky.
 Military Administration (Training Depart-
 ment)—Col. G. Clark, executive officer.
 Housing and Health Divisions—Capt. Julius I.
 Peysler, chief.
 Inspector General, Office of—Maj.-Gen. John
 L. Chamberlain.
 Insular Affairs—Maj.-Gen. Frank McIntyre,
 chief.
 Brig.-Gen. Chas. C. Walcutt, Jr., acting chief.
 Invention Board—Col. C. H. Hilton.
 Judge-Advocate General—Maj.-Gen. E. H.
 Crowder.
 Military Aeronautics—Maj.-Gen. W. L. Kenly.
 Military Bureau—Brig.-Gen. J. W. Heavey,
 acting chief.
 Motor Transport Corps—Col. Charles B. Drake,
 chief.
 Nitrate Commission—Dr. Arthur A. Noyes,
 chairman.
 Ordnance and Fortification, Board of—T. M.
 McKee, secretary.
 Ordnance Department—Gen. Clark C. Williams,
 acting chief.
 Administration Division—Col. W. W. Gibson,
 chief.
 Arsensals, Director of—Brig.-Gen. John L.
 Thompson.
 Engineering Division—Brig.-Gen. J. W. Burr,
 chief.
 Estimates and Requirements Division—Col. J.
 F. Crabb, chief.
 Information Division—Maj. H. E. Atterbury,
 chief.
 Inspection Division—Col. H. W. Schull, acting
 chief.
 Metallurgical Committee—Dr. G. W. Sargent.
 Nitrate Division—Col. John W. Joves, chief.
 Procurement Division—Col. Robert P. La-
 mont, chief.
 Supply Division—Col. J. C. Hickman.
 Panama Canal—A. L. Glint, general purchas-
 ing officer and chief.
 Provost Marshal General—Maj.-Gen. E. H.
 Crowder.
 Quartermaster General—Brig.-Gen. Robert E.
 Wood, acting.
 Assistant to Acting Quartermaster General—
 Col. R. M. Schofield.
 Bakery Organizations Branch—Capt. James
 Casselberry.

Cemeterial Branch—Maj. H. R. Lemley.
 Civilian Personnel Branch—Maj. Franklin D. Shawn.
 Commissioned Personnel—Maj. Henry O. Benson.
 Departmental Personnel Branch—Capt. E. A. Farrell.
 Enlisted Personnel—Maj. Charles W. Diets.
 Labor Organization Branch—Col. William G. Austin.
 Office Service Branch—Maj. A. A. Cedarwald.
 Remount Operating Branch—Col. L. Hardman.
 Signal Corps—Maj.-Gen. G. O. Squire.
 Surgeon-General-Major—Gen. M. W. Ireland.
 Tank Corps—Col. Ira C. Welborn, director.
 War Credits Board—Lieut.-Col. W. H. Thompson, president.

RANK OF GENERAL.

The rank of general in the United States army has been held by the following:
 George Washington. John J. Pershing.
 Ulysses S. Grant. Tasker H. Bliss.
 William T. Sherman. Peyton C. March.
 Philip H. Sheridan.

RANK OF LIEUTENANT-GENERAL.

The rank of lieutenant-general in the United States army has been held by the following:
 George Washington. Samuel B. M. Young.
 Ulysses S. Grant. Adna R. Chaffee.
 William T. Sherman. John C. Bates.
 Philip Sheridan. Henry C. Corbin.
 John M. Schofield. Hunter Liggett.
 Nelson A. Miles. Robert L. Bullard.

THE AMERICAN FIRST ARMY AT THE FRONT.

Though America had three armies fully organized on the western battle front in Europe before the war came to an end, the 1st army saw the bulk of the fighting, and because of this and for historical purposes the officers and units composing its corps, divisions, brigades and regiments are given herewith in detail. It may be said that after the 2d and 3d armies were organized the complexion of the 1st army was changed to a large extent but as it existed in September, 1918, during some of the most fearful days of the great conflict, it was constituted as shown in the appended list:

GENERAL OFFICERS.

Commander-in-Chief—Gen. John J. Pershing.
 Chief of Staff—Lieut.-Col. Hugh A. Drum.
 Assistant Chiefs—Col. Robert McCleave, Lieut.-Col. Jens Bugge, Lieut.-Col. Willey Howell, Lieut.-Col. John L. DeWitt and Lieut.-Col. Lewis H. Watkins.
 Chief of Artillery—Maj.-Gen. Edward F. McClachlin.
 Adjutant-General—Col. Joseph F. Barnes.
 Inspector-General—Col. Jacob C. Johnson.
 Judge Advocate—Lieut.-Col. Blanton Winship.
 Chief Quartermaster—Maj. George Luberoff.
 Chief Surgeon—Col. Alexander N. Stark.
 Chief Engineer—Brig.-Gen. J. J. Morrow.
 Chief Signal Officer—Lieut.-Col. Parker Hitt.
 Chief Ordnance Officer—Col. Edward P. O'Hern.
 Chief of Motor Transport Corps—Col. William H. Winters.
 Chief of Air Service—Col. William Mitchell.

FIRST ARMY CORPS.

Maj.-Gen. Hunter Liggett commanding.
 First division, regular army.
 Second division, regular army.
 Twenty-sixth division, national guard (New England).
 Thirty-second division, national guard (Michigan and Wisconsin).
 Forty-first division, national guard (Washington, Oregon, North Dakota, South Dakota, Colorado, New Mexico, Montana, Idaho, Wyoming and Minnesota).
 Forty-second division, national guard (Rainbow, troops from twenty-six states).

First Division.

Maj.-Gen. Charles P. Summerall commanding.
 Lieut.-Col. Campbell King, chief of staff.
 Maj. H. K. Loughry, adjutant-general.
 First brigade of infantry (Maj.-Gen. John L. Hines commanding)—16th regiment of infantry, Col. R. C. Langdon; 18th regiment of infantry, Lieut.-Col. R. G. Rutherford; 2d machine gun battalion, Lieut.-Col. E. H. Houghton.
 Second brigade of infantry (Maj.-Gen. Beaumont B. Buck commanding)—26th regiment of infantry, Col. W. A. Burnside; 28th regiment of infantry, Lieut.-Col. Jesse M. Cutler; 3d machine gun battalion, Maj. Chester A. Davis.

First brigade of field artillery—5th regiment of field artillery, Lieut.-Col. Walter S. Sturgill; 6th regiment of field artillery, Col. E. D. Scott; 7th regiment of field artillery, Lieut.-Col. Charles W. Harlow; 1st trench mortar battery, Capt. Otis H. Hill.
 Engineer troops—1st regiment of engineers, Col. Francis B. Wilby.
 Signal troops—2d field signal battalion, Maj. Richard B. Paddock.
 Division units—1st division headquarters troop, Capt. Ralph I. Sasse; 1st machine gun battalion.

Second Division (U. M. C.).

Brig.-Gen. John E. LeJeune commanding.
 Brig.-Gen. Preston Brown, chief of staff.
 Second brigade of infantry (Brig.-Gen. Hanson E. Ely commanding)—9th regiment of infantry, Lieut.-Col. Ralph B. Lister; 23d regiment of infantry, Lieut.-Col. M. C. Corey; 5th machine gun battalion, Maj. D'Alary Fechet.
 Fourth brigade of infantry, marines (Brig.-Gen. John E. LeJeune commanding)—5th regiment of marines, Brig.-Gen. A. W. Catlin; 6th regiment of marines, Col. Hiram Bearse; 6th machine gun battalion (marines).
 Second brigade of field artillery (Brig.-Gen. A. J. Bowley commanding)—12th regiment of field artillery, Maj. Edwin M. Watson; 15th regiment of field artillery, Lieut.-Col. Joseph P. Davis; 17th regiment of field artillery, Maj. William A. Pendleton, Jr.; 2d trench mortar battery, Capt. Percy D. Betts.
 Engineer troops—2d regiment of engineers, Col. William A. Mitchell.
 Signal troops—1st field signal battalion, Maj. Frank K. Chapin.
 Division units—2d division headquarters troops, Capt. V. E. Prichard; 4th machine gun battalion.

Twenty-Sixth Division.

Maj.-Gen. Clarence R. Edwards commanding.
 Lieut.-Col. Cassius M. Dowell, chief of staff.
 Maj. Charles A. Stevens, adjutant-general.
 Fifty-first brigade of infantry (Brig.-Gen. George H. Shelton commanding)—102d regiment of infantry, Col. E. L. Logan; 102d regiment of infantry, Col. J. H. Parker; 102d machine gun battalion, Maj. John D. Murphy.
 Fifty-third brigade of infantry (Brig.-Gen. C. H. Cole commanding)—103d regiment of infantry, Col. F. M. Hume; 104th regiment of infantry, Lieut.-Col. Alfred F. Foote; 103d machine gun battalion, Maj. Arthur Ashworth.
 Fifty-third brigade of field artillery (Brig.-Gen. D. E. Aultman commanding)—101st regiment of field artillery, Lieut.-Col. Richard K. Hale; 102d regiment of field artillery, Col. M. E. Locke; 103d regiment of field artillery, Lieut.-Col. E. S. Chaffe; 101st trench mortar battery, Capt. Roger A. P. Greene.

Engineer troops—101st regiment of engineers, Col. George W. Bunnell.
Signal troops—101st field signal battalion, Maj. Paul W. Evans.
Division units—26th division headquarters troop, Capt. Bertrand W. Ashby; 101st machine gun battalion, Maj. James L. Howard.

Thirty-Second Division.

Maj.-Gen. W. G. Haan commanding.
Lieut.-Col. Allen L. Briggs, chief of staff.
Maj. John H. Howard, adjutant-general.
Sixty-third brigade of infantry (Brig.-Gen. William D. Connor commanding)—125th regiment of infantry, Col. R. B. McCoy; 126th regiment of infantry, Col. J. B. West-nedge; 120th machine gun battalion, Maj. David E. Cleary.
Sixth-fourth brigade of infantry (Brig.-Gen. E. B. Winans commanding)—127th regiment of infantry, Lieut.-Col. P. J. Zink; 128th regiment of infantry, Col. John Turner; 121st machine gun battalion, Maj. Stanley E. Piasecki.

Fifty-seventh brigade of field artillery (Brig.-Gen. G. Leroy Irwin commanding)—119th regiment of field artillery, Col. C. B. McCormick; 120th regiment of field artillery, Col. Carl Penner; 121st regiment of field artillery, Col. P. C. Westfahl; 107th trench mortar battery, Capt. Otto A. Miller.

Engineer troops—107th regiment of engineers, Lieut.-Col. Luke H. Callam.
Signal troops—107th field signal battalion, Maj. William M. Lewis.
Division units—32d division headquarters troop, Capt. Walter N. Gaudynski; 119th machine gun battalion, Maj. Frank H. Fowler.

Forty-First Division (Sunset).

Maj.-Gen. Robert Alexander commanding.
Col. Harry H. Tebbetts, chief of staff.
Maj. Herbert H. White, adjutant-general.
Thirty-first brigade of infantry (Brig.-Gen. Wilson B. Burtt commanding)—161st regiment of infantry, Col. William M. Inglis; 162d regiment of infantry, Col. John L. May; 147th machine gun battalion, Maj. Edward C. Geary, Jr.

Thirty-second brigade of infantry (Brig.-Gen. Edward Vollrath commanding)—163d regiment of infantry, Col. John J. McGuinness; 164th regiment of infantry, Col. John H. Fraine; 148th machine gun battalion, Maj. James M. Hanley.
Sixty-sixth brigade of field artillery—146th regiment of field artillery, Col. William H. Edelbutt; 147th regiment of field artillery, Col. Boyd Wales; 148th regiment of field artillery, Col. Joseph W. Cavender; 116th trench mortar battery.

Engineer troops—116th regiment of engineers, Col. M. L. Walker.
Signal troops—116th field signal battalion, Maj. Jesse A. Jackson.
Division units—41st division headquarters troop, Maj. John G. MacDonnell; 146th machine gun battalion, Maj. Harry T. Lewis.

Forty-Second Division (Rainbow).

Maj.-Gen. C. T. Menoher commanding.
Maj. Walter E. Powers, adjutant-general.
Thirty-third brigade of infantry (Brig.-Gen. M. Lanihan commanding)—165th regiment of infantry, Col. F. B. McCoy; 166th regiment of infantry, Col. E. W. Hough; 150th machine gun battalion.

Eighty-fourth brigade of infantry (Brig.-Gen. E. A. Brown commanding)—167th regiment of infantry, Col. W. P. Screws; 168th regiment of infantry, Col. E. R. Bennett; 151st machine gun battalion, Maj. Cooper D. Winn, Jr.

Sixty-seventh brigade of field artillery (Brig.-Gen. G. C. Gatley commanding)—149th regiment of field artillery, Col. H. J. Reilly; 150th regiment of field artillery, Col. R. H. Tyndall; 151st regiment of field artillery,

Col. G. E. Leach; 117th trench mortar battery, Capt. Robert J. Gill.
Engineer troops—117th regiment of engineers, Col. William Kelly.
Signal troops—117th field signal battalion, Maj. Ruby D. Garrett.
Division units—42d division headquarters troop, Capt. Arthur W. Underwood; 149th machine gun battalion, Maj. Quentin O. Reitzel.

SECOND ARMY CORPS.

Maj.-Gen. Robert Lee Bullard commanding.
Fourth division, regular army.
Twenty-eighth division, national guard (Pennsylvania).
Thirtieth division, national guard (Tennessee, North Carolina, South Carolina, District of Columbia).
Thirty-fifth division, national guard (Missouri and Kansas).
Seventy-seventh division, national army (New York).
Eighty-second division, national army (Georgia, Alabama and Florida).

Fourth Division.

Maj.-Gen. George H. Cameron commanding.
Lieut.-Col. Christian A. Bach, chief of staff.
Maj. Jesse D. Elliott, adjutant-general.
Seventh brigade of infantry (Brig.-Gen. B. A. Poore commanding)—39th regiment of infantry, Col. F. C. Bolles; 47th regiment of infantry, Col. S. S. Roudiez; 11th machine gun battalion, Lieut.-Col. Wm. G. Murchison.
Eighth brigade of infantry (Brig.-Gen. E. E. Booth commanding)—58th regiment of infantry, Col. G. F. Armistead; 59th regiment of infantry, Col. B. W. Atkinson; 12th machine gun battalion, Maj. Francis R. Fuller.
Fourth brigade of field artillery (Brig.-Gen. E. B. Babbitt commanding)—13th regiment of field artillery, Lieut.-Col. C. F. Cox; 16th regiment of field artillery, Col. H. W. Butler; 77th regiment of field artillery, Lieut.-Col. A. F. Commiskey; 4th trench mortar battery, Capt. Robert H. Ennis.
Engineer troops—4th regiment of engineers, Col. Albert H. Archer.
Signal troops—8th field signal battalion, Maj. Resolve P. Palmer.

Division units—4th division headquarters troop, Capt. Paul R. Frank; 10th machine gun battalion.

Twenty-Eighth Division.

Maj.-Gen. C. H. Muir commanding.
Lieut.-Col. David J. Davis, adjutant-general.
Fifty-fifth brigade of infantry (Brig.-Gen. T. W. Darrah commanding)—109th regiment of infantry, Col. M. D. Brown; 110th regiment of infantry, Col. George Kemp; 108th machine gun battalion, Maj. Robert M. Vail.
Fifty-sixth brigade of infantry (Maj.-Gen. William Weigel commanding)—111th regiment of infantry, Col. E. C. Shannon; 112th regiment of infantry, Col. G. C. Rickards; 109th machine gun battalion, Maj. John W. Foss.
Fifty-third brigade of field artillery (Brig.-Gen. W. G. Price commanding)—107th regiment of field artillery, Lieut.-Col. A. V. Crookston; 108th regiment of field artillery, Lieut.-Col. E. St. J. Greale, Jr.; 109th regiment of field artillery, Col. Asher Miner; 103d trench mortar battery, Capt. Ralph W. Knowles.

Engineer troops—103d regiment of engineers, Col. Frederic A. Snyder.
Signal troops—103d field signal battalion, Maj. Fred G. Miller.

Division units—28th division headquarters troop, Capt. Walter F. Brooman; 107th machine gun battalion, Maj. Harry D. Case.

Thirtieth Division (Wildcat).

Maj.-Gen. Edward M. Lewis commanding.
Lieut.-Col. Robert B. McBride, chief of staff.
Lieut.-Col. Francis B. Hinkle, adjutant-general.
Fifty-ninth brigade of infantry (Brig.-Gen. Lawrence D. Tyson commanding)—117th

regiment of infantry, Col. Carcy F. Spence; 118th regiment of infantry, Col. Peter A. McCully; 144th machine gun battalion, Maj. James P. Fyffe.

Sixtieth brigade of infantry (Brig.-Gen. Samuel L. Faison commanding)—119th regiment of infantry, Col. John B. B. Metts; 120th regiment of infantry, Col. Sidney W. Minor; 115th machine gun battalion, Maj. William R. Robertson.

Fifty-fifth brigade of field artillery—113th regiment of field artillery, Col. Albert L. Cox; 114th regiment of field artillery, Col. Luke Lea; 115th regiment of field artillery, Col. Harry S. Berry; 105th trench mortar battery, Capt. Ambrose Gaines.

Engineer troops—105th regiment of engineers, Lieut.-Col. Joseph H. Pratt.

Signal troops—105th field signal battalion.

Division units—30th division headquarters troop, Capt. Henry F. Forcher; 113th machine gun battalion, Maj. Walter H. Hyde.

Thirty-Fifth Division.

Maj.-Gen. Peter E. Traub commanding.

Col. Robert McCleave, chief of staff.

Maj. J. M. Hobson, adjutant-general.

Sixty-ninth brigade of infantry (Brig.-Gen. Nathaniel McClure commanding)—137th regiment of infantry, Col. George H. McMaster; 138th regiment of infantry, Col. Edmund J. McMahon; 129th machine gun battalion, Maj. Thomas H. Loy.

Seventieth brigade of infantry (Brig.-Gen. Charles I. Martin commanding)—139th regiment of infantry, Col. John D. McNeely; 140th regiment of infantry, Col. Albert Linxwiler; 130th machine gun battalion, Maj. John F. Constable.

Sixtieth brigade of field artillery (Brig.-Gen. L. G. Berry commanding)—128th regiment of field artillery, Col. Frank M. Rumbold; 129th regiment of field artillery, Col. Karl D. Klemm; 130th regiment of field artillery, Col. Hugh Means; 110th trench mortar battery, Capt. Fred W. Manchester.

Engineer troops—110th regiment of engineers, Col. Sherwood A. Chaney.

Signal troops—110th field signal battalion, Maj. Milton R. McLean.

Division units—35th division headquarters troop—Capt. Ward H. Patton; 128th machine gun battalion, Maj. Welley Halliburton.

Seventy-Seventh Division.

Maj.-Gen. George B. Duncan commanding.

Maj. W. N. Haskell, adjutant-general.

One hundred and fifty-third brigade of infantry (Brig.-Gen. Edward Wittenmeyer commanding)—205th regiment of infantry, Col. William R. Sladberg, Jr.; 306th regiment of infantry, Col. George Vidmer; 305th machine gun battalion, Maj. D. A. Nolan.

One hundred and fifty-fourth brigade of infantry (Brig.-Gen. Evan M. Johnson commanding)—307th regiment of infantry, Lieut.-Col. Reuben Smith; 308th regiment of infantry, Col. Nathan K. Averill; 306th machine gun battalion, Maj. John B. Richardson.

One hundred and fifty-second brigade of field artillery (Brig.-Gen. Thomas H. Reeves commanding)—304th regiment of field artillery, Col. Raymond W. Briggs; 305th regiment of field artillery, Col. Fred C. Doyle; 306th regiment of field artillery, Col. Frank C. Jewell; 302d trench mortar battery, Capt. Harold G. Fitz.

Engineer troops—302d regiment of engineers, Col. Clarence O. Sherrill.

Signal troops—302d field signal battalion, Maj. Charles M. Milliken.

Division units—77th division headquarters troop, Capt. Charles C. Rumsey; 304th machine gun battalion, Lieut.-Col. Charles C. Winnia.

Eighty-Second Division.

Maj.-Gen. W. P. Burnham commanding.

Lieut.-Col. Royden E. Beebe, chief of staff.

Lieut.-Col. John K. Thomas, adjutant-general. One hundred and sixty-third brigade of infantry (Brig.-Gen. Marcus D. Cronin commanding)—325th regiment of infantry, Col. Walter M. Whitman; 326th regiment of infantry, Col. John C. MacArthur; 320th machine gun battalion, Maj. Orlando G. Palmer.

One hundred and sixty-fourth brigade of infantry (Brig.-Gen. Julian Lindsay commanding)—327th regiment of infantry, Col. Frank D. Ely; 328th regiment of infantry, Col. Hunter B. Nelson; 321st machine gun battalion, Maj. Emery J. Pike.

One hundred and fifty-seventh brigade of field artillery (Brig.-Gen. Charles D. Rhodes commanding)—319th regiment of field artillery, Col. Earl D. Pearce; 320th regiment of field artillery, Col. H. C. Williams; 321st regiment of field artillery, Col. Clarence Deems, Jr.; 307th trench mortar battery, Capt. H. M. Dodd.

Engineer troops—307th regiment of engineers, Col. Julian H. Schley.

Signal troops—307th field signal battalion, Maj. Kilbreth D. Schaffer.

Division units—82d division headquarters troop, First Lieut. Robert H. Dimond; 319th machine gun battalion, Maj. Richard Wetherill.

Engineer troops—7th regiment of engineers, Col. Lewis W. Adams.

Signal troops—9th field signal battalion.

Division units—5th division headquarters troop, Capt. Raymond I. Newton; 13th machine gun battalion, Lieut.-Col. Gilbert M. Allen.

THIRD ARMY CORPS.

Maj.-Gen. William M. Wright commanding.

Third division, regular army.

Fifth division, regular army.

Twenty-seventh division, national guard (New York).

Thirty-third division, national guard (Illinois). Seventy-eighth division, national army (Delaware and New York).

Eightieth division, national army (New Jersey, Virginia, Maryland, Delaware and District of Columbia).

Third Division.

Maj.-Gen. Joseph T. Dickman commanding.

Col. Robert H. Kelton, chief of staff.

Capt. Frank L. Purdon, adjutant-general.

Fifth brigade of infantry (Brig.-Gen. F. W. Sladen commanding)—4th regiment of infantry, Col. George N. Bomford; 7th regiment of infantry, Col. T. M. Anderson, Jr.; 8th machine gun battalion, Lieut.-Col. Harry D. Mitchell.

Sixth brigade of infantry—30th regiment of infantry, Col. E. L. Butts; 38th regiment of infantry, Col. Halstead Dorey; 9th machine gun battalion, Maj. Sherman A. White.

Third brigade of field artillery (Brig.-Gen. W. M. Cruikshank commanding)—10th regiment of field artillery, Col. C. R. Lloyd; 76th regiment of field artillery, Col. W. C. Rivers; 18th regiment of field artillery, Col. O. W. R. Farr; 3d trench mortar battery, Capt. Van Rensselaer Vestal.

Engineer troops—6th regiment of engineers, Lieut.-Col. John W. Stewart.

Signal troops—5th field signal battalion, Maj. Elton L. Franklin.

Division units—3d division headquarters troop, Capt. Charles C. Smith; 7th machine gun battalion, Lieut.-Col. Fred L. Davidson.

Fifth Division.

Maj.-Gen. John E. McMahon commanding.

Col. Ralph E. Ingram, chief of staff.

Maj. David P. Wood, adjutant-general.

Ninth brigade of infantry (Brig.-Gen. J. C. Caster commanding)—60th regiment of infantry, Col. Douglas Settle; 61st regiment of infantry, Col. H. D. Wise; 14th machine gun battalion, Maj. Frederick A. Barker.

Tenth brigade of infantry (Maj.-Gen. W. H. Gordon commanding)—6th regiment of infantry, Col. P. H. Mulla; 11th regiment of infantry, Col. J. B. Bennett; 15th machine gun battalion, Maj. H. Muncaster.

Fifth brigade of field artillery (Brig.-Gen. C. A. F. Flagger commanding)—19th regiment of field artillery, Col. C. H. Lanza; 20th regiment of field artillery, Col. Brooke Payne; 21st regiment of field artillery, Col. R. H. McMaster; 5th trench mortar battery, Maj. Hugh P. Avent.

Twenty-Seventh Division.

Maj.-Gen. J. F. O'Ryan commanding.
Lieut.-Col. Stanley H. Ford, chief of staff.
Lieut.-Col. Frank W. Ward, adjutant-general.

Fifty-third brigade of infantry (Brig.-Gen. Alfred W. Bjornstad commanding)—105th regiment of infantry, Col. James M. Andrews; 106th regiment of infantry, Col. William A. Taylor; 105th machine gun battalion, Maj. Kenneth Gardner.

Fifty-fourth brigade of infantry (Brig.-Gen. Palmer E. Pierce commanding)—107th regiment of infantry, Col. Willard C. Pisk; 108th regiment of infantry, Col. Edgar S. Jennings; 106th machine gun battalion, Maj. Mortimer D. Bryant.

Fifty-second brigade of field artillery (Brig.-Gen. George A. Wingate commanding)—104th regiment of field artillery, Col. Merritt H. Smith; 105th regiment of field artillery, Lieut.-Col. DeW. C. Weld, Jr.; 106th regiment of field artillery, Lieut.-Col. John D. Howland; 102d trench mortar battery, Capt. Charles Pierson, Jr.

Engineer troops—102d regiment of engineers, Lieut.-Col. W. S. Conrow.
Signal troops—102d field signal battalion, Maj. Arthur L. Howe.

Division units—7th division headquarters troop, Capt. Tristan Tupper; 104th machine gun battalion, Maj. Edward McLeer, Jr.

Thirty-Third Division.

Maj.-Gen. George Bell, Jr., commanding.
Col. William K. Naylot, chief of staff.

Sixty-fifth brigade of infantry (Brig.-Gen. Edward L. King commanding)—129th regiment of infantry, Col. Charles H. Greene; 130th regiment of infantry, Col. Charles B. Center; 123d machine gun battalion, Maj. Albert L. Culbertson.

Sixty-sixth brigade of infantry (Brig.-Gen. Paul A. Wolff commanding)—131st regiment of infantry, Col. Joseph B. Sanborn; 132d regiment of infantry, Col. Abel Davis; 124th machine gun battalion, Maj. Floyd F. Putman.

Fifty-eighth brigade of field artillery (Brig.-Gen. James A. Shipton commanding)—122d regiment of field artillery, Col. Milton J. Foreman; 123d regiment of field artillery, Col. Charles G. Davis; 124th regiment of field artillery, Col. Horatio B. Hackett; 108th trench mortar battery, Capt. Frank Frazier.

Engineer troops—108th regiment of engineers, Col. Henry A. Allen.
Signal troops—108th field signal battalion, Maj. John P. Lucas.

Division units—33d division headquarters troop, Capt. Herbert W. Styles; 122d machine gun battalion, Lieut.-Col. W. C. Gardenhire.

Seventy-Eighth Division.

Maj.-Gen. James H. McRae commanding.
Lieut.-Col. Harry N. Cootes, chief of staff.
Maj. William T. MacMillan, adjutant-general.

One hundred and fifty-fifth brigade of infantry (Brig.-Gen. Mark L. Hersey commanding)—309th regiment of infantry, Col. John M. Morgan; 310th regiment of infantry, Col. Walter C. Babcock; 308th machine gun battalion, Maj. Edward M. Oflsey.

One hundred and fifty-sixth brigade of infantry (Brig.-Gen. James T. Dean commanding)—311th regiment of infantry, Col. Marcus B. Stokes; 312th regiment of infantry, Col. A.

Van P. Anderson; 309th machine gun battalion, Maj. Henry R. Allen.

One hundred and fifty-third brigade of field artillery (Brig.-Gen. Clint C. Hearn commanding)—307th regiment of field artillery, Col. James H. Bryson; 308th regiment of field artillery, Col. Charles M. Bunker; 309th regiment of field artillery, Col. Edwin O. Sar-ratt; 303d trench mortar battery, Capt. John E. McGlothlan.

Engineer troops—303d regiment of engineers, Col. E. M. Markham.

Signal troops—303d field signal battalion, Maj. James Kelly.

Division units—78th division headquarters troop, Capt. G. S. Woolworth; 307th machine gun battalion, Maj. Robert M. Beck, Jr.

Eightieth Division.

Maj.-Gen. Adelbert Cronkrite commanding.
Lieut.-Col. William H. Waldron, chief of staff.
Maj. Steven C. Clark, adjutant-general.

One hundred and fifty-ninth brigade of infantry (Brig.-Gen. George H. Jamerson commanding)—317th regiment of infantry, Lieut.-Col. William L. Reed; 318th regiment of infantry, Col. Ulysses Worriow; 314th machine gun battalion, Maj. Jennings C. Wise.

One hundred and sixtieth brigade of infantry (Brig.-Gen. Lloyd M. Bratt commanding)—319th regiment of infantry, Col. Frank S. Cocheu; 320th regiment of infantry, Col. Howard R. Perry; 315th machine gun battalion, Maj. Thomas A. Rothwell.

One hundred fifty-fifth brigade of field artillery (Brig.-Gen. Gordon G. Heiner commanding)—313th regiment of field artillery, Col. Charles J. Ferris; 314th regiment of field artillery, Col. Robert S. Welsh; 315th regiment of field artillery, Lieut.-Col. William Tidball; 305th trench mortar battery, Capt. P. B. Barringer, Jr.

Engineer troops—305th regiment of engineers, Col. George R. Spalding.

Signal troops—305th field signal battalion, Maj. Thomas I. King.

Division units—80th division headquarters troops, Capt. Turner H. Wiltshire; 313th machine gun battalion, Maj. Oscar Foley.

FOURTH ARMY CORPS.

Maj.-Gen. George W. Read commanding.
Eighty-third division, national army (Ohio and Pennsylvania).

Eighty-ninth division, national army (Kansas, Missouri, South Dakota, Nebraska, Colorado, New Mexico and Arizona).

Thirty-seventh division, national guard army (Ohio).

Twenty-ninth division, national guard army (New Jersey, Virginia, Delaware, Maryland and District of Columbia).

Nineteenth division, national army (Texas and Oklahoma).

Ninety-second division, national army (negro troops).

Twenty-Ninth Division.

Maj.-Gen. C. G. Morton commanding.
Col. George S. Goodale, chief of staff.
Maj. James A. Ulio, adjutant-general.

Fifty-seventh brigade of infantry (Brig.-Gen. Charles W. Barber commanding)—113th regiment of infantry, Col. Harry C. Jones; 114th regiment of infantry, Col. Thomas D. Landon; 11th machine gun battalion, Maj. Joseph H. Davidson.

Fifty-eighth brigade of infantry (Brig.-Gen. H. H. Bandholtz commanding)—115th regiment of infantry, Col. Milton A. Reckford; 116th regiment of infantry, Col. H. L. Threlkeld; 112th machine gun battalion, Maj. David J. Markey.

Fifty-fourth brigade of field artillery—110th regiment of field artillery, Col. Washington Bowie, Jr.; 111th regiment of field artillery, Lieut.-Col. Edward C. James; 112th regiment of field artillery, Col. Quincy A. Gilmore;

104th trench mortar battery, Capt. Anthony Weis.
 Engineer troops—104th regiment of engineers, Col. Ralph T. Ward.
 Signal troops—104th field signal battalion, Maj. Charles B. Hazeltine.
 Division units—29th division headquarters troop, Capt. John C. Lane; 110th machine gun battalion, Maj. James H. Washburn.

Thirty-Seventh Division.

Maj.-Gen. C. S. Farnsworth commanding.
 Lieut.-Col. Dana T. Merrill, chief of staff.
 Maj. Edward W. Wildrick, adjutant-general.
 Seventy-third brigade of infantry (Brig.-Gen. C. F. Zimmerman commanding)—145th regiment of infantry, Col. Sanford B. Stanbery; 146th regiment of infantry Col. C. C. Weybrecht; 135th machine gun battalion, Maj. Charles C. Chambers.
 Seventy-fourth brigade of infantry (Brig.-Gen. W. P. Jackson commanding)—147th regiment of infantry, Col. F. W. Galbrith, Jr.; 148th regiment of infantry, Col. George H. Wood; 136th machine gun battalion, Maj. John A. Logan.

Sixty-second brigade of field artillery—134th regiment of field artillery, Col. Harold M. Bush; 135th regiment of field artillery, Col. Dudley J. Hard; 136th regiment of field artillery, Col. Paul L. Mitchell; 112th trench mortar battery, Capt. A. S. Dillon.

Engineer troops—112th regiment of engineers, Col. John R. McQuigg.
 Signal troops—112th field signal battalion, Maj. Russell L. Mundhenk.

Division units—37th division headquarters troop, Capt. Frank F. Frebis; 134th machine gun battalion, Maj. Wade C. Christy.

Eighty-Third Division.

Maj.-Gen. E. F. Glenn commanding.
 Lieut.-Col. C. A. Trott, chief of staff.
 Maj. James L. Cochran, adjutant-general.
 One hundred and sixty-fifth brigade of infantry (Brig.-Gen. Ora E. Hunt commanding)—320th regiment of infantry, Col. John J. Toffey, Jr.; 330th regiment of infantry, Col. S. D. Ham; 323d machine gun battalion, Maj. Anton C. Cron.

One hundred and sixty-sixth brigade of infantry (Brig.-Gen. Malin Graig commanding)—331st regiment of infantry, Col. Robert C. Williams; 332d regiment of infantry, Col. William Wallace; 324th machine gun battalion, Maj. B. B. McCroskey.

One hundred and fifty-eighth brigade of field artillery (Brig.-Gen. Adrian S. Fleming commanding)—322d regiment of field artillery, Col. A. B. Warfield; 323d regiment of field artillery, Col. F. B. Hennessy; 324th regiment of field artillery, Col. Homer B. Grant; 308th trench mortar battery, Capt. Don E. McGill.

Engineer troops—308th regiment of engineers, Col. Warren T. Hannum.
 Signal troops—308th field signal battalion, Maj. Joseph F. Ware.

Division units—83d division headquarters troop, Lieut.-Col. Otis R. Cole; 322d machine gun battalion, Maj. Ralph R. Glass.

Eighty-Ninth Division.

Brig.-Gen. Frank L. Winn commanding (act'g).
 Col. C. E. Kilbourne, chief of staff.
 Maj. Jerome G. Pillow, adjutant-general.
 One hundred and seventy-seventh brigade of infantry (Brig.-Gen. Frank L. Winn commanding)—353d regiment of infantry, Col. J. H. Reeves; 354th regiment of infantry, Col. Americus Mitchell; 341st machine gun battalion.

One hundred and seventy-eighth brigade of infantry (Brig.-Gen. Thomas G. Hanson commanding)—355th regiment of infantry, Col. William G. Sills; 356th regiment of infantry, Col. Lewis M. Nuttman; 342d machine gun battalion, Maj. Thomas P. Bernard.

One hundred and sixty-fourth brigade of field artillery (Brig.-Gen. Edward T. Donnelly commanding)—340th regiment of field artil-

lery, Col. Ernest S. Wheeler; 341st regiment of field artillery, Lieut.-Col. Robert Davis; 342d regiment of field artillery, Lieut.-Col. Earl Biscoe; 314th trench mortar battery, Capt. John L. Milvurn.

Engineer troops—314th regiment of engineers, Col. Robert P. Johnston.

Signal troops—314th field signal battalion, Maj. David Reeves.

Division units—89th division headquarters troops, Capt. Tom A. Velie; 340th machine gun battalion.

Ninetieth Division.

Maj.-Gen. Henry T. Allen commanding.

Col. John J. Kingman, chief of staff.

Maj. Wyatt O. Sellkirk, adjutant-general.

One hundred and seventy-ninth brigade of infantry (Brig.-Gen. Joseph T. O'Neill commanding)—357th regiment of infantry, Col. E. T. Hartmann; 358th regiment of infantry, Col. Edmund M. Leary; 344th machine gun battalion, Maj. Ernest O. Thompson.

One hundred and eightieth brigade of infantry (Brig.-Gen. W. H. Johnston commanding)—359th regiment of infantry, Col. W. A. Cavebaugh; 360th regiment of infantry, Col. Casper H. Conrad, Jr.; 345th machine gun battalion, Maj. John M. Hagens.

One hundred and sixty-fifth brigade of field artillery (Brig.-Gen. Francis C. Marshall commanding)—343d regiment of field artillery, Col. Henry V. Farrar; 344th regiment of field artillery, Col. Samuel Frankenberg; 345th regiment of field artillery, Col. R. S. Abernathy; 315th trench mortar battery, Capt. William B. Blocker.

Engineer troops—315th regiment of engineers, Col. Frank C. Boggs.

Signal troops—315th field signal battalion, Maj. John C. Grant.

Division units—90th division headquarters troop, Capt. Donald L. Henderson; 343d machine gun battalion, Maj. Arthur L. McCoy.

Ninety-Second Division.

Maj.-Gen. C. C. Ballou commanding.

Lieut.-Col. Allen J. Greer, chief of staff.

Maj. Sherburne Whipple, adjutant-general.

One hundred and eighty-third brigade of infantry (Brig.-Gen. Malvern H. Barnum commanding)—365th regiment of infantry, Col. Vernon A. Caldwell; 366th regiment of infantry, Col. Ralph B. Parrott; 350th machine gun battalion, Maj. Charles W. Mason.

One hundred and eighty-fourth brigade of infantry (Brig.-Gen. W. A. Hay commanding)—367th regiment of infantry, Col. James A. Moss; 368th regiment of infantry, Lieut.-Col. Henry S. Terrell; 351st machine gun battalion, Maj. Robert M. Barton.

One hundred and sixty-seventh brigade of field artillery—349th regiment of field artillery, Col. Dan T. Moore; 350th regiment of field artillery, Col. Roger O. Mason; 351st regiment of field artillery, Col. William E. Cole; 317th trench mortar battery, Capt. Theron Strong.

Engineer troops—317th regiment of engineers, Col. Earl I. Brown.

Signal troops—317th field signal battalion, Maj. Luther I. Rose.

Division units—92d division headquarters troop, Capt. Rufus Reed; 349th machine gun battalion, Lieut.-Col. Robert Sterrett.

FIFTH ARMY CORPS.

Maj.-Gen. Omar Bundy commanding.

Sixth division, regular army.

Thirty-sixth division, national guard army (Texas and Oklahoma).

Seventy-sixth division, national army (New England).

Seventy-ninth division, national army (Pennsylvania, Maryland and District of Columbia).

Eighty-fifth division, national army (Michigan and Wisconsin).

Ninety-first division, national army (Washington, Oregon, Alaska, California, Idaho, Nevada, Montana, Wyoming and Utah).

Sixth Division.

Brig.-Gen. James B. Erwin commanding.
 Col. James M. Pickering, chief of staff.
 Lieut.-Col. Robert S. Knox, adjutant-general.
 Eleventh brigade of infantry (Brig.-Gen. W. R. Dashiell commanding)—51st regiment of infantry. Col. Isaac Newell; 52d regiment of infantry. Col. Ernest Smith; 17th machine gun battalion. Maj. Joseph M. Cummins.
 Twelfth brigade of infantry (Brig.-Gen. J. B. Erwin commanding)—53d regiment of infantry. Lieut.-Col. W. H. Patterson; 54th regiment of infantry. Col. Matthias Crowley; 18th machine gun battalion. Maj. Enoch B. Garey.
 Sixth brigade of field artillery (Brig.-Gen. E. A. Millar commanding)—3d regiment of field artillery. Col. W. D. Newell; 11th regiment of field artillery. Lieut.-Col. W. F. Sharp; 78th regiment of field artillery. Lieut.-Col. James Hustin; 6th trench mortar battery. First Lieut. John Gray Paul.
 Engineer troops—316th regiment of engineers. Col. Stuart C. Godrey.
 Signal troops—6th field signal battalion. Maj. Donald S. Sanger.
 Division units—6th division headquarters troop. Capt. C. Y. Hendricks; 16th machine gun battalion. Maj. Frederick B. Terrell.

Thirty-Sixth Division.

Maj.-Gen. W. R. Smith commanding.
 Col. E. J. Williams, chief of staff.
 Maj. William R. Scott, adjutant-general.
 Seventy-first brigade of infantry (Brig.-Gen. Henry Hutchings commanding)—141st regiment of infantry. Col. Well E. Jackson; 142d regiment of infantry. Col. Alfred W. Bloor; 132d machine gun battalion. Maj. Preston A. Weathered.
 Seventy-second brigade of infantry (Brig.-Gen. John A. Hulen commanding)—143d regiment of infantry. Col. John S. Hoover; 144th regiment of infantry. Col. Jules E. Muchert; 133d machine gun battalion. Maj. Lewis S. Davidson.
 Sixty-first brigade of field artillery (Brig.-Gen. John A. Stevens commanding)—131st regiment of field artillery. Col. Claude V. Birkhead; 132d regiment of field artillery. Col. Arthur R. Sholars; 133d regiment of field artillery. Col. Fred A. Logan; 111th trench mortar battery. Capt. Lewis Maverick.
 Engineer troops—111th regiment of engineers. Col. William A. Johnson.
 Signal troops—111th signal field battalion. Maj. Robert A. Robinson.
 Division units—36th division headquarters troop. Capt. Wayne R. Davis; 131st machine gun battalion. Maj. Ellis Stephenson.

Seventy-Sixth Division.

Maj.-Gen. Harry F. Hodges commanding.
 Maj. George M. Peck, adjutant-general.
 One hundred and fifty-first brigade of infantry (Brig.-Gen. Frank E. Albright commanding)—301st regiment of infantry. Col. Frank Tompkins; 302d regiment of infantry. Col. Charles C. Smith; 302d machine gun battalion. Maj. Arthur B. Collins.
 One hundred and fifty-second brigade of infantry (Brig.-Gen. F. D. Evans commanding)—303d regiment of infantry. Col. John F. Preston; 304th regiment of infantry. Col. Joseph S. Herron; 303d machine gun battalion. Maj. James A. Sullivan.
 One hundred and fifty-first brigade of field artillery (Maj.-Gen. William S. McNair commanding)—301st regiment of field artillery. Col. George M. Brooks; 302d regiment of field artillery. Col. Daniel F. Craig; 303d regiment of field artillery. Col. F. W. Stoford; 301st trench mortar battery. Capt. Jewett B. Newton.
 Engineer troops—301st regiment of engineers. Col. Francis A. Pope.
 Signal troops—301st field signal battalion. Maj. John F. Fanning.
 Division units—76th division headquarters troop. Capt. Q. A. McKean; 301st machine gun battalion. Maj. Will D. Willis.

Seventy-Ninth Division.

Maj.-Gen. Joseph E. Kuhn commanding.
 Col. Tenny Ross, chief of staff.
 Maj. Charles B. Moore, adjutant-general.
 One hundred and fifty-seventh brigade of infantry (Brig.-Gen. William L. Nicholson commanding)—313th regiment of infantry. Col. Claude B. Sweezy; 314th regiment of infantry. Col. William H. Oury; 311th machine gun battalion. Maj. Charles M. Dupuy.
 One hundred and fifty-eighth brigade of infantry—315th regiment of infantry. Lieut.-Col. C. G. Morton; 316th regiment of infantry. Col. Oscar J. Charles; 312th machine gun battalion. Maj. Stewart S. Janney.
 One hundred and fifty-fourth brigade of field artillery (Brig.-Gen. Andrew Hero, Jr., commanding)—310th regiment of field artillery. Col. Howard L. Landers; 311th regiment of field artillery. Col. Charles G. Mortimer; 312th regiment of field artillery. Col. Harry P. Wilbur; 304th trench mortar battery. Capt. William G. Huckel.
 Engineer troops—304th regiment of engineers. Col. James P. Jervey.
 Signal troops—304th field signal battalion. Maj. Z. H. Mitchum.
 Division units—79th division headquarters troop. Capt. Edward W. Madeira; 310th machine gun battalion. Maj. Andrew W. Smith.

Eighty-Fifth Division.

Maj.-Gen. C. W. Kennedy commanding.
 Col. Edgar T. Collins, chief of staff.
 Lieut.-Col. Clarence Lininger, adjutant-general.
 One hundred and sixty-ninth brigade of infantry (Brig.-Gen. Thomas B. Dugan commanding)—337th regiment of infantry. Col. Robert H. Allen; 338th regiment of infantry. Col. D. G. Berry; 329th machine gun battalion. Maj. Sidney D. Matze.
 One hundred and seventieth brigade of infantry—339th regiment of infantry. Col. John W. Craig; 340th regiment of infantry. Col. James S. Parker; 330th machine gun battalion. Maj. William Hendrie.
 One hundred and sixtieth brigade of field artillery (Brig.-Gen. Guy B. Preston commanding)—328th regiment of field artillery. Col. Frank E. Hopkins; 329th regiment of field artillery. Col. Tilman Campbell; 330th regiment of field artillery. Col. Harold E. Cloke; 310th trench mortar battery. Capt. Charles I. Anderson.
 Engineer troops—310th regiment of engineers. Col. W. Goff Caples.
 Signal troops—310th field signal battalion. Maj. Keene Richards.
 Division units—85th division headquarters troop. Capt. Henry N. Traxler; 328th machine gun battalion. Maj. Rollin L. Caldwell.

Ninety-First Division.

Brig.-Gen. F. H. Foltz commanding.
 Col. Herbert J. Brees, chief of staff.
 Maj. Frederic W. Manley, adjutant-general.
 One hundred and eighty-first brigade of infantry (Brig.-Gen. John B. McDonald commanding)—361st regiment of infantry. Col. William D. Davis; 362d regiment of infantry. Col. William H. Jordan; 347th machine gun battalion. Maj. Arthur W. Hanson.
 One hundred and eighty-second brigade of infantry (Brig.-Gen. Frederick S. Foltz commanding)—363d regiment of infantry. Col. H. L. Cavanaugh; 364th regiment of infantry. Col. McD. George Weeks; 348th machine gun battalion. Maj. Thomas N. Gimpferling.
 One hundred and sixty-sixth brigade of field artillery (Brig.-Gen. Edward Burr commanding)—346th regiment of field artillery. Col. Raymond S. Pratt; 347th regiment of field artillery. Col. Ralph S. Granger; 348th regiment of field artillery. Col. Rex Van Den Corput; 316th trench mortar battery. Capt. Harold T. Pease.
 Engineer troops—361st regiment of engineers. Col. Henry C. Jewett.

Signal troops—316th field signal battalion, Maj. Wilford Danvers.
Division units—91st division headquarters troop, Capt. W. P. Coakley; 346th machine gun battalion, Maj. F. C. Endicott.

NOT ASSIGNED TO CORPS.

Eighty-First Division.

Maj.-Gen. C. J. Bailey commanding.
Col. Charles D. Roberts, chief of staff.
Maj. Arthur E. Ahrends, adjutant-general.
One hundred and sixty-first brigade of infantry (Brig.-Gen. George W. McIver commanding)—321st regiment of infantry, Col. Frank Halstead; 322d regiment of infantry, Col. L. T. Richardson; 317th machine gun battalion, Maj. W. C. McGowan.
One hundred and sixty-second brigade of infantry (Brig.-Gen. Monroe McFarland commanding)—323d regiment of infantry, Col. Thomas A. Pearce; 324th regiment of infantry, Col. George W. Moses; 318th machine gun battalion.
One hundred and fifty-sixth brigade of field artillery (Brig.-Gen. Andrew Moses commanding)—316th regiment of field artillery, Col. Russell P. Reeder; 317th regiment of field artillery, Col. Nelson E. Marrett; 318th regiment of field artillery, Col. James P. Robinson; 306th trench mortar battery, Capt. David M. Etheridge.
Engineer troops—306th regiment of engineers, Col. Robert R. Ralston.
Signal troops—306th field signal battalion, Maj. Samuel R. Todd.
Division units—81st division headquarters troop, Capt. Clayton E. Rich, Jr.; 316th machine gun battalion, Maj. John E. Beller.

Ninety-Third Division.

Maj. Lee S. Tillotson, adjutant-general.
One hundred and eighty-fifth brigade of infantry—369th regiment of infantry, Col. William Hayward; 370th regiment of infantry, Col. F. A. Dennison; 333d machine gun battalion.
One hundred and eighty-sixth brigade of infantry (Brig.-Gen. George H. Harries commanding)—371st regiment of infantry, Col. Perry L. Miles; 372d regiment of infantry, Col. Herschel Tupes; 334th machine gun battalion.
One hundred and sixty-eighth brigade of field artillery—332d regiment of field artillery, 333d regiment of field artillery, 334th regiment of field artillery, 318th trench mortar battery.
Engineer troops—318th regiment of engineers.
Signal troops—318th field signal battalion.
Division units—332d machine gun battalion.

DIVISIONS AT THE FRONT NOV. 7.

Location of the thirty-five combat divisions and six depot divisions of the American army in France on Nov. 7, four days before the signing of the armistice, was announced with the names of their commanding generals by the war department Nov. 27, 1918, as follows:

Combat Divisions.

First (regulars)—Nouart and St. Dizier, Brig.-Gen. Parker.
Second (regulars)—Fosse and St. Dizier, Maj.-Gen. John A. Lejeune.
Third (regulars)—Tannois and St. Dizier, Brig.-Gen. Preston Brown.
Fourth (regulars)—Lucey and St. Dizier, Maj.-Gen. Mark L. Hersey.
Fifth (regulars)—Cunel and St. Dizier, Maj.-Gen. Hanson E. Ely.
Sixth (regulars)—Stonne and St. Dizier, Maj.-Gen. W. H. Gordon.
Seventh (regulars)—Euvезin and St. Dizier, Maj.-Gen. Edmund Wittenmeyer.
Twenty-sixth (New England)—Bras, Troyon-sur-Meuse, St. Dizier, Brig.-Gen. F. E. Bamford.
Twenty-seventh (New York)—Corbie, Beauquesne, St. Dizier, Maj.-Gen. John F. O'Ryan.

Twenty-eighth (Pennsylvania)—Heudicourt and St. Dizier, Maj.-Gen. William H. Hay.
Twenty-ninth (New Jersey, Delaware, Virginia, Maryland, District of Columbia)—Robert Espagne and St. Dizier, Maj.-Gen. C. C. Mortou.

Thirtieth (Tennessee, North Carolina, South Carolina, District of Columbia)—Querrieu, Maj.-Gen. E. H. Lewis.

Thirty-first (Georgia, Alabama, Florida)—Brest, Maj.-Gen. Leroy S. Lyon.

Thirty-second (Michigan, Wisconsin)—Ancerville and St. Dizier, Maj.-Gen. William C. Haan.

Thirty-third (Illinois)—Troyon and St. Dizier, Maj.-Gen. George Bell, Jr.

Thirty-fourth (Nebraska, Iowa, South Dakota, Minnesota)—Castres, Brig.-Gen. John A. Johnson.

Thirty-fifth (Missouri, Kansas)—Somme Dieue and St. Dizier, Maj.-Gen. Peter E. Traub.

Thirty-sixth (Texas, Oklahoma)—Conde-en-Barrois, Maj.-Gen. W. R. Smith.

Thirty-seventh (Ohio)—Thielt, Dunkerque, Maj.-Gen. Charles S. Farnsworth.

Thirty-eighth (Indiana, Kentucky, West Virginia)—Le Mans, Maj.-Gen. Robert L. Howze.

Forty-second (Rainbow)—Maisoncelle and St. Dizier, Maj.-Gen. Charles D. Rhodes.

Seventy-seventh (New York city)—La Basace, Varennes, St. Dizier, Maj.-Gen. Robert Alexander.

Seventy-eighth (western New York, New Jersey, Delaware)—Le Champy Haut and St. Dizier, Maj.-Gen. James H. McKee.

Seventy-ninth (northwest Pennsylvania, Maryland, District of Columbia)—Vacheraville and St. Dizier, Maj.-Gen. Joseph E. Kuhn.

Eightieth (Virginia, West Virginia, western Pennsylvania)—Sommauthe and St. Dizier, Maj.-Gen. Adeltbert Cronkhitte.

Eighty-first (North Carolina, South Carolina, Florida, Porto Rico)—Somme Dieue, Is-sur-Tille, Maj.-Gen. Charles J. Bailey.

Eighty-second (Georgia, Alabama, Tennessee)—Florent, Maj.-Gen. George P. Duncan.

Eighty-fourth (Kentucky, Indiana, southern Illinois)—Neuvic, Maj.-Gen. Harry C. Hale.

Eighty-sixth (Chicago and northern Illinois)—St. Andre de Cubzac, Maj.-Gen. Charles H. Martin.

Eighty-seventh (Arkansas, Louisiana, Mississippi, southern Alabama)—Pons, Maj.-Gen. S. D. Sturgis.

Eighty-eighth (North Dakota, Minnesota, Iowa, western Illinois)—Montreux Chateau, Is-sur-Tille, Maj.-Gen. William Weigel.

Eighty-ninth (Kansas, Missouri, South Dakota, Nebraska, Colorado, New Mexico, Arizona)—Taily and St. Dizier, Brig.-Gen. Frank L. Winn.

Ninetieth (Texas and Oklahoma)—Villers Dev Dun and St. Dizier, Maj.-Gen. Henry T. Allen.

Ninety-first (Alaska, Washington, Oregon, California, Idaho, Nevada, Montana, Wyoming, Utah)—Oostrosebeke and Dunkerque, Maj.-Gen. William H. Johnston.

Ninety-second (negroes, national army)—Marbache and St. Dizier, Maj.-Gen. Charles C. Ballou.

Depot Divisions.

Forty-first (Washington, Oregon, Montana, Idaho and Wyoming)—St. Aignan and Noyers, Brig.-Gen. Eli Cole.

Eighty-third (Ohio and western Pennsylvania)—Le Mans and Castres, Maj.-Gen. E. F. Glenn.

Seventy-sixth (New England and New York)—St. Amand Mont Rond, Maj.-Gen. Harry F. Hodges, Jr.

Eighty-fifth (Michigan and eastern Wisconsin)—Pouilly, Maj.-Gen. Chase W. Kennedy.

Thirty-ninth (Arkansas, Mississippi and Louisiana)—St. Florent, Maj.-Gen. Henry C. Hodges, Jr.

Fortieth (Colorado, Utah, Arizona, New Mexico and California)—Revinny and St. Dizier, Maj.-Gen. F. S. Strong.

ARMY GENERAL STAFF.

By order of the secretary of war the army general staff was reorganized in February, 1918, into five main divisions each under an assistant chief having specific duties. To carry out the provisions of the new plan the secretary through the adjutant-general of the army issued the following general order:

The chief of the general staff with the assistance of the war council created under general orders No. 160, Dec. 20, 1917, is the immediate adviser of the secretary of war upon all matters relating to the military establishment and is charged by the secretary of war with the planning and development of the army program in its entirety. He exercises such supervising and co-ordinating powers and secures such information as his judgment may dictate to the end that the war policies of the secretary of war may be harmoniously executed by the several corps, bureaus and all other agencies of the military establishment and the army program to its last detail be carried out speedily and efficiently.

The planning of the army program in its entirety, the constant development thereof in its larger aspects and the relating of this program to the general staff and the entire army will be the duty of the chief of staff and the war council. The burden upon the chief of staff, the assistant chiefs of staff and the officers forming the general staff in their duties in connection with the administration of the army program by the military establishment has so increased that it becomes immediately necessary to organize the general staff into responsible divisions.

Accordingly the chief of staff is directed to organize the general staff into five main divisions under his direct control and to attach to the general staff such personnel, officers and civilians, that the work of the general staff may proceed. Each division shall be under an officer who shall have full power to act for the secretary of war and the chief of staff upon all matters charged to his division. Such divisions and duties of each are as follows:

Executive Division.

I. **Executive Division**—This division shall take charge of the office of the chief of staff under an officer to be known as the executive assistant to the chief of staff, who shall be an assistant to the chief of staff. The executive assistant to the chief of staff shall act for the chief of staff or the acting chief of staff during their respective absences. This division shall have cognizance and control of the following subjects:

1. To supervise the organization, administration and method of all divisions of the general staff and the several bureaus, corps, and other agencies of the war department, to the end that all such matters may be comprehensively treated and the activities of all such agencies may be co-ordinated, duplication of work avoided, harmonious action secured, and all unnecessary machinery of organization and administration eliminated.

2. The collection, compilation, and maintenance of all statistical information obtained from the several bureaus, corps, or other agencies of the military establishment, both as to troops and supplies as well as all other statistical information obtained from outside sources relating to the war program for transmission to the secretary of war, the chief of staff, the war council, the general staff, and the several divisions thereof.

3. Military intelligence concerning espionage, counterespionage, fire prevention, and other matters thereto related.

4. Requisitions and permits.

5. Promotions and assignments.

6. The militia bureau and federal guards.

War Plans Division.

II. **War Plans Division**—This division shall undertake the study of and submit reports upon all matters referred to it from time

to time by the chief of staff and shall be in charge of an officer designated as the director of the war plans division. This officer will be an assistant to the chief of staff and shall be president of the war college and in charge of all activities at the war college. The duties of this division shall also include the following matters:

1. Plans for the organization of all branches of the army.

2. The study and determination of the types and the quantities of equipment for all branches of the army, and the approval of design and types of equipment submitted by the several bureaus; supervision of research and invention by the several bureaus or other agencies of the military establishment in connection with equipment.

3. Projects for national defense.

4. Training for all branches of the army, the tactics and methods of warfare to be employed, together with all publications having relation thereto, and the supervision of military schools.

5. Military intelligence as related to army operations and the translation and compilation of foreign documents relating to military affairs.

6. Collection, compilation, and maintenance of complete military records.

7. Proposed legislation and the preparation of regulations and rules for the military establishment.

Purchase and Supply Division.

III. **Purchase and Supply Division**—This division shall have cognizance of and supervision over the purchase and production of all munitions and other supplies required for the use of the army, under an officer designated as the director of purchases and supplies, who shall be an assistant to the chief of staff. The duties of this division shall include the following matter:

1. The supervision and direction of all purchase, procurement, and production activities of the several bureaus, corps, and other agencies of the war department.

The co-ordination and correlation of the purchase and procurement activities of the several bureaus, corps, and other agencies of the war department.

The representing of the army in all arrangements for co-ordinating the purchase and procurement activities of the several bureaus, corps, and agencies of the government and with the allies.

2. The determination of purchasing and manufacturing priorities between the several bureaus, corps, and other agencies within the war department and in relation to other agencies of the government, and also the determination of preference to be afforded to contractors for supplies in the matter of shortages of fuel, power and raw materials.

3. The supervision and co-ordination of all appropriations, estimates and requirements and other financial matters relating to the purchase of munitions and all other supplies.

4. There shall be in the purchase and supply division the office of surveyor general of supplies under an officer or a civilian.

It shall be the duty of the surveyor general of supplies to provide that all arrangements for the purchase, procurement, and production of all munitions and other supplies for the use of the army shall be so correlated and otherwise scheduled as most effectually to forward the army program and most advantageously utilize the industrial resources of the country.

Storage and Traffic Division.

IV. **Storage and Traffic Division**—This division shall have cognizance and control of the transportation of all branches of the army and of all munitions and other supplies for the army both by land and sea and all storage facilities in connection therewith, under an officer designated as the director of storage and traffic, who shall be an assistant

to the chief of staff. The duties of this division shall include the following matters:

1. All movements of troops, as well as of munitions and of supplies of every kind, including raw materials and finished products both during manufacture and after assembly, to points of embarkation, interior points and overseas points, and in and out of all storage.

2. All inland traffic, embarkation service, and overseas service relating to the army program, including the employment of all army transports engaged in the transatlantic service and such commercial shipping as may be used to supplement that service, including all arrangements with the navy department for convoy service.

3. All storage for munitions and all other supplies of the army on the seaboard and at interior points.

Direct correspondence between the director of storage and traffic and the commanding officers of ports of embarkation is authorized. Copies of all requisitions, requests, and information of every character received from the commanding general of our forces in Europe or his subordinates which bear upon reinforcements or renewals of supplies will be transmitted to the director of storage and traffic, and, in general, this officer is charged with the duty of arranging that all supplies for our forces in this country and in Europe shall be forwarded in the most expeditious and convenient manner, and to that end he is authorized to exercise control of army shipment, both within the territory of the United States and as the same relates to the overseas haul.

Army Operations Division.

V. Army Operations Division—This division shall have cognizance and control of army operations under an officer who is designated as the director of operations, who shall be an assistant to the chief of staff. The duties of this division shall include the following matters:

1. The operation of all branches of the army, the recruitment and mobilization of the army, the personnel of troops, the selection of special troops, the movements and distribution of troops, and the determination of all overseas priorities.

2. The assignment of equipment to all branches of the army and the determination of priorities with respect to such assignments.

3. The supervision and co-ordination of camp sites, cantonments, army posts, hospitals, sanitation, construction plans and projects as the same relate to all branches of the army.

GENERAL STAFF CORPS.

The war department made public in October, 1918, the following consolidated list of the general staff corps, both in the United States and overseas, as it existed on Sept. 28, 1918:

General.

March, Peyton C.

Major-Generals.

Coe, Frank W.

Goethals, George.

McIntyre, Frank.

Brigadier-Generals.

Anderson, Edward D.
Brown, Lytle.
Brown, Preston.
Churchill, M.
D'Armond, Edward H.
Hawkins, Hamilton S.
Hines, Frank T.

Jervey, Henry.
Johnson, Hugh S.
King, Edward L.
Lochner, P. D.
Nolan, Dennis E.
Smith, Harry A.

Colonels.

Arrowsmith, G. D.
Barker, John W.
Bishop, Percy P.
Black, Roger D.
Bowman, George T.
Brees, Herbert J.
Browning, William S.
Buchan, Fred E.
Burt, R. J.
Case, F. L.
Clark, W. F.

Cocheu, George W.
Collins, E. T.
Conger, Arthur L.
Conley, E. T.
Conrad, C. H., Jr.
Cordier, Constant.
Coward, Jacob M.
Coxe, Alexander B.
Craig, J. W.
Currie, Dennis H.
Drake, C. B.

Drum, Hugh A.
Drum, John M.
Enochs, Berkeley.

Phenix, Spencer.
Rayner, Harold H.
Rice, Charles H.

Stokely, Carlin C.
Upham, John S.
Wainwright, J. M.

Wildrick, George A.
William, Sumner M.

Summary.

By branches of service the staff was divided as follows: Infantry, 113; cavalry, 41; field artillery, 11; coast artillery corps, 34; engineers, 11; miscellaneous, 5; total, 216.

CHANGE IN ORDNANCE DEPARTMENT.

On account of the delay in procuring the arms needed by the American forces and division of authority the ordnance department of the army was reorganized early in January, 1918. Secretary Baker announced the change Jan. 2 as follows:

"Heretofore the business of the ordnance department has been conducted by five separate and more or less independent organizations, under the direction of the chief of ordnance. These divisions will now be consolidated. The chief of ordnance will be assisted by an extensive administrative and advisory staff.

"The principal business functions of the department, as distinct from the technical designing and other scientific work with which it is charged, will be carried on by four operating divisions:

"(a) The procurement division will negotiate all orders and contracts for artillery, small arms, ammunition, and other articles heretofore purchased by the various divisions of the ordnance department.

"(b) The production division will have general charge of production. It will follow up, supervise and stimulate the production of all articles contracted for by the procurement division.

"(c) The inspection division will inspect and accept or reject all munitions of war contracted for by the procurement division.

"(d) The supply division will receive and distribute all ordnance and ordnance stores, operate all storehouses and have charge of matters pertaining to transportation.

"Experienced business executives will be put in charge of the procurement and production divisions, and the work of those divisions will be entrusted to recently commissioned civilians, supplemented by further acquisition of trained experts and men of proved business ability."

Division Heads.

Procurement Division—Samuel McRoberts.

Assistant Chief—Robert P. Lamont.

Production Division—Guy E. Tripp.

ARMY CORPS ORGANIZATION.

On Nov. 7, 1918, four days before the signing of the armistice, the organization of the various army corps stood as follows:

Army corps.	Div.	Infantry brigades.				Infantry regiments.				Artillery brigades.		Artillery regiments.		
		6	11	12		51	52	53	54	6		3	78	11
First	36	71	72		141	142	143	144	61		131	132	133	
	42	83	84		165	166	167	168	67		149	150	151	
	77	153	154		305	306	307	308	152		304	305	306	
	78	155	156		309	310	311	312	153		307	308	309	
Second	80	159	160		317	318	319	320	155		313	314	315	
	27	53	54		105	106	107	108	52		104	105	106	
	30	59	60		117	118	119	120	55		113	114	115	
Third	3	5	6		4	7	30	38	3		10	76	18

GROWTH OF THE ARMY.

[From Secretary Baker's annual report for 1918.]

At the date of the signing of the armistice over 25 per cent of the entire male population of the country between the ages of 18 and 31 were in military service. This represents a growth in the size of the army in nineteen months of nearly twentyfold, namely, from 189,674 in March, 1917, to 3,664,000 in November, 1918. The steps in this amazing growth are shown in the following table:

1917.	*In U. S.	†Am. Ex.	Total.
April 1.....	190,000	190,000
July 1.....	480,000	20,000	500,000
August 1.....	516,000	35,000	551,000
September 1....	646,000	45,000	691,000
October 1.....	883,000	65,000	948,000
November 1.....	896,000	104,000	1,100,000
December 1.....	1,060,000	129,000	1,189,000
1918.			
January 1.....	1,149,000	176,000	1,325,000
February 1.....	1,257,000	225,000	1,482,000
March 1.....	1,386,000	253,000	1,639,000
April 1.....	1,476,000	320,000	1,796,000
May 1.....	1,529,000	434,000	1,963,000
June 1.....	1,390,000	722,000	2,112,000
July 1.....	1,384,000	994,000	2,380,000
August 1.....	1,365,000	1,293,000	2,658,000
September 1....	1,425,000	1,576,000	3,001,000

1917.	*In U. S.	†Am. Ex.	Total.
October 1.....	1,599,000	1,834,000	3,433,000
November 1....	1,672,000	1,993,000	3,665,000

*In United States and foreign possessions,
†American expeditionary force in France and England.

RANK AND INSIGNIA OF ARMY AND NAVY OFFICERS.

For illustration see opposite page.

The following table shows the rank of commissioned officers in the United States army and marine corps and the corresponding grades in the navy:

ARMY AND MARINE CORPS.	NAVY.
General.	Admiral.
Lieutenant-general.	Vice-admiral.
Major-general.	Rear-admiral.
Brigadier-general.	Commodore.
Colonel.	Captain.
Lieutenant-colonel.	Commander.
Major.	Lieutenant-commander.
Captain.	Lieutenant.
First Lieutenant.	Lieutenant, jr. grade.
Second Lieutenant.	Ensign.

Commissioned army officers wear the following insignia on the shoulder loop.

RANK AND INSIGNIA.

Lieutenant-general—Three silver stars.
Major-general—Two silver stars.
Brigadier-general—One silver star.
Colonel—Silver eagle.
Lieutenant-colonel—Silver oak leaf.
Major—Gold oak leaf.
Captain—Two silver bars.
First Lieutenant—One silver bar.
Second Lieutenant—No insignia.
Chaplain—Cross.

Commissioned officers of the navy wear the following devices on the collar:

Admiral—Anchor and four stars.
Vice-admiral—Anchor and three stars.
Rear-Admiral—Anchor and two stars.
Captain—Anchor and silver eagle.
Commander—Anchor and silver leaf.
Lieutenant-commander—Anchor and gold leaf.
Lieutenant—Anchor and two bars.
Lieutenant, junior grade—Anchor and one bar.

Following are the army service insignia:
Infantry—Crossed guns.
Cavalry—Crossed sabers.
Field artillery—Crossed cannon and numbers.
Coast artillery—Crossed cannon.
Engineer corps—Castle.
Aviation corps—Globe with wings.
Medical corps—Winged staff and serpents.
Signal corps—Crossed flags.
Quartermaster corps—Eagle on wheel.
Motor transport corps—Winged hat on bronze wheel.

Hat Cords.

Generals wear hat cords the color of gold, while those of other officers are gold and black. The branch of the service to which each enlisted man belongs is indicated by the color of the hat cord he wears:

Infantry—Light blue.
Cavalry—Yellow.
Artillery—Scarlet.
Engineers corps—Scarlet intertwined with white.
Signal corps—Orange intertwined with white.
Medical department—Maroon.
Quartermaster corps—Buff.
Ordnance department—Black intertwined with white.
Motor transport corps—Purple.

Chevrans.

First class privates wear on their coat sleeves or shirts the design of the department or service to which they belong. The designs or chevrons sewn on the sleeves of noncommissioned officers are as follows:

Lance corporal—One inverted V-shaped bar.
Corporal—Two bars.
Sergeant—Three bars.
First sergeant—Diamond mark under bars.
Stable sergeant—Horse's head under bars.
Color sergeant—Star under bars.
Battalion quartermaster sergeant—Three horizontal bars.
Chief trumpeter—One bar and bugle.

Regimental Insignia.

The number on a man's coat collar is that of the regiment to which he belongs. If it is below 101 it shows that he is in the regular army; if it is between 101 and 300 inclusive he is in the national guard; if it is 301 or over he is in the national army. In addition men in the national guard and the national army will have on their collars devices showing from what state they come, and in the case of national guards the regiment to which they belonged before being taken into the federal service, as for example, Ill.; 1st Ill.; Ind.; 3d Ind., etc.

By direction of the president the war department issued general orders Jan. 12, 1918, authorizing the following decorations and insignia:

Distinguished Service Cross.

A bronze cross of appropriate design and a ribbon to be worn in lieu thereof, to be awarded by the president, or in the name of the president, by the commanding general of the American expeditionary forces in Europe to any person who, while serving in any capacity with the army, shall hereafter distinguish himself or herself, or who, since April 6, 1917, has distinguished himself or herself, by extraordinary heroism in connection with military operations against an armed enemy of the United States under circumstances which do not justify the award of the medal of honor.

Distinguished Service Medal.

A bronze medal of appropriate design and a ribbon to be worn in lieu thereof, to be awarded by the president to any person who, while serving in any capacity with the army, shall hereafter distinguish himself or herself, or who, since April 6, 1917, has distinguished himself or herself by exceptionally meritorious service to the government in a duty of great responsibility in time of war or in connection with military operations against an armed enemy of the United States.

War Service Chevron.

A gold chevron of standard material and design, to be worn on the lower half of the left sleeve of all uniform coats, except fatigue coats, by each officer and enlisted man who has served six months in the zone of the advance in the war, and an additional chevron for each six months of similar service thereafter. Officers and enlisted men of the aviation service on combat flying duty in Europe will be credited for the war service chevron with the time they may be on duty.

Wound Chevrons.

A gold chevron of pattern identical with that of the war service chevron, to be worn on the lower half of the right sleeve of all uniform coats, except fatigue coats, by each officer and enlisted man who has received, or who may hereafter receive, a wound in action with the enemy which necessitates treatment by a medical officer, and an additional chevron for each additional wound, but not more than one chevron will be worn for two or more wounds received at the same time. Disablement by gas necessitating treatment by a medical officer shall be considered to be a wound within the meaning of this order.

Medal of Honor.

During the present emergency, whenever a recommendation for the award of the medal of honor reaches the commanding general of the American expeditionary forces in Europe, he is authorized to cable his recommendation for immediate action and to hold the papers until a reply is received. In the event that his recommendation is approved, he will note the action taken in his indorsement when forwarding the papers in the case and will present the medal to the recipient as the representative of the

president or will delegate a suitable officer to act in that capacity.

In any case where the person recommended for the award of the medal of honor is at the time of the recommendation apparently fatally wounded or so ill as to endanger his life, the commanding general of the expeditionary forces in Europe is authorized to act immediately upon the recommendation as the representative of the president, afterward reporting his action by cable.

Whenever a recommendation for the award of the medal of honor is approved by cable, and whenever a report is received announcing the award of the distinguished service cross by the commanding general of the American expeditionary forces in Europe, and whenever the distinguished service medal is awarded, such award, with a statement of the circumstances in each case, will be announced in general orders of the war department by the adjutant-general of the army without unnecessary delay.

[The medal of honor is the highest token of valor awarded in the American army. It originated at the time of the civil war.]

The distinguished service cross and the distinguished service medal may be awarded posthumously to persons killed in the performance of acts meriting such award or to persons whose death from any cause may have occurred prior to such award. The medal so awarded will be issued to the nearest relative of the deceased person.

No individual will be entitled to more than one distinguished service cross or one distinguished service medal, but each additional citation in war department orders for conduct or service that would warrant the award of either of these decorations will entitle the person so cited to wear upon the ribband of the decoration and upon the corresponding ribbon a bronze oak leaf of approved design, and the right to wear such oak leaf will be announced as a part of the citation. Other citations for gallantry in action published in orders issued from the headquarters of a force commanded by a general officer will be indicated in each case by a silver star three-sixteenths of an inch in diameter worn upon the ribband of the distinguished service cross and upon the corresponding ribbon.

When an officer or enlisted man is admitted to a hospital for treatment of a wound, or when an officer or enlisted man is treated for a wound without being admitted to a hospital, the commanding officer of the hospital, or, in the latter case, the medical officer who treats the wound, will furnish the commanding officer of the wounded person with a certificate describing briefly the nature of the wound and certifying to the necessity of the treatment. This information may be furnished to commanders of higher units in the form of certified lists and will be transmitted by them to the commanding officers concerned.

Commanding officers will forward to the adjutant-general of the army, through military channels, lists in duplicate of those officers and enlisted men of their commands who have been honorably wounded in action, with a statement in the case of each individual, showing time and place wounds were received and organization in which they were then serving. Whenever a report is made of an action, it will be accompanied by the above described list and by certified copies of the medical officers' statements.

Upon receipt of lists of wounded the commanding general of the American expeditionary forces in Europe is authorized to grant the right to wear the wound chevron to the persons concerned, and he will note his action by indorsement in forwarding the papers.

The right to wear the wound chevron shall be confined to those who are authorized to do so by letter from the adjutant-general of the

army or from the commanding general of the American expeditionary forces in Europe.

Requests for the issue or purchase of these chevrons will be accompanied by a list of the persons for whom they are desired, for the information of the commanding officer who authorizes the issue. The officer, before approving a requisition or a purchase, will verify the right of the persons concerned to wear the chevrons requested. Requests for authority to wear the wound chevron on account of wounds received prior to the present war will be forwarded with all available evidence to the adjutant-general of the army for verification through the war department records and appropriate action.

Mexican Service Badge.

The following order was issued by the war department in February, 1918:

By authority of the president, a service badge with ribbon, to be known as the Mexican service badge, will be issued to all officers and enlisted men who are now or may hereafter be in the military service of the United States, and whose service has been under the following conditions:

(a) In Mexico, afloat or ashore, as members of the Vera Cruz expedition, between April 24, 1914, and Nov. 26, 1914.

(b) In Mexico as members of the punitive or other authorized expeditions between March 14, 1916, and Feb. 7, 1917.

(c) Those who were actually present and participated in an engagement against Mexicans between April 22, 1911, and Feb. 7, 1917, in which there were casualties on the side of the United States troops.

(d) Those who were present as members of the Mexican border patrol between April 12, 1911 and Feb. 7, 1917, in proximity to an engagement between Mexicans which resulted in casualties among their own company, troop, battery or detachment.

The distribution of this badge will be governed by the provisions of article VIII., compilation of general orders, circulars and bulletins, war department, 1881-1915. No individual will be entitled to more than one Mexican service badge.

Persons not now in the army of the United States, who, if they had remained in the service would be entitled to this badge and whose separation from the service has been honorable, may apply to the adjutant-general of the army for authority to purchase and wear the Mexican service badge.

Wound and Service Chevrons in Navy.

Wound and service chevrons for men in the naval service, afloat or ashore in Europe, were authorized by the secretary of the navy Sept. 25, 1918. The chevrons are similar to those worn in the army and take the form of a V-shaped bar of gold braid for blue uniforms and yellow silk lace or braid for white. Service chevrons are worn on the lower half of the left sleeve and wound chevrons on the right sleeve.

War service chevrons will be given as follows:

Served three months or more since April 6, 1917 afloat or ashore, on duty east of the thirty-seventh meridian west of Greenwich.

Served afloat three months or more since May 25, 1918, on vessels that have cruised on the high seas of the Atlantic ocean north of the equator.

Served on vessels that have been torpedoed or fired upon.

Served on aviation duty in the United States, making actual flights in search of enemy vessels since May 25, 1918.

Service on transports and conveying ships shall be included.

UNITED STATES ARMY PAY.

Statement of the system of pay of the army authorized by the quartermaster-general:

Commissioned Officers.

Rank.	Per year.
General.....	\$10,000
Lieutenant-general.....	9,000
Major-general.....	8,000
Brigadier-general.....	6,000
Colonel.....	4,000
Lieutenant-colonel.....	3,500
Major.....	3,000
Captain.....	2,400
First lieutenant.....	2,000
Second lieutenant.....	1,700

In the cases of colonels and other commissioned officers of lower rank an increase of 10 per cent, known as longevity pay, is allowed for each period of five years of service, provided that such increase shall not exceed 40 per cent. Officers of higher rank than colonel receive no increase for continuous service.

All officers are entitled to be furnished public quarters, with fuel and light, but if these cannot be provided the officers receive a commuted money value of the same. The allowance for quarters for a second lieutenant is 2 rooms, or \$24 per month; for a first lieutenant, 3 rooms or commutation of \$36 per month; a captain, 4 rooms or commutation of \$48; major, 5 rooms or commutation of \$60; lieutenant-colonel, 6 rooms or commutation of \$72; colonel, 7 rooms or commutation of \$84; brigadier-general, 8 rooms or commutation of \$96; major-general, 9 rooms or commutation of \$108; lieutenant-general, 10 rooms or commutation of \$120 and a general, 11 rooms or commutation of \$132. All receive a suitable allowance for heat and light, dependent upon the locality of their stations and the season. While on foreign service officers receive an increase of 10 per cent of their base pay and longevity pay.

Aerial Flight Increases.

Aviation officers of the signal corps, or officers attached to the signal corps, while on duty which requires them to participate regularly and frequently in aerial flights, are entitled to an increase in the pay of their grade, under their commissions, as follows: Aviation officers, 25 per cent; junior military aviators, 50 per cent; military aviators, 75 per cent. Each junior military aviator and each military aviator duly qualified and serving has the rank, pay and allowances of one grade higher than that held by them under their commissions, provided that the ranks under their commissions are not higher than that of captain.

Pay of Enlisted Men.

The pay of enlisted men depends on their grades, ratings and length of service. From June 1, 1917, and continuing during the term of the war the pay of enlisted men is as follows:

Men receiving \$30: All privates, the army entering grade.

Men receiving \$33: First-class privates, men promoted to act in minor noncommissioned officer capacity.

Men receiving \$36: Corporals, saddlers, mechanics, farmers and wagoners, and musicians of the third class.

Men receiving \$38: All sergeant grades in the line, which include infantry, field artillery, coast artillery and cavalry; cooks, horseshoers, band corporals and musicians of the second class.

Men receiving \$44: Sergeants of the various corps of the engineers, ordnance, signal corps, quartermaster corps and medical department; band sergeants and musicians of the first class.

Men receiving \$48: Battalion sergeant majors, squadron sergeant majors, sergeant majors (junior grade), sergeant buglers, master gunners and assistant band leaders of the line.

Men receiving \$51: Regimental sergeant majors, regimental supply sergeants, sergeant majors (senior grade), quartermaster sergeants of the quartermaster corps, ordnance sergeants, first sergeants, electrical sergeants of the first class, assistant engineers and battalion sergeant majors and battalion supply sergeants of the engineers.

Men receiving \$56: Sergeants, first class, of the medical department.

Men receiving \$71: Hospital sergeants, master engineers of the junior grade and engineers.

Men receiving \$81: Quartermaster sergeants of the senior grade of the quartermaster corps, band leaders, master signal electricians, master electricians, master engineers of the senior grade and master hospital sergeants.

Assignment to Special Duties.

These are the established grades of the enlisted men, but they may variously be assigned to such special duties as chauffeurs, switch-board operators, cobblers, clerks, camoufleurs, sanitary inspectors, draftsmen, stevedores, accountants, plumbers and such other occupations and trades as are necessary to meet the requirements of army service.

In addition to the rates of pay for enlisted men heretofore mentioned, supplemental pay or allowances are made as follows:

(1) Increased pay is allowed for continuous service, computed under what is known as "enlistment period." An enlistment period ordinarily represents a period of three or four years, dependent upon the law in effect at date of enlistment. There are seven such periods, covering a period of service of from 1 year to more than 18 years, provided for, and the increases range from \$3 to \$24 per month, according to the grade and length of service. Men in the grade of private calling for \$30 per month are increased \$3 per month during the second enlistment period, an additional \$3 during the third enlistment period, and \$1 per month for each additional enlistment period to include the seventh enlistment period. Men above the \$30 grade and up to and including the \$38 grade are entitled to \$3 per month additional pay for each enlistment period from the second to the seventh for each successive enlistment period. Men above the \$38 grade are entitled to \$4 per month additional pay for each enlistment period from the second to the seventh.

Some Additional Ratings.

(2) Enlisted men of the coast artillery, below the grade of mess sergeant, are entitled to the following additional ratings, according to established individual qualifications: Casement electricians, observers of the first class, plotters and coxswains, \$9 per month; chief planters, observers of second class, chief loaders, gun commanders and gun pointers, \$7 per month; enlisted men of the field artillery—expert first-class gunners, \$5 per month; first-class gunners, \$3 per month, and second-class gunners, \$2 per month; enlisted men of the cavalry, engineers and infantry—expert rifemen, \$5 per month; sharpshooters, \$3 per month and marksmen, \$2 per month; enlisted men of the medical department—surgical assistants, \$5 per month; nurses (enlisted men) \$3 per month, and dispensary assistant, \$2 per month.

(3) Enlisted men of the signal corps, while on duties which require them to participate regularly in aero flights, assuming that they have rating of aviation mechanic, receive 50 per cent increase in their monthly pay.

Housing and Subsistence.

(4) All enlisted men, while on detached duty not in the field, where there are no army quarters available, receive in addition to their pay \$15 per month to cover the expense of housing and also a suitable allowance for subsistence and for heat and light.

(5) Enlisted men, if serving in a foreign country or beyond the continental limits of the United States (Porto Rico, Hawaii and Panama Canal Zone excepted) receive 20 per cent increase in pay computed on the base pay and service pay prevailing prior to June 1, 1917, when an act of congress increased, for the "term of the emergency," the pay of all enlisted men in amounts ranging from 50 per cent to 8 per cent.

(6) Enlisted men attached to the United States Military academy are entitled to the same pay and allowances as other enlisted men of the regular army of the same grade and additional compensation provided for performing certain duties upon detail therefor in orders.

For deeds of valor, recognized by acts of congress, officers and enlisted men receive certificates of merit which entitle them to an additional compensation of \$2 per month.

Allowances at Retirement.

Enlisted men can apply for retirement after 30 years of service. They are retired on 75 per cent of the monthly pay drawn at the time of retirement, and \$15.75 a month additional in lieu of allowances.

Officers are retired for disability or after 64 years of age, and receive 75 per cent of the pay of the grade held at date of retirement.

An enlisted man in active service has no necessary personal expenses except for barber and laundry. Uniforms, underclothing, shoes, hats, quarters, medical attendance and subsistence are supplied them at government expense. Such materials as tobacco, postage, confectionery and incidentals of individual taste may be purchased at the post exchange at cost.

Officers, while in hospital, are charged \$1 per day for subsistence. They are not entitled to clothing or equipment and are required to subsist themselves, purchasing their supplies either from the quartermaster or through the ordinary channels of trade.

NAVY PAY TABLE.

From official statement issued by committee on public information, Washington, D. C., Jan. 11, 1918.

All commissioned officers of the active list of the navy receive the same pay and allowances according to rank and length of service. Officers of the medical, pay and construction corps, chaplains, civil engineers and professors of mathematics have the relative ranks of the various grades of the line, the annual base pay of each grade being as follows:

Admiral (in command of fleet).....	\$10,000
Vice-admiral (second in command of fleet)	9,000
Rear-admiral, upper half.....	8,000
Rear-admiral, lower half.....	6,000
Commodore	6,000
Captain	4,000
Commander	3,500
Lieutenant-commander	3,000
Lieutenant	2,400
Lieutenant (junior grade).....	2,000
Ensign	1,700

To each commissioned officer below the rank of rear-admiral is allowed 10 per cent of his yearly base pay for each five years of service in the army, navy and marine corps, but not exceeding in all 40 per cent. Additional provision is made by law that the pay of a captain shall not exceed \$5,000, a commander \$4,500, and a lieutenant-commander \$4,000 per annum.

Sea and Foreign Shore Duty.

An officer on sea or on shore duty beyond the continental limits of the United States receives while so serving 10 per cent additional of his pay.

An officer on shore duty where no government quarters are furnished is paid \$12 per month for each of the number of rooms to which his rank entitles him, that is:

	Rooms.
Rear-admiral, upper half.....	9
Rear-admiral, lower half.....	8
Captain	7
Commander	6
Lieutenant-commander	5
Lieutenant	4
Lieutenant (junior grade).....	3
Ensign, warrant officer and nurse.....	2

Varying allowances for heat and light, depending upon the month and place of duty, are made for the number of rooms actually occupied, but not exceeding the number to which an officer's rank entitles him.

Aids to rear-admirals of the upper half are each paid \$200 per annum and aids to rear-admirals of the lower half \$150 each per annum.

Student Naval Aviators.

Officers of the navy appointed student naval aviators and while detailed for duty involving actual flying in aircraft receive the pay and allowances of the rank plus 35 per cent increase thereof, and those officers who have qualified as naval aviators shall, while so detailed, receive the pay and allowances of their rank plus 50 per cent thereof.

Boatswains, gunners, pay clerks, machinists, carpenters, sailmakers and pharmacists are known as warrant officers and are paid as follows:

	At sea.	On shore.	Waiting orders.
First 3 years' service....	\$1,500	\$1,125	\$875
Second 3 years' service....	1,625	1,250	1,000
Third 3 years' service....	1,750	1,625	1,125
Fourth 3 years' service....	2,000	1,750	1,250
After 12 years' service....	2,250	2,000	1,500

Warrant officers on shore duty receive the same allowances for quarters and heat and light as an ensign.

After six years from date of warrant these officers are, if duly qualified, commissioned chief warrant officers and receive the pay and allowances of ensign. After six years from date of commission each commissioned warrant officer with a creditable record receives the pay and allowances of a lieutenant (junior grade), and after twelve years from date of commission the pay and allowances of a lieutenant.

Warrant officers while attached to a sea-going ship are paid a ration allowance of 40 cents per day.

All officers in the regular navy are required to provide their own uniforms and to pay for subsistence both ashore and afloat.

The Entitled Personnel.

The enlisted personnel of the navy is of various classifications, depending upon their duties. Entry into the service is usually made in the lower ratings and the men are advanced upon the establishment of qualifications for the higher ratings. The following tables show the classifications and the base monthly pay of each rating during the present war as provided by the act of May 22, 1917:

Chief Petty Officers.

Chief master at arms.....	\$77.50
Chief boatswain's mates.....	61.00
Chief gunner's mates.....	61.00
Chief turret captains.....	73.00
Chief quartermasters.....	61.00
Chief machinists' mates.....	83.00
Chief electricians.....	72.00
Chief carpenters' mates.....	61.00
Chief water tenders.....	61.00
Chief yeomen.....	72.00
Chief storekeepers.....	61.00
Chief pharmacists' mates.....	72.00
Bandmasters.....	63.20
Chief commissary stewards.....	83.00
Chief printers.....	72.00

Any of the above-named chief petty officers who has served as such for one year with credit is given what is known as a "per-

manent appointment," which increases his base pay to \$83 per month.

Petty Officers, First Class.

Master at arms, first class.....	\$52.00
Boatswain's mates, first class.....	52.00
Gunners' mates, first class.....	52.00
Turret captains, first class.....	61.00
Quartermasters, first class.....	52.00
Boilermakers.....	77.50
Machinists' mates, first class.....	66.50
Coppersmiths.....	66.50
Shipfitters, first class.....	66.50
Electricians, first class.....	61.00
Blacksmiths.....	61.00
Plumbers and fitters.....	55.50
Sailmakers' mates.....	52.00
Carpenters' mates, first class.....	52.00
Water tenders.....	52.00
Painters, first class.....	52.00
Storekeepers, first class.....	52.00
Pharmacists' mates, first class.....	52.00
Yeomen, first class.....	52.00
First musicians.....	47.60
Commissary stewards.....	72.00
Ships' cooks, first class.....	66.50
Bakers, first class.....	55.50
Printers, first class.....	52.00

Petty Officers, Second Class.

Master at arms, second class.....	\$46.50
Boatswain's mates, second class.....	46.50
Gunners' mates, second class.....	46.50
Quartermasters, second class.....	46.50
Machinists' mates, second class.....	52.00
Electricians, second class.....	52.00
Shipfitters, second class.....	52.00
Oilers.....	48.70
Carpenters' mates, second class.....	46.50
Printers, second class.....	46.50
Painters, second class.....	46.50
Storekeepers, second class.....	46.50
Yeomen, second class.....	46.50
Ships' cooks, second class.....	52.00
Pharmacists' mates, second class.....	46.50

Petty Officers, Third Class.

Master at arms, third class.....	\$41.00
Coxswains.....	41.00
Gunners' mates, third class.....	41.00
Quartermasters, third class.....	41.00
Electricians, third class.....	41.00
Carpenters' mates, third class.....	41.00
Painters, third class.....	41.00
Storekeepers, third class.....	41.00
Yeomen, third class.....	41.00
Pharmacists' mates, third class.....	41.00

Seamen, First Class.

Seamen gunners.....	\$36.60
Seamen.....	38.40
Firemen, first class.....	46.50
Shipwrights.....	35.50
Musicians, first class.....	43.20
Ships' cooks, third class.....	41.00
Bakers, second class.....	46.50
Hospital apprentice, first class.....	38.40

Seamen, Second Class.

Seamen, second class.....	\$35.90
Firemen, second class.....	41.00
Musicians, second class.....	41.00
Buglers.....	41.00
Ships' cooks, fourth class.....	35.50
Hospital apprentice, second class.....	35.90

Seamen, Third Class.

Apprentice seamen.....	\$32.60
Firemen, third class.....	36.20
Landsmen.....	32.60

Messmen Branch.

Stewards to commanders in chief.....	\$72.00
Cooks to commanders in chief.....	61.00
Stewards to commandants.....	72.00
Cooks to commandants.....	61.00
Cabin stewards.....	61.00
Cabin cooks.....	55.50
Wardroom stewards.....	61.00
Wardroom cooks.....	55.50

Steerage stewards.....	\$46.50
Steerage cooks.....	41.00
Warrant officers' stewards.....	46.50
Warrant officers' cooks.....	41.00
Mess attendants, first class (United States citizen).....	41.00
Mess attendants, second class (United States citizen).....	35.50
Mess attendants, third class (United States citizen).....	37.00
Mess attendants, first class (not United States citizen).....	38.40
Mess attendants, second class (not United States citizen).....	37.00
Mess attendants, third class (not United States citizen).....	32.60

In addition to the pay as provided in the above tables the following amounts are also paid monthly to each enlisted man who is qualified to receive them:

\$1.50 for each successive re-enlistment for four years within four months of date of honorable discharge from previous enlistment.

\$.50 for first re-enlistment and \$3.30 for each subsequent re-enlistment, if citizen of the United States and completed previous enlistment.

\$2.20 if a seaman gunner.

\$2.20 if a graduate of a petty officers' school.

\$5.50 to a steward or cook who holds a certificate of qualification and is a citizen of the United States.

83 cents for each good conduct medal a man holds.

Extra Monthly Compensation.

The following extra monthly compensations are paid to men who perform the transient duties specified:

\$5 to a seaman in charge of hold.

\$5 to a coxswain of a steam or motor launch.

\$5 to a captain of a gun's crew.

\$5 to a jack-of-the-dust.

\$5 to a lamplighter.

\$5 to a messman.

From \$10 to \$30 to a mail clerk, the amount depending upon the complement of the ship.

From \$2 to \$10 to a man who qualifies at target practice as a gun pointer, the amount depending upon the caliber of the gun.

From \$1 to \$3 to a signalman.

From \$10 to \$20 to a tailor or tailor's helper, the amount depending upon the complement of ship.

Pay for Special Duties.

For special duties or details the following compensations are paid:

\$1.20 per hour to divers for the actual time spent under water.

33 cents per day to seamen detailed for duty as firemen.

\$5 per month for submarine service.

\$1 per day (but not exceeding \$15 per month) spent submerged in submarine, if qualified for torpedo work.

A man detained beyond the expiration of his enlistment receives one-fourth additional of all pay while so detained.

A man receives a gratuity of four months' pay if he re-enlists within four months and presents an honorable discharge from his last enlistment.

Each enlisted man receives on first enlistment an outfit of clothing and small stores free of charge. Any articles subsequently drawn are issued at cost price.

Enlisted men are subsisted by the government. Men on detached duty are furnished cash in lieu of subsistence.

Men discharged are either furnished transportation to their homes and all expenses while en route or are paid 4 cents per mile for the total number of miles from place of discharge to their homes.

On board each ship of the navy and at each station on shore is maintained a commissary store at which may be purchased at cost price

such articles as are usually sold in civilian stores and shops.

Officers on the retired list receive three-fourths of their active duty pay.

Enlisted men are retired after 30 years' service and are paid three-fourths of total pay and allowances they received at date of retirement and cash in lieu of quarters and subsistence.

Officers and men of the naval reserve force and the national naval volunteers while on active duty receive the same pay and allowances as those of same rank and length of service in the regular navy.

When first called into active service in time of war or national emergency a uniform gratuity of \$150 is allowed each officer of the naval reserve and \$60 each enlisted man.

RECONSTRUCTION HOSPITALS FOR DISABLED SOLDIERS.

The following statement was issued by the United States war department Aug. 1, 1918:

The surgeon-general, with the approval of the general staff, announces the completion of plans for the physical reconstruction of disabled soldiers in the general military hospitals. These plans are formulated with a view to close co-operation with the war department committed to the reception and special service in the work of restoring men to full or limited military service, and with the federal board for vocational education, which is authorized by the law to provide vocational training for disabled men after their discharge from the army and navy.

The records of 516 cases treated in four hospitals show 134 men able to return to full military duty, 210 fit for limited service and 172 who are eligible for discharge. In the last group twelve are classed as helpless or institutional cases, 121 are able to return to their former occupations, and thirty-nine will need further training to fit them for earning a livelihood. These figures show the division of responsibility in the work of reconstruction.

The task of fitting men for further military service is at present the most pressing need because wherever an able-bodied man behind the lines can be replaced by one less fit physically, but vocationally capable, a soldier is gained for active duty. The reconstruction work in the hospitals, therefore, will emphasize technical training in all lines capable of adaptation to the physical limitations of disabled men and in which employment will act as a therapeutic agent. When play and work and study will help a man to get well, this kind of medicine will be prescribed to the patient. If the work he does leads to further service in the army or to better prospects in civilian life so much the better.

HOSPITALS DESIGNATED.

The surgeon-general has designated the following general military hospitals for the work of physical reconstruction:

Walter Reed General Hospital, Washington, D. C.

General hospital No. 2, Fort McHenry, Md.

General hospital No. 3, Colonia, N. J.

General hospital No. 6, Fort McPherson, Ga.

General hospital No. 7, Roland park, Baltimore (for the blind).

General hospital No. 8, Otisville, N. Y.

General hospital No. 4, Fort Porter, N. Y.

General hospital No. 9, Lakewood, N. J.

General hospital No. 11, Cape May, N. J.

General hospital No. 16, New Haven, Conn.

General hospital No. 17, Markleton, Pa.

Letterman General hospital, San Francisco, Cal.

United States Army hospital, Fort Des Moines, Ia.

Plattsburg Barracks hospital, Plattsburg Barracks, N. Y.

General hospital, Fort Bayard, N. M.

POLICY TO BE FOLLOWED.

The policy to be followed in these hospitals, as announced by the surgeon-general, is that hereafter no member of the military service

disabled in line of duty, even though not expected to return to duty will be discharged from service until he shall have attained complete recovery or as complete recovery as may be expected when the nature of his disability is considered. In furtherance of this policy physical reconstruction is defined as complete mental and surgical treatment carried to the point of maximum functional restoration, both mental and physical. To secure this result all methods recognized by modern medicine as conducive to cure will be utilized. In other words, not only the ordinary means of medicine and surgery, including all specialties, will be utilized, but also physical measures such as are employed under physiotherapy, including hydro, electro and mechanotherapy, active exercises, indoor and outdoor games, and passive exercise in the form of massage. Provision in the form of adequate buildings and equipment for physiotherapy have been adopted in each of the hospitals.

FUNCTIONAL RESTORATION, AIM.

Modern medicinal treatment does not end with physical cure. Functional restoration is the final aim of the modern physicians and surgeons. It is conceded that the physical rehabilitation of disabled men is peculiarly dependent upon their mental attitude. The more serious the disability, the greater the danger of mental depression and an indisposition to respond to medical and surgical treatment. The educational work should begin, therefore, at the moment when the man has arrived at the stage where he begins to worry about his future, whether in this country or overseas. The first problem is to divert his attention by simple recreation, through reading, pictures, games, handiwork occupations and the like, with a view to securing a genuine interest in the attainment of some worthy end—the end most certain to hold his attention and to claim his best efforts in his future vocation. Hence, by gradual steps he may be induced to supplement his previous vocational experience by academic, scientific, or technical instruction, or to choose a new vocation and begin preparation for it if such a course is necessary.

The end of "cheer up" work in the hospitals extends to all who are mentally capable of planning for their own future. This means a relatively large proportion of the entire number. The beginning is made at the bedside with handicrafts of various kinds grouped under the term "occupational therapy." When the man is able to leave the ward and can be benefited physically by technical training, he has the opportunity of working at specific trades either in the curative workshop, in specially provided classrooms, or out of doors.

The teachers for this work have been secured from the convalescent disabled soldiers who are already skilled in their vocations and from the enlisted personnel of the army, secured by transfer or by induction of regulars, but qualified for general military service, but qualified for special limited service. These instructors work under the direction of educational officers chosen for their professional standing in civil life and commissioned in the sanitary corps of the medical department. The general staff has just authorized commissions for 119 educational officers for this purpose.

CLASSES OF DISABLED SOLDIERS.

From the military standpoint disabled soldiers may be placed in three general classes:

(a) Those who can be restored to full duty.

(b) Those who can be fitted for limited service.

(c) Those disabled to the extent of unfitting them for further military service.

It is the announced policy of the surgeon-general that patients of the first class (a) should have, when circumstances warrant it, the benefit of therapeutic treatment through play work and study, as may be prescribed by medical officers, in order that their morale may be stiffened, their special skills improved, their future usefulness increased, and their recovery hastened.

Patients of the second class (b) should have, whenever conditions permit and the medical officers approve, such specific training—physical and vocational—as will in the judgment of the educational officers best fit such patients for limited service of a particular kind. At present patients are being trained in general hospitals for limited service as general and vocational teachers, typists, printers, tailors, cobblers, harnessmakers, welders, motor mechanics, painters, machine workers, woodworkers, bookkeepers, statisticians, telegraphers, photographers, telephone operators, cooks, storekeepers, electricians, etc.

LIST TO BE EXTENDED.

The list will be extended with the advice and co-operation of the committee on education and special service of the war department to meet other needs as they arise. In connection with the large general hospitals there is abundant opportunity for practice in

many trades and occupations. At Fort McPherson, for example, practical experience can be gained in twenty different trades. Moreover, there is immediately adjacent to the hospital a large quartermaster's mechanical repair shop, covering all phases of mechanical repair and construction to which men can be assigned for limited service or to gain experience.

Patients of the third class (c) should be encouraged in every possible way to accept the benefits accorded them for vocational training by the federal board for vocational education. To this end they should have while in the hospital such physical training and general education as will best promote their physical reconstruction and at the same time contribute most to their vocational training. Patients who do not select or who are not eligible to continue their education under the federal board should receive such training as the medical and educational officers deem best in each individual case.

ARMY ORGANIZATION.

The following statement outlining the new army organization for overseas service was made public by the war department Sept. 22, 1917:

Strength of Infantry Regiment.

At maximum strength an infantry regiment will comprise 103 officers and 3,652 men. It will be made up as follows, the figures including officers and men:

1 headquarters and headquarters company.....	303
3 battalions of 4 rifle companies each.....	3,078
1 supply company.....	140
1 machine gun company.....	178
1 medical detachment.....	56
	3,755

Each rifle company has a strength of 250 men and 6 officers. It is composed of a company headquarters (2 officers and 18 men) and four platoons. Each platoon includes:

1 headquarters.....	2
1 section bombers and rifle grenadiers.....	22
2 sections riflemen, 12 each.....	24
1 section auto riflemen (4 guns).....	11
	59

The machine gun company has 6 officers and 172 men. It consists of the headquarters (3 officers and 21 men), 3 platoons (each with 1 officer and 46 men), and a train (13 men). Its armament is 12 machine guns of heavy type and 4 spare guns.

Transportation and Equipment.

The transportation equipment of the regiment is: 22 combat wagons, 16 rolling kitchens, 22 baggage and ration wagons, 16 ration carts, 15 water carts, 3 medical carts, 24 machine gun carts, 59 riding horses, 8 riding mules, 332 draft mules, 2 motorcycles with side cars, 1 motor car, 42 bicycles.

New fighting equipment for each regiment, in addition to the usual rifles, bayonets, pistols, etc., includes 480 trench knives (40 to each company), 192 automatic rifles (16 to each company), and 3 one-pounder cannon manned by the one-pounder cannon platoon of the regimental headquarters company.

Headquarters Company.

Each regimental headquarters company is made up of 7 officers and 294 men, as follows:

One headquarters platoon (93 officers and men) including 1 staff section (36 officers and men), 1 orderlies section (29 men), 1 band section (28 men).

One signal platoon (77 officers and men) including 1 telephone section (51 men), 1 section with headquarters (19 men), 1 section with 3 battalions (16 officers and men).

One sappers' and bombers' platoon (43 officers and men) including 1 section sappers (9 men) for digging and special work, 1 section bombers (34 officers and men).

One pioneer platoon (55 officers and men) for engineer work.

One one-pounder cannon platoon (33 officers and men).

Infantry Divisions.

The following summary of the organization of an infantry division completes the general outline of organization of the United States army for service in Europe. The figures are the total of officers and men for each entry. Each infantry division comprises:

1 division headquarters.....	164
1 machine gun battalion of 4 companies.....	768
2 infantry brigades, each composed of 2 infantry regiments and 1 machine gun battalion of 3 companies.....	16,420
1 field artillery brigade composed of 3 field artillery regiments and 1 trench mortar battery.....	5,068
1 field signal battalion.....	262
1 regiment of engineers.....	1,666
1 train headquarters and military police.....	337
1 ammunition train.....	962
1 supply train.....	472
1 engineer train.....	84
1 sanitary train composed of 4 field hospital companies and 4 ambulance companies.....	949
	27,152

Artillery and Machine Gun Strength.

The new organization increases the ratio of artillery and machine gun strength of infantry. In place of the old division of three brigades with three infantry regiments in each are two brigades with two infantry regiments in each. But in the new as in the old organization there are three regiments of field artillery in each division, making the ratio of artillery to infantry regiments three to four, in place of three to nine. A trench mortar battery, added to the artillery brigade, and a one-pounder platoon, attached to each infantry regiment headquarters company, adds to the gun strength of the division.

A division now includes a total of fourteen machine gun companies. Each of the four infantry regiments has one; each of the two brigades has a machine gun battalion of three companies, and the division has a machine gun battalion of four companies. This gives each division a mobile machine gun strength of ten companies, which can be used as special needs require, while each regiment still has its own machine gun equipment in one of its component companies. And, in addition, there are forty-eight sections of auto-riflemen, each section carrying four light machine guns (automatic rifles), one section in each of the four platoons making up each rifle company.

SPECIAL AND TECHNICAL TROOPS.

General order 108.

1. Under authority conferred by section 2, act of May 18, 1917, the president directs that there be organized for the period of the existing emergency, the enlisted strength being raised and maintained by voluntary enlistment or draft, the following special and technical engineer troops:

A. For each army:
Special service—to consist of:
(1) A gas and flame service; 1 regt. engrs.
(2) A mining service: 1 regtl. hqrs.; 6 engr. cos. (mining).
(3) A water supply service: 1 regtl. hqrs.; 6 engr. cos. (water supply).
(4) A general construction service: 1 regtl. hqrs.; 6 engr. cos. (construction).
(5) An engineer supply service: 1 regtl. hqrs.; 1 batln. engr. (supply) of 3 cos.; 1 batln. engrs. (workshop) of 3 cos.; 1 service batln. (4 cos.).
(6) A surveying and printing service: 1 batln. engrs. (topographical); additional officers will be attached as needed.
(7) A road service: 1 regtl. hqrs.; 4 batlns. engrs. (road) of 3 cos. each; 6 service batlns. (4 cos. each); 10 truck cos. (31 trucks each); 5 wagon cos. (61 wagons each).
(8) An army ponton park.
B. For the line of communications:
(1) A general construction service: 1 regtl. hqrs.; 6 engr. cos. (construction); 6 service batlns. (4 cos. each).
(2) An engineer supply service: 1 regtl. hqrs.; 2 batlns. engrs. (supply) of 3 cos. each; 2 batlns. engrs. (workshop) of 3 cos. each; 3 service batlns. (4 cos. each).
(3) A forestry service: 1 regtl. hqrs.; 10 batlns. engrs. (forestry) of 3 cos. each; 9 service batlns. (4 cos. each).
(4) A quarry service: 1 regtl. hqrs.; 2 batlns. engrs. (quarry) of 3 cos. each; 3 service batlns. (4 cos. each).
(5) A light railway service, consisting of the following:
Construction department—1 regtl. hqrs.; 5 batlns. engrs. (railway) of 3 cos. each; 3 service batlns. (4 cos. each).
Operation and mechanical department—1 regtl. hqrs.; 4 batlns. engrs. (railway) of 3 cos. each; 3 service batlns. (4 cos. each).
(6) A standard gauge railway service, consisting of the following:
Construction departments—5 regts. engrs. (railway) (the 11th, 15th, 16th, 17th and 18th engrs. [railway], nat. army); 8 service batlns. (4 cos. each).
Operation and maintenance department—2 regtl. hqrs.; 6 batlns. engrs. (railway) of 3 cos. each; 3 service batlns. (4 cos. each).
Mechanical and supplies department—1 regtl. engrs. (shop) (19th engrs. [railway], nat. army); 1 batln. engrs. (railway) of 3 cos.; 1 service batln. (4 cos.).
2. Service battalions will be transferred from one service to another as may be necessary. Engineer troops of a special service may be utilized in another engineer service in the discretion of the commanding general concerned.
3. A regimental headquarters will consist of:
Commissioned—Col., 1; Lieut.-col., 1; capt., 3; total, 5. Enlisted—Master engrs., sr. grade, 4; jr. grade, 4; regtl. sergt. major, 1; regtl. supply sergts., 2; sergts., 4; wagoners, 3; cooks, 2; pvts., first class, 6; pvts., 12; total, 38.
A battalion of engineers will consist of:
Battalion headquarters—Commissioned—Major, 1; capt., 2; 1st Lieuts., 1; total, 4. Enlisted—Master engrs., sr. grade, 2; jr. grade, 4; batln. sergt. major, 1; batln. supply sergt., 1; sergts., 2; corporals, 2; wagoners, 2; cook, 1; pvts., first class, 3; pvts., 6; total, 24. And three engineer companies.
An engineer company will consist of:
Commissioned—Capt., 1; 1st Lieuts., 3; 2d Lieuts., 2; total, 6. Enlisted—First sergt., 1; sergts., first class, 4; supply sergt., 1; mess sergt., 1; stable sergt., 1; sergts., 10; corporals, 20; horseshoer, 1; saddler, 1; wagoners, 5; cooks, 5; buglers, 2; pvts., first class, and pvts., 198; total, 250.
An army ponton park (materiel, 3 ponton divisions and 1 supply division complete) will consist of:
Commissioned—First Lieut., 1; 2d Lieut., 1; total, 2. Enlisted—First sergt., 1; sergts., first class, 2; supply sergt., 1; mess sergt., 1; stable sergts.,

4; sergts., 4; corporals, 15; horseshoers, 4; saddler, 1; wagoners, 65; cooks, 3; buglers, 2; pvts., first class, 26; pvts., 52; total, 181.
Combat wagons (6 mule), 30; combat wagons (4 mule), 15; baggage and ration wagons, 3; rolling kitchen, 1; water cart (2 mule), 1; technical supply train wagons (6 mule), 5; technical supply train wagons (4 mule), 10; horses, riding, 3; mules, draft, 334.
A service battalion will consist of:
Battalion headquarters: Commissioned—Major, 1; 1st Lieut., 1; 2d Lieut., 1; total, 3. Enlisted—Batln. sergt. major, 1; batln. supply sergt., 1; pvts., first class, 4; total, 6.
Four service companies, each of the following personnel:
Commissioned—Capt., 1; 1st Lieut., 1; 2d Lieut., 1; total, 3. Enlisted—First sergt., 1; mess sergt., 1; supply sergt., 1; sergts., 8; corporals, 16; wagoners, 3; mechanics, 2; buglers, 2; cooks, 4; pvts., first class, 70; pvts., 142; total, 250.
4. The following field transportation is authorized:
For each regimental headquarters—Truck (2 ton), 1; motor cars (5 passenger), 2; motorcycles with side cars, 6.
For each battalion headquarters—Truck (2 ton), 1; motor car (5 passenger), 1; motorcycles with side cars, 4.
For each engineer company—Trucks (2 ton), 2; truck (½ ton, delivery type), 1; motorcycles with side cars, 2; rolling kitchen (trail mobile type), 1; water cart (trail mobile), 1.
For each headquarters of a service battalion—Motorcycles with side cars, 3.
For each service company—Motor trucks, 2; motorcycles with side cars, 2; rolling kitchen (trail mobile type), 1; water cart (trail mobile), 1.
For each army ponton park—Baggage and ration wagons, 3; rolling kitchen (4 mule), 1; water cart (2 mule), 1; horse, riding, 3; mules, draft, 334.
SECRETARY BAKER'S VISITS TO EUROPE.
Newton D. Baker, the secretary of war, made two visits to Europe in 1918. On his first trip he arrived at a French port on March 19. After a conference in Paris with Arthur J. Balfour, the British foreign secretary, and Gen. Foch of the French army, he inspected the American camps and parts of the front line where Americans were receiving their "top" training. He also visited the Belgian front and met King Albert. Then he crossed the channel and went to London, where he was received by King George and had interviews with Premier Lloyd George and other British statesmen and military officers.
Returning to France soon after the beginning of the great German offensive on March 21 he conferred with Gen. Pershing and approved of the American commander's action in placing his troops at the unqualified disposal of Gen. Foch, who had been made the commander of the allied forces. Early in April he visited Italy, inspecting the damage done by air raids in Venice, calling at the Italian army headquarters and having interviews with Premier Orlando and the foreign and war ministers in Rome. Returning to France he was received by Premier Clemenceau and took part in ceremonies in Paris in connection with a celebration of the first anniversary of America's entry into the war.
Mr. Baker returned home, arriving at an Atlantic port on April 16. The dates of his departure for Europe and for his return trip were kept secret. He traveled both ways on one of the large German steamships interned in the United States and taken over when the war began.
Secretary Baker made another trip to France in the fall, spending part of September and October there and in England to arrange for further co-operation in shipping troops and supplies. He witnessed part of the American victory at the St. Mihiel salient and inspected the various military activities behind the lines as well as at the front. In England he visited a number of hospitals for American wounded.

SOLDIERS' AND SAILORS' INSURANCE.

See also amendments to war insurance act, page 391, this volume.

William C. DeLanoy, director of the bureau of war risk insurance in the treasury department, determined upon and published on Oct. 15, 1917, the terms and conditions of the contract of insurance to be made under the act of Oct. 6, 1917. Following is the substance of these terms: Insurance will be issued for any of the following aggregate amounts upon any one life, the amounts being converted into monthly installments as indicated:

Amount.	Installment.	Amount.	Installment.
\$1,000	\$5.75	\$4,500	\$25.88
\$1,500	8.63	\$5,000	28.75
\$2,000	11.50	\$5,500	31.63
\$2,500	14.38	\$6,000	34.50
\$3,000	17.25	\$6,500	37.38
\$3,500	20.13	\$7,000	40.25
\$4,000	23.00	\$7,500	43.13

Amount.	Installment.	Amount.	Installment.
\$8,000	\$46.00	\$9,500	\$54.63
\$8,500	48.88	\$10,000	57.50
\$9,000	51.75		

The installments will be payable during the total and permanent disability of the insured, or if death occur without such disability, for 240 months, or if death occur following such disability, for a sufficient number of months to make 240 in all, including months of disability already paid for, in both cases except as otherwise provided.

The insurance is issued at monthly rates for the age (nearest birthday) of the insured when the insurance goes into effect, increasing annually upon the anniversary of the policy to the rate for an age one year higher, as per the following table of rates:

Age.	\$1,000	\$1,500	\$2,000	\$2,500	\$3,000	\$3,500	\$4,000	\$4,500	\$5,000	\$5,500	\$6,000	\$6,500	\$7,000
15	\$0.63	\$0.95	\$1.26	\$1.58	\$1.89	\$2.21	\$2.52	\$2.84	\$3.15	\$3.47	\$3.78	\$4.10	\$4.41
16	.63	.95	1.26	1.58	1.89	2.21	2.52	2.84	3.15	3.47	3.78	4.10	4.41

The insurance may be continued at these increasing term rates during the war and for not longer than five years after the termination of the war.

Persons entitled to apply for this insurance are:

1. A commissioned officer (including a warrant officer) in active service in the military or naval forces of the United States.

2. Any person, male or female, enlisted, enrolled or drafted into active service in the military or naval forces of the United States, including noncommissioned and petty officers and members of training camps authorized by law.

The term "military or naval forces" means the army, the navy, the marine corps, the coast guard, the naval reserves, the national guard, coasters and any other branch of the United States service while serving pursuant to law with the army or the navy.

3. Any member of the army nurse corps (female) or of the navy nurse corps (female) while employed in active service under the war department or navy department, respectively.

Insurance may be applied for in favor of one or more of the following persons with sum of \$500 or a multiple thereof for each beneficiary, the aggregate not exceeding the limit of \$10,000 and not less than \$1,000 upon any one life:

Husband or wife.

Child, including legitimate child; child legally adopted before April 15, 1917, or more than six months before enlistment or entrance into or employment in active service, whichever date is the later; stepchild, if a member of the insured's household; illegitimate child, but, if the insured is his father, only if acknowledged by instrument in writing signed by him, or if he has been judicially ordered to contribute to such child's support, and if such child, if born after Dec. 31, 1917, shall have been born in the United States or in its insular possessions.

Grandchild, meaning a child, as above defined, of a child as above defined.

Parent, including father, mother, grandfather, grandmother, stepfather and stepmother, either of the insured or of his/her spouse.

Brother or sister, including of the half blood as well as of the whole blood, stepbrothers and stepsisters and brothers and sisters through adoption.

Unless other designation is made by the insured, such person or persons, within the permitted class of beneficiaries, as would under the laws of the place of residence of the insured be entitled to his personal property in case of intestacy shall be deemed designated as the beneficiary or beneficiaries to whom

shall be paid any installments remaining unpaid upon the death or disqualification under the provisions of the act, of any named beneficiary.

In case the applicant does not desire the premium to be deducted from his/her pay (or his/her deposit) he/she should so elect in writing at the time of making application; but if no election is made it shall have the effect to provide for such deduction from his/her pay, or if such pay be insufficient, any balance from his/her deposit.

INSURANCE AFTER THE WAR.

Secretary William G. McAdoo issued the following official statement Nov. 18, 1918:

I desire to remind all America's soldiers and sailors that it is their opportunity and their privilege to keep up their insurance with the United States government after the war has officially terminated and even after they have returned to civil life.

More than 4,000,000 officers and men of the army and navy are now insured with the United States government through the bureau of war risk insurance of the treasury department. The grand total of insurance is more than \$36,000,000,000.

In its present form this insurance is annual renewable term insurance at net peace rates, issued against death and total permanent disability. Under the provisions of the war risk insurance act every person holding this insurance may keep it up in this form even after he leaves the service for a period of five years. All that is necessary is the regular payment of premiums.

Moreover, the law provides that not later than five years after the termination of the war as declared by presidential proclamation, the term insurance shall be converted, without medical examination, into such term or forms of insurance as may be prescribed by regulations and as the insured may request.

In accordance with the provisions of the law, these regulations will provide for the right to convert into ordinary life, twenty payment life, endowment maturing at age 62, and into other usual forms of insurance. This insurance will continue to be government insurance. The various forms of policies which the bureau of war risk insurance will write are now being prepared.

Every person in the military or naval service owes it to himself and to his family to hold on to Uncle Sam's insurance. It is the strongest, safest and cheapest life insurance ever written. Just as this insurance relieved our soldiers and sailors of anxiety and misgivings for the welfare of their loved ones and protected them against the hazards of war, so it will continue to protect them through the days of readjustment and reconstruction and in time of peace.

The advantages of keeping this insurance in force cannot be emphasized too strongly. The right to continue it is a valuable right given by the government to our fighting part of the men as compensation for their services. If this right is lost by allowing insurance to lapse it can never be regained. When government insurance is allowed to lapse the holder cannot again obtain insurance except from private companies at a considerable increase in cost. Moreover, many of the men may have become uninsurable as a result of the war through physical impairment and if these allow their insurance to lapse they will lose the last opportunity for their families to have the protection of life insurance.

The economic value of life insurance to society is so well recognized as to need no argument. The government now has in force upon the lives of 4,000,000 American citizens who have fought its battles a life insurance group larger than all others combined. Therefore, it is manifestly of the highest importance, not only to the fighting men and their dependents but to all the people, that the largest possible percentage of this insurance shall be continued in force after its holders shall be returned to civil life.

MEMORANDUM FOR SOLDIERS.

A copy of the following memorandum of information will be furnished to each officer and enlisted man separated from service in the United States army:

Information relative to compensation and continuance of war risk insurance.

Furnished to

(Surname) (Christian name) (Army Serial No.)
War Risk Insurance.

All correspondence relating to war risk insurance should be addressed to "Bureau of War Risk Insurance, Treasury Department, Washington, D. C.," and always contain the following information:

Your first name, middle name and last name in full.

Your grade and organization at the time of applying for insurance.

Your army serial number.

Date of your discharge or separation from service.

Your present address.

1. If you desire to continue your war risk insurance it will be necessary for you to make payments of the monthly premiums directly to the disbursing clerk, bureau of war risk insurance, treasury department, Washington, D. C. Check or money order should be made payable to the treasurer of the United States.

2. Your premium on \$..... insurance will be \$..... per month until July 1, 1919, after which date it will be as follows:

From July 1, 1919, to July 1, 1920, \$..... per month.

From July 1, 1920, to July 1, 1921, \$..... per month.

From July 1, 1921, to July 1, 1922, \$..... per month.

From July 1, 1922, to July 1, 1923, \$..... per month.

From July 1, 1923, to July 1, 1924, \$..... per month.

3. Should your address or that of a beneficiary change at any time, you should advise the bureau of war risk insurance, treasury department, Washington, D. C., immediately.

4. Within five years after the termination of the war, as declared by proclamation of the president, you must apply to the bureau of war risk insurance, treasury department, Washington, D. C., for the conversion of your present policy into some other form of insurance. Your present policy will lapse unless converted within that time.

5. You may change your beneficiary at any time provided the new beneficiary is within the permitted class. Those who may be designated are: A spouse, child, parent, brother or sister or grandchild.

Compensation.

All correspondence relating to compensation should be addressed to "Compensation Section, Bureau of War Risk Insurance, Treasury Department, Washington, D. C.," and always contain the following information:

Your first name, middle name and last name in full.

Your grade and organization at the time of discharge.

Your army serial number.

The date of your discharge or separation from the service.

Your present address.

1. The United States will pay compensation for death or disability resulting from injury suffered or disease contracted in the line of duty by an officer or enlisted man when employed in active service, except where injury or disease has been caused by his own willful misconduct. Furthermore, dismissal or dishonorable discharge from the service terminates all rights to any compensation.

2. In case a man should discover after and within one year after separation from the service that he has sustained an injury or contracted disease in the line of duty when employed in active service which may result in disability or death, but which did not disable him and of which he had no knowledge at the time of separation from the service, he should communicate the fact immediately to the compensation section of the bureau of war risk insurance, giving his full name, army serial number, if an enlisted man, rank, or grade, and organization; the date of his discharge or separation from the service; and if possible, the date of his injury or disability. He should at the same time request to be furnished a certificate to the fact that at the time of his separation from the service he was suffering from a wound, injury, or disease which is likely to result in death or disability. This certificate must be obtained within one year from the date of separation from the service, and in order to obtain it the man must submit to a medical examination by a physician designated by the bureau of war risk insurance.

3. No compensation shall be payable for death or disability which does not occur prior to or within one year from date of separation from the service.

4. No compensation is payable for disability unless claim is filed within five years after the date of separation from the service.

5. In order to procure compensation for disability the claimant shall submit to examination by a medical officer of the United States. If he refuses to submit to such examination his right to compensation ceases.

6. Compensation is entirely separate and distinct from war risk insurance and should not be confused therewith.

MONUMENT TO FIRST SOLDIERS WHO FELL.

On Nov. 3, 1918, an artistic monument at Bathelemont, France, was dedicated by the citizens of Nancy to commemorate the death of the first three Americans who fell there in action just a year before while fighting under the American flag. The names of these men are Corp. James B. Gresham, Evansville, Ind. Thomas F. Enright, Pittsburgh, Pa.; and Meric D. Hay, Glidden, Iowa.

Notwithstanding the fact that Bathelemont was still under enemy shell fire, early on the morning of the 3d, there were some beau-

tiful floral wreaths sent to the place and laid at the base of the monument.

The memorial was given by the people of the department of Meurthe-et-Moselle. In a large salon of the city hall at Nancy a meeting was held at which there were made a number of speeches praising the bravery of the Americans and the services they had rendered to France. One of the ministers of the government presided. Among the speakers were the mayor of Nancy, the prefect, and one of the senators from the department.

CZECHO-SLOVAK REPUBLIC.

President—Dr. Thomas G. Masaryk.
 Premier—Dr. Karl Kramarz.
 Minister of Foreign Affairs—Edouard Benes.
 Minister of Justice—M. Haberman.
 Minister of National Defense—M. Klofar.
 Minister of Agriculture—M. Praschek.
 Minister of Education—Anthony Soukoup.
 Minister of Finance—M. Raising.
 Minister of Commerce—M. Stransky.
 Minister of Posts—M. Spherny.
 Minister of Health—M. Frore.
 Minister of War—M. Stefanik.
 Minister of the Interior—M. Svehla.
 Minister of Food—M. Aronsky.
 Minister of Social Welfare—M. Winter.
 Minister of Railways—M. Zahradnik.
 Minister Without Portfolio—M. Kruban.

At a session of the national assembly held in Prague, Bohemia, Nov. 15, 1918, the creation of a Czecho-Slovak republic was ratified and the choice of Dr. Thomas G. Masaryk as its first president was confirmed. The territory in the new state, it was decided, should consist of fifteen districts, with Prague as the capital. The national assembly at the same time abolished all titles of nobility and passed an eight-hour working day act.

Copyright, Cline-Edmet

THOMAS G. MASARYK To provide the funds with which to set the machinery of the republic going the United States government on Nov. 16 extended to the national assembly a credit of \$7,000,000.

The men chiefly responsible for the creation of the Czecho-Slovak republic were Prof. Thomas G. Masaryk, president of the Czecho-Slovak national council, which at first had headquarters in Paris, France, but subsequently established itself in Washington, D. C.; Gen. Milan R. Stefanik, vice-president of the council, and Dr. Edouard Benes, the general secretary. These leaders worked ceaselessly with the one object of securing from the great allied nations the recognition of their organization, their armies and their plans for a state which should be free and entirely independent of the autocratic rulers of Austria-Hungary. They formed legions which under their own banners fought for the allies in Italy, France and Russia. Their arguments and acts were conclusive and recognition followed. This was a severe blow to the Austrian empire and probably had as much to do with its downfall as any other one thing.

Italy was among the first to see the importance of dividing the strength of her chief opponent in the war, Austria-Hungary. She accepted the services of a large Czecho-Slovak contingent of soldiers at the front and also recognized the right of the Czecho-Slovaks to independence.

Recognized by France and Britain.

On June 30, 1918, President Poincare of France presented a flag to the Czecho-Slovak soldiers fighting as a unit on the western front. At the same time M. Pichon, the foreign secretary, issued a statement addressed to the Czecho-Slovak national council in which he proclaimed the right of the Czechs and Slovaks to independence. M. Pichon wrote:

"At the moment when the first unit of the autonomous Czecho-Slovak army of France is preparing to quit its quarters and having received its flag, to proceed to man its sector amidst its French brothers in arms, the government of the republic deems it equitable and necessary to proclaim the rights of your nation to independence. For long centuries the Czecho-Slovak nation possessed the incomparable blessing of independence. It was deprived of it by the violence of the Hapsburgs allied with Germanic princes. The his-

toric rights of nations are imprescriptible, it is for the defense of these rights that France, attacked, is fighting to-day, together with her allies. The cause of the Czechs is specially dear to it.

"In the name of the government of the republic I express the sincerest and warmest wishes that the Czecho-Slovak state may soon become by the common efforts of all the allies, in close union with Poland and the Jugo Slav state, an impassable barrier to Germanic aggression and a factor of peace in a Europe reconstructed according to the principles of justice and the right of nationalities."

To this Dr. Masaryk made the following acknowledgment:

"Recognition of the independent Czecho-Slovak state means the dismemberment of Austria-Hungary, reducing Germany to her own national forces. The independent Czecho-Slovak state is the final check to pan-German schemes of a Brest-Litovsk route, the anti-German barrier formed by the Czecho-Slovak state, Poland, Jugo Slavia, Roumania and Italy is also the surest help to Russia and the small nations now under Austro-German domination. Russia, separated from the Germans and the Magyars, can develop without direct German interference."

Great Britain extended recognition to the Czecho-Slovak nation Aug. 13, 1918, issuing through the secretary of foreign affairs, Arthur J. Balfour, the following declaration:

"Since the beginning of the war the Czecho-Slovak nation has resisted the common enemy by every means in its power. The Czecho-Slovaks have constituted a considerable army, fighting on three different battle fields, and attempting in Russia and Siberia to arrest the Germanic invasion. In consideration of its efforts to achieve independence Great Britain regards the Czecho-Slovaks as an allied nation and recognizes the unity of the three Czecho-Slovak armies as an allied and belligerent army waging regular warfare against Austria-Hungary and Germany. Great Britain also recognizes the right of the Czecho-Slovak national council as the supreme organ of Czecho-Slovak national interests and as the present trustee of the future Czecho-Slovak government to exercise supreme authority over this allied and belligerent army."

Recognized by the United States.

On Sept. 2, 1918, Robert Lansing, secretary of state, received Dr. Masaryk and made to him the following formal announcement:

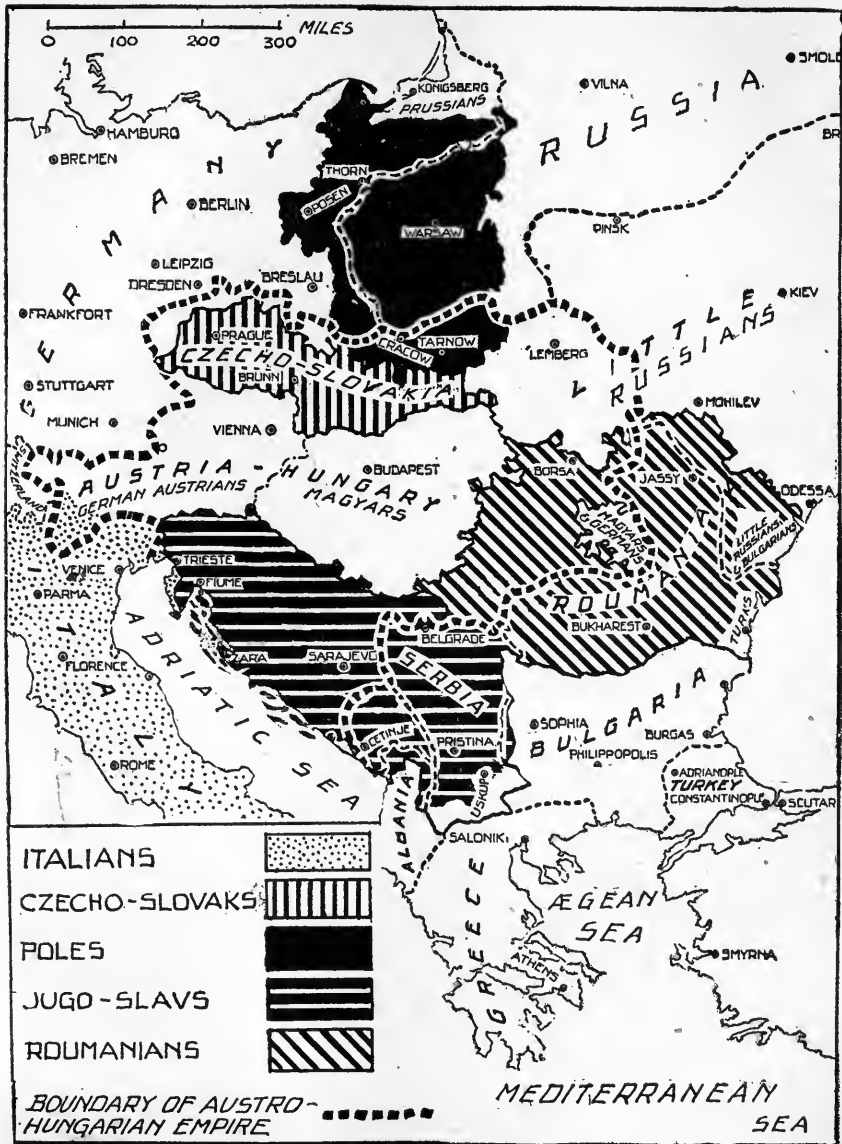

"The Czecho-Slovak peoples having taken up arms against the German and Austro-Hungarian empires and having placed organized armies in the field which are waging war against those empires under officers of their own nationality and in accordance with the rules and practices of civilized nations; and the Czecho-Slovaks having, in prosecution of their independence purpose in the present war, confided supreme political authority to the Czecho-Slovak national council."

"The government of the United States recognizes that a state of belligerency exists between the Czecho-Slovaks thus organized and the German and Austro-Hungarian empires.

"It also recognizes the Czecho-Slovak national council as a de facto belligerent government, clothed with proper authority to direct the military and political affairs of the Czecho-Slovaks.

"The government of the United States further declares that it is prepared to enter formally into relations with the de facto government thus recognized for the purpose of prosecuting the war against the common enemy, the empires of Germany and Austria-Hungary."

Explaining the form of this declaration Prof. Masaryk later in the day made this statement: "The American recognition differs from the French and British in that these recognize the right to our independence directly, whereas Mr. Lansing's wording recognizes in the first place our army and the national council. But speaking of the Czecho-Slovaks the declaration denotes our whole nation. The British text

Prepared by Clarence L. Speed, Union League Club, Chicago.
 MAP SHOWING RACIAL LINES ON WHICH NEW STATE FRONTIERS WERE BEING ARRANGED IN 1918.

recognizes our national council as the present trustee of the future government; the United States recognizes our council directly as the de facto government. The United States lays stress on the belligerency and emphasizes the organization of our nation shown first in mobilizing armies and second in confiding all political affairs to the leading authority of the national council. In accordance with the humanitarian principles of the American constitution the military practice of our armies (this applies especially to our army in Russia) is acknowledged.

Thanks from American Bohemians.

The following telegram, dated Sept. 3, 1918, was sent from Chicago to Secretary Robert Lansing in Washington:

"The epochmaking act of the American government recognizing Czecho-Slovaks as allies and cobelligerents, worthy of independence and the coming of free nations, has moved us most profoundly, and we wish to pour our hearts to you and to the American government in gratitude, for by that act our brothers were liberated from centuries long bondage, from indescribable suffering imposed by the awful Austrian and Magyar tyranny, and have instilled in them new hopes. We who have chosen this land for our country will be inspired by this act to greater achievements. We shall be filled with new strength to fulfill the solemn vows given America. The champions of the oppressed, we shall feel new joy in performing our duties toward her, new valor and new motive power; we see today the glorious banner of our great free republic reaching over the oceans and beaming upon the new flowers of liberty where there was but dark desert of despair. Glory be to our own America, the champion of freedom. Glory be to America, the defender of democracy and humanity. We love her passionately and shall strive to be worthy of her. Our eternal gratitude is here."

"For the Czecho-Slovak people of America."
"BOHEMIAN NATIONAL ALLIANCE."

Revolt in Bohemia.

On Oct. 18, 1918, it was announced that the Czechs had made themselves masters of Prague, had hoisted the Czech flag and placed Czech money in circulation. The Austrian authorities at this time were powerless to make any effective opposition and the revolt was completely successful.

CZECHO-SLOVAK DECLARATION OF INDEPENDENCE.

The following declaration was issued by the provisional government of the Czecho-Slovak nation in Paris, France, Oct. 18, 1918:

"Declaration of independence of the Czecho-Slovak nation by its provisional government:

"At this grave moment, when the Hohenzollerns are offering peace in order to stop the victorious advance of the allied armies and to prevent the dismemberment of Austria-Hungary and Turkey, and when the Hapsburgs are promising the federalization of the empire and autonomy to the dissatisfied nationalities committed to their rule, we, the Czecho-Slovak national council, recognized by the allied and American governments as the provisional government of the Czecho-Slovak state and nation, in complete accord with the declaration of the Czech deputies, made in Prague on Jan. 6, 1918, and realizing that federalization and still more, autonomy, means nothing under a Hapsburg dynasty, do hereby make and declare this our declaration of independence.

"We do this because of our belief that no people should be forced to live under a sovereignty they do not recognize, and because of our knowledge and firm conviction that our nation cannot freely develop in a Hapsburg mock federation, which is only a new form of the denationalizing oppression under which we have suffered for the last 300 years. We consider freedom to be the first prerequisite for federalization, and believe that the free nations of central and eastern

Europe may easily federate should they find it necessary.

"We make this declaration on the basis of our historic and natural right. We have been an independent state since the seventh century, and in 1526, as an independent state, consisting of Bohemia, Moravia and Silesia, we joined with Austria and Hungary in a defensive union against the Turkish danger. We have never voluntarily surrendered our right as an independent state in this confederation. The Hapsburgs broke their compact with our nation by illegally transgressing our rights and violating the constitution of our state, which they had pledged themselves to uphold, and we therefore refuse longer to remain a part of Austria-Hungary in any form.

"We claim the right of Bohemia to be reunited with her Slovak brethren of Slovakia, once part of our national state, later torn from our national body, and fifty years ago incorporated in the Hungarian state of the Magyars, who, by their unspicable violence and ruthless oppression of their subject races, have lost all moral and human right to rule anybody but themselves.

"The world knows the history of our struggle against the Hapsburg oppression, intensified and systematized by the Austro-Hungarian dualistic compromise of 1867. This dualism is only a shameless organization of brute force and exploitation of the majority by the minority; it is a political conspiracy of the Germans and Magyars against our own as well as the other Slav and the Latin nations of the monarchy. The world knows the justice of our claims, which the Hapsburgs themselves dared not deny. Francis Joseph, in the most solemn manner, repeatedly recognized the sovereign rights of our nation.

"The Germans and Magyars opposed this recognition, and Austria-Hungary, bowing before the pan-Germans, became a colony of Germany, and, as her vanguard to the east, per seceded the last Balkan conflict, as well as the present world war, which was begun by the Hapsburgs, alone, without the consent of the representatives of the people.

"We cannot and will not continue to live under the direct or indirect rule of the violators of Belgium, France and Serbia, the would-be murderers of Russia and Roumania, the murderers of tens of thousands of civilians and soldiers of our blood, and the accomplices in numberless unspeakable crimes committed in this war against humanity by the two degenerate and irresponsible dynasties.

"We will not remain a part of a state which has no justification for its existence and which, refusing to accept the fundamental principles of modern world organizations, remains only an artificial and immoral political structure, hindering every movement toward democratic and social progress.

"The Hapsburg dynasty, weighed down by a huge inheritance of error and crime, is a perpetual menace to the peace of the world, and we deem it our duty toward humanity and civilization to aid in bringing about its downfall and destruction.

"We reject the sacrilegious assertion that the power of the Hapsburg and Hohenzollern dynasties is of divine origin; we refuse to recognize the divine rights of kings. Our nation elected the Hapsburgs to the throne of Bohemia of its own free will, and by the same right deposes them. We hereby declare the Hapsburg dynasty unworthy of leading our nation and deny all of its claims to rule in the Czecho-Slovak land, which we here and now declare shall henceforth be a free and independent people and nation.

"We accept and shall adhere to the ideals of modern democracy, as they have been the ideals of our nation for centuries. We accept the American principles as laid down by President Wilson—the principles of liberated mankind, of the actual equality of nations and of governments deriving all their just power from the consent of the governed. We, the nation of Comenius, cannot but accept these principles expressed in the American declaration of independence, the principles of

Lincoln and of the declaration of the rights of man and of the citizen. For these principles our nation shed its blood in the memorable Hussite wars, 500 years ago; for these same principles, beside her allies, our nation is shedding its blood to-day in Russia, Italy and France.

"We shall outline only the main principles of the constitution of the Czecho-Slovak nation; the final decision as to the constitution itself falls to the legally chosen representatives of the liberated and united people.

"The Czecho-Slovak state shall be a republic. In constant endeavor for progress it will guarantee complete freedom of conscience, religion and science, literature and art, speech, the press and the right of assembly and petition. The church shall be separated from the state.

"Our democracy shall rest on universal suffrage; women shall be placed on an equal footing with the men, politically, socially and culturally. The rights of the minority shall be safeguarded by proportional representation; national minorities shall enjoy equal rights. The government shall be parliamentary in form and shall recognize the principles of initiative and referendum. The standing army will be replaced by militia.

"The Czecho-Slovak nation will carry out far reaching social and economic reforms; the large estates will be redeemed for home colonization; patents of nobility will be abolished. Our nation will assume its part of the Austro-Hungarian prewar public debt; the debts for this war we leave to those who incurred them.

"In its foreign policy the Czecho-Slovak nation will accept its full share of responsibility in the reorganization of eastern Europe. It accepts fully the democratic and social principle of nationality, and subscribes to the doctrine that all covenants and treaties shall be entered into openly and frankly, without secret diplomacy.

"Our constitution shall provide an efficient, rational and just government, which will exclude all special privileges and prohibit class legislation.

"Democracy has defeated theocratic autocracy. Militarism is overcome; democracy is victorious; on the basis of democracy mankind will be reorganized. The forces of darkness have served the victory of light; the longed for age of humanity is dawning.

"We believe in democracy; we believe in liberty and liberty evermore.

"Given in Paris on the 18th day of October, 1918.

"**DR. EDWARD BENEŠ,**

"Minister of Foreign Affairs and of Interior."

MID-EUROPEAN UNION.

A convention representing 50,000,000 persons under Germanic domination in mid-Europe was held in Independence hall, Philadelphia, Pa., Oct. 23-26 to take steps looking to the organization of a mid-European union of small nations and also to draft a declaration of the common aims of such a democratic union. The union was organized with Dr. Masaryk as president and on Oct. 26 a new declaration of independence was read.

To fittingly proclaim that the eighteen Slav states of the German emperor's once subservient Mitteleuropa had united under a banner of their own and shaken off the yoke of domination, the mid-European union had a new liberty bell cast, as well as a new national flag, which was unfurled alongside the stars and stripes lying on the roof of Independence hall.

As the new bell pealed forth its chimes Prof. Masaryk read the declaration from the steps of America's birthplace of freedom. Previously the document had been signed by the representatives of the new federation, com-

posed of Czecho-Slovaks, Ukrainians, Lithuanians and Jugo Slavs.

"Liberty for all, the world and all the inhabitants thereof," is prominently inscribed on the new liberty bell, which is a replica of the bell which rang out America's declaration 142 years ago.

The new declaration of independence was signed on the same table where Hancock, Adams, Jefferson, Franklin and those others of the patriot fathers signed the pact that created this republic. Those present watched with interest each of the representatives, as his name was called, step to the table and put down his name. Palatmar, Gen. Avi represented the Jews of Palestine, Mirewv Sichinsky the Ukrainians, Capt. Vasilio Stosia the Rumanians.

Text of Declaration.

Following is the text of the new declaration of independence:

In the house assembled at Independence hall, Philadelphia, Pennsylvania, United States of America, on Oct. 26, 1918, we, representing together more than 50,000,000 people constituting a chain of nations lying between the Baltic, the Adriatic and the Black seas, comprising Czecho-Slovaks, Poles, Jugo Slavs, Ukrainians, Uro-Russians, Lithuanians, Rumanians, Italian Irredentists, Unredeemed Greeks, Albanians and Zionists, wholly or partly subject to alien dominion, deeply appreciating the aid and assistance given our peoples by the government and people of America and of the entente allies, on behalf of ourselves and our brethren at home do hereby solemnly declare that we place all our peoples and resources at the disposal of our allies for use against our common enemy, and, in order that the whole world may know what we deem are the essential and fundamental doctrines which shall be embodied in the constitutions hereafter adopted by the peoples of our respective independent nations, as well as the purposes which shall govern our common and united action, we accept and subscribe to the following as basic principles for all free peoples:

1. That all governments derive their just power from the consent of the governed.

2. That it is the inalienable right of every people to organize their own government on such principles and in such form as they believe will best promote their welfare, safety and happiness.

3. That the free and natural development of the ideals of any state shall be allowed to pursue their normal and unhindered course, unless such course harms or threatens the common interest of all.

4. That there should be no secret diplomacy, and all proposed treaties and agreements between nations should be made public prior to their adoption and ratification.

5. That we believe our peoples, having kindred ideals and purposes, should co-ordinate their efforts to insure the liberty of their individual nations for the furtherance of their common welfare, provided such a union contributes to the peace and welfare of the world.

6. That there should be formed a league of the nations of the world in a common and binding agreement for genuine and practical co-operation to secure justice and therefore peace among nations.

In the course of our history we have been subject to and victims of aggressive and selfish nations and autocratic dynasties and held in subjection by force of arms.

We have suffered destruction of our cities, violation of our homes and lands, and we have maintained our ideals only by stealth, in spite of the tyranny of our oppressors.

We have been deprived of proper representation and fair trial. We have been denied the right of free speech and the right freely to assemble and petition for the redress of our grievances. We have been denied free and friendly intercourse with our sister states, and our men have been impressed in war against their brothers and friends of kindred races.

The signers of this declaration and representatives of other independent peoples who

may subscribe their names hereto do hereby pledge, on behalf of their respective nations, that they will unitedly strive to the end that these wrongs shall be righted, that the sufferings of the world war shall not have been in vain and that the principles here set forth shall be incorporated in the organic laws of whatever governments our respective peoples may hereafter establish.

Czecho-Slovak Army in Russia.

Much of the credit for the formation of the new republic is due the intrepid Czecho-Slovak army in Russia, the story of whose march through the former empire to the Pacific coast in the face of privations and innumerable enemies is already an epic. After the signing of the Brest-Litovsk treaty a Czecho-Slovak army of approximately 50,000 men which had been fighting against Austria-Hungary and Germany was in the vicinity of Kiev in Ukraine. That country made peace with the Germans and the Czecho-Slovaks found themselves surrounded by enemies on all sides. Nevertheless, they spurned an offer of amnesty from Emperor Charles and started on their famous march to the east. They fought many battles against German and bolshevik forces, defeating them all, and steadily forced their way onward until they reached their goal and joined the allied forces in western Siberia.

Population and Area.

The Czechs are chiefly inhabitants of Bohemia, Moravia and Austrian Silesia, while the Slovaks live in the upper part of Hungary. The peoples are practically of the same race and speak the same language. There has never been any serious political differences between them.

"We hope to include in the new nation," said Prof. Masaryk before leaving the United States to go to his capital in Prague, "Bohemia, Moravia, Silesia and their historical boundaries. To these will be added Slovakia—that is, the northern part of Hungary, extending as far south as Presburg and to the east as far as Ungvár. This territory is about four times greater than that of Belgium. The population of the new nation will be 12,000,000. Of these 10,000,000 are Bohemians and Slovaks. The remainder consists of minorities.

Our constitution will provide for a president and two legislative chambers, a senate and a house of representatives, similar to yours. There will be a very elaborate system of local self-government, as a means of insuring a democracy that is not one in form alone. We shall endeavor to work out the problem of local self-government so as to render the justice of leaving the affairs of minorities in their own hands as far as possible. In reaffirming the historical boundary lines of Bohemia, Moravia and Silesia there will of necessity be included some Germans among the population, notably in the west and north, but we shall confer on communities of this kind the same local self-government that obtains in other parts of the country. There will be universal suffrage. We have confidence in this and a high degree of local self-government because all our people are educated."

The area of the new republic as outlined by Prof. Masaryk is approximately 48,000 square miles.

JUGO SLAV NATION.

When it became apparent that the Austro-Hungarian empire as a result of the war would practically cease to exist, the various nationalities immediately set about forming independent states. Emperor Charles offered federalization, but this plan was rejected as being merely an attempt to deceive President Wilson. The Jugo or southern Slavs were among those who wanted independence and they formed a national council in Agram, the capital of Croatia and Slavonia, to work with this end in view. Their aspirations were formally recognized by Italy on Sept. 28, 1918. On Oct. 23 the central executive com-

mittee elected on Oct. 5 by the national council of Slovenes, Croatsians and Serbians at Agram issued a statement that the committee would at once assume the political direction of those nationalities and declaring for the creation of a sovereign state on a democratic basis. The following principles were enunciated by the committee:

1. To bring about a reunion of all the Slovenes, Croatsians and Serbians on a racial basis without reference to their present political frontiers.

2. To create a sovereign state on a democratic basis.

3. To see that the nationalities represented by the council had a delegate at the peace conference.

The committee rejected the plan contained in the imperial manifesto for the settlement of nationalistic problems in Austria. It guaranteed the free development of all national majorities which may form a part of the state organized by it. Neighboring states would be assured free access to the sea, providing that they make no attempts on the constitutional rights of the state and on its territorial integrity.

The committee finally urged concord among all the nationalities in order to create a great national state.

On Oct. 31 the Croatian parliament at Agram had voted for a total separation of Croatia, Slavonia and Dalmatia from Hungary. Crown Prince Alexander of Serbia was appointed regent of the Jugo Slav state Nov. 26 by the national council at Agram. A state council, comprising all the members of the Agram council, fifty delegates from Serbia and five from Montenegro, was summoned to meet at Serajevo. This council was to appoint a cabinet for the Jugo Slav state.

POLAND.

The rehabilitation of Poland along the lines existing when the country was divided between Prussia, Austria and Russia in 1772 was in progress in November and December, 1918, but its exact form of government had not been determined when this edition of the Almanac and Year-Book went to press. On Nov. 9 it was announced that a Polish republic had been formed at Cracow under the presidency of Deputy Daszynski, while on Nov. 15 advices were received from Warsaw that Gen. Joseph Pilsudski of the Polish legion had been entrusted by the Polish regency council with the formation of a national government and with the control of all the troops. On Nov. 23 he had progressed so far as to appoint a cabinet with himself as minister of war; Andreas Moraczewski, a socialist leader, as premier and Leon Wasilewski as minister of foreign affairs. Three portfolios had been reserved for Prussian Poland.

Agitation for an independent Poland was conducted in the United States by a Polish national committee in Washington, of which Roman Dmowski was president, and by various other committees. Prominent in this movement and also in relief measures affecting Poland were such men as Ignace Paderewski, the famous pianist, and John F. Smulski, the Chicago banker.

Recognized by the United States.

On Nov. 2 the American secretary of state, Robert Lansing, addressed the following letter to President Dmowski:

"Sir: I beg to acknowledge receipt of your letters of Oct. 18 and Oct. 25 requesting the government of the United States to associate itself with the governments of France and Great Britain by recognizing the Polish army, under the supreme political authority of the Polish national committee, as autonomous, allied and cobelligerent.

In reply I beg to inform you that the government of the United States has not been unmindful of the zeal and tenacity with which the Polish national committee has prosecuted the task of marshaling its fellow countrymen in a supreme military effort to free Poland from its present oppressors.

"This government's position with respect to the Polish cause and the Polish people could hardly be more clearly defined than was outlined by the president in his address before the congress of Jan. 8, 1918. Therefore, feeling as it does a deep sympathy for the Polish people and viewing with gratification the progress of the Polish cause, this government experiences a feeling of genuine satisfaction in being able to comply with your request by recognizing the Polish army, and the supreme political authority of the Polish national committee, as autonomous and co-belligerent. I am, sir, your obedient servant.

"ROBERT LANGSING."

Ignace Paderewski, armed with power to act on behalf of various Polish committees in the United States, sailed from New York Nov. 23, 1918, for Europe to further the interests of his compatriots in the pending political developments.

"Poland will be free and so will her inhabitants," Mr. Paderewski said in a statement before departing. "The democratic constitution of Poland will assure liberty and equity to every citizen without distinction as to race, religion or political opinion."

In the course of November Polish troops took possession of Posen in Germany, Galicia and other places. They took possession of the royal palaces in Warsaw, disarmed the German police and demobilized the German troops.

Area and Population.

It was assumed that the new Poland would obtain an outlet to the Baltic sea at Danzig, by way of the Vistula. The limits of the state will probably be decided at the peace conference. Its area and population cannot at this time (Dec. 2, 1918) be given with any degree of accuracy. In 1914 Russian Poland had an area of 43,804 square miles and a population of 12,247,600; Austrian Poland (Galicia), 30,321 square miles and a population of 8,025,675 (in 1910) and Prussian Poland (Posen) an area of 11,184 square miles and a population of 2,099,831 (1910); total area, 85,509 square miles; total population, 22,373,106.

HUNGARIAN PEOPLE'S REPUBLIC.

According to advices received from Budapest, the "Hungarian People's Republic" was proclaimed Nov. 16, 1918, by the Hungarian national council and the two chambers of parliament, with Count Michael Karolyi as president. It was planned to proclaim universal, secret and equal suffrage for men and women. Hungary before the middle of October had declared herself independent of Austria. Archduke Joseph of Austria and his son, Archduke Joseph Franz, took an oath to "submit unconditionally to the orders of the national council of Hungary and to support it in all its decrees."

It was anticipated early in December, 1918, that the future of the Hungarian state would depend largely upon the decisions taken at the peace conference. Hungary in 1910 had an area of 123,609 square miles and a population of 20,886,487.

GERMAN AUSTRIA.

On Oct. 23, 1918, the German-Austrian deputies in the Austrian reichsrath formed an assembly for the purpose of conducting the affairs of the Germanic people in Austria and issued a declaration announcing the creation of the "German State of Austria." Karl Seitz, leader of the German socialists in Austria, was elected president of the new assembly. The deputies announced their desire to bring about the autonomy of the Germans in Austria and to establish relations with other nations.

The assembly drew up a resolution respecting the form of government of the territory occupied by Germans. The "German State of Austria," it was said, would seek access to the Adriatic sea, in agreement with other nations. Pending the establishment of a constitution, according to this program, the peo-

ple would be represented by the reichsrath deputies constituted as a provisional national assembly.

In 1910, on the basis of language, there were 9,950,266 Germans out of a total population of 28,324,940 in Austria.

UKRAINIA.

Ukrainia is one of the more important states carved out of what was once the Russian empire. It was proclaimed as the "Ukrainian People's Republic" Nov. 21, 1917, and since then has had a troubled existence, with uprisings, riots and several changes of government. It made peace with Germany on its own account, but the Germans by their exactions and extortions aroused the resentment of the farming classes, who resisted the forcible collection of grain and other foodstuffs from them. Because of the defeat of the central powers and the denouncing of the Brest-Litovsk treaties by the allies the status of Ukrainia will probably have to be decided at the peace conference. The state has an estimated area of 216,400 square miles and a population of about 30,000,000. Kiev is the capital.

UKRAINE TREATY WITH GERMANY.

Following are the provisions of the treaty of peace signed at Brest-Litovsk Feb. 9, 1918, by representatives of Germany, Austria-Hungary, Bulgaria and Turkey on the one hand and of the Ukrainian People's Republic on the other:

The preamble states that the Ukrainian people, having in course of the present world war declared itself to be independent and expressed a wish to restore peace between itself and the powers at war, desires "to take the first step toward a lasting world's peace, honorable to all parties, which shall not only put an end to the horrors of war but also lead to the restoration of friendly relations of the people in the political, legal, economic and intellectual realm."

The names of all of the plenipotentiaries engaged in the negotiations are then set forth and they are declared to have reached an agreement on the following points:

"Article I. Germany, Austria-Hungary, Bulgaria and Turkey on the one hand and the Ukrainian People's Republic on the other declare that the state of war between them is at an end. The contracting parties are resolved henceforth to live in peace and friendship with one another.

"Art. II. Between Austria-Hungary on the one hand and the Ukrainian People's Republic on the other hand as far as these two powers border one another, those frontiers will exist which existed before the outbreak of the present war between the Austro-Hungarian monarchy and Russia. Farther north the frontier of the republic beginning at Tarnograd will in general follow the line of Bilgerye to Szezerberzszyn, Krasnostav, Pugasze, Radzyn, Mieshretschei, Sarnaki, Selnik, Wysekeltowski, Kamietshitowski, Prushany and Wlodzowskysiecz. This will be fixed in detail by a fixed commission according to ethnographical conditions and with a regard to the desires of the population. Should the Ukrainian People's Republic have common frontiers with another of the powers of the quadruple alliance special agreements will be made thereon.

"Art. III. The evacuation of occupied territories will begin immediately after the ratification of the present treaty. The manner of carrying out the evacuation and transfer of the evacuated territories will be determined by the plenipotentiaries of the interested parties.

"Art. IV. The diplomatic and consular relations between the contracting parties will be entered upon immediately after the ratification of the peace treaty. The widest possible admittance of the respective parties to consuls is to be reserved for a special agreement.

"Art. V. The contracting parties mutually renounce the reimbursement of their war costs—that is to say, the state expenditure for car-

rying on the war, as well as indemnification for damages, that is to say, those damages suffered by them and their subjects in the war, as through military measures, including all requisitions made in the enemy's countries.

Art. VI. The respective prisoners of war will be permitted to return home as far as they do not desire, with the approval of the state concerned, to remain in its territories or proceed to another country. The regulation of the questions connected herewith will follow by means of separate treaties provided for in article VIII.

Art. VII. The contracting parties undertake mutually and without delay to enter into economic relations and organize and exchange for goods on the basis of the following prescriptions:

"1. Until the 31st day of July of the current year reciprocal exchange of the more important surplus supplies of agricultural and industrial products will be carried out as follows for the purpose of covering current requirements: The quantities and sort of products to be exchanged will be settled by a joint commission, to sit immediately upon the signature of the peace treaty; prices will be regulated by the joint commission; payments will be made in gold on the basis of 1,000 German imperial gold marks as the equivalent of 462 gold rubles of the former Russian empire, or 1,000 Austro-Hungarian gold kroner as the equivalent of 393 rubles 78 kopeks of the former Russian empire. The exchange of goods fixed by the joint commission aforementioned, which commission will consist of equal numbers of representatives of both parties, will take place through state central bureaus. The exchange of those products which are not fixed by the aforementioned commission will take place by the way of free trade, according to the stipulation of a provisional commercial treaty.

"2. So far as it is not otherwise provided the economic relations between the contracting parties shall continue provisionally, and in any case until the conclusion of a final commercial treaty. But until the termination of a period of at least six months after the conclusion of peace between the central powers on the one part and the European states at war with the central powers, as well as the United States and Japan, on the other part certain prescriptions are laid down as a basis of relations."

As regards economic relations between Germany and Ukraine the text of the treaty prescribes what parts of the Russo-German commercial and shipping treaties of 1894 and 1904 shall be put into force. The contracting parties further agree to maintain the general Russian customs tariff of Jan. 13, 1903.

The treaty also provides (section 3) which parts of the Austro-Hungarian-Russian commercial and shipping treaty of Feb. 5, 1906, shall be maintained, and adds:

"All the parties agree that all articles transported across the territory of either party shall be free of duty. Trade mark agreements are resumed and the contracting parties agree to support each other in restoring railway tariffs. Economic relations between Bulgaria and Turkey and Ukraine are to be settled according to the most favored nation definition until definite commercial treaties are concluded.

"If the period provided for in the first paragraph of section 2 should not occur before June 30, 1919, each of the two contracting parties is to give from June 30, 1919, to give six months' notice to terminate the prescriptions contained in the above mentioned section.

"4. (a) The Ukrainian People's Republic will make no claim to preferential treatment which Germany grants Austria-Hungary, or another country bound to her by a customs alliance, which directly borders on Germany, or indirectly through another country bound to her or Austria-Hungary by a customs alliance, or which Germany grants to her own colonies,

foreign possessions and protectorates, or to countries bound to her by a customs alliance. Germany will make no claim to preferential treatment which the Ukrainian People's Republic may grant to another country bound to her by a customs alliance, which directly borders on Ukraine, or indirectly through another country bound to her by a customs alliance, or to the colonies, foreign possessions and protectorates of one of the countries bound to her by a customs alliance.

"5. (a) So far as commodities which originally came from Germany or Ukraine are stored in neutral states, though the obligation rests upon Germany and Ukraine that they shall not be exported either directly or indirectly to the territories of the other contracting party, such restrictions regarding their disposal shall be abolished so far as the contracting parties are concerned. The two contracting parties, therefore, undertake immediately to notify the governments of neutral states of the above mentioned abolition of this restriction.

"(b) So far as commodities which originally came from Austria-Hungary or Ukraine are stored in neutral states, although the obligation rests upon Austria-Hungary and Ukraine that they shall neither directly nor indirectly be exported to the territories of the other contracting party, such restriction respecting their disposal will be abolished so far as the contracting parties are concerned. Both contracting parties, therefore, undertake immediately to notify the governments of neutral states of the above mentioned abolition of these restrictions.

"Art. VIII. Restoration of public and private legal relations, the exchange of prisoners of war and interned civilians, the question of amnesty and the question of the treatment of merchantmen in enemy hands will be regulated in separate treaties with the Ukrainian People's Republic, to form an essential part of the present peace treaty, which so far as practicable will take effect simultaneously therewith.

"Art. IX. The agreements made in this peace treaty form an indivisible whole.

"Art. X. For the interpretation of this treaty the German and Ukrainian texts are authoritative in regard to relations between Germany and Ukraine, the German, Hungarian and Ukrainian texts for relations between Austria-Hungary and Ukraine, the Bulgarian and Ukrainian texts for relations between Bulgaria and Ukraine, the Turkish and Ukrainian texts for relations being Turkey and Ukraine."

The concluding part of the treaty provides: "The present peace treaty will be ratified. Ratified documents shall be exchanged as soon as possible. So far as there are no provisions to the contrary the peace treaty shall come into force on ratification."

FINLAND.

The new state of Finland, which proclaimed its independence July 20, 1917, and announced the formation of a republic on Oct. 7 the same year, was the scene of fighting and bloodshed in 1918, and its status on Dec. 1 was uncertain. It was the scene of many battles between the red guards of the Russian bolsheviks and the white guards under Gen. Mannerheim. Then it was occupied by the Germans, with whom a treaty of peace was made on March 7, and efforts were made to turn it into a kingdom, with a German prince on the throne. In November, 1918, the German troops were withdrawn and it was announced that Gen. Mannerheim would be governor, with a coalition government in power.

OTHER NEW RUSSIAN STATES.

Among the many new states carved out of the old Russian empire in 1917 and 1918 may be mentioned Estonia, Siberia, the Don

Republic, the Tatar-Bashkir Republic, White Russia, Republic of Turkestan, Republic of Kazan, Republic of Georgia, Ciscaucasia, the Tauride Republic, the Yakutsk Republic, Courland, and the Siberian Republic (Omsk), Archangel, and Vladivostok. The limits of authority, population and government of these states cannot be given until conditions in Russia become more settled. In December, 1918, everything was unsettled and uncertain, with new dictators and new governments springing up almost daily.

the support and sympathy not only of this great nation but of all the world's victorious democracies.

"As Americans we pray you speak, and speak soon, in order that those of our people who are less fortunate than we may be granted the simple elementary rights of self-determination and self-government for the preservation of which we and our children are now working at home and fighting abroad."

PRESIDENT WILSON'S REPLY.

To this petition the president made the following answer:

"The White House, Washington, Nov. 12, 1918.—My Dear Mr. Bodholdt: In addressing myself to you I wish to include not only Carl Plow of Petaluma, Cal., and Jens Jensen of Chicago, who with you have been the chief spokesmen of Slesvig in this country, but all the Slesvigians who have signed the petition directed to me, as well as the still greater number of Americans of Danish race who have indorsed that petition.

"The statement you have given me signed by former residents of Slesvig and indorsed by a still greater number of Danes, all now American citizens, voices anew an unforgetten injustice. I can but assure you that your appeal to America's sympathy and passion for justice will not go unheeded, for it founds itself wisely upon the rights of men to rule themselves and to choose the manner in which that self-rule shall be exercised. I do not doubt that your voice and that of your former countrymen will be heard and heeded wherever the thought of the nations turns to the righting of old wrongs kept fresh by the lengthened oppression of the intervening years. It is for the whole world, which has borne the burdens of war, to share in the adjustments of peace. Not America alone, but all the peoples now quickened to a newer sense of the values of justice, must join in the relief of a grievance whose continuance would traverse the principles for which more than a score of nations are now fighting.

"Please accept on behalf of the Slesvigians in this country my thanks for the faith of which their petition is an evidence, and on behalf of your race in the old country, my earnest wish for the hastening of the day when right and justice shall prevail to deliver them from oppression.

"Cordially and sincerely yours,

"WOODROW WILSON.

"The Rev. K. C. BODHOLDT,

"816 Union street, Racine, Wis."

Schleswig-Holstein, including Helgoland, has an area of 7,340 square miles. In 1910 it had a population of 1,621,004.

REPUBLIC OF LITHUANIA.

The republic of Lithuania, it was announced Nov. 30, 1918, had been proclaimed at Riga in the presence of the national council and great numbers of the population. Karl Ullman was chosen the first president of the new state.

Lithuania is situated in the basin of the Nemunas (Niemen), and the Daurava (Prima) rivers, on the southeast coast of the Baltic sea. Ethnographic Lithuania corresponds to the following administrative divisions, which were once part of Russian czarism: The governments of Vilna, Kovna, Suvalki, Grodno, a part of Courland, and the governments of Minsk and Vitebsk; also the provinces in East Prussia known as Tilze (Tilsit), Klaipeda (Memel), Gumbine (Gumbinnen) and Karaliaucius (Koenigsberg). The city of Vilnius (Vilna) is the capital of Lithuania.

The area which ethnographical Lithuania occupies is approximately 80,000 square miles. The population is about 9,000,000, of whom 7,000,000 are Lithuanians (3,500,000 Lithuanians proper; 1,500,000 Lithuanians using Slavic dialect; and 2,000,000 Letts), and 308,444 Poles. The rest of the population consists of Jews, White Russians, Germans, Monks, and others.

"From the Lithuanian word "baltas"—white,

STATUS OF SCHLESWIG-HOLSTEIN.

One of the questions which may be settled at the peace conference following the world war is that regarding the status of Schleswig and Holstein, the provinces which were taken from Denmark by Prussia in 1864. In October, 1918, Denmark sent a note to Germany suggesting that certain terms of the treaties executed between the two countries in the period from 1860 to 1870 should be carried out. It was pointed out that article V of the treaty of 1864, which ceded to the duke of Schleswig-Holstein and Lauenburg to Prussia, provided for a plebiscite in Schleswig to decide whether the inhabitants would prefer allegiance to Germany or to Denmark. This provision, it was declared, never had been carried out.

On Nov. 10, 1918, it was reported that Schleswig-Holstein was preparing to declare itself an independent state, with a provisional government controlled by workers' and soldiers' councils on the bolshevist order. However, the desire of the inhabitants of Schleswig, at least, has always been to return under the jurisdiction of Denmark, most of them being Danes. Citizens of the United States hailing from Schleswig or Slesvig (as the Danes spell it) in November sent the following petition to President Wilson:

"At this moment of glorious dawn when a new day seems to be breaking upon the world with promise of a universal readjustment on the basis of justice and right, we, American citizens hailing from the German province Slesvig, turn to you with an urgent appeal that you bring before the world the case of our oppressed kinsmen in the old country.

"What they ask, and what we ask on their behalf, implies no taking of territory from one nation for the enlargement or aggrandizement of another. While we know that Danes all over the world, without regard to political allegiance, are with us, our appeal is made regardless of them and without thought of gain or loss to Denmark. All we ask for our race in Slesvig, and all they ask for themselves, is that they be granted the right for which you have spoken with such convincing power—the right of determining for themselves whether they are to give allegiance to Germany or to Denmark.

"There can be the less question or hesitation about the validity of their demand because it was explicitly reserved to them by point 5 of the treaty made at Prague in 1866. Is it not meet that to-day, when other 'scraps of paper' torn by Germany are being pieced together again, this one as well be made binding once more?

"We think that we know what you feel about the subject so close to our hearts—closer than ever because we ourselves are no longer victims of the tyranny against which we protest. We can see more than one reason why, until now, the name of Slesvig has not been included in any one of those heart stirring utterances of yours that are being made the fundamental documents for the world's rebuilding into a safe refuge for true democracy. But now we believe that all such reasons have lost their binding force. Now, when the fetters are falling from the limbs of one nation and race after another the time has come, we believe, to add the name of Slesvig to those that have a valid claim to

GERMAN INTRIGUE IN SOUTH AMERICA.

The following translations of messages between the German legation in Buenos Aires, Argentina, and the foreign office in Berlin were published by Secretary Lansing, in agreement with the minister for foreign affairs of Argentina, Dec. 20, 1917:

Says Foreign Minister Shows an "Insane Cunning."

Buenos Aires to Berlin, July 7 or 8, 1917 (No. 62).—Minister for foreign affairs, who is a theatrical person, has shown an insane cunning in preventing me from having an interview with the president. He sent me a copy of the note and declared in accordance therewith that Argentina could not consent to all the products of the country being treated as contraband.

The pressure of North America in regard to shipping iron, coal and paper is great, but not irresistible. What is lacking is strength of will.

If the president, whose action it is impossible to foretell, changes ministers a postponement of the crisis or a settlement is possible.

If the answer is unsatisfactory there is to be a rupture of relations. LUXBURG.

Suggests Submarine Squadron Might "Save Situation."

Buenos Aires to Berlin, July 7, 1917 (No. 63).—Our attitude toward Brazil has created the impression here that our easy going good nature can be counted on. This is dangerous in South America, where the people under thin veneer are Indians. A submarine squadron with full powers to me might probably still save the situation. I request instructions as to whether after a rupture of relations legation is to start for home or to remove to Paraguay or possibly Chile. The naval attaché will doubtless go to Santiago de Chile. LUXBURG.

Quotes President Desiring the Friendship of Germany.

Buenos Aires to Berlin, July 10, 1917 (No. 67).—President in the course of a long interview protested his friendship for Germany and firm desire for neutrality in spite of severe pressure. He demanded forbearance for all ships, about six in number, proceeding to the war zone, but conceded that contraband found on board might be destroyed. He stated that it is a fact that there are no more ships available. Am regretted the possibility of rupture. Am reporting further. LUXBURG.

Says Chancellor's Speech Made a Good Impression.

Buenos Aires to Berlin, July 13, 1917 (No. 69).—Imperial chancellor's declaration of no peace without annexations has made the best impression among our friends and also created impression of the strength of our confidence of victory. The news of the crisis and the dismissal of numerous ministers is being exploited by our enemies. LUXBURG.

Reports President Refusing to Invite U. S. Squadron.

Buenos Aires to Berlin, July 14, 1917 (No. 70).—Situation better, president refuses to invite American squadron. I am negotiating respecting proposals for the solution of the ship question. LUXBURG.

Suggests Nature of Reply to Note on Toro Sinking.

Buenos Aires to Berlin, July 15, 1917 (No. 71).—At the special request of the president I have undertaken to transmit the following. We have discussed the following proposals: 1. That our reply to the note should merely express regret for the necessity of sinking the Toro on account of contraband and should give the desired assurance as regards the future on condition that Argentine ships avoid contraband and any hostile undertaking. This reply to be couched in conciliatory language. LUXBURG.

Outlines Some of Terms of the Proposed Protocols.

Buenos Aires to Berlin, July 15, 1917 (No. 72). Continuation of No. 71).—Protocols to be exchanged here.

2. Argentina to promise that for the future ships will avoid the blockade zone or perhaps that the government should decline responsibility.

3. We to allow the five or six very small vessels now on the way to pass through without convoy. Details remain for further settlement. LUXBURG.

Recommends Delaying Answer Until End of the Month.

Buenos Aires to Berlin, July 19, 1917 (No. 73). In continuation of number 71).—Visit of American fleet is expected next week probably for five days. After that a change of ministers is probable.

Recommend delaying answer till end of month and when it is given going fully into the Toro case in conciliatory language emphasizing regret about, cruiser warfare and expressing regret at the necessity for sinking her. Owners here Dodero are agents of an enemy government and have sold 16th inst. Argentine steamship to France for patrol service. Continuation follows. LUXBURG.

Advises Conciliatory Tone Regarding International Law.

Buenos Aires to Berlin, July 20, 1917 (No. 74). Continuation of No. 73).—In regard to treatment of general question of note, please show conciliatory attitude in regard to recognized international law and suggest further negotiation; the Argentine government wishes to continue conversations. Chile has removed flag from steamer Iquique, property of Dodero. Recommend expressing recognition of this to the Chilean minister. LUXBURG.

Tells of Radio Plant Erected According to Instructions.

Buenos Aires to Berlin, July 20 (No. 75).—1. Receiving plant erected according to instructions. When does Nauen send at greatest strength and which is the wave length?

2. The legation balance at the bank was, on June 30, 856,000 pesos. LUXBURG.

Asks That Note Be Delayed Until First of August.

Buenos Aires to Berlin, July 24, 1917 (No. 80).—Confidential also for Molina in agreement with Saguier, who is shortly to take over the ministry of foreign affairs. I beg that the reply to the note may be delayed until the first of August. LUXBURG.

"Remittances Are Dependent on the General Situation."

Buenos Aires to Berlin, July 25, 1917 (No. 82).—1. Remittance of coupons of provincial and state loans depends on the general situation we are negotiating.

2. Union is in need of a subvention on account of the blacklist and prices about 10,000 pesos monthly. LUXBURG.

Gives Names and Tonnage of Ships Sailing to Europe.

Buenos Aires to Berlin, July 28, 1917 (No. 83).—Destination and particulars of ships bound for Europe are kept strictly secret. The following are on the way, the first two being over 800 tons, the others under: Caborna, Pellegrini, Unioning, Laterra, Francia, Peru, Venezuela, Itamby, Brazil, Bolivia, sailing from Brazilian ports at various dates, the last named 20th July. Steamer lies low in the water and has a superstructure amidships. LUXBURG.

Says President Decides on Making Secret Agreement.

Buenos Aires to Berlin, Aug. 1, 1917 (No. 85).—The president has at last made up his

mind to conclude a secret agreement with Chile and Bolivia with regard to a mutual rapprochement for protection vis a vis North America before the conference idea is taken up again. Saguer, with friendly underscretary of state and full powers, is on his way to * * * and Santiago. LUXBURG.

"Agreement Not Possible"; Suggests Arbitration Court.

Buenos Aires to Berlin, Aug. 5, 1917 (No. 87. Reply to telegram 149).—Agreement not possible since minister insists that protocol shall establish the obligation to pay indemnity and contain provision for freedom for known Argentine ships carrying the products of the country. Most of the ships have been sold to the enemy and will change flags. I recommend answering the new note after 10th August in friendly terms and if necessary proposing a court of arbitration.

LUXBURG.

"Marine and Foreign Affairs Ministers Probably Bribed."

Buenos Aires to Berlin, Aug. 4, 1917 (No. 88).—Please treat with indulgence the last attempt of the government to put on pressure. The minister of marine and the minister for foreign affairs are probably bribed. President holds with us. The fact that North America is supplying munitions and advancing loan interest to Brazil has made an impression here. Please cable me at once further full powers. LUXBURG.

Advises the Cultivation of Friendship with Chile.

Buenos Aires to Berlin, Aug. 4, 1917 (No. 89).—I am convinced that we shall be able to carry through our principal political aims in South America, the maintenance of open market in Argentina, and the reorganization of South Brazil equally well whether with or against Argentina. Please cultivate friendship with Chile. The announcement of a visit of a submarine squadron to salute the president would even now exercise decisive influence on the situation in South America. Prospect excellent for wheat harvest in December.

LUXBURG.

Information That U. S. Asked Neutral Conference Dropped.

Buenos Aires to Berlin, Aug. 7, 1917 (No. 90).—I have certain information that North American note to Argentina asked that conference of South American neutrals should be dropped. Vanity does not allow them to tell the truth. Meanwhile there is a possibility that congress may be unconstitutionally dissolved by president. Please show willingness to meet the Argentine government as far as possible. LUXBURG.

"Important to Avoid the Appearance of Weakness."

Buenos Aires to Berlin, (About) Aug. 10, 1917 (No. 94. Reply to No. 157).—It is not known with certainty which ships are sold. I have not communicated to president suggestion about sparing Argentine ships for the present; it is important to avoid appearance of weakness in face of the pressure. Please give me full powers, secret and comprehensive, to settle matters, and let reply to note be courteous in tone. Best of all would be authorization to announce submarine visit.

LUXBURG.

Makes New Proposals Over Head of Foreign Minister.

Buenos Aires to Berlin, Aug. 13, 1917 (No. 95).—Advise delaying reply to note still further. My new proposal made over the head of the minister for foreign affairs is as follows:

1. Toro case to be settled by international court of arbitration.
2. Assurance that Argentine ships will be

spared in accordance with international law. 3. Protocol according to which Argentine ships avoid war zone. Germany allows all steamers now on the way to pass through both going and returning.

President's answer not yet received; request instructions. LUXBURG.

Considers Readjustment Is Probable but Not Certain.

Buenos Aires to Berlin, Aug. 16, 1917 (No. 97. Reply to telegram 158).—Readjustment probable, not certain. Objections of government regarding concessions have to be overcome, what amount is to be reimbursed to trans-ocean; what is desired is that the German government as sleeping partner should share expenses up to date half and half with Siemens Schuckert and also in future the working expenses of the company.

LUXBURG.

New Orientation Appears to Be "Proceeding Favorably."

Buenos Aires to Berlin, Aug. 16, 1917 (No. 98).—This government's new orientation seems to be proceeding favorably. Saguer, who has been invited by Peru, will visit Lima and then Santiago. LUXBURG.

Argentine President Firm in Adhering to Neutrality.

Buenos Aires to Berlin, Aug. 18, 1917 (No. 99).—Reference to your telegram No. 166, Secret. I have had a long and agitated conference with president. He is conscious that there have been errors in the past and has firm intention of adhering to neutrality and it is asserted that all pending conflicts may be settled on loyal broad lines on a basis of mutual confidence. He recommends that an early settlement should be arrived at. First, instead of there being a protocol Argentine ships should on the one hand tacitly be spared and on the other be prevented from going to sea. As a matter of fact the use of the Argentine flag has latterly been refused repeatedly, moreover shipbuilding material is exhausted. Continuation follows.

LUXBURG.

Should Be Assurance That Ships Will Not Be Harmed.

Buenos Aires to Berlin, Aug. 18, 1917 (No. 100. Continuation of No. 99).—Second, as regards note of your excellency or of the imperial legation, the lines of which were telegraphed to Molina at the president's wish, a large hearted solution should be arrived at out of friendship. There should be assurance that Argentine ships will not be harmed and that freedom of movement will be allowed them in accordance with international law. As regards Toro indemnity there should be same procedure as in the case of the Monte Protegido, but ship's value should only come in so far as it is not covered by insurance. The president deserves confidence.

LUXBURG.

"Public Opinion Unpatriotic"; Advises Immediate Settlement.

Buenos Aires to Berlin, Aug. 24, 1917 (No. 103. Reply to telegram No. 170).—Public opinion is becoming unpatriotic. I recommend an immediate, definite settlement. My telegraphic communication with Mexico is entirely interrupted. LUXBURG.

Says Friendly Minister Fears Secret Wire May Be Compromised.

Buenos Aires to Berlin, Sept. 1, 1917.—A friendly minister regrets very much the communication made at Berlin to Molina to the effect that telegraphic instructions to me were contemplated. He fears that the secret wire may be compromised. The Argentine government has published all reports and drafts, as well as the instructions sent to me through Molina respecting the last note.

LUXBURG.

Says He Is Allowed Only Seldom to See the President.

Buenos Aires to Berlin, Sept. 1, 1917 (No. 108).—I can be—in fact, I am—allowed only seldom to see the president. The government here is ready to communicate details about the ships through Molina. Please show no anxiety. LUXBURG.

Berlin to Buenos Aires, July 3, 1917 (No. 137).—For naval attache. In reply to telegram No. 34. He is one of our agents.

Berlin Announces Proposals and Adds Secret Instructions.

Berlin to Buenos Aires, (About) July 24, 1917 (No. 149).—Proposal agreed to if formulated in the following terms: Germany allows six ships of moderate size in the blockade area while on their present journey here and back provided they are not convoyed. Instructions are being issued accordingly. As it is not absolutely certain that information can be given in time, compensation is agreed to in case a ship is unintentionally sunk. Argentina promises that in future her ships will keep away from the blockade area and Argentine ships are to remain unharmed if they neither carry contraband nor undertake any hostile enterprise. I authorize you to sign a protocol in accordance with this. If the palliative [paragraph] above referred to cannot be obtained you should declare to the president verbally that the imperial government, in full appreciation of the value of the continuance of the historic friendship between the two countries, entertains a well-founded confidence that incidents productive of harm to Argentine ships will not occur again in the future. Very secret, for your personal information. Argentine ships will be treated with forbearance as far as they can be recognized. It is quite impossible to make an express communication to that effect to the Argentine government on account of other neutrals and of military considerations. The desired Toro note will be handed to the Argentine minister. ZIMMERMANN.

Berlin Asks for Names of Ships That Have Been Sold.

Berlin to Buenos Aires, (About) Aug. 8, 1917 (No. 157).—Please telegraph the names of the ships which have been sold. Have you made use of the second alternative in telegram No. 149, vis a vis the president? STRUMM.

Plan to Mollify Neutrals After Payment of Indemnity.

Berlin to Buenos Aires, (About) Aug. 11, 1917 (No. 161).—Please, as far as possible, deal with the president, and in answering last note state that after explanation of circumstances we are prepared to pay compensation for Toro. As regards safety for Argentine ships in future, please refer verbally to explanations given lately to Argentine minister here as well as to the declaration which you were empowered to make. For your information—in answer to complaints from other neutrals, the payment of indemnity will be explained by saying that part of the cargo was for Switzerland should necessity arise. Acknowledged by telegraph. KUEHLMANN.

Is Empowered to Announce a Probable Submarine Visit.

Berlin to Buenos Aires, (About) Aug. 12, 1917 (No. 163. Reply to No. 94).—The Argentine minister is receiving here only general oral information. The answering of the note, in accordance with instructions in our telegrams Nos. 161 and 149, is left to you. You are empowered to announce a submarine visit should politico-military situation allow. KUEHLMANN.

Suggests That He Go to Chile in Case a Rupture Occurs.

Berlin to Buenos Aires, Aug. 16, 1917 (No. 165. Reply to No. 63).—In case of a rup-

ture of relations I request legation to go to Chile, hand over protection of German interests to Swedish legation.

VON DEM BUSSCHE-HADDENHAUSEN.

Proposals Are Agreed To, Including Toro Indemnity.

Berlin to Buenos Aires, Aug. 15, 1917 (No. 166. Reply to No. 95).—Proposals agreed to in their form: One, indemnity for Toro to be agreed to in accordance with telegram No. 161; two, agreed to provide as is implied by three, war zone remains excluded and our interpretation of international law is not narrowed by any addition; three, agreed to. If the above suggested agreement suffices to prevent a rupture of relations previous instructions are canceled, as an agreement is preferable.

Tells of Secret Instructions, by "the Well Known Way."

Berlin to Buenos Aires, Aug. 21, 1917 (No. 170).—Telegram No. 99, and draft of note received. The matter will be dealt with as speedily as possible. Draft of note will probably be sent through the Argentine minister. Secret instructions by the well known way. KUEHLMANN.

The Proposed Sparing of Ships "Must Be Absolutely Secret."

Berlin to Buenos Aires, Aug. 25, 1917 (No. 172).—Reference to my telegram No. 170, the proposed sparing of ships must absolutely remain secret, otherwise submarine war would be endangered. As blockade area rests on the principle of retaliation, not on international law, the note must contain a limitation, in this sense: Full compensation is guaranteed in regard to the Toro, but in view of the precedent involved this is to be attributed not to liberality but to the circumstances of the case; that this course is justified by the facts. A draft note on these lines will follow through the Argentine minister. Please await its arrival. Former instructions canceled.

Rely on Promise to Prevent Ships' Going to Blockade Area.

Berlin to Buenos Aires, Aug. 26, 1917 (No. 175. Reply to telegram No. 104).—Draft note for you has been handed to Argentine minister. Please present it if possible to the president. Request president that you may be furnished with names and numbers of ships involved. Point out that we rely on his promise to prevent ships from proceeding to the blockade area. Please state at once, should any incident take place, and this is not quite impossible owing to technical reasons, that we are in any circumstances prepared to adopt the most conciliatory attitude.

Berlin to Buenos Aires, Sept. 1, 1917 (No. 176).—Now that Toro matter is satisfactorily disposed of, please express to the president the expectation of the imperial government that he will prevent ships from proceeding to blockade area. Report by wire. BUSSCHE.

"Firm Intention of Setting Council Against North America."

Buenos Aires to Santiago, Chile, July 19, 1917 (No. 64).—With reference to your postal cipher dispatch 1730, I congratulate you on the solution arrived at. As long as Chile is neutral, Germany will be able after the war to carry out her South American policy just as well, if not more easily, in opposition to an infatuated and misguided Argentina as with Argentina on her side. All sensible men here, even Zeballos, allow that Chile is obviously better governed than Argentina; moreover, the situation here is by no means incapable of solution. The president has the firm intention of setting the council of ministers against North America. Use the above confidentially. LUXBURG.

THE DECLARATION OF LONDON.

Because of its importance in connection with the peace conference and the determination of issues arising from the world war, the historical agreement known as the "Declaration of London Concerning the Rules of Naval War" adopted Feb. 6, 1909, is herewith given in full:

His majesty the German emperor, king of Prussia; the president of the United States of America; his majesty the emperor of Austria, king of Bohemia, etc., and apostolic king of Hungary; his majesty the king of Spain; the president of the French republic; his majesty the king of the united kingdom of Great Britain and Ireland and of the British dominions beyond the seas, emperor of India; his majesty the king of Italy; his majesty the emperor of Japan; her majesty the queen of the Netherlands; his majesty the emperor of all the Russias;

Having regard to the terms in which the British government invited various powers to meet in conference in order to arrive at an agreement as to what are the generally recognized rules of international law within the meaning of article 7 of the convention of 18th October, 1907, relative to the establishment of an international prize court; recognizing all the advantages which an agreement as to the said rules would, in the unfortunate event of a naval war, present, both as regards peaceful commerce, and as regards the belligerents and their diplomatic relations with neutral governments; having regard to the divergence often found in the methods by which it is sought to apply in practice the general principles of international law; animated by the desire to insure henceforward a greater measure of uniformity in this respect; hoping that a work so important to the common welfare will meet with general approval; have appointed as their plenipotentiaries, that is to say:

His majesty the German emperor, king of Prussia: M. Kriege, privy counselor of legislation and legal adviser to the department for foreign affairs, member of the permanent court of arbitration.

The president of the United States of America: Rear-Admiral Charles H. Stockton, retired; Mr. George Grafton Wilson, professor at Brown university and lecturer on international law at the naval war college and at Harvard university.

His majesty the emperor of Austria, king of Bohemia, etc., and apostolic king of Hungary: His excellency M. Constantin Theodore Dumba, privy counselor of his imperial and royal apostolic majesty, envoy extraordinary and minister plenipotentiary.

His majesty the king of Spain: M. Gabriel Maury y Gamazo, Count de la Mortera, member of parliament.

The president of the French republic: M. Louis Renault, professor of the faculty of law at Paris, honorary minister plenipotentiary, legal adviser to the ministry of foreign affairs, member of the Institute of France, member of the permanent court of arbitration.

His majesty the king of the united kingdom of Great Britain and Ireland, and of the British dominions beyond the seas, emperor of India: The Earl of Desart, K. C. B., king's proctor.

His majesty the king of Italy: M. Guido Fusinato, counselor of state, member of parliament, ex-minister of public instruction, member of the permanent court of arbitration.

His majesty the emperor of Japan: Baron Toshiatsu Sakamoto, vice-admiral, head of the department of naval instruction; M. Enjiro Yamaza, counselor of the imperial embassy at London.

Her majesty the queen of the Netherlands: His excellency Jonkheer J. A. Roell, aid de camp to her majesty the queen in extraordinary service, vice-admiral retired, ex-minister of marine; Jonkheer L. H. Ruyssekers, en-

voy extraordinary and minister plenipotentiary, ex-secretary-general of the permanent court of arbitration.

His majesty the emperor of all the Russias: Baron Taube, doctor of laws, counselor to the imperial ministry of foreign affairs, professor of international law at the University of St. Petersburg.

Who, after having communicated their full powers, found to be in good and due form, have agreed to make the present declaration:

PRELIMINARY PROVISION.

The signatory powers are agreed that the rules contained in the following chapters correspond in substance with the generally recognized principles of international law.

Chapter I.—Blockade in Time of War.

Article 1. A blockade must not extend beyond the ports and coasts belonging to or occupied by the enemy.

Art. 2. In accordance with the Declaration of Paris of 1856, a blockade, in order to be binding, must be effective—that is to say, it must be maintained by a force sufficient really to prevent access to the enemy coastline.

Art. 3. The question whether a blockade is effective is a question of fact.

Art. 4. A blockade is not regarded as raised if the blockading force is temporarily withdrawn on account of stress of weather.

Art. 5. A blockade must be applied impartially to the ships of all nations.

Art. 6. The commander of a blockading force may give permission to a warship to enter, and subsequently to leave, a blockaded port.

Art. 7. In circumstances of distress, acknowledged by an officer of the blockading force, a neutral vessel may enter a place under blockade and subsequently leave it, provided that she has neither discharged nor shipped any cargo there.

Art. 8. A blockade, in order to be binding, must be declared in accordance with article 9, and notified in accordance with articles 11 and 16.

Art. 9.—A declaration of blockade is made either by the blockading power or by the naval authorities acting in its name.

It specifies:

1. The date when the blockade begins;
2. The geographical limits of the coastline under blockade;
3. The period within which neutral vessels may come out.

Art. 10. If the operations of the blockading power or of the naval authorities acting in its name, do not tally with the particulars, which, in accordance with article 9, (1) and (2), must be inserted in the declaration of blockade, the declaration is void, and a new declaration is necessary in order to make the blockade operative.

Art. 11. A declaration of blockade is notified:

1. To neutral powers, by the blockading power by means of a communication addressed to the governments direct, or to their representatives accredited to it;
2. To the local authorities, by the officer commanding the blockading force. The local authorities will, in turn, inform the foreign consular officers at the port or on the coastline under blockade as soon as possible.

Art. 12. The rules as to declaration and notification of blockade apply to cases where the limits of a blockade are extended, or where a blockade is re-established after having been raised.

Art. 13. The voluntary raising of a blockade, as also any restriction in the limits of a blockade, must be notified in the manner prescribed by article 11.

Art. 14. The liability of a neutral vessel to capture for breach of blockade is contingent on her knowledge, actual or presumptive, of the blockade.

Art. 15. Failing proof to the contrary, knowledge of the blockade is presumed if the vessel left a neutral port subsequently to the notification of the blockade to the power to which such port belongs, provided that such notification was made in sufficient time.

Art. 16. If a vessel approaching a blockaded port has no knowledge, actual or presumptive, of the blockade, the notification must be made to the vessel itself by an officer of one of the ships of the blockading force. This notification should be entered in the vessel's logbook, and must state the day and hour, and the geographical position of the vessel at the time.

If through the negligence of the officer commanding the blockading force no declaration of blockade has been notified to the local authorities, or, if in the declaration, as notified, no period has been mentioned within which neutral vessels may come out, a neutral vessel coming out of the blockaded port must be allowed to pass free.

Art. 17. Neutral vessels may not be captured for breach of blockade except within the area of operations of the warships detailed to render the blockade effective.

Art. 18. The blockading forces must not bar access to neutral ports or coasts.

Art. 19. Whatever may be the ulterior destination of a vessel or of her cargo, she cannot be captured for breach of blockade, if, at the moment, she is on her way to a non-blockaded port.

Art. 20. A vessel which has broken blockade outward, or which has attempted to break blockade inward, is liable to capture so long as she is pursued by a ship of the blockading force. If the pursuit is abandoned, or if the blockade is raised, her capture can no longer be effected.

Art. 21. A vessel found guilty of breach of blockade is liable to condemnation. The cargo is also condemned, unless it is proved that at the time of the shipment of the goods the shipper neither knew nor could have known of the intention to break the blockade.

Chapter II.—Contraband of War.

Art. 22. The following articles may, without notice, be treated as contraband of war, under the name of absolute contraband:

1. Arms of all kinds, including arms for sporting purposes and their distinctive component parts.
2. Projectiles, charges and cartridges of all kinds and their distinctive component parts.
3. Powder and explosives specially prepared for use in war.
4. Gun-mountings, limber boxes, limbers, military wagons, field forges and their distinctive component parts.
5. Clothing and equipment of a distinctively military character.
6. All kinds of harness of a distinctively military character.
7. Saddle, draft, and pack animals suitable for use in war.
8. Articles of camp equipment and their distinctive component parts.
9. Armor-plates.
10. Warships, including boats, and their distinctive component parts of such a nature that they can only be used on a vessel of war.
11. Implements and apparatus designed exclusively for the manufacture of munitions of war, for the manufacture or repair of arms, or war material for use on land or sea.

Art. 23. Articles exclusively used for war may be added to the list of absolute contraband by a declaration, which must be notified.

Such notification must be addressed to the governments of other powers, or to their representatives accredited to the power making the declaration. A notification made after the outbreak of hostilities is addressed only to neutral powers.

Art. 24. The following articles, susceptible of use in war as well as for purposes of peace, may, without notice, be treated as contraband of war, under the name of conditional contraband:

1. Foodstuffs.
2. Forage and grain, suitable for feeding animals.
3. Clothing, fabrics for clothing and boots and shoes, suitable for use in war.
4. Gold and silver in coin or bullion; paper money.
5. Vehicles of all kinds available for use in war and their component parts.
6. Vessels, craft and boats of all kinds; floating docks, parts of docks and their component parts.
7. Railway material, both fixed and rolling stock, and material for telegraphs, wireless telegraphs and telephones.
8. Balloons and flying machines and their distinctive component parts, together with accessories and articles recognizable as intended for use in connection with balloons and flying machines.
9. Fuel; lubricants.
10. Powder and explosives not specially prepared for use in war.
11. Barbed wire and implements for fixing and cutting the same.
12. Horseshoes and shoeing materials.
13. Harness and saddlery.
14. Field glasses, telescopes, chronometers and all kinds of nautical instruments.

Art. 25. Articles susceptible of use in war as well as for purposes of peace, other than those enumerated in articles 22 and 24, may be added to the list of conditional contraband by a declaration, which must be notified in the manner provided for in the second paragraph of article 23.

Art. 26. If a power waives, so far as it is concerned, the right to treat as contraband of war an article comprised in any of the classes enumerated in articles 22 and 24, such intention shall be announced by a declaration, which must be notified in the manner provided for in the second paragraph of article 23.

Art. 27. Articles which are not susceptible of use in war may not be declared contraband of war.

Art. 28. The following may not be declared contraband of war:

1. Raw cotton, wool, silk, jute, flax, hemp and other raw materials of the textile industries and yarns of the same.
2. Oil seeds and nuts; copra.
3. Rubber, resins, gums and lacs; hops.
4. Raw hides and horns, bones and ivory.
5. Natural and artificial manures, including nitrates and phosphates for agricultural purposes.
6. Metallic ores.
7. Earths, clays, lime, chalk, stone, including marble, bricks, slates and tiles.
8. Chinaware and glass.
9. Paper and paper making materials.
10. Soap, paint and colors, including articles exclusively used in their manufacture, and varnish.
11. Bleaching powder, soda ash, caustic soda, salt cake, ammonia, sulphate of ammonia and sulphate of copper.
12. Agricultural, mining, textile and printing machinery.
13. Precious and semiprecious stones, pearls, mother-of-pearl and coral.
14. Clocks and watches, other than chronometers.
15. Fashion and fancy goods.
16. Feathers of all kinds, hairs and bristles.

17. Articles of household furniture and decoration; office furniture and requisites.

Art. 29. Likewise the following may not be treated as contraband of war:

1. Articles serving exclusively to aid the sick and wounded. They can, however, in case of urgent military necessity and subject to the payment of compensation, be requisitioned, if their destination is that specified in article 30.
2. Articles intended for the use of the vessel in which they are found, as well as those intended for the use of her crew and passengers during the voyage.

Art. 30. Absolute contraband is liable to capture if it is shown to be destined to territory belonging to or occupied by the enemy or to the armed forces of the enemy. It is immaterial whether the carriage of the goods is direct or entails transshipment or a substitute transport by land.

Art. 31. Proof of the destination specified in article 30 is complete in the following cases:

1. When the goods are documented for discharge in an enemy port, or for delivery to the armed forces of the enemy.
2. When the vessel is to call at enemy ports only, or when she is to touch at an enemy port or meet the armed forces of the enemy before reaching the neutral port for which the goods in question are documented.

Art. 32. Where a vessel is carrying absolute contraband her papers are conclusive proof as to the voyage on which she is engaged, unless she is found clearly out of the course indicated by her papers and unable to give adequate reasons to justify such deviation.

Art. 33. Conditional contraband is liable to capture if it is shown to be destined for the use of the armed forces or of a government department of the enemy state, unless in this latter case the circumstances show that the goods cannot in fact be used for the purposes of the war in progress. This latter exception does not apply to a consignment coming under article 24 (4).

Art. 34. The destination referred to in article 33 is presumed to exist if the goods are consigned to enemy authorities, or to a contractor established in the enemy country who, as a matter of common knowledge, supplies articles of this kind to the enemy. A similar presumption arises if the goods are consigned to a fortified place belonging to the enemy, or other place serving as a base for the armed forces of the enemy. No such presumption, however, arises in the case of a merchant vessel bound for territory belonging to or occupied sought to prove that she herself is contraband.

In cases where the above presumptions do not arise the destination is presumed to be innocent.

The presumptions set up by this article may be rebutted.

Art. 35. Conditional contraband is not liable to capture, except when found on board a vessel bound for one of these places if it is by the enemy, or for the armed forces of the enemy, and when it is not to be discharged in an intervening neutral port.

The ship's papers are conclusive proof both as to the voyage on which the vessel is engaged and as to the port of discharge of the goods, unless she is found clearly out of the course indicated by her papers and unable to give adequate reasons to justify such deviation.

Art. 36. Notwithstanding the provisions of article 35, conditional contraband, if shown to have the destination referred to in article 33, is liable to capture in cases where the enemy country has no seaboard.

Art. 37. A vessel carrying goods liable to capture as absolute or conditional contraband may be captured on the high seas or in the territorial waters of the belligerents through-

out the whole of her voyage, even if she is to touch at a port of call before reaching the hostile destination.

Art. 38. A vessel may not be captured on the ground that she has carried contraband on a previous occasion if such carriage is in point of fact at an end.

Art. 39. Contraband goods are liable to condemnation.

Art. 40. A vessel carrying contraband may be condemned if the contraband, reckoned either by value, weight, volume or freight, forms more than half the cargo.

Art. 41. If a vessel carrying contraband is released, she may be condemned, to pay the costs and expenses incurred by the captor in respect of the proceedings in the national prize court and the custody of the ship and cargo during the proceedings.

Art. 42. Goods which belong to the owner of the contraband and are on board the same vessel are liable to condemnation.

Art. 43. If a vessel is encountered at sea while unaware of the outbreak of hostilities or of the declaration of contraband which applies to her cargo, the contraband cannot be condemned except on payment of compensation; the vessel herself and the remainder of the cargo are not liable to condemnation or to the costs and expenses referred to in article 41. The same rule applies if the master, after becoming aware of the outbreak of hostilities or of the declaration of contraband, has had no opportunity of discharging the contraband.

A vessel is deemed to be aware of the existence of a state of war, or of a declaration of contraband, if she left a neutral port subsequently to the notification to the power to which such port belongs of the outbreak of hostilities or of the declaration of contraband respectively, provided that such notification was made in sufficient time. A vessel is also deemed to be aware of the existence of a state of war if she left an enemy port after the outbreak of hostilities.

Art. 44. A vessel which has been stopped on the ground that she is carrying contraband, and which is not liable to condemnation on account of the proportion of contraband on board, may, when the circumstances permit, be allowed to continue her voyage if the master is willing to hand over the contraband to the belligerent warship.

The delivery of the contraband must be entered by the captor on the logbook of the vessel stopped, and the master must give the captor duly certified copies of all relevant papers. The captor is at liberty to destroy the contraband that has been handed over to him under these conditions.

Chapter III.—Unneutral Service.

Art. 45. A neutral vessel will be condemned and will, in a general way, receive the same treatment as a neutral vessel liable to condemnation for carriage of contraband:

1. If she is on a voyage specially undertaken with a view to the transport of individual passengers who are embodied in the armed forces of the enemy, or with a view to the transmission of intelligence in the interest of the enemy.
2. If, to the knowledge of either the owner, the charterer or the master, she is transporting a military detachment of the enemy, or one or more persons who, in the course of the voyage, directly assist the operations of the enemy.

In the cases specified under the above heads, goods belonging to the owner of the vessel are likewise liable to condemnation.

The provisions of the present article do not apply if the vessel is encountered at sea while unaware of the outbreak of hostilities, or if the master, after becoming aware of the outbreak of hostilities, has had no opportunity of disembarking the passengers. The vessel is deemed to be aware of the exist-

ence of a state of war if she left an enemy port subsequently to the outbreak of hostilities or a neutral port subsequently to the notification of the outbreak of hostilities to the power to which such port belongs, provided that such notification was made in sufficient time.

Art. 46. A neutral vessel will be condemned and, in a general way, receive the same treatment as would be applicable to her if she were an enemy merchant vessel:

1. If she takes a direct part in the hostilities;
2. If she is under the orders or control of an agent placed on board by the enemy government;
3. If she is in the exclusive employment of the enemy government;
4. If she is exclusively engaged at the time either in the transport of enemy troops or in the transmission of intelligence in the interest of the enemy.

In the cases covered by the present article, goods belonging to the owner of the vessel are likewise liable to condemnation.

Art. 47. Any individual embodied in the armed forces of the enemy who is found on board a neutral merchant vessel may be made a prisoner of war, even though there be no ground for the capture of the vessel.

Chapter IV.—Destruction of Neutral Prizes.

Art. 48. A neutral vessel which has been captured may not be destroyed by the captor; she must be taken into such port as is proper for the determination there of all questions concerning the validity of the capture.

Art. 49. As an exception, a neutral vessel which has been captured by a belligerent warship, and which would be liable to condemnation, may be destroyed if the observance of article 48 would involve danger to the safety of the warship or to the success of the operations in which she is engaged at the time.

Art. 50. Before the vessel is destroyed all persons on board must be placed in safety, and all the ship's papers and other documents which the parties interested consider relevant for the purpose of deciding on the validity of the capture must be taken on board the warship.

Art. 51. A captor who has destroyed a neutral vessel must, prior to any decision respecting the validity of the prize, establish that he only acted in the face of an exceptional necessity of the nature contemplated in article 49. If he fails to do this he must compensate the parties interested and no examination shall be made of the question whether the capture was valid or not.

Art. 52. If the capture of a neutral vessel is subsequently held to be invalid, though the act of destruction has been held to have been justifiable, the captor must pay compensation to the parties interested, in place of the restitution to which they would have been entitled.

Art. 53. If neutral goods not liable to condemnation have been destroyed with the vessel, the owner of such goods is entitled to compensation.

Art. 54. The captor has the right to demand the handing over, or to proceed himself to the destruction of, any goods liable to condemnation found on board the vessel not herself liable to condemnation, provided that the circumstances are such as would, under article 49, justify the destruction of a vessel herself liable to condemnation. The captor must enter the goods surrendered or destroyed in the logbook of the vessel stopped, and must obtain duly certified copies of all relevant papers. When the goods have been handed over or destroyed, and the formalities duly carried out, the master must be allowed to continue his voyage.

The provisions of articles 51 and 52 respecting the obligations of a captor who has destroyed a neutral vessel are applicable.

Chapter V.—Transfer to a Neutral Flag.

Art. 55. The transfer of an enemy vessel to a neutral flag, effected before the outbreak of hostilities, is valid, unless it is proved that such transfer was made in order to evade the consequences to which an enemy vessel, as such, is exposed. There is, however, a presumption, if the bill of sale is not on board a vessel which has lost her belligerent nationality less than sixty days before the outbreak of hostilities, that the transfer is void. This presumption may be rebutted.

Where the transfer was effected more than thirty days before the outbreak of hostilities, there is an absolute presumption that it is valid if it is unconditional, complete and in conformity with the laws of the countries concerned, and if its effect is such that neither the control of, nor the profits arising from the employment of, the vessel remain in the same hands as before the transfer. If, however, the vessel has lost her belligerent nationality less than sixty days before the outbreak of hostilities and if the bill of sale is not on board, the capture of the vessel gives no right to damages.

Art. 56. The transfer of an enemy vessel to a neutral flag, effected after the outbreak of hostilities, is void unless it is proved that such transfer was not made in order to evade the consequences to which an enemy vessel, as such, is exposed.

There, however, is an absolute presumption that a transfer is void:

1. If the transfer has been made during a voyage or in a blockaded port.
2. If a right to repurchase or recover the vessel is reserved to the vendor.
3. If the requirements of the municipal law governing the right to fly the flag under which the vessel is sailing have not been fulfilled.

Chapter VI.—Enemy Character.

Art. 57. Subject to the provisions respecting transfer to another flag, the neutral or enemy character of a vessel is determined by the flag which she is entitled to fly.

The case where a neutral vessel is engaged in a trade which is closed in time of peace remains outside the scope of and is in no wise affected by this rule.

Art. 58. The neutral or enemy character of goods found on board an enemy vessel is determined by the neutral or enemy character of the owner.

Art. 59. In the absence of proof of the neutral character of goods found on board an enemy vessel they are presumed to be enemy goods.

Art. 60. Enemy goods on board an enemy vessel retain their enemy character until they reach their destination, notwithstanding any transfer effected after the outbreak of hostilities while the goods are being forwarded.

If, however, prior to the capture, a former neutral owner exercises, on the bankruptcy of an existing enemy owner, a recognized legal right to recover the goods, they regain their neutral character.

Chapter VII.—Convoy.

Art. 61. Neutral vessels under national convoy are exempt from search. The commander of a convoy gives, in writing, at the request of the commander of a belligerent warship, all information as to the character of the vessels and their cargoes which could be obtained by search.

Art. 62. If the commander of the belligerent warship has reason to suspect that the confidence of the commander of the convoy has been abused, he communicates his suspicions to him. In such a case it is for the commander of the convoy alone to investigate the matter. He must record the result of such investigation in a report, of which a copy is handed to

the officer of the warship. If, in the opinion of the commander of the convoy, the facts shown in the report justify the capture of one or more vessels, the protection of the convoy must be withdrawn from such vessels.

Chapter VIII.—Resistance to Search.

Art. 63. Forcible resistance to the legitimate exercise of the right of stoppage, search and capture involves in all cases the condemnation of the vessel. The cargo is liable to the same treatment as the cargo of an enemy vessel. Goods belonging to the master or owner of the vessel are treated as enemy goods.

Chapter IX.—Compensation.

Art. 64. If the capture of a vessel or of goods is not upheld by the prize court, or if the prize is released without any judgment being given, the parties interested have the right to compensation, unless there were good reasons for capturing the vessel or goods.

Final Provisions.

Art. 65. The provisions of the present declaration must be treated as a whole and cannot be separated.

Art. 66. The signatory powers undertake to insure the mutual observance of the rules contained in the present declaration in any war in which all the belligerents are parties thereto. They will therefore issue the necessary instructions to their authorities and to their armed forces, and will take such measures as may be required in order to insure that it will be applied by their courts, and more particularly by their prize courts.

Art. 67. The present declaration shall be ratified as soon as possible.

The ratifications shall be deposited in London.

The first deposit of ratifications shall be recorded in a protocol signed by the representatives of the powers taking part therein, and by his Britannic majesty's principal secretary of state for foreign affairs.

The subsequent deposits of ratifications shall be made by means of a written notification addressed to the British government and accompanied by the instrument of ratification.

A duly certified copy of the protocol relating to the first deposit of ratifications and of the notifications mentioned in the preceding paragraph as well as of the instruments of ratification which accompany them, shall be immediately sent by the British government, through the diplomatic channel, to the signatory powers. The said government shall, in the cases contemplated in the preceding paragraph, inform them at the same time of the date on which it received the notification.

Art. 68. The present declaration shall take effect, in the case of the powers which were parties to the first deposit of ratifications, sixty days after the date of the protocol recording such deposit, and, in the case of the powers

which shall ratify subsequently, sixty days after the notification of their ratification shall have been received by the British government.

Art. 69. In the event of one of the signatory powers wishing to denounce the present declaration, such denunciation can only be made to take effect at the end of a period of twelve years beginning sixty days after the first deposit of ratifications, and, after that time, at the end of successive periods of six years, of which the first will begin at the end of the period of twelve years.

Such denunciation must be notified in writing, at least one year in advance, to the British government, which shall inform all the other powers.

It will only operate in respect of the denouncing power.

Art. 70. The powers represented at the London naval conference attach particular importance to the general recognition of the rules which they have adopted, and therefore express the hope that the powers which were not represented there will accede to the present declaration. They request the British government to invite them to do so.

A power which desires to accede shall notify its intention in writing to the British government and transmit simultaneously the act of accession, which will be deposited in the archives of the said government.

The said government shall forthwith transmit to all the other powers a duly certified copy of the notification, together with the act of accession, and communicate the date on which such notification was received. The accession takes effect sixty days after such date.

In respect of all matters concerning this declaration, acceding powers shall be on the same footing as the signatory powers.

Art. 71. The present declaration, which bears the date of the 26th February, 1909, may be signed in London up till the 30th June, 1909, by the plenipotentiaries of the powers represented at the naval conference.

In faith whereof the plenipotentiaries have signed the present declaration and have thereto affixed their seals.

Done at London, the 26th day of February, 1909, in a single original, which shall remain deposited in the archives of the British government, and of which duly certified copies shall be sent through the diplomatic channel to the powers represented at the naval conference.

List of signatures appended to the declaration of Feb. 26, 1909, up to March 20, 1909:

For Germany—Kriegs.

For the United States of America—C. H. Stockton, George Grafton Wilson.

For Austria-Hungary—C. Dumba.

For France—L. Renault.

For Great Britain—Desart.

For the Netherlands—J. A. Roell, L. H. Ruysenaers.

GOVERNMENT TELEGRAPH, TELEPHONE AND CABLE CONTROL.

Under a joint resolution of congress (see page 390 this volume) President Wilson, on July 22, 1918, issued the following proclamation:

"Whereas, the congress of the United States, in the exercise of the constitutional authority vested in them, by joint resolution of the senate and house of representatives, bearing date July 16, 1918, resolved: [The president here quotes the resolution in full and then proceeds]:

"And whereas it is deemed necessary for the national security and defense to supervise and to take possession and assume control of all telegraph and telephone systems and to operate the same in such manner as may be needful or desirable:

"Now, therefore, I, Woodrow Wilson, president of the United States, under and by virtue of the powers vested in me by the foregoing resolution, and by virtue of all other powers

thereto me enabling, do hereby take possession and assume control and supervision of each and every telegraph and telephone system, and every part thereof, within the jurisdiction of the United States, including all equipment thereof and appurtenances thereto whatsoever and all materials and supplies.

"It is hereby directed that the supervision, possession, control and operation of such telegraph and telephone systems hereby by me undertaken shall be exercised by and through the postmaster-general, Albert S. Burleson. Said postmaster-general may perform the duties hereby and hereunder imposed upon him, so long and to such extent and in such manner as he shall determine, through the owners, managers, boards of directors, receivers, officers and employes of said telegraph and telephone systems.

"Until and except so far as said postmaster-general shall from time to time by general

or special orders otherwise provide, the owners, managers, boards of directors, receivers, officers and employes of the various telegraph and telephone systems shall continue the operation thereof in the usual and ordinary course of the business of said systems, in the names of their respective companies, associations, organizations, owners, or managers, as the case may be.

"Regular dividends hitherto declared, and maturing interest upon bonds, debentures, and other obligations may be paid in due course, and such regular dividends and interest may continue to be paid until and unless the said postmaster-general shall, from time to time, otherwise by general or special orders determine; and, subject to the approval of said postmaster-general, the various telegraph and telephone systems may determine upon and arrange for the renewal and extension of maturing obligations.

"By subsequent order of said postmaster-general supervision, possession, control or operation may be relinquished in whole or in part to the owners thereof of any telegraph or telephone system or any part thereof supervision, possession, control, or operation or which is hereby assumed or which may be subsequently assumed in whole or in part hereunder.

"From and after 12 o'clock midnight on the 31st day of July, 1918, all telegraph and telephone systems included in this order and proclamation shall conclusively be deemed within the possession and control and under the supervision of said postmaster-general without further act or notice.

"In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done by the president, in the District of Columbia, this 22d day of July, in the year of our Lord 1918 and of the independence of the United States the 143d.

"WOODROW WILSON.

"By the president:

"FRANK L. POLK.

"Acting Secretary of State."

COMMITTEE OF MANAGEMENT.

On July 23, 1918, Postmaster-General Burleson issued the following order for the government control of the telegraph and telephone systems covered by the proclamation of the president dated July 22, 1918.

"John C. Koons, first assistant postmaster-general; David J. Lewis, commissioner, United States tariff commission, and William H. Lamar, solicitor for the postoffice department, are hereby appointed a committee for the governmental management, operation and control of the telegraph and telephone systems covered by the proclamation of the president dated July 22, 1918, of which committee the postmaster-general shall be chairman."

In announcing the appointment of this committee the postmaster-general stated that while the committee would have charge of the governmental management, operation, and control of the telegraph and telephone systems, yet it would be necessary to divide the work to a certain extent and that Mr. Koons and the postmaster-general would have charge of the administration and organization of the service, Mr. Lewis and the postmaster-general of its operation, and Mr. Lamar and the postmaster-general of the finances.

FEDERAL CONTROL ASSUMED.

Postmaster-General Burleson issued the following statement Aug. 1, 1918:

"Pursuant to the proclamation of the president of the United States, I have assumed possession, control and supervision of the telegraph and telephone systems of the United States. This proclamation has already been published and the officers, operators, and employes of the various telegraph and telephone companies are acquainted with its terms.

"Until further notice, the telegraph and telephone companies will continue operation in

the ordinary course of business through regular channels. Regular dividends heretofore declared and maturing interest on bonds, debentures, and other obligations may be paid in due course and the companies may renew or extend their maturing obligations unless otherwise ordered by the postmaster-general. All officers, operators and employes of the telegraph and telephone companies will continue in the performance of their present duties, reporting to the same officers as heretofore and on the same terms of employment. Should any officer, operator, or employe desire to leave the service he should give notice as heretofore to the proper officer so that there may be no interruption or impairment of the service to the public.

"I earnestly request the loyal co-operation of all officers, operators and employes, and the public, in order that the service rendered shall be not only maintained at a high standard, but improved wherever possible. It is the purpose to co-ordinate and unify these services so that they may be operated as a national system with due regard to the interests of the public and the owners of the properties.

"No changes will be made until after the most careful consideration of all the facts. When deemed advisable to make changes announcement will be made."

CABLE LINES TAKEN OVER.

On Nov. 2, 1918, President Wilson issued another proclamation, which, after quoting the joint resolution of July 16, 1918 (see page 390 this volume), continued:

"And whereas, it is deemed necessary for the national security and defense to supervise and to take possession and assume control of all marine cable systems and to operate the same in such manner as may be useful or desirable:

"Now, therefore, I, Woodrow Wilson, president of the United States, under and by virtue of the powers vested in me by the foregoing resolution, and by virtue of all other powers thereto me enabling, do hereby take possession and assume control and supervision of each and every marine cable system and every part thereof owned or controlled and operated by any company or companies organized and existing under the laws of the United States, or any state thereof, including all equipment thereof and appurtenances thereto, whatsoever, and all materials and supplies. It is hereby directed that the supervision, possession, control and operation of such marine cable systems hereby by me undertaken shall be exercised by and through the postmaster-general, Albert S. Burleson. Said postmaster-general may perform the duties hereby and hereunder imposed upon him, so long and to such extent and in such manner as he shall determine through the owners, managers, boards of directors, receivers, officers and employes of said marine cable systems.

"Until and except so far as said postmaster-general shall from time to time by general or special orders otherwise provide, the owners, managers, boards of directors, receivers, officers and employes of the various marine cable systems shall continue the operation thereof in the usual and ordinary course of the business of said systems, in the names of their respective companies, associations, organizations, owners or managers, as the case may be.

"Regular dividends hitherto declared and maturing interest upon bonds, debentures and other obligations may be paid in due course and such regular dividends and interest may continue to be paid until and unless the said postmaster-general shall from time to time otherwise by general or special orders determine; and, subject to the approval of said postmaster-general, the various marine cable systems may determine upon and arrange for the renewal and extension of maturing obligations.

"From and after 12 o'clock midnight on the 2d day of November, 1918, all marine cable systems included in this order and proclama-

tion shall conclusively be deemed within the possession and control and under the supervision of said postmaster-general without further act or notice.

"In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

"Done by the president in the District of Columbia this 2d day of November, in the year of our Lord 1918 and of the independence of the United States the 143d.

WOODROW WILSON,
"By the president: ROBERT LANSING, Secretary of State."

PLOTS AND ESPIONAGE CASES IN THE UNITED STATES.

VON RINTELEN CASE.

Franz von Rintelen, German naval officer and a reputed member of the German war staff, was found guilty with ten other defendants in federal court in New York city, Feb. 5, 1918, of conspiracy to destroy food and munitions ships of the entente allies by placing "fire bombs" in their cargoes.

Judge Howe immediately imposed the maximum penalty of eighteen months' imprisonment in the federal penitentiary at Atlanta, and a fine of \$2,000 on each of the prisoners.

"Pleas of lack of proof, sickness, recent marriage and ignorance of the laws of this country," Judge Howe said, "will not influence this court in imposing sentence. These men have been found guilty by an impartial jury of American citizens and by the crime calls for the severest penalty. I regret that it is not more severe."

In instances where the defendants were serving sentences under previous convictions the new penalty was to take effect when the term of the first punishment expired. This applied to Von Rintelen, who was convicted in 1917 of conspiracy to cause strikes in munitions plants and was given two years and six months at Atlanta.

Among others convicted Feb. 5 were:

Capt. Otto Wolpert, former superintendent of the Atlas line pier, which was operated by the Hamburg-American Steamship company.

Karl von Kleist, formerly a sea captain and an American citizen; a partner of Dr. Walter P. Scheele in the latter's chemical plant in Hoboken, N. J. Dr. Scheele was missing and Von Kleist was said to have aided him in putting combustibles into fire bombs.

Ernest Becker, an electrician on a German Lloyd liner, accused of having made the bombs and carried them to the pier of the Atlas line. He had served six months on a previous conviction.

Frederick Wilhelm Karbade, assistant engineer on the Friedrich der Grosse, who helped in making the bombs.

Bonford Boniface, American citizen, accused as accomplice.

Joseph Geffert, American citizen, accused as accomplice.

Indicted at the same time but not found guilty were: Capt. Enno Bode, Dr. Karl Schimmel, Dr. Walter P. Scheele and Capt. Gustav Steinberg.

GERMAN-HINDU PLOT.

In San Francisco, Cal., Feb. 27, 1918, the government made public intercepted German diplomatic correspondence intended to show how Germany by machinations carried a band of so-called Hindu plotters into the private audiences of ministers and statesmen and financed lavishly their aims toward revolution in British India. Secret papers introduced by the government purported to show that Sir Rabindra Nath Tagore, British knight and winner of the Nobel prize for poetry, had enlisted the interest of Counts Okuma and Gerauchi, former premier and premier, respectively, in the movement to establish an independent government in India.

The intercepted correspondence, however, was indefinite as to the connections between the Japanese statesmen and the alleged Hindu conspirators. The name of Wu Ting-fang, former Chinese minister to the United States, also was mentioned in the documents as one of the persons with whom Sir Rabindra Nath had obtained a friendly interview.

The papers were all introduced by the government in closing its case against the thirty defendants charged with fomenting a revolution against a friendly power.

An unsigned letter to R. Sachse, Rotterdam, dated Jan. 31, 1916, said:

"Dr. Chakravarty will return to the United States to form a new American committee, which will include Ram Chandra and himself. He has agreed to send an agent to the West Indies, where there are 100,000 Indians, and also to British Guinea, Java and Sumatra, and to conduct secret propaganda in America."

Dr. Chakravarty and Ram Chandra were two of the chief Hindu defendants.

A letter from New York under date of May 2, 1916, to H. Eisenhuth, Copenhagen, which was unsigned, said:

"We have organized the Pan-Asiatic league, but it will not be necessary to buy the two Japanese dailies, as they are agreeable to our interests and they have decided to attack the Anglo-Japanese treaty."

An unsigned letter from Rye, N. Y., to Eisenhuth in Copenhagen, said:

"Agents in India report the delivery of arms. I have seen Ram Chandra and he is willing to work in harmony with us."

A later telegram, dated Jan. 4, 1917, said to have been sent by Zimmermann to Von Bernstorff through Von Luxburg, told of the actions of a secret Japanese agent who was financed by the German government.

"The Japanese Hideo Nakao, is on his way to America with important information," it said. "He is to deal exclusively with Chakravarty. I advise giving Nakao up to \$50,000 for the execution of his plan in America and eastern Asia."

Murder in Court.

On April 23 Ram Chandra, Hindu publicist and revolutionist, was shot dead in the United States District court, where he was on trial, by Ram Singh, a former employe and fellow defendant. While Singh still pulled the trigger of his automatic pistol, he was shot dead by United States Marshal James B. Holohan, who fired from across the courtroom and over the heads of lawyers at their tables. Belief that Ram Chandra had diverted to his own use proceeds from property which Ram Singh had turned over to be used for aiding revolutionary measures is said by federal officials to have prompted the shooting.

Both men, with thirty others, were on trial on charge of conspiring to foment revolution in India. Ram Singh chose for his vengeance the closing hours of a trial which started Nov. 20, 1917, and seethed with excitement and animosity among the defendants to such an extent that all were searched for weapons daily when entering court.

Found Guilty and Sentenced.

On the following day twenty-nine persons, Hindus, former German consular officers, business men and others were found guilty by a jury of conspiracy to violate the neutrality of the United States through plots to foment revolution against British rule in India. Thirty were on trial and the only verdict of "not guilty" was returned in the case of John F. Craig, head of the Craig shipbuilding yards, Long Beach, Cal.

Maximum sentences of two years' imprisonment in a federal penitentiary and fines of \$10,000 each were imposed April 30 upon Franz Bopp, former German consul-general in San Francisco, and E. H. von Schack, former vice-consul.

Baron Wilhelm von Bricken, former military attache at the San Francisco German consulate-general, who pleaded guilty to the conspiracy charges in the course of the trial.

was sentenced to two years' imprisonment, to run concurrently with other sentences he was serving on previous convictions of violating the neutrality of the United States.

Sentences were imposed on twenty-five other defendants. They included several Americans, a number of former German naval officers and German steamship officials, and fourteen Hindu students and revolutionists.

Guilt for the conspiracy was placed squarely on the German supreme command. Judge Van Fleet characterized the Hindu conspirators as mere cat's-paws of the "ruthless Prussian military system," and told them that had their revolution succeeded and they had been spared no effort to escape it. The German foreign office, embassy at Washington and consulate at San Francisco were the nerve centers of the world-wide plot to wrest India from England, Judge Van Fleet said.

ROSE PASTOR STOKES CASE.

Mrs. Rose Pastor Stokes, socialist lecturer and wife of the wealthy J. G. Phelps Stokes of New York, was arraigned before Judge A. S. Van Valkenburgh in Kansas City, Mo., April 23, 1918, and entered a plea of not guilty following her indictment on three counts for alleged violation of the espionage act.

One of the causes contributing to the arrest and subsequent indictment of Mrs. Stokes was the publication of a letter over her signature sent by her to the Kansas City Star in which she contended she had been misled by the government. The letter, as quoted in an interview by the Star, published by that paper. The interview was obtained when Mrs. Stokes was in Kansas City for an address before the Women's Dining club. Following this she spoke in several southern Missouri towns, until her arrest at Willow Springs.

In her correction to the Star she said in part:

"A heading in this evening's issue of the Star reads: 'Mrs. Stokes for Government and Against War at the Same Time.' I am not for the government. In the interview that follows I am quoted as having said: 'I believe the government of the United States should have the unqualified support of every citizen in its war aims.'"

"I made no such statement and I believe in no such things. No government which is for the profiteers can also be for the people, and I am for the people, while the government is for the profiteers.

"I expect my working class point of view to receive no sympathy from your paper, but I do expect that the traditional courtesy of publication by the newspapers of a signed statement of correction which even our most bourbon papers grant, will be extended to this statement by yours."

Mrs. Stokes was convicted by a jury in the federal court May 23, upon all three counts in the indictment against her.

Mrs. Stokes received the jury's verdict without the slightest trace of emotion. As she was leaving the courtroom she declared to those about her that she intended going on with her work regardless of the outcome of the case.

The government contended that her motive in writing the communication was to spread disloyal propaganda and interfere with the prosecution of the war.

The limit to which criticism of the government may go in time of war and the line between objectionable and unobjectionable criticism was drawn by Judge Van Valkenburgh in instructing the jury.

"Our armies and our navies," he declared in discussing the signed statement by Mrs. Stokes to the Kansas City Star, "can operate and succeed only so far as they are supported and maintained by the folks at home and the measure of their success depends upon the intensity of their maintenance and support.

"Any statement made knowingly and willfully and with intent to promote such inter-

ference with the operation and success of these forces and to promote a corresponding success of our enemies, if false, and known to be false by the one who makes it, comes within the terms of this act of congress.

"Anything which lowers the morale of our forces, which serves to chill enthusiasm, extinguish confidence and retard co-operation may very well cause insubordination, disloyalty or mutiny."

The prosecution of the case in nowise makes invalid the constitutional rights of free speech and free press, the court said.

"Neither the law nor this prosecution seeks to interfere with the right of opinion nor with the proper advocacy of principles within the limitations of the law," he explained. "But no valid law, as this is, may be violated under guise and color of advocating principles.

"Honest criticism, made in the interest of the government and intended to favor and forward the policies to which it is committed, is no offense, but words and acts hostile to these policies and intended to paralyze and defeat the efforts of the government do not come within that category and cannot be permitted."

On June 1 a sentence of ten years in the Missouri penitentiary was imposed upon Mrs. Stokes. Pending an appeal she was released on a \$10,000 bond.

Following her conviction Mrs. Stokes asked permission to read a statement, in which she said:

"I assumed that it was my privilege to approve or criticize any of the war aims brought forward. I have at all times recognized the cause of our entrance into the war, and I have at no time opposed the war. No evidence has been produced to prove that I have at any time opposed the war.

"Early this year newspapers were filled with reports of the exceptionally large profits secured by what is generally known as 'war profiteers,' and, rightly or wrongly, I honestly feared their dominating influence over the administration, and I am not free from that apprehension at the present time.

"There are many things I have in my heart to say, but somehow I feel that time and events will speak more eloquently for me than I am able to speak for myself."

SOCIALIST LEADERS INDICTED.

On March 9, 1918, it was made public that five of the most prominent socialists in the country had been indicted by a federal grand jury in Chicago on Feb. 2. They were:

Victor L. Berger, Milwaukee, former congressman and then candidate for the United States senate from Wisconsin.

Adolph Germer, Chicago, national secretary of the socialist party.

J. Louis Engdahl, Chicago, editor of the American Socialist.

William B. Kruse, Chicago, of American Liberty Defense League.

Irwin St. John Tucker, Chicago, of "peace party" fame and author of "The Price We Pay" and other antiwar literature.

The indictments date back to activities in opposition to the draft and other alleged efforts to defeat the policies of the government in connection with the war. They were accused of disloyalty and obstructing recruiting work and by public utterances and writings to have interfered with the military plans of the United States. It was made plain that the men were not indicted as socialists or because of their connection with the socialist party. Each was indicted for individual acts alleged to have been committed.

United States District Attorney Clyne gave out a statement in which he said:

"The indictment sets forth that the speeches, articles, pamphlets, pictures, etc., were such as persistently dwell upon the evils and horrors of the war without mentioning any consideration in favor thereof and upon the desirability and necessity of avoiding and stopping said war and opposing the further prosecution thereof at all costs and regard-

less of the patriotic duty of said persons constituting the military and naval forces of the United States.

"The indictment sets forth twenty-six overt acts alleged to have been done in furtherance of the unlawful conspiracy.

"Among those are the printing and distributing of 'Proclamation of War Program' and other pamphlets, the printing of different items in the American Socialist and the Milwaukee Leader."

The men under indictment had not been brought to trial up to Dec. 1, 1918. At the November election Berger was elected a member of congress from a Milwaukee district.

GIVEN TWENTY YEARS IN PRISON.

In Oklahoma City, Okla., June 6, 1918, Orville C. Enfield, socialist candidate for congress against James V. McClintic, 7th congressional district, was found guilty by a federal court jury on indictments charging conspiracy to obstruct the selective service law and sentenced to twenty years in the federal prison at Leavenworth.

EUGENE V. DEBS CONVICTED.

Eugene V. Debs, four times socialist candidate for the presidency of the United States, was arrested in Cleveland, O., June 20, 1918, by United States Marshal Charles W. Lapp and Deputy Marshal Charles Bohme as he was about to deliver a socialist address. The arrest was made on a federal warrant in connection with Debs' speech at the socialist state convention in Canton, O., on June 16. He was brought to trial and on Sept. 12 was found guilty by a federal jury. Of the original ten counts of the indictment only four remained when the jury retired to consider the evidence. He was found guilty of attempting to incite insubordination, disloyalty, etc., in the military and naval forces; attempting to obstruct recruiting and uttering language tending to incite, provoke and encourage resistance to the United States and to promote the cause of the enemy. The count on which he was adjudged innocent charged that he opposed the cause of the United States.

On Sept. 14, Debs was sentenced to ten years in the Moundsville (W. Va.) penitentiary on each of three counts of the indictment by Federal Judge D. C. Westenhaver. The sentences will run concurrently. Motion for a new trial was overruled and an exception on behalf of the defendant was allowed. A motion for arrest of the sentence was also overruled. The court admitted Debs to \$10,000 bail, with permission to leave the northern federal district of Ohio only to go to and remain at his home.

In imposing sentence Judge Westenhaver said:

"I do not regard the idealism of the defendant as expressed by himself as any higher, purer, nobler than the idealism of thousands of young men I have seen marching down the streets of Cleveland to defend our country.

"I cannot accept the attitude of mind of any one who claims any right to excuse anybody from observing the laws of our land for the protection and peace and safety while thousands of young men are defending the country against the common enemy.

"Any one who strikes the sword from the hand of those young men or causes another young man to refuse to do his duty when called to serve by their side, or any one who obstructs the recruiting service, does just as much injury and wrong to our country as if he were a soldier in the ranks of the German army."

Following the motion for a new trial and the court's refusal, Judge Westenhaver asked Mr. Debs if he had anything to say why sentence should not be imposed upon him.

Mr. Debs spoke for thirty minutes. He asked for no mercy and said he had no fault to find with the conduct of the trial. He stated he had devoted his life to the cause of the downtrodden and is opposed to the form

of our present government and our social system, and believes in a change in both by peaceful and orderly means.

DR. KARL MUCK INTERNED.

Dr. Karl Muck, leader of the Boston Symphony orchestra, was taken into custody as an enemy alien at his residence in Boston, Mass., March 25, 1918. Representatives of United States District Attorney Thomas J. Boynton and of Special Agent Judd Dewey of the department of justice, as well as of the city police, took part in the arrest. Dr. Muck was not permitted to obtain bail. An agent of a district attorney's office who was asked whether any special evidence of pro-German activity had been found replied that he was not at liberty to say, adding that Dr. Muck had been under surveillance for months.

The arrest of Dr. Muck was made so quietly that none of his friends had an opportunity to see him before he was whisked away to a police cell. All callers who sought an interview were told that, by orders from the department of justice, he could not be seen and that no statement would be permitted.

Dr. Muck is a citizen of Switzerland, although he was born in Bavaria.

Dr. Muck and the Boston Symphony orchestra had been under criticism since this country entered the war, at first because of failure to play "The Star Spangled Banner" at concerts. Later the management announced that the national anthem would be a feature of every concert and this plan was carried out.

Dr. Muck was loaned to the Boston Symphony orchestra by Emperor William in 1912 and again in 1916.

On April 6 Dr. Muck was taken to Fort Oglethorpe, Ga., to be interned.

MUNITIONS PLANTS PLOT.

A. Mitchell Palmer, alien property custodian, announced on Oct. 11, 1918, that he had taken over 19,900 of the 20,000 shares of capital stock of the Bridgeport Projectile company of Bridgeport, Conn., and that this concern had reported to him other property of approximate value of \$500,000 held by it for and in behalf of Germany. In making this announcement Mr. Palmer bared the efforts of Count von Bernstorff, Dr. Albert, Dr. Dernburg, Capt. von Papen and other German propagandists to use the Bridgeport Projectile company to prevent the manufacture and shipment of arms and munitions to the allies.

The taking over of the stock of the Bridgeport Projectile company and the report by the company of the property owned by the German government, with the disclosures incident thereto, followed many months of persistent investigation by Francis P. Garvin, director of the bureau of investigation of the alien property custodian's office.

Mr. Garvin found that propaganda and crime having failed to prevent the manufacture and shipment of arms to our allies, the German propagandists conceived the idea of preventing the shipments by creating an American corporation, apparently dominated and controlled by loyal American citizens, ostensibly for the purpose of engaging in the manufacture of munitions on an enormous scale. The real purpose was to hamper and hinder, if not to prevent altogether, other American manufacturers from making munitions for what Germany then considered to be the probable duration of the war.

It was planned to have this corporation buy up all the available supplies of powder, antimony, hydraulic presses and other supplies and materials essential to the manufacture of munitions. The plan also involved the negotiation of contracts with the allied governments to supply them with materials of war, apparently in good faith but in reality with no intention of fulfilling them.

The ultimate expenditure of approximately \$10,000,000 for this purpose was contemplated. It was thought that the object sought was of sufficient importance to justify so large an expenditure.

Germany Furnished the Money.

Mr. Garvin found that the German government had furnished the money with which the Bridgeport Projectile company acquired its land, erected its factory buildings, and fully equipped the factories with machinery and certain materials; that the company had made a contract with the German agents not to sell any munitions to any country with which Germany was at war; that the company contracted for the entire output of powder of the Aetna Explosives Company (Inc.), of Jan. 1, 1916, for which approximately \$5,000,000 was expended. These powder contracts were canceled and the funds advanced were returned to Germany. The company was protected by the guaranty of the Guaranty Trust company that it would meet its drafts properly signed to the extent of \$5,000,000.

George W. Hoadley, an American citizen of Bridgeport, Conn. caused the Bridgeport Projectile company to be incorporated under the laws of the state of Connecticut in 1915, with an authorized capital stock of \$2,000,000, divided into 20,000 shares, each of the par value of \$100. Hoadley had no financial resources, but all of this stock, except ten qualifying directors' shares, was issued to him. The funds were provided by the Deutsche Bank under negotiations conducted by Hugo Schmidt and Dr. Albert.

On April 1, 1915, shortly after the incorporation of the company, Hoadley and one George W. Clynes, an American citizen of Temple, Tex., entered into a contract for the ostensible manufacture of 2,000,000 shrapnel cases at a price of \$2.50 each. It was never intended to manufacture all of these shells and the contract was for the purpose of furnishing a plausible reason for the purchase by the Bridgeport Projectile company, and provided in the agreement, of large quantities of powder and shells needed for the manufacture of complete shrapnel rounds, and especially to enable it to purchase or contract for the entire output of hydraulic presses, without which shells could not be made, until Jan. 1, 1916.

Hoadley, in turn, assigned the contract to the Bridgeport Projectile company, and this assignment by him formed the sole consideration of the issuance to him of the entire capital stock of the company of the par value of \$2,000,000.

Allies to Get No Munitions.

Upon the full and faithful performance of the contract of April 1, 1915, Hoadley was to become the owner of the capital stock. One of the conditions of the agreement was that no arms or ammunition were to be manufactured and shipped to France, England or Russia, or to any person or corporation other than to Germany or the United States, without the written consent of the representatives of Germany. Up to April 1, 1916, the company had only 20,000 shrapnel cases in the course of manufacture.

Chemical Exchange Association.

Further disclosures of the efforts of Count von Bernstorff, Dr. Albert and their fellow propagandists to prevent the manufacture and shipment of munitions to the allies were made Oct. 19 by A. Mitchell Palmer. Mr. Palmer revealed the workings of an organization known as the Chemical Exchange association, which was organized by Dr. Hugo Schweitzer in 1915 to buy up all of the available carbolic acid in this country and prevent its manufacture into picric acid, one of the most necessary ingredients in the manufacture of TNT and other high explosives. The carbolic acid purchased by the Chemical Exchange association was converted into harmless pharmaceutical products, thereby eliminating any possibility of its use in the making of picric acid. Large profits were made by Dr. Schweitzer and his associates.

The story of the Chemical Exchange association was unearthed by Francis P. Garvin, director of the bureau of investigation, in his investigation of the German owned chemical companies in this country which had

recently been taken over by the alien property custodian. He found that Dr. Albert, in conjunction with Count von Bernstorff, arranged with Dr. Hugo Schweitzer a naturalized American and a chemist of the Bayer company, to prepare and carry out plans which would prevent the shipment of carbolic acid to England, France and Italy by converting it into salicylates, salol, formaldehyde and aspirin. This plan also provided for keeping away from American munition manufacturers the supply of carbolic acid available at that time, so that they would be hampered and hindered in the manufacture of high explosives for the allies.

The Heyden chemical works of 135 William street, New York, and the Bayer company of 117 Hudson street, New York, were the two chemical concerns through which Dr. Schweitzer arranged to carry out his plans. Both of these concerns are now (October, 1918) in the hands of the alien property custodian and are being managed by 100 per cent. Americans. The Heyden company was owned by the Chemische Fabrik von Heyden, Radebul, Germany, and the Bayer company was owned by Farbenfabrikvormals Friedrich Bayer & Co. of Elberfeld, Germany.

Set Out to Corner Supply.

In 1915, when it became apparent that carbolic acid was a necessary ingredient in the manufacture of high explosives, Thomas A. Edison invented a synthetic carbolic acid, of which the American Oil and Supply company of Newark became the selling agent. Comparatively little carbolic acid was purchasable at that time. Dr. Schweitzer immediately set out to corner this supply, and on June 22, 1915, entered into a contract with the American Oil and Supply company whereby this company agreed to ship 6,000 pounds of carbolic acid each working day from July 1, 1915, to Dec. 31, 1915, and 4,000 pounds each working day from Jan. 1, 1916, to March 31, 1916, at a price of \$1.06 2-3 per pound cash from July 1 to Dec. 1, 1915, and \$1 per pound cash for all succeeding deliveries. This price was nearly double the usual market price. Dr. Schweitzer put up \$100,000 in cash, which was furnished by Dr. Albert, as security for the faithful performance of this contract and a \$25,000 surety bond.

On June 30, 1915, Dr. Schweitzer entered into a contract with the Heyden chemical works, of which George Simon, a German subject, was the manager, whereby Schweitzer agreed to deliver all of the carbolic acid received from the American Oil and Supply company to the Heyden works of Garfield, N. J., the Heyden company agreeing to increase its facilities and convert the carbolic acid into salicylic acid. Schweitzer was given an option whereby he might have the carbolic acid also converted into sodium salicylate, methyl salicylate and salol.

To obviate doing business in his own name Schweitzer organized what was called the Chemical Exchange association on June 30, the day on which he made his contract with the Heyden chemical works. This association was a co-partnership, comprising Dr. Schweitzer and Richard Kny, father-in-law of George Simon, business manager of the Heyden chemical works and at one time president of the concern. Muller, Schall & Co. of 45 William street, New York, were the sales agents for Dr. Schweitzer.

Every effort was made by Schweitzer and Kny to keep their contract secret and to prevent the American people from knowing that Dr. Albert and the German government were behind this contract. No certificate of conducting business, as provided for by law, was filed in the county clerk's office until Feb. 9, 1916, a few days before the contract expired. In the meantime the American Oil and Supply company delivered large quantities of carbolic acid to the Heyden chemical works, which were converted into harmless pharmaceutical preparations, and sold at a profit on this deal was \$816,000, which Richard Kny told Mr. Garvin was divided equally between himself and Dr. Schweitzer.

Kny also said that the Chemical Exchange association kept no books or records. The investigation showed that on June 23, 1915 (which is the day after Schweitzer entered into his contract with the American Oil and Supply company), G. Amsinck & Co., the bankers, wrote Dr. Heinrich F. Albert, 45 Broadway, New York city, a letter stating that they had received imperial German government certificates, due Jan. 1, 1918, as collateral for which they placed at the disposal of Dr. Albert a drawing account of \$300,000. G. Amsinck & Co., acting upon the instructions of Dr. Albert, gave their check to Dr. Hugo Schweitzer for \$100,000, which they charged to the account of Dr. Albert. This was the \$100,000 which Schweitzer posted as a forfeit with the American Oil and Supply company, guaranteeing the fulfillment of his contract.

Papers Left by Schweitzer.

Dr. Schweitzer died in December, 1917. Among his effects Mr. Harvin discovered the following statement, which shows how thoroughly he was dealing with the carbolic acid situation in this country at that time:

"Explanation of the attached agreements. The following firms are manufacturing carbolic acid in the United States:

"The Smet-Solvay company, Rochester, N. Y.

"The Du Pont de Nemours Powder company, Wilmington, Del.

"Thomas A. Edison, (Inc.), Silver Lake, N. Y.

"Merck & Co., Rahway, N. J.

"The Smet-Solvay company and the Du Pont people do not sell carbolic acid to anybody, but convert it into picric acid and sell it to the allies.

"Merck & Co. sell their carbolic acid for pharmaceutical purposes exclusively and exact an agreement from the buyers that the product should not be used for manufacturing explosives.

"Edison company has made an agreement with brokers who were to furnish picric acid to the allies. The carbolic acid which they purchased from Edison was to be converted by powder manufacturers, among them the Trojan company, into picric acid.

"It occurred to me that through my connections with Mr. Hoffman of the American Oil and Supply company I might be able to divert the carbolic acid of Edison from these brokers and thus prevent the conversion of the same into picric acid. This would be so much more important, as Edison is the only one in the United States who for the next three or four years has spot carbolic acid for sale.

"As a matter of fact, I thus succeeded in getting hold of 6,000 pounds of carbolic acid per day, which is equivalent to 18,000 pounds of picric acid per day. For the purchase of this quantity I made agreement marked 'A' with the American Oil and Supply company.

"In view of the fact that, as stated above, this carbolic acid was for at least three or four months the only acid available in the market, it would have been good policy to buy the product, even at the high price paid, which, however, is about 35 cents per pound lower than the acid which our firm bought on contract.

"I then conceived the idea of having this carbolic acid converted into salicylic acid, salicylate of soda, salol and artificial oil of wintergreen. On these products there is an embargo in all countries at war. The prices are very high and the salicylic acid which is made out of the above carbolic acid would, in fact, for the next three or four months, be the only free salicylic acid to be bought without any restrictions. On account of the high prices for these products there is a possibility of not losing money in the venture; in fact, profits might be made provided that England's shipping blockade is maintained and provided that the war does not end within the time limit of the agreement."

In the latter part of 1916 Dr. Schweitzer and Richard Kny gave a dinner at the Hotel Astor in honor of Dr. Albert and in celebration of the success of the Chemical exchange. Among those present besides Dr. Albert, Dr. Schweitzer and Mr. Kny were George Simon, F. A. Borgemeister, Norvin R. Lindheim and Capt. Wolf von Igel of the German embassy. The occasion was made happy by the presentation to Dr. Albert of a loving cup, the contents of which were jokingly referred to as carbolic acid. Dr. Albert in response to the toast stated that he felt he had rendered valuable aid to the German empire and had saved many German lives by preventing the allies from obtaining carbolic acid and by converting it into harmless pharmaceutical products.

Like the Bridgeport Projectile company, the German propagandists fully believed that the war would end in the latter part of 1915 and that Germany would be victorious. Consequently they laid their plans accordingly.

DEPARTMENT OF JUSTICE REVELATIONS.

Confidential records of the department of justice dealing with the activities of German agents and others in the United States were placed before the senate committee investigating brewers' and German propaganda by A. Bruce Bielaski, chief of the department's bureau of investigation, Dec. 6, 1918. They dealt with correspondence of Count von Bernstorff, former German ambassador, and others concerning the possible purchase of the Washington Post and other newspapers; the sending of William Bayard Hale to Germany as correspondent of the Hearst newspapers, described by Von Bernstorff as having "outspokenly placed themselves on the German side," and with suggestions of fomenting trouble between the United States and Japan as a means of stopping munitions shipments to the allies.

Mr. Bielaski told the committee that under date of Oct. 17, 1914, Count von Bernstorff sent this message from Washington to Dr. Bernard Dernburg and Heinrich F. Albert, German propaganda agents in New York:

"The Washington Post is offered me to buy to-day for \$2,000,000, with the understanding to buy it back again after the war for \$1,500,000. A second offer was to put the paper entirely at our disposal for two months for \$100,000. The paper is of importance as the only large newspaper of the capital. How do you stand on the question of the money? I have not yet inquired at Berlin."

There was nothing to show that any reply was made, but Mr. Bielaski said that under date of Oct. 27, 1916, the German ambassador sent this message to the Berlin foreign office in cipher:

"In the official accounts for the first and second quarters of 1916 will be found entries of payments to Theodore Lowe. As to this I have to report that this gentleman is of German origin, and is married to a German lady, and that he used his services to work on a paper in Washington, the National Courier."

"This offer came at the time we were deeply regretting the death of John R. McLean. This gentleman had given his newspaper an entire anti-English character, so that his death left a great gap which the National Courier can unfortunately never hope to fill."

"The Washington Post has since then been fairly neutral, but may be entirely lost to us if it cannot, as is very much desired, be put into the hands of Mr. Hearst."

Under date of Aug. 2, 1916, Mr. Bielaski said, another communication was sent to the Berlin foreign office and was signed by Dr. H. K. Fuehrer, a former German consular agent in the orient, who came to the United States early in 1914. The message followed:

"The Washington Post whose neutral attitude toward the belligerents during the present war has won for it warm recognition from the German side, has of late materially changed its tone in questions of European politics and seems fairly on the way to join our enemies."

"From reliable sources I learn that this chance of front is due to the Russian ambassador in Washington. After the death of its former owner, John R. McLean, the Washington Post, together with the Cincinnati Enquirer, came into the hands of the son of the first mentioned, on whom his aunt, Mme. Bakmetieff, is said to have great influence.

"Mr. McLean, Jr., inaugurated his ownership by naming as editorial director one Bill Spurgeon, who is said to be a British subject and a nephew of Robert Porter, one of the chief leaders of the Northcliffe ring."

"Another communication produced by Mr. Bielaski and alleged to have been written by Samuel Untermyer of New York to Albert in February, 1916, dealt with the purchase of a New York paper for \$2,000,000. The name of this paper was not mentioned in the communication, but Mr. Bielaski said there were indications that it was the New York Sun. The letter said:

"I have received word that our opportunity has now arrived to acquire that morning and evening paper about which we have been talking and that it can be had at a price slightly under \$2,000,000 for four-sixths of the capital stock, which includes valuable real estate on Park row, but that action must be taken immediately.

"I shall be glad to hear from you as to whether you are now in position to take up this subject seriously and promptly with me and bring it to a conclusion, if, as I believe, the terms are advantageous."

Hale in Germany's Pay.

Mr. Bielaski also produced a copy of a message relating to Dr. Hale's going to Germany for the Hearst newspapers, which, he said, was sent by Von Bernstorff to Berlin June 2, 1916, through Buenos Aires and Stockholm. Dr. Hale, according to Bielaski, was paid by the German government to visit Roumania and if possible prevent entrance of that nation into the war. Mr. Hearst, Mr. Bielaski said, was ignorant of Hale's employment on the latter mission.

Dr. Hale, the witness said, was on the German embassy pay roll at \$15,000 a year and also received \$300 a week as a writer for the Hearst papers.

William Randolph Hearst, he said, did not know that Dr. Hale was in the pay of the German government.

Von Bernstorff's message, which asked preferential treatment of Hale because he was employed by the Hearst organs, follows:

"The man selected, W. B. Hale, has been, as your excellency knows, since the beginning of the war a confidential agent of the embassy, and as such has been bound by contract till June 23, 1918. In making this arrangement the main idea was that Hale would be the most suitable man to start the reorganization of the news service after peace on the right lines.

"I request full confidence may be accorded to Hale, who will bring with him a letter of recommendation from me to Dr. Hammat. Hearst is not aware that Hale is a Germanophile journalist who has contributed leading articles to papers."

Another message, dated June 5, 1916, said: "Hale tells me, and Hearst confirms, that the latter is rather hurt that on Wiegand's account the World gets all the important Berlin interviews. I recommend that under suitable circumstances Hale should, for obvious reasons, be given preference, as Hearst organs have during the course of war always placed themselves outspokenly on our side."

Mr. Bielaski produced letters which, he said, Dr. Hale wrote to Dr. Albert, advising him how notes written by Secretary Bryan during the Lusitania controversy should be answered. He also testified that Hale was paid by the German government to visit Roumania and, if possible, prevent the entrance of that nation into the war. He said Mr. Hearst was ignorant of Hale's employment on this mission.

Pro-German List.

Mr. Bielaski gave the committee a list of names of prominent Americans which, he said, contained names of practically all those who were actively pro-German before the entrance of the United States into the war. The list, which was labeled for the department of justice files "Important List of Names," follows:

Prof. William R. Shepher, Columbia university; Prof. Hugo Muensterberg, Harvard university; Prof. William M. Sloane, Columbia university; Dr. Edmund von Mach, Cambridge, Mass.; Dr. Auth von Briesen, New York; Prof. John W. Burgess, Columbia, R. I.; Prof. Eugene Smith, Columbia university; Prof. H. C. Sanborn, Vanderbilt university; Prof. J. G. MacDonald, University of Indiana; Prof. Ferdinand Schevill, University of Chicago; E. C. Richardson, Princeton university; Prof. Kuno Francke, Harvard university; Prof. George B. McClellan, Princeton university; Prof. A. B. Faust, Cornell university; Prof. Morris Jastrow, Jr., University of Wisconsin; Dr. Walter S. McNeill, Richmond; Dr. David Starr Jordan, Berkeley, Cal.; Peter S. Grosscup, United States federal judge, Highland Park, Ill.; Richard Barthold, St. Louis; Prof. Albert Bushnell Hart, Harvard university; Dr. C. J. Hexamer, Philadelphia, Pa.; Nagel, St. Louis; Oswald Garrison Villard, New York Evening Post; William Randolph Hearst, New York American; Bernard Ridder, New York Staats Zeitung; Edward A. Rumely, New York Evening Mail; Frederick A. Schraeder, 1493 Broadway, New York; Frank Harris, 3 Washington square, New York; Rob I. Ford, Freeman's Journal, New York; the Rev. Father Thirney, American Catholic Weekly, New York; Max A. Hein, 230 Riverside drive, New York; George S. Viereck, New York, and Prof. William P. Trent, 137 West 58th street, New York.

In addition, Mr. Bielaski said, there was a list of about thirty names of persons to whom German propaganda was mailed, but these men were not believed to be friendly to the German cause. The committee excluded this list from the record.

Among the American newspaper correspondents to go to Germany in 1915, Mr. Bielaski said, was Edward L. Fox, a writer who, he said, had been employed by Dernburg. On his return, Mr. Bielaski testified, Fox presented a plan for stirring up trouble between the United States and Japan as the means of stopping munition shipments and in the hope that the United States would become an ally of Germany.

Fox said Mr. Bielaski suggested the writing of plays, scenarios and vaudeville sketches as a part of his propaganda, and as an author suggested Hiram Green, editor of the Illustrated Weekly. He also suggested that Green be employed to write a series of articles in his weekly on Japan. This plan also was discussed with Capt. von Papen, formerly attached to the German embassy, the witness said.

"The thing to do is to make the United States an ally of Germany," said a letter described by Mr. Bielaski as having been written by Fox. "An examination of the files of the Hearst newspapers shows Hearst's opposition to Japan. Hearst must not know that this is fomenting. He will take it up soon enough."

Fox suggested also, Mr. Bielaski said, that to stir up trouble with the Japanese in San Francisco would be a good means of making the people believe that war with Japan was impending.

Mr. Bielaski testified that a committee of the German propaganda organization formed in New York by Albert and Dernburg and of which Hale, George Sylvester Viereck, Edward A. Rumely and others were members, met frequently.

He said notes of Dernburg made at a meeting on Nov. 5, 1914, recorded that the Irish question would be an important one in the propaganda and that James K. McGuire, for-

mer mayor of Syracuse, N. Y., had undertaken to organize a society to conduct propaganda in favor of Germany among the Irish.

The witness testified that McGuire received \$14,000 from Albert for the work and for pamphlets. He said McGuire worked among religious organizations and that Dernburg's notes showed McGuire had said most of the Catholic publications would not publish anti-German matter.

Organization of motion picture propaganda by the German agents also was testified to by Mr. Bielaski. He produced a letter from Albert to Von Bernstorff asking that the German ambassador at Mexico City be advised that the showing of German motion pictures in Mexico would be pushed by the American Film corporation, organized by Dernburg, Fuehr and others.

In this connection the correspondence indicated that the corporation was having difficulty in getting German commercial and "kulturr" pictures displayed and suggested the

building of theaters in fifteen cities into which "commercial and kultur pictures might be smuggled."

From April, 1915, to three days before this country entered the war, Dr. Albert paid \$701,000 for the operation of the New York Evening Mail, Bielaski said. Title was held by Dr. Edward A. Rumely. Over \$150,000 of the total, the witness asserted, was paid during the three months before the United States declared war.

It was through Rumely that \$3,000 was paid to Gaston B. Means, then employed by the Burns Detective agency, in an endeavor to show that the British were sending supplies from this country to their warships at sea. Great Britain was not doing that, but Germany had been doing it, and he desired, to offset the accusation against Germany.

"Means also acted as a German agent in affairs with Capt. Boy-Ed. I do not think that Means was connected with the German government after Boy-Ed sailed."

GERMANY'S SUBMARINE WARFARE.

Germany continued her policy of ruthless submarine warfare almost up to the moment when the armistice terms were signed on Nov. 11, 1918. The same disregard for international law and human rights was shown as in the earlier years of the war, but with diminishing success so far as tonnage of shipping destroyed was concerned. This was due to the increasing efficiency of the methods of attack adopted by the allied fleet, leading to heavy losses among the underwater craft. It was announced Nov. 29, 1918, that Germany lost approximately 200 "U" boats in the course of the war. Most of these were destroyed or captured by the British, French and Italian naval forces, but ten were sunk or taken by American warships. Destroyers accounted for two "U" boats, yachts for three, submarines for one and submarine chasers for four. Forty-six vessels were engaged in fights in which it was known that submarines were present. The American navy places the total number of fights in which it was reasonable to suppose that a submarine was lurking near at 500.

FATE OF "U" BOAT COMMANDERS.

The British admiralty on Sept. 6, 1918, published the following list of commanding officers of 150 German submarines which had been accounted for up to that time:

Albrecht, Kurt (Kap.)	Dead
Amberger, Werner (Ober.)	Dead
Amberger, Gustav (Kap.)	P. W.
Amberger, Wilhelm (Ober.)	Dead
Arnold, Alfred (Ober.)	P. W.
Bachmann, Gunther (Ober.)	Dead
Barten, Wilhelm (Ober.)	Dead
Bauk, W. (Kap.)	Dead
Bauer, Casar (Kap.)	Dead
Bender, Waldemar* (Kap.)	Dead
Bereckhelm, Egrewolf, Freiherr von (Kap.)	Dead
Berger, Gerhardt (Kap.)	Dead
Bernis, Kurt (Kap.)	Dead
Brancheid, Albert (Ober.)	Dead
Braun, Charles (Ober.)	Dead
Breyer, Herbert (Ober.)	P. W.
Buch, Gustav (Kap.)	Dead
Degetau, Hans (Ober.)	Dead
Dieckmann, Victor (Kap.)	Dead
Ditfurth, Benno von (Ober.)	Dead
Edling, Karl (Kap.)	Dead
Ehrentraut, Otto (Ober.)	Dead
Eltester, Max (Kap.)	Dead
Fedderson, Adolf (Leut.)	Dead
Fiercks, Wilhelm, Freiherr von (Kap.)	Dead
Fischer, Karl-Hanno (Leut.)	Dead
Froener, Eberhard (Leut.)	Dead
Furbringer, Gernardt (Kap.)	P. W.
Furbringer, Werner (Kap.)	P. W.
Galster, Hans (Ober.)	Dead
Gebeschus, Rudolf (Kap.)	Dead
Gercke, Hermann (K. Kap.)	Dead

Gerlach, Helmuth (Kap.)	Dead
Gerth, Georg (Kap.)	P. W.
Glimpf, Hermann (Ober.)	Dead
Graef, Ernst (Kap.)	P. W.
Graef, Fritz (Ober.)	Dead
Gross, Karl (Ober.)	Dead
Gunther, Paul (Ober.)	Dead
Guntzel, Ludwig (Kap.)	Dead
Gunzel, Erich (Kap.)	Dead
Haag, Georg (Leut.)	Dead
Hansen, Claus (Kap.)	Dead
Hartman, Richard (Kap.)	Dead
Hecht, Erich (Ober.)	Dead
Heinke, Curt (Ober.)	Dead
Heller, Bruno (Ober.)	Dead
Hennig, Heinrich von (Kap.)	P. W.
Heydebreck, Karsten von (Ober.)	Dead
Hirzel, Alfred (Ober.)	Dead
Hoppe, Bruno (Kap.)	Dead
Hufnagel, Hans (Kap.)	Dead
Kesselringk, Harald von (Ober.)	Dead
Kiel, Wilhelm (Ober.)	Dead
Kiesewetter, Wilhelm (Kap.)	Int.
Klatt, Alfred (Ober.)	Dead
Kolbe, Walther (Ober.)	Dead
Konig, Georg (Kap.)	Dead
Korsch, Hans Paul (Ober.)	Dead
Kratzsch (Kap.)	Dead
Krech, Gunther (Kap.)	P. W.
Kreysern, Gunther (Ober.)	Dead
Kroll, Karl (K. Kap.)	Dead
Kustner, Heinrich (Ober.)	Dead
Laurenz, Claus P. (Kap.)	P. W.
Launburg, Otto (Ober.)	P. W.
Lemma, Johannes (Kap.)	Dead
Lenius, Reinhold (Ober.)	Dead
Lillienstern, Buhle von (Ober.)	Dead
Lorenz, Heimut (Ober.)	Int.
Lorenz, Hermann (Kap.)	Dead
Lowe, Werner (Ober.)	Dead
Luhe, Vicco von der (Ober.)	P. W.
Menzel, Bernhard (Ober.)	Dead
Metz, Arthur (Ober.)	Dead
Metzger, Heinrich (Kap.)	Int.
Mey, Karl (Ober.)	Dead
Mildenstein, Christian (Ober.)	Dead
Moecke, Fritz (Ober.)	Dead
Mohrbutter, Ulrich (Ober.)	P. W.
Moraht, Robert (Kap.)	P. W.
Muhlau, Helmuth (Kap.)	P. W.
Muhle, Gerhardt (Kap.)	Dead
Mueller, Hans Albrecht (Ober.)	Dead
Neumann, Friedrich (Ober.)	P. W.
Niemer, Hans (Ober.)	Int.
Niemeyer, Georg (Ober.)	Dead
Nitzsche, Alfred (Ober.)	Dead
Nowit, Rich (Ober.)	Dead
Petz, Willy (Kap.)	Dead
Platsch, Erich (Ober.)	Dead
Pohle, Richard (Kap.)	Dead
Prinz, Athalwin (Kap.)	Dead
Pustkuchen, Herbert (Ober.)	Dead
Reichenbach, Gottfried (Ober.)	Dead

Reimarus, Georg (Ober.).....	Dead
Remy, Johannes (Kap.).....	Dead
Rohr, Walther (Kap.).....	Dead
Rosenow, Ernst (Kap.).....	Dead
Rucker, Claus (Kap.).....	Dead
Rumpel, Walther (Kap.).....	Dead
Saltzwedel, Rudolf (Ober.).....	Dead
Sebelin, Erwin (Kap.).....	Dead
Seuffer, Rudolf (Kap.).....	Dead
Schmettow, Graf von (Kap.).....	Dead
Schmidt, Georg (Kap.).....	Dead
Schmidt, Siegfried (Ober.).....	Dead
Schmidt, Walther G. (Ober.).....	Int.
Schmitz, Max (Ober.).....	Dead
Schmitz, Walther (Ober.).....	P. W.
Schneider, Rudolf (Kap.).....	P. W.
Schultz, Theodor (Ober.).....	Dead
Schurmann, Paul (Ober.).....	Dead
Schwartz, Ferdinand (Ober.).....	Dead
Schweinitz and Krain, Graf von (Kap.).....	Dead
Schwiegerl (Kap.).....	Dead
Sittenfeld, Erich (Kap.).....	Dead
Smiths, Wilhelm (Ober.).....	P. W.
Soergel, Hans (Ober.).....	Dead
Sprenger (Kap.).....	P. W.
Steckelberg, Oscar (Ober.).....	Int.
Stein zu Lausnitz, Freiherr von (Ober.).....	Dead
Steindorff, Ernst (Ober.).....	Dead
Stenzler, Heinrich (Ober.).....	Dead
Stosberg, Arthur (Ober.).....	Dead
Stoss, Alfred (Kap.).....	P. W.
Stoter, Karl (Ober.).....	Dead
Stuhr, Fritz (Kap.).....	Dead
Suchooletz, Ferdinand von (Kap.).....	Dead
Tebbenjohanns, Kurt (Kap.).....	P. W.
Trager, Friedrich (Ober.).....	Dead
Utko, Kurt (Ober.).....	P. W.
Valentiner, Hans (Ober.).....	Dead
Voigt, Ernest (Ober.).....	Dead
Wachendorf, Siegfried (Ober.).....	Dead
Wacker, Karl (Ober.).....	Dead
Wagenfuhr, Pauls (Kap.).....	Dead
Walther, Franz (Ober.).....	Dead
Weddigen, Otto (Kap.).....	Dead
Wegner, Bernhard (Kap.).....	Dead
Weisbach, Erwin (Kap.).....	Dead
Weisbach, Raimund (Kap.).....	P. W.
Wendlandt, Hans H. (Ober.).....	P. W.
Wenninger, Ralph (Kap.).....	P. W.
Wigankow, Gunther (Ober.).....	Dead
Wilcke, Erich (Kap.).....	Dead
Wilhelms, Ernst (Kap.).....	Dead
Willich, Kurt (Kap.).....	Dead
Wurdorff, Hans Oskar (Kap.).....	P. W.
Zerboni di Sposetti, Werner von (Kap.).....	Dead

Note—In the foregoing list "Ober." signifies oberleutnant (first lieutenant). "Kap." kapiteuleutnant (captain lieutenant). "P. W." prisoner of war and "Int." interned.

*This officer was not lost when his submarine sank. He returned to Germany. †Torpedoed the SS. Arabic on Aug. 19, 1915. ‡Torpedoed the Lusitania on May 7, 1915. His boat lost on the Danish coast in November, 1916, but Kap.-Lt. Schwieger survived to bring disaster to another submarine, viz., U-38, lost with all hands in September, 1917. §Sank the Belgian Prince on July 31, 1917, and so barbarously drowned forty of the crew, whom he had ordered to line up on the submarine's deck. The submarine (U-44) was sunk, with all hands, a fortnight after.

TONNAGE SUNK BY SUBMARINES.

The following table from British official sources shows the gross tonnage of British and foreign (non-British) vessels sunk by enemy submarines, mines and by accidents due to other causes, from August, 1914, to the close of September, 1918:

Year and quarter.	British.	Foreign.
1914—August & September	314,000	85,947
Fourth quarter.....	154,728	126,688
1915—First quarter.....	215,905	104,542
Second quarter.....	223,676	156,743
Third quarter.....	356,659	172,822
Fourth quarter.....	307,139	187,234

1916—First quarter.....	325,237	198,958
Second quarter.....	270,690	251,599
Third quarter.....	284,358	307,681
Fourth quarter.....	617,563	541,780
1917—First quarter.....	911,840	707,532
Second quarter.....	1,361,870	870,064
Third quarter.....	952,938	541,535
Fourth quarter.....	782,889	489,954
1918—First quarter.....	697,590	449,330
Second quarter.....	630,506	332,864
Third quarter.....	510,551	381,995

AMERICAN LOSSES.

The department of commerce announced Nov. 21, 1918, that 145 American passenger and merchant vessels of 354,449 tons and 775 lives had been lost through acts of the enemy in the course of the period from the beginning of the war to the cessation of hostilities Nov. 11, 1918. Nineteen vessels and sixty-seven lives were lost through the use of torpedoes, mines and gunfire prior to the entrance of the United States into the war.

SCANDINAVIAN LOSSES.

Following are the official figures of the losses sustained by the three Scandinavian kingdoms from Germany's submarine warfare in the world war: Norway, 831 ships with a tonnage of 1,238,000, and 1,020 lives; Sweden, 178 ships with a tonnage of 200,570, and 248 lives; Denmark, 249 ships with a tonnage of 253,622 (no loss of life reported).

RAIDS ON AMERICAN COAST.

German submarines made several raids along the Atlantic coast, but did not succeed in torpedoing any troopships while outward bound. Most of their victims were fishing schooners and coastwise steamships. Their names and the dates on which they were sunk will be found in the appended list of merchant ships torpedoed.

MERCHANT SHIPS TORPEDOED.

The following list includes some of the more important vessels torpedoed and sunk or otherwise destroyed through the German submarine warfare, especially in 1917 and 1918.

Alamance, American steamer, 3,000 tons, torpedoed and sunk off English coast Feb. 5, 1918; six lives lost.
Amazon, British steamer, 10,037 tons, torpedoed and sunk near Gibraltar; reported March 20, 1918.
Andania, Cunard liner, 13,405 tons, torpedoed and sunk off northern coast of Ireland, Jan. 27, 1918.
Anilles, American transport, torpedoed and sunk off Spain, Oct. 17, 1918; seventy lives lost.
Aragon, British transport, torpedoed and sunk in the Mediterranean, Dec. 30, 1917; 610 lives lost.
Aronaut, American steamship, torpedoed and sunk off Sicily islands June 5.
Armenia, American steamship, torpedoed Feb. 9, 1918; beached on British coast.
Arrino, British steamship, 4,484 tons; torpedoed and sunk; reported March 4, 1918.
Atlantian, British steamship, 9,399 tons, torpedoed and sunk; reported June 28.
Atlantique, French steamship, 6,447 tons; torpedoed in Mediterranean early in May, 1918, but reached port; ten passengers killed.
Aurania, British steamship, 13,400 tons, torpedoed and sunk about Feb. 6, 1918; no lives lost.
Ausonia, British transport, torpedoed and sunk in Atlantic; reported June 11, 1918.
Australian, French steamer, torpedoed and sunk in Mediterranean, July 14, 1918; twenty lives lost.
Aztec, American steamer, torpedoed and sunk off Brest, France, April 1, 1917; twenty-eight lives lost.

- begona No. 4, Uruguayan steamer, torpedoed and sunk in Mediterranean; reported March 20, 1918.
- Calgarian, British mercantile cruiser, torpedoed and sunk March 1, 1918, off Irish coast; forty-eight lives lost.
- Californian, Hawaiian line steamship, sunk by mine in European waters June 22, 1918; no lives lost.
- Carlisle Castle, British steamship, 4,325 tons, torpedoed and sunk in English channel, Feb. 10, 1918; one life lost.
- Carolina, American steamship, 5,093 tons, sunk by submarine off Jersey coast June 2, 1918; sixteen lives lost.
- Celtic, British liner, 21,000 tons, torpedoed but not sunk off Ireland, April 1, 1918; no lives lost.
- Chattahoochee (formerly the Sachsen), American steamer, torpedoed and sunk off English coast; reported March 25, 1918.
- Cheviot Range, British steamship, sunk by submarine off Fastnet with loss of twenty-five lives; reported May 30, 1918.
- Chilier, Belgian steamship, 2,966 tons, sunk by submarine in mid-Atlantic June 21, 1918.
- Clan Matheson, British, 4,500 tons, sunk in collision; reported May 25, 1918.
- Conargo, Australian steamer, 4,312 tons, torpedoed and sunk in Irish sea, March 31, 1918; two of lifeboats sunk by gunfire.
- Cork, British steamship, torpedoed and sunk Jan. 28, 1918; twelve lives lost.
- Covington (formerly Cincinnati), U. S. transport, 18,339 tons, torpedoed and sunk in war zone July 1, 1918; six lives lost.
- Cubare, American steamer, 7,300 tons, sunk by submarine, Aug. 15, 1918.
- D. N. Luckenbach, American steamship, torpedoed and sunk off France, Oct. 27, 1917; five lives lost.
- Djennah, British transport, sunk by submarine in the Mediterranean, July 14, 1918; 442 lives lost.
- Dora, American steamship, torpedoed 400 miles from France, Sept. 4, 1918; no lives lost.
- Dora, Swedish steamer, sunk by submarine; nine lives lost; reported June 14, 1918.
- Drove, French freight transport, and Kerbihan, trawler, sunk by mines near Marseilles, Jan. 23, 1918; forty lives lost.
- Ducadi Genova, Italian steamship, torpedoed and sunk on Spanish coast; announced Feb. 9, 1918.
- Dwinsk, British transport leased to United States, 8,173 tons, torpedoed and sunk 700 miles east of Delaware capes June 18, 1918; sixty-seven men missing.
- Edna, American schooner, 325 tons, sunk off Cape May, N. J., May 26, 1918.
- Edward H. Cole, American schooner, 1,791 tons, sunk by bombs off Barnegat, N. J., June 2, 1918.
- Edward R. Baird, American schooner, 279 tons, sunk by bombs, off Maryland coast, June 4, 1918.
- Eidsvold, Norwegian steamer, sunk by submarine off Virginia capes, June 4, 1918.
- Etonian, British steamship, 4,135 tons, torpedoed and sunk off Irish coast, March 23; four lives lost.
- Flandres, Belgian relief steamer, sunk by mine, April 8, 1918.
- Florence H., American steamer, blown up by internal explosion in a French port, April 17, 1918; forty-one lives lost.
- Fridland, Swedish steamship, 4,960 tons, bombarded and torpedoed, Feb. 7, 1918, off coast of Holland; six men killed.
- Galway Castle, British steamer, 7,988 tons, torpedoed and sunk in Atlantic, Sept. 12, 1918; 189 lives lost.
- Giralda, Spanish steamer, pillaged and sunk by German submarine, on Spanish coast, Jan. 26, 1918.
- Harpathan, British steamer, torpedoed and sunk 100 miles east of Virginia capes, June 5, 1918.
- Harry Luckenbach, American steamer, torpedoed and sunk Jan. 7, 1918; nine lives lost.
- Hattie Dunn, American schooner, 436 tons, sunk off Jersey coast, May 29, 1917.
- Hauppauge, American schooner, 1,500 tons, sunk off Barnegat, N. J., May 28, 1918.
- Havna, Norwegian steamer, torpedoed and sunk with loss of eleven lives; reported March 6, 1918.
- Healdton, American steamer, torpedoed and sunk in North sea, April 1, 1917; twenty-one lives lost.
- Hendrik Lund, Norwegian steamer, sunk by submarine off Virginia coast, June 10, 1918.
- Herbert L. Pratt, American tanker, 7,200 tons, damaged by mine off coast of Delaware, June 2, 1918; towed into port June 6, 1918.
- Hirano Maru, Japanese steamship, 7,935 tons, sunk by submarine off Ireland, Oct. 4, 1918.
- Indien, Danish steamship, sunk by submarine off the Azores March 31, 1918; twenty-seven lives lost.
- Innsfallen, British steamer, torpedoed and sunk in British waters; eleven lives lost; reported June 7, 1918.
- Isabel B. Wiley, American schooner, 776 tons, sunk by bombs off Barnegat, N. J., 1918.
- Jacob M. Haskell, American schooner, 1,778 tons, sunk by shell fire off Barnegat, N. J., June 2, 1918.
- Joseph Cudahy, American steamer, torpedoed off English coast, Aug. 17, 1918; thirteen lives lost.
- Justicia, 32,234 tons, British; torpedoed and sunk near Ireland, July 20, 1918; eleven lives lost.
- Kenmare, British steamer, torpedoed and sunk off Irish coast with loss of twenty-one lives; reported March 6, 1918.
- Kringsjaa, Norwegian sailing ship, sunk by submarine off Virginia coast; reported June 16, 1918.
- LaDive, French steamer, 1,777 tons, torpedoed and sunk in Mediterranean sea, Feb. 1, 1918; 110 lives lost.
- Lake Edon, American steamer, torpedoed and sunk in foreign waters, Aug. 21, 1918; sixteen lives lost.
- Lake Moor, American steamer, torpedoed and sunk in European waters, April 11, 1918; thirty-five lives lost.
- Lake Owens, American steamer, 2,308 tons, sunk by submarine in foreign waters Sept. 3, 1918; five lives lost.
- Leasowe Castle, British transport, 9,737 tons, sunk by submarine in Mediterranean, May 26, 1918; 101 lives lost.
- Leinster, Irish mail boat, 2,646 tons, torpedoed and sunk in St. George's channel, Oct. 10, 1918; 480 lives lost.
- Lewis Luckenbach, American steamer, torpedoed and sunk in English channel, Oct. 16, 1917; eleven lives lost.
- Llandoverly Castle, British hospital ship, 11,423 tons, sunk by submarine, seventy miles west of Fastnet, June 27, 1918; 234 lives lost.
- Louvain, British boarding ship, torpedoed and sunk in Mediterranean Jan. 21, 1918; 224 lives lost.
- Lucia, American steamer, torpedoed and sunk in Atlantic, Oct. 19, 1918; four lives lost.
- Luz Blanca, American tank steamer, torpedoed and sunk off Nova Scotia, Aug. 5, 1918.
- Marmora, British cruiser, 10,500 tons, sunk by submarine, July 23, 1918; ten lives lost.
- Mechanician, British armed escort steamer, torpedoed Jan. 20, 1918; thirteen lives lost.
- Medora, Canadian Pacific steamship, sunk by submarine near British coast; reported June 26, 1918.
- Ministre de Smet de Naeyer, Belgian relief ship, sunk in North sea, Aug. 6, 1918; twelve lives lost.
- Missanabic, British steamer, 12,469 tons, torpedoed and sunk in European waters Sept. 9, 1918.

Moldavia, British troopship, 9,500 tons, torpedoed and sunk May 23, 1918; fifty-three lives lost.

Monitor, American sailing vessel, torpedoed and sunk off Canary islands; reported Jan. 17, 1918.

Montanan, American steamer, 6,659 tons, torpedoed and sunk in foreign waters, Aug. 16, 1918; five lives lost.

Motano, American steamer, torpedoed and sunk in British channel, July 31, 1917; twenty-four lives lost.

Mount Vernon, U. S. transport, torpedoed but not sunk, July 25, 1918; thirty-five lives lost.

Neches, 7,175 tons, American steamer, sunk by submarine May 15, 1918; no lives lost.

Neguri, Spanish steamer, torpedoed and sunk, about Feb. 26, 1918.

Omega, American steamship, sunk off English coast Aug. 31, 1918; twenty-six lives lost.

Oronsa, British steamship, 5,436 tons, torpedoed and sunk in British waters April 28, 1918; three lives lost.

Otranto, British transport, sunk in collision off Scottish coast, Oct. 6, 1918; 431 lives lost.

Owasco, American steamer, formerly the Allemania, sunk by submarine early in December, 1917; two lives lost.

Patria, British mercantile cruiser, torpedoed and sunk, June 13, 1918; sixteen lives lost.

Persic, British liner, 12,042 tons, torpedoed 200 miles from British coast, Sept. 6, 1918; vessel beached; no lives lost.

Philadelphian, British steamship, 5,120 tons, torpedoed and sunk about Feb. 21, 1918.

Pirar del Rio, American steamer, 2,504 tons, sunk by submarine off coast of Maryland June 8, 1918.

Pomeranian, Canadian Pacific steamship, sunk by submarine on coast off British isles; reported June 26, 1918.

President Lincoln, American transport, 18,500 tons, torpedoed and sunk in Atlantic, May 31, 1918; twenty-six lives lost.

Rewa, British hospital ship, torpedoed Jan. 4, 1918; three lives lost.

Saetia, American steamship, sunk by mine off Maryland coast, Nov. 19, 1918.

Salamina, Greek steamer, sunk in Irish sea by gunfire, March 31, 1918.

Samoa, Norwegian bark, sunk by submarine, off Virginia capes, June 14, 1918.

Samuel C. Mengel, American schooner, sunk 175 miles off New York, June 2, 1918.

Santa Anna, French steamer, 9,350 tons, torpedoed and sunk May 10, 1918, in Mediterranean; 638 lives lost.

Santa Maria, American tank steamer, 8,300 tons, torpedoed and sunk off Irish coast; reported Feb. 27, 1918.

Sebastian, Spanish steamship, 4,500 tons, torpedoed and sunk; announced Feb. 9, 1918.

Statendam (see Justitia).

Texel, American steamer, 3,210 gross tons, torpedoed and sunk off Jersey coast, June 2, 1918.

Tiberia, British steamer, 4,880 tons, torpedoed and sunk Feb. 27, 1918.

Ticonderoga, American steamship, torpedoed and sunk in mid-Atlantic Sept. 30, 1918; 113 lives lost.

Tuscania, British transport, 14,348 tons, carrying American troops, torpedoed and sunk off north coast of Ireland Feb. 5, 1918; 213 lives lost.

Tyler, American steamship, 3,928 tons; torpedoed and sunk off French coast May 3, 1918; eleven lives lost.

Vacuum, American steamer, torpedoed and sunk off Irish coast April 28, 1917; twenty-one lives lost.

Valeria, British steamship, 5,865 tons, sunk in Irish sea; reported April 5.

Vigilancia, American freight steamer, torpedoed off Irish coast, May 16, 1917; fifteen lives lost.

Vindegen, Norwegian steamer, sunk by submarine off the Virginia capes June 10, 1918.

Vinland, Norwegian, sunk by German submarine off the Virginia capes June 5, 1918.

Warilda, British hospital ship, torpedoed and sunk near English coast, Aug. 3, 1918; 123 lives lost.

Wegadeck, Norwegian steamer, 4,271 tons, sunk by submarine in North sea; reported March 20, 1918.

West Bridge, American steamer, 8,800 tons, sunk by submarine in foreign waters, Aug. 16, 1918; three lives lost.

Westover, American supply ship, torpedoed and sunk July 11, 1918, in war zone; ten lives lost.

William Rockefeller, American tanker, torpedoed and sunk May 18, 1918; three lives lost.

Winneconne, American steamship, 1,869 tons gross, torpedoed and sunk off Cape May, N. J., May 26, 1918.

Zaanland, 8,700 tons, Dutch steamship, sunk in collision May 13, 1918; no lives lost.

TOTAL MERCHANT TONNAGE LOST.

It was officially announced in London, Dec. 5, 1918, that the world's total loss of merchant tonnage from the outbreak of the war to the end of October, 1918, from enemy action and marine risk was 15,053,786 gross tons. During the same period vessels totaling 10,849,527 tons were constructed and enemy tonnage totaling 2,392,675 was captured, making a net loss of tonnage during the war of 1,811,584.

During the war 2,475 British ships were sunk with their crews and 3,147 vessels were sunk and their crews left adrift, according to a statement by Sir Eric Geddes, first lord of the admiralty.

LOSS OF THE TRANSPORT TUSCANIA.

The Anchor liner Tuscania, 14,384 tons, was torpedoed on the north coast of Ireland about 6 o'clock on the evening of Feb. 5, 1918, while carrying American troops for service in France. Though the vessel remained afloat two hours after being hit there was considerable loss of life owing to a heavy list, which made the launching of lifeboats a difficult and dangerous task. A number of those on board were killed by the explosion of the torpedo, some were badly wounded and went down with the ship, while others were drowned or died from shock and exposure. The total number of deaths was placed at 213. Of these three officers and 137 men were identified and buried, one officer and thirty-one men were buried without being identified, while forty-one men were missing, having probably gone down with the ship.

The Tuscania carried 2,177 military passengers, two civilian passengers and a crew of 239, making the total number of persons on board 2,418. The military passengers consisted of 117 officers and 2,060 men, representing the following units:

Headquarters detachment and companies D, E and F, 20th engineers.
 One hundred and seventh engineer train.
 One hundred and seventh military police.
 One hundred and seventh supply train.
 One hundredth aero squadron.
 One hundred and fifty-eighth aero squadron.
 Two hundred and thirteenth aero squadron.
 Replacement detachments Nos. 1 and 2, 32d division.

Fifty-one casual officers.
 While many of the men aboard were national guardsmen from Wisconsin and Michigan, there were a considerable number from other states. The Tuscania was accompanied by other transports being convoyed by warships and had been in sight of the north coast of Ireland before the attack came. The vessels in the convoy, in obedience to instructions, hastened from the spot, but boats from the warships and patrol vessels, which soon came up, picked up the Tuscania survivors from the lifeboats, rafts and wreckage. The survivors were taken

to Buncrana, Larne, Belfast and Londonderry, Ireland, and Islay and Glasgow, Scotland. They were given every assistance and comfort by the local authorities, the representatives of the Shipwrecked Mariners' society, the Red Cross and British naval and military men. Many of them were taken care of by the hospitals in Londonderry.

The bodies of most of those drowned were washed ashore on the Scotch coast, at widely separated points. In nearly all cases the men wore lifebelts, but these had been of no avail in the rough and icy water or among the rocks near the shore, and all the men not picked up by the boats near the scene of the disaster died. They were buried on the coast near the places where most of the bodies were recovered from the sea.

CUNARD LINERS LOST.

The following list of large steamships lost by the Cunard company and its auxiliary, the Anchor line, was made public Nov. 23, 1918: Cunard line—Lusitania, 30,396; Franconia, 18,150; Laconia, 18,099; Transylvania, 14,600; Ivernia, 14,278; Carpathia, 13,603; Alaunia, 13,405; Andria, 13,405; Auranja, 13,926; Campania, 12,950; Royal Edward, 11,174; Ultonia, 10,402; Ascania, 9,121; Asonia, 8,153; Feltria, 5,254.

Anchor line—Tuscania, 14,384; Cameronia, 10,963; Caledonia, 9,223; Athenia, 8,668; California, 8,662; Tiberia, 4,880; Perugia, 4,376; Assyria, 4,376.

The total tonnage of the fifteen Cunard liners was 206,769. All were torpedoed or mined except the Campania and Ascania, which were lost through accidents. The Anchor line tonnage lost was 65,532.

LOSS OF THE PRESIDENT LINCOLN.

The President Lincoln, an Atlantic liner of 18,500 tons used as a transport by the American government, was torpedoed and sunk while returning from Europe May 31, 1918, with a loss of three officers and twenty-six enlisted men. All of the other passengers, including a number of hospital patients, were saved. The vessel was struck at 10:40 o'clock in the morning and sank an hour later.

SINKING OF THE MOLDAVIA.

The British transport Moldavia of 9,500 tons was torpedoed and sunk in the Atlantic May 23, 1918, with a loss of fifty-three lives. The men killed were American soldiers sleeping in the lower part of the ship, which was struck just forward of the engines on the port side. It was a moonlight night and although a good lookout was kept the attacking submarine was not sighted before the torpedo struck. Most of the men aboard were in their hammocks when the explosion occurred amidships. The sailors and soldiers alike showed no panic. They fell calmly into line and awaited orders. When it was seen that the Moldavia was settling down many on board were taken off by the escorting ships. The men lost all of their belongings, but were supplied with new clothing at the different naval ports where they were taken.

LOSS OF THE U. S. S. TAMPA.

While engaged in convoy work the U. S. S. Tampa was torpedoed and sunk in the Bristol channel off the English coast on the night of Sept. 26, 1918, with the loss of all the officers and men on board, numbering 118. The Tampa for some reason had gone ahead of the convoy and about 8:45 p. m. the shock of an explosion was felt. The vessels which conducted the search in the vicinity found large quantities of wreckage and one of the Tampa's life belts. Two dead bodies in naval uniform, but otherwise unidentified, were found. The U. S. S. Tampa was a former coast guard cutter and was in command of Capt. C. Satterlee of the coast guard. Her complement consisted of ten officers and 102 enlisted men and she had on board also one British army officer and five civilian employes.

LOSS OF THE U. S. S. SAN DIEGO.

The U. S. S. San Diego while on its way from Portsmouth, N. H. to New York, was sunk by an exterior explosion at 11 a. m. July 19, 1918, with the loss of six men. A court of inquiry subsequently reported that the loss of the ship was due to its striking a mine, which had been placed by a German submarine some time before. No blame was attached to the officers in command.

LOSS OF THE OTRANTO.

The British transport Otranto was sunk off the coast of Scotland Oct. 6, 1918, with a loss of 431 lives, 366 of the dead being American soldiers on their way to France. The British admiralty statement published on Oct. 12 gave the following details:

"At 11 o'clock on Sunday the armed mercantile cruiser Otranto, Acting Captain Ernest Davidson in command, was in collision with the steamship Kashmir. Both vessels were carrying United States troops. The weather was very bad and the ships drifted apart and soon lost sight of each other. The torpedo-boat destroyer Mounsey was called by wireless and by skillful handling succeeded in taking off twenty-seven officers and 239 men of the crew and 300 United States soldiers and thirty French sailors. They were landed at a north Irish port.

"The Otranto drifted ashore on the island of Islay. It became a total wreck. Sixteen survivors were picked up at Islay. The Kashmir reached a Scottish port and landed its troops without casualties."

LOSS OF THE U. S. S. TICONDEROGA.

The U. S. S. Ticonderoga was sunk by a submarine Sept. 30 almost in midocean, 1,700 miles from shore, while east bound. Eleven naval officers and 102 enlisted men of the navy were lost. The attack occurred at 5:20 a. m. The weather was fair, but overcast, the sea moderate. The Ticonderoga was ten or fifteen miles behind the convoy, having been unable to keep up. Chief Quartermaster George S. Tapply, who later reported the sinking to the navy department in Washington, said he was in his bunk when general alarm sounded at 5:20 a. m., and when he reached the bridge it was all afire. At this time the whistle blew for "abandon ship" and he helped the paymaster bring aft the captain, who was badly wounded. He helped lower the forward boat on the port side and to a after boat. The wireless had been carried away, so no messages could be sent out. The guns were firing all this time. When the submarine was sighted it was about 2,000 yards off the port bow. The "U" boat's first two shots hit the bridge, setting it afire, and its third shot carried away one of the Ticonderoga's guns.

The submarine submerged for twenty minutes and reappeared about two miles off the starboard quarter, when it started to shell the vessel with shrapnel. It next fired a torpedo, which struck amidships, bursting the steam pipes. The ship then started to settle. The German marksmanship was effective, and most of the lifeboats were full of holes from shrapnel. At about 7:15 the captain, with fourteen soldiers, was put in the last boat on the vessel and the boat was lowered away. That was the only boat to get clear. At that time there were thirty-five or forty men still left alive in the ship and the 6-inch gun had been disabled by shell fire. The vessel could not be steered. By order of the executive officer a white blanket was tied to the aftermost near the topmast, but the submarine continued to fire.

A raft was launched and some fifteen men boarded it. It was then about 7:30 and a few minutes later the ship sank stern first. The submarine fired two shots at the only open boat left and then went alongside the lifeboat, the officers inquiring for the captain and officers. Not finding the captain, they took aboard two seamen. The submarine then picked up the

executive officer from the wreckage and went alongside the raft, taking off the first assistant engineer and returning the two seamen to the raft. The men on the raft asked for medical assistance, but the submarine ignored the request and cut the raft adrift. The lifeboat drifted near the raft and five men from the raft were transferred to the boat with the idea of tying a line to the raft, but this could not be done and the wind prevented the boat's getting back to the raft. There were twenty-two men in the boat and they sailed and drifted for four days, being picked up about 2 p. m. on the fourth day by the steamship Moorish Prince.

ATTACK ON TRANSPORT MOUNT VERNON.

The U. S. S. Mount Vernon was struck by a torpedo on Thursday, Sept. 5, while on a west bound voyage about 200 miles from the coast of France, but was able to return to port under her own steam. The torpedo struck the ship on the starboard side, flooding four firerooms and doing other damage. Thirty-five men were killed by the explosion. Senator James Hamilton Lewis of Illinois was among the passengers who were safely landed. The Mount Vernon was formerly the German steamship Kronprinzessin Cecilie, which was interned in American waters, and when this country entered the war was taken over by the government and converted into a troop transport. She has a gross tonnage of 18,372. The Mount Vernon was commanded by Capt. Douglas F. Dismukes. The vessel had landed the troops she carried overseas and was returning when the torpedo struck. The loss of so many lives was due to the fact that the watch was being re-

lieved and there were many more men than usual in the firerooms.

LAST AMERICAN SHIP TORPEDOED.

The last American vessel reported torpedoed by an enemy submarine was the steamship Lucia, sunk Oct. 18, it having remained afloat for twenty-two hours after being struck by the torpedo. At 5:30 p. m., Oct. 17, 1918, the commander sighted a white wake about 100 yards off port beam. The explosion occurred simultaneously with the sight of this wake, the torpedo striking the boat amidships on the port side, entering the engine room and killing four men. A short while after the explosion it was thought advisable to have the civilian crew abandon ship. One boat, with carrying capacity of twenty-two men, had been broken by the explosion, so that the remaining eighteen men (four having been killed by the explosion) were allotted to the remaining five boats and one life raft. They remained near the ship until the following morning, when, seeing that the enemy submarine had not appeared, they were called alongside and given food.

At intervals during the night the moon was hidden behind the clouds. During the entire night the ship was in sinking condition, with the after gun platform just clear of the water, as the explosion of the torpedo had carried away the bulkhead between the engine room and the adjoining compartment. About noon on the 18th the water started forcing its way forward to the bow compartments. The ship was just about to sink when the U. S. S. Fairfax appeared and rescued all of the passengers and crew without the loss of a life.

SHIPBUILDING RECORDS BROKEN.

When the German submarine campaign was at its height the situation of the allies was becoming critical in the matter of ability to transport supplies and men to the allied countries from the United States. It was seen that unless the enemy submarine could be destroyed faster than they could be built, and new ships built more rapidly than they could be destroyed disaster would be sure to ensue. Thanks to the allied navies and to the shipbuilders in the United States and the united kingdom both aims were attained. The manner in which the navies accounted for about 200 of the undersea boats is told on another page. It remains to give some facts indicating the success of the shipbuilders, especially of those in America. This may best be done by quoting from a statement made by the United States shipping board and published Sept. 24, and also from a statement issued on Nov. 9, 1918. In the first statement the board said:

Within the jurisdiction of the United States shipping board at the present time (Sept. 1, 1918) there are 2,185 seagoing vessels, totaling 9,511,915 dead weight tons. Of these 1,234, totaling 8,598,405 dead weight tons, fly the American flag. Under charter to the shipping board and to American citizens there are 891 foreign vessels, totaling 2,915,510 dead weight tons. At the time the United States entered the war the American merchant marine included approximately only 2,750,000 dead weight tons of seagoing vessels of over 1,500 dead weight tons. The expansion of the fleet within the jurisdiction of the shipping board has come about for the most part during the last year.

This fleet lists as follows on Sept. 1, 1918:

	Num-ber	Dead weight tons.
Requisitioned American merchant ships.....	449	2,900,525
Ex-German and ex-Austrian ships taken over by the United States government..	100	644,713
New ships owned by United States shipping board.....	256	1,465,963
Old lake steamers transferred to American merchant ships not yet requisitioned (of over 1,500 dead weight tons)....	31	117,800
	377	980,459

	Num-ber.	Dead weight tons.
Dutch steamers requisitioned.	81	486,945
Foreign ships chartered to United States shipping board.	291	1,208,411
American citizens.....	600	1,707,099
Totals	2,185	9,511,915

The American merchant marine is to-day expanding more rapidly than any other in the world. In August of this year (1918) the United States took rank as the leading shipbuilding nation in the world. It now has more shipyards, more shipways, more shipworkers, more ships under construction and is building more ships every month than any other country, not excepting the united kingdom, hitherto easily the first shipbuilding power. Prior to the war the United States stood a poor third among the shipbuilding nations.

Since August, 1917, more seagoing tonnage has been launched from American shipyards than has ever launched before in a similar period anywhere. The total as of Sept. 1, 1918, 574 vessels, of 3,017,238 dead weight tons, is nearly four times all the seagoing tonnage (of over 1,500 dead weight tons) built in the United States in any four pre-war years. The total launchings since the first of this year, 482 vessels, of 2,392,692 dead weight tons, are more than eight times the seagoing tonnage (of over 1,500 dead weight tons) produced in this country in any prewar year.

More than 2,000,000 dead weight tons of new ships have been completed and delivered to the shipping board during the last year. The first delivery was made on Aug. 30, 1917, by the Toledo Shipbuilding company of Toledo, O. The first million tons of completed ships were obtained in May; the second million in August. The deliveries to the shipping board in August broke all world's records in the production of ocean going tonnage and established the United States as the leading shipbuilding nation of the world. They totaled 349,783 dead weight tons. Those from American shipyards to the shipping board in August totaled 324,180 dead weight tons, ex-

ceeding the previous world's record for any month, which had been made by British shipyards in May, 1918, by 28,669 dead weight tons. The deliveries to the shipping board by American shipyards from Aug. 30, 1917, to and including Aug. 31, 1918, totaled 327 seagoing vessels of 1,952,675 dead weight tons. Adding eight vessels of 66,357 dead weight tons delivered by Japanese shipyards, the grand total of deliveries to the shipping board up to Sept. 1, 1918, was 335 vessels of 2,019,032 dead weight tons.

RECORDS MADE BY SHIPYARDS.

The most spectacular achievements in the history of shipbuilding, in this or any other country was the launching from American shipyards on Independence day of ninety-five steel, wood and composite vessels, totaling 474,464 dead weight tons; thus in one day there were launched 188,909 more dead weight tons than was the output of seagoing tonnage (of over 1,500 dead weight tons) in the best prewar year of American shipbuilding.

Another world's record was made by American shipyards for the month of July. There were launched in that month 126 steel, wood and composite vessels totaling 634,411 dead weight tons. This total more than doubles the launching totals for any month in the history of British shipyards. Prior to this year British shipyards launched more vessels annually than all the others in the world.

Thus an unprecedented pace of construction marks the rapidly increasing output of tonnage from American shipyards. All records for fast shipbuilding are now held by them.

A world's record was made when the Tuckahoe was launched 90 per cent complete on June 5 in 27 days 2 hours and 50 minutes from keel laying. Another world's record was made ten days later when the Tuckahoe, ready for service, was delivered to the shipping board. The Tuckahoe was carrying coal to New England on the fortieth day.

SHIPYARDS AND SHIPWAYS.

When the present shipping board began its work, in August, 1917, there were only sixty-one shipyards in the United States. There were thirty-seven steel shipyards with 162 ways. The largest shipyards in the world in September, 1918, were those of the United States. The Clyde River in Scotland, historically famous as the greatest of all shipbuilding localities, is already surpassed by two shipbuilding districts on the Atlantic coast and by two on the Pacific coast. Now there are 203 shipyards in the United States.

STATUS OF WORLD TONNAGE SEPT. 1, 1918.

Germany and Austria excluded.

	Dead weight
Total losses (allied and neutral) tons.	
August, 1914-Sept. 1, 1918.....	21,404,913
Total construction (allied and neutral) August, 1914-Sept. 1, 1918.....	14,247,825
Total enemy tonnage captured (to end of 1917).....	3,795,000
Excess of losses over gains.....	3,362,088
Estimated normal increase in world's tonnage if war had not occurred (based on rate of increase, 1905-1914).....	14,700,000
Net deficit due to war.....	18,062,088
Allied monthly construction passed destruction for the first time in May, 1918.	

In August deliveries to the shipping board and other seagoing construction in the United States for private parties passed allied and neutral destruction for that month. The figures:

Gross (actual) tons, Deliveries to shipping board.....	244,121
Other construction over 1,000 gross....	16,918
Total	261,039
Losses (allied and neutral).....	259,400
America alone surpassed losses for month by	1,630
Note—World's merchant tonnage as of June	

20, 1914, totaled 49,089,552 gross tons, or, roughly, 73,634,328 dead weight tons. (Lloyd's Register.)

OCTOBER STATEMENT.

All shipbuilding records for any country were broken by the total deliveries of completed new ships to the shipping board during October. In spite of the epidemic of influenza that incapacitated about one-third of the shipworkers, the record breaking total for September was surpassed by nearly 50,000 dead weight tons. There were added to the American merchant marine in October seventy-nine completed new ships of 415,908 dead weight tons.

Class of Vessels.

The deliveries comprised forty-seven steel ships of 301,208 dead weight tons, thirty wood ships of 107,200 dead weight tons and two composite ships of 7,500 dead weight tons. From American shipyards came the unprecedented total of 398,108 dead weight tons. Japanese shipyards delivered two steel ships of 7,808 dead weight tons. The American total exceeds by 68,980 dead weight tons the output of oceangoing vessels in this country in 1914 and 1915. It betters the prewar high mark in American shipbuilding, the total for 1916, by 112,553 dead weight tons. It also surpasses the British record for any month by 102,397 dead weight tons.

Once more the Pacific coast led all sections of the country in shipbuilding. The deliveries from California, Washington and Oregon totaled thirty vessels of 190,400 dead weight tons. Along the Atlantic coast there were completed and delivered seventeen vessels of 102,000 dead weight tons. The Great Lakes shipyards delivered twenty-one vessels of 73,000 dead weight tons. From the gulf states came nine vessels of 33,200 dead weight tons.

Total for 1918.

The October deliveries bring the total of completed new ships in 1918 up to 2,386,835 dead weight tons. Since the date of the first delivery, Aug. 30, 1917, there have been completed and delivered 487 ocean going vessels totaling 2,793,510 dead weight tons.

FOOD USED BY AMERICAN ARMY ABROAD.

The division of army subsistence in a report showing the food supplies and forage sent to the American expeditionary force from the beginning of the war until the signing of the armistice gave the following figures:

Flour, 493,162,058 lbs.; beef, fresh frozen, 213,034,473 lbs; canned meats, 118,183,810 lbs.; bacon, 115,415,372 lbs.; sugar, 97,627,445 lbs.; beans, baked, 54,496,008 lbs.; beans dry, 38,832,171 lbs.; tomatoes, canned, 77,335,095 lbs.; prunes, 13,709,341 lbs.; jam, 24,723,263 lbs.; cigarettes, 1,936,159,687; other tobacco, 38,972,129 lbs.; milk, evaporated, 39,918,202 lbs.; hay, 136,852 tons; bran, 22,273 tons; oats, 267,926 tons.

RESIGNATION OF FUEL ADMINISTRATOR GARFIELD.

It was announced in Washington Dec. 3, 1918, that United States Fuel Administrator Garfield had tendered his resignation to take effect at the pleasure of the president, and that the president had accepted the resignation, although it was made clear that the needs of domestic consumers would continue to receive the attention of the fuel administration until the war was past.

KNITTED 14,089,000 GARMENTS.

American Red Cross workers during the war knitted 14,089,000 garments for the army and navy. In addition, the workers turned out 253,196,000 surgical dressings, 22,255,000 hospital garments, and 1,464,000 refugee garments. The work was done under the direction of 3,870 chapters of the Red Cross, with more than 31,000 branches and auxiliaries, embracing more than 8,000,000 workers.

AVIATION IN THE WAR.

Aviation became increasingly important as a factor in the war up to the last. Better, faster and more powerful machines were built and they were used for more varied purposes. At the opening of hostilities they were used mainly for observation purposes, but as time went on they were employed as scouts hunting for submarines at sea, artillery fire directing, bombing hostile centers by day and night, maintaining liaison in battle, photographing enemy positions, for speedy transportation of individuals and mail and for attacking infantry with machine gun fire. After the failure of the great German offensive in the spring and summer of 1918 the American flyers obtained almost complete mastery of the air. The Germans confined much of their activity to bombing hospitals behind the allied lines at night, generally avoiding encounters in the daytime. Formation flying became common and many machines would engage in raids at the same time. Heroic work was done and many flyers lost their lives on the battle fields of France.

WORK OF AMERICAN FLYERS.

When hostilities were suspended Nov. 11, 1918, American aviators had destroyed 661 more German planes and thirty-five more German balloons than the Americans had lost. The total number of enemy planes destroyed by the Americans was 926 and the total number of balloons seventy-three. Two hundred and sixty-five American planes and thirty-eight balloons were destroyed by the enemy.

On Nov. 11, the day of the signing of the armistice, there were actually engaged on the front 740 American planes, 744 pilots, 457 observers and 23 aerial gunners.

Of the total number of planes 329 were of the pursuit type, 296 were for observation and 115 were bombers.

The Lafayette Squadron.

Most of the famous American flyers were members of the Lafayette squadron in the French aerial service, though a number gained renown quickly when the aviation branch of the American expeditionary force became active. At a dinner given Nov. 27 in Paris by American aviators in honor of their French comrades in the air service it was announced by the undersecretary of aviation that of the 240 pilots in the Lafayette squadron sixty lost their lives.

Among those who helped to make the Lafayette squadron famous were Kiffin Yates Rockwell, C. C. Genet, Willis Haviland, Dudley L. Hill, Edward Hinkle, Ronald Hoskier, Charles Chouteau Johnson, Walter Lovell, Raoul Lufbery, Victor Chapman, Norman Prince, Harold Willis, William Thaw, Robert Rockwell, Lawrence Rumsey, Robert Soubiran, James R. McConnell, Theodore Parsons, Ray C. Bridgman, Charles Dolan, William E. Dugan, Jr., Kenneth Marr, David M. Peterson, Didier Masson, Christopher Ford, John F. Huffer, Charles J. Biddle, James Norman Hall, Henry Sweet Jones, Phelos Collins, Kenneth P. Littauer, Dinsmore Ely, Wallace C. Winter and Paul F. Baer. The names of many of these men will be found among those who were killed in action. Most of the survivors were given commissions in the American air service late in 1917 or in the course of 1918.

American Aces.

Many American flyers were credited with bringing down five or more enemy airplanes and balloons. Among them were these:

Maj. Raoul Lufbery.
Lieut. Jacques Schwab.
Capt. Eddie Rickenbacker.
Lieut. Frank Luke, Jr.
Lieut. William Erwin.
Lieut. David E. Putnam.
Lieut. Donald Hudson.
Lieut. Douglas Campbell.
Lieut. John McArthur.
Lieut. Ralph O'Neil.

Decorated for Heroism.

So many of the Americans were awarded the war cross and other decorations by the French and British and the distinguished service cross by the American authorities that they cannot all be mentioned here. A few of the citations carrying with them the bestowal of the distinguished service cross will be given, however, to show the kind of work the heroes of the air performed. For example, on Oct. 28, 1918, Gen. Pershing, in the name of the president, awarded crosses to the following for "acts of extraordinary heroism":

Second Lieutenant Alan F. Winslow, A. S., 94th aero squadron, for extraordinary heroism in action in the Toul sector on June 6, 1918. While on a patrol consisting of himself and two other pilots he encountered a biplane enemy plane at an altitude of 4,000 meters near St. Mihiel, France. He promptly and vigorously attacked and after a running fight extending far beyond German lines, shot his foe down in flames near Thiaucourt. Home address: W. H. Winslow, 2628 Hampden court, Chicago, Ill.

Second Lieutenant John W. Jordan, F. A., observer. Home address: E. L. Frybarger, uncle, Hyde Park hotel, Chicago, Ill. for extraordinary heroism in action near Fismes, France, Aug. 11. Under the protection of three pursuit planes, each carrying a pilot and an observer, Lieuts. Bernheimer of New York and Jordan, in charge of a photo plane, carried out successfully a hazardous photographic mission over the enemy's lines to the River Aisne. The four American ships were attacked by twelve enemy battle planes. Lieut. Bernheimer by coolly and skillfully maneuvering his ship and Lieut. Jordan by accurate operation of his machine gun, in spite of wounds in shoulder and leg, aided materially in the victory which came to the American ships and returned safely with thirty-six valuable photographs.

First Lieutenant Frank A. Llewellyn, pilot, 99th aero squadron. Home address: Mrs. W. A. Llewellyn, mother, 5636 Kenwood avenue, Chicago. and Second Lieutenant Roland H. Neel, observer, 99th aero squadron. Home address: Macon, Ga. For extraordinary heroism in action east of St. Die, France, Aug. 17. Lieut. Llewellyn and Lieut. Neel carried on successful liaison with the infantry, during the attack on Frapelle. They flew over the enemy lines at an altitude of 400 meters, firing on and disconcerting the enemy and thereby giving courage and confidence to the American forces. Despite heavy fire from fifteen anti-aircraft machine guns and several batteries of anti-aircraft artillery, they performed their work efficiently. Their airplane was struck by a number of machine gun bullets, one of which cut the rudder and elevator control wires and caused the rudder to jam. The broken control wire was held and operated by Lieut. Neel under direction of Lieut. Llewellyn. Running the machine together in this manner, they continued their liaison work until the plane began to become unmanageable, when in spite of its damaged condition, they brought it back to their airdrome.

Maj. William Thaw, A. S., 103d aero squadron, for extraordinary heroism near Reims, on March 26. Maj. Thaw was the leader of a patrol of three planes which attacked five enemy monoplanes and three battle planes. He and another member of the patrol brought down one enemy plane and the three drove down out of control two others and dispersed the remainder. The bronze oak leaf is awarded Maj. Thaw for heroism near Montagne on April 29, when he attacked and brought down burning an enemy balloon. While returning to his own lines he attacked two enemy monoplanes, one of which he shot down in flames. Home address: Care American Embassy, Paris, France.

First Lieutenant Edward V. Rickenbacker, A. S., 94th aero squadron. For extraordinary heroism near Mont Sec, on April 29. Lieut. Rickenbacker attacked an enemy Albatross monoplane and after a fight in which he fol-

lowed his foe into German territory he succeeded in shooting it down. One bronze oak leaf is awarded for each of the following acts: On May 17 he attacked three Albatross planes, shooting one down in the vicinity of Biscourt and forcing the others to retreat. On May 22 he attacked three monoplane Albatross planes 4,000 meters over St. Mihiel, drove them back into German territory, separated one from the group and shot it down. On May 28 he sighted a group of two battle planes and four monoplanes, which he at once attacked, shooting down one and dispersing the others. On May 30, 4,000 meters over Jaunoy he attacked a group of five. After a battle he shot down one and drove the others away. Home address: Columbus, O.

First Lieutenant Douglas Campbell, A. S., 94th aero squadron, for extraordinary heroism on May 19. Lieut. Campbell attacked an enemy biplane at an altitude of 4,500 meters east of Flirey. He rushed to the attack, but after shooting a few rounds his gun jammed. Undeterred, he corrected the jam in midair and returned to the assault. After a short, violent action the enemy plane took fire and crashed to the earth. One bronze oak leaf is awarded to Lieut. Campbell for each of the following acts: On May 27 he encountered three enemy monoplanes at an altitude of 3,000 meters over Mont Sec, promptly attacked and shot down one German machine and drove the other two well within the enemy lines.

On May 28 Lieut. Campbell saw six German Albatross airplanes flying toward him at an altitude of 2,000 meters, near Bois Bata. He immediately attacked and by skillful maneuvering an accurate operation of his machine gun brought one plane down in flames and drove the other five back. On May 31 he took the offensive against two German biplanes at an altitude of 2,500 meters over Lironville, shot down one and pursued the other far behind the German lines. On June 5, accompanied by another pilot, he attacked two enemy battle planes at an altitude of 5,700 meters over Epley. After a spirited combat Lieut. Campbell was shot through the back by a machine gun bullet, but in spite of his injury kept on fighting until he had forced one of the enemy planes to the ground, where it was destroyed, and had driven the other plane back into its own territory. Home address: Mount Hamilton, Cal.

AIRPLANE RAIDS ON LONDON AND PARIS.

Not so many airplane raids were made by the German machines on London and Paris in 1918 as in the year before, yet a number were carried out. Two or three of the more serious may be mentioned.

Sixty-six persons were killed and 183 injured in two German airplane raids over London Jan. 29 and 30, 1918. In the first raid fifty-six were killed and 173 injured; in the second raid the killed numbered ten and the wounded ten. Some fifteen German machines took part in the attack, but only five or six reached the metropolis. They were attacked by British flyers and one of them was shot down in flames from a height of 10,000 feet, the three occupants being burned to death. In the first raid thirty of the killed and ninety-one of the injured were in a single air raid shelter.

On March 7, 1918, seven or eight German airplanes raided the east coast of England, two reaching London, where bombs were dropped on the residential sections on the northwest and southwest sides of the city. Eleven persons were killed and forty-six injured.

It was announced Nov. 25, 1918, that in air raids on sixty-six municipal districts in England in the course of the war 365 persons were killed and 1,147 injured. The property damage was \$4,500,000.

German airplanes attacked Paris on the night of Jan. 30-31, 1918, throwing bombs on various parts of the city. As a result forty-nine persons were killed and 206 wounded. The dead included fourteen women and four children and the wounded fifty-three

women and ten children. One of the German machines was brought down and the occupants made prisoners. The last previous raid on Paris occurred July 27, 1917. It was announced in Berlin that the latest raid was in reprisal for the "bombing" of German towns outside the region of operations."

SECRETARY BAKER ON AIR SERVICE.

In his annual report for 1918, covering the period of America's participation in the world war, the secretary of war, Newton D. Baker, dealt in detail with the American air service concerning the production branch of which there had been much criticism. His statement follows:

Organization.

The aviation section of the signal corps, which had charge of the production and operation of military aircraft at the outbreak of the war, was created on July 18, 1914. To assist in outlining America's aviation program, the aircraft production board was appointed by the council of national defense in May, 1917. In October, 1917, the aircraft board, acting in an advisory capacity to the signal corps and the navy, was created by act of congress. In April, 1918, the aviation section of the signal corps was separated into two distinct departments, John D. Ryan being placed in charge of aircraft production and Brig.-Gen. W. L. Kenly in charge of military aeronautics. Under the powers granted in the Overman bill a further reorganization was effected by presidential order in May, 1918, whereby aircraft production and military aeronautics were completely divorced from the signal corps and established in separate bureaus. This arrangement continued until August, when the present air service, under Mr. Ryan as second assistant secretary of war, was established, combining under one head the administration of aviation personnel and equipment.

Raw Materials Secured.

One of the most important questions which confronted the aircraft organization from the start was the obtaining of sufficient spruce and fir for ourselves and our allies. To facilitate the work, battalions were organized under military discipline and placed in the forests of the west coast. A government plant and kiln were erected to cut and dry lumber before shipment, thus saving valuable freight space. To Nov. 11, 1918, the date the armistice was signed, the total quantity of spruce and fir shipped amounted to approximately 174,000,000 feet, of which more than two-thirds went to the allies.

The shortage of linen stimulated the search for a substitute possessing the qualities necessary in fabric used for covering airplane wings. Extensive experiments were made with a cotton product which proved so successful that it is now used for all types of training and service planes.

To meet the extensive demands for a high-grade lubricating oil castor beans were imported from India and a large acreage planted in this country. Meanwhile, research work with mineral oils was carried on intensively, with the result that a lubricant was developed which proved satisfactory in practically every type of airplane motor except the rotary motor, in which castor oil is still preferred.

Production of Training Planes and Engines.

When war was declared the United States possessed less than 300 training planes, all of inferior types. Deliveries of improved models were begun as early as June, 1917. Up to Nov. 11, 1918, over 5,300 had been produced, including 1,600 of a type which was temporarily abandoned on account of unsatisfactory engines.

Planes for advanced training purposes were produced in quantity early in 1918; up to

the signing of the armistice about 2,500 were delivered. Approximately the same number was purchased overseas for training the units with the expeditionary force.

Several new models, to be used for training pursuit pilots, are under development.

Within three months after the declaration of war extensive orders were placed for two types of elementary training engines. Quantity production was reached within a short time. In all about 10,500 have been delivered, sufficient to constitute a satisfactory reserve for some time to come.

Of the advanced training engines, the three important models were of foreign design, and the success achieved in securing quantity production is a gratifying commentary on the manufacturing ability of this country. The total production up to Nov. 11 was approximately 5,200.

Production of Service Planes.

The experience acquired during the operations on the Mexican border demonstrated the unsuitability of the planes then used by the American army. Shortly after the declaration of war, a commission was sent abroad to select types of foreign service planes to be put into production in this country. We were confronted with the necessity of redesigning these models to take the Liberty motor, as foreign engine production was insufficient to meet the great demands of the allies. The first successful type of plane to come into quantity production was a modification of the British De Havilland 4—an observation and day bombing plane. The first deliveries were made in February, 1918. In May, production began to increase rapidly, and by October a monthly output of 1,200 had been reached. Approximately 1,900 were shipped to the expeditionary force prior to the termination of hostilities.

The Handley-Page night bomber, used extensively by the British, was redesigned to take two Liberty motors. Parts for approximately 100 planes have been shipped to England for assembly.

A total of 2,676 pursuit, observation, and day bombing planes, with spare engines, were delivered to the expeditionary force by the French government for the equipment of our forces overseas.

Considerable progress was made in the adaptation of other types of foreign planes to the American-made engines, and in the development of new designs. The U. S. D. 9A, embodying some improvements over the De Havilland 4, was expected to come into quantity production in the near future. The Bristol Fighter, a British plane, was redesigned to take the Liberty 8 and the Hispano-Suiza 300 h. p. engines. A force of Italian engineers and skilled workmen was brought to America to redesign the Caproni night bomber to take three Liberty motors, and successful trial flights of this machine have been made.

Several new models are under experimentation. Chief of these is the Le Pere two-seater fighter, designed around the Liberty motor, the performance of which is highly satisfactory. Several of these planes were sent overseas to be tested at the front.

Production of Service Engines.

In view of the rapid progress in military aeronautics, the necessity for the development of a high powered motor adaptable to American methods of quantity production was early recognized. The result of the efforts to meet this need was the Liberty motor—America's chief contribution to aviation, and one of the great achievements of the war. After this motor emerged from the experimental stage, production increased with great rapidity, the October output reaching 4,200, or nearly one-third of the total production up to the signing of the armistice. The fac-

ories engaged in the manufacture of this motor, and their total production to Nov. 8, are listed in the following table:

Packard Motor Car company....	4,654
Lincoln Motor corporation.....	3,720
Ford Motor company.....	3,025
General Motors corporation....	1,554
Nordyke & Marmon company....	443

Total13,396

Of this total, 9,824 were high compression, or army type, and 3,572 low compression, or navy type, the latter being used in seaplanes and large night bombers.

In addition to those installed in planes, about 3,500 Liberty engines were shipped overseas, to be used as spares and for delivery to the allies.

Other types of service engines, including the Hispano-Suiza 300 h. p., the Bugatti and the Liberty 8-cylinder, were under development when hostilities ceased. The Hispano-Suiza 180 h. p. had already reached quantity production. Nearly 500 engines of this type were produced, about half of which were shipped to France and England for use in foreign-built pursuit planes.

Improvements in Instruments and Accessories.

Few facilities existed for the manufacture of many of the delicate instruments and intricate mechanisms going into the equipment of every battle plane. The courage and determination with which these most difficult problems were met and solved will form one of the bright pages in the archives of American industry.

One of the most important outgrowths of the research work which the war stimulated was the development of voice command in formation flying by means of wireless devices. The great significance of this invention will be appreciated when it is realized that the leader of a formation has heretofore been dependent on signals for conveying instructions to the individual units of the squadron.

Training of Personnel.

After the declaration of war the construction of training fields proceeded with such rapidity that the demand for training equipment greatly exceeded the output. Since the latter part of 1917, however, the supply of elementary training planes and engines has been more than sufficient to meet the demands, while the situation as regards certain types of planes for advanced training has greatly improved. Approximately 17,000 cadets were graduated from ground schools; 8,602 reserve military aviators were graduated from elementary training schools; and 4,028 aviators completed the course in advanced training provided in this country. Pending the provision of adequate equipment for specialized advanced training, the policy was adopted of sending students overseas for a short finishing course before going into action. The shortage of skilled mechanics with sufficient knowledge of airplanes and motors was met by the establishment of training schools from which over 14,000 mechanics were graduated.

At the cessation of hostilities there were in training as aviators in the United States 6,528 men, of whom 22 per cent were in ground schools, 37 per cent in elementary schools, and 41 per cent in advanced training schools. The number of men in training as aviator mechanics was 2,154.

Forces at the Front.

Early in 1918 the first squadrons composed of American personnel provided with French planes appeared at the front. The number was increased as rapidly as equipment could be obtained. On Sept. 30, the date of the latest available information, there were thirty-two squadrons at the front; of these fifteen were pursuit, thirteen observation, and four

bombing. The first squadron equipped with American planes reached the front in the latter part of July.

Losses in Battle and in Training.

Though the casualties in the air force were small as compared with the total strength, the casualty rate of the flying personnel at the front was somewhat above the artillery and infantry rates. The reported battle fatalities up to Oct. 24 were 128 and accident fatalities overseas 244. The results of allied and American experience at the front indicate that two aviators lose their lives in accidents for each aviator killed in battle. The fatalities at training fields in the United States to Oct. 24 were 262.

Commissioned and Enlisted Strength.

On America's entrance into the war, the personnel of the air service consisted of sixty-five officers and 1,120 men. When the armistice was signed the total strength was slightly over 190,000, comprising about 20,000 commissioned officers, over 6,000 cadets under training, and 184,000 enlisted men. In addition to the cadets under training, the flying personnel was composed of about 11,000 officers, of whom approximately 42 per cent were with the expeditionary force when hostilities ceased. The air service constituted slightly over 5 per cent of the total strength of the army.

AIRCRAFT PRODUCTION INQUIRY.

The failure of the United States to deliver fighting airplanes to American aviators in France and elsewhere in any appreciable quantity at the time they were most needed led to a demand for a searching inquiry into the cause of the delay. The following letter sent by Attorney-General T. W. Gregory to President Wilson Oct. 31, 1918, will give a clear idea of the charges and the nature of the investigation made by Judge Charles E. Hughes: Dear Mr. President:—On May 6 last you directed me to investigate and pursue charges of dishonesty or malversation in regard to the production of aircraft and on May 13 you asked Judge Charles E. Hughes to act with me in making this investigation. By far the larger part of the last five months has been consumed in taking testimony. An opportunity has been given to every person claiming to have grievances, charges or criticisms to appear and testify in person and produce other witnesses and data.

We spent many weeks in personally inspecting conditions and taking testimony at the larger plants having aircraft contracts with the government at Dayton, O.; Detroit, Mich.; Elizabeth and New Brunswick, N. J., and Buffalo, N. Y. The papers, books, correspondence, accounts and other records in the files of the signal corps at Washington, as well as those of the principal contractors and of the government at these plants, have been critically examined as far as there was reason to believe that they would throw light on the matters under investigation. We have examined nearly 300 witnesses and taken about 17,000 pages of testimony.

In an effort to make the investigation thorough we have attempted to go into every phase of aircraft production since our entry into the war in April, 1917, and had recourse to every source of information which appeared available. Every complaint or charge of wrongdoing has been heard and carefully considered. It is believed that the investigation has been exhaustive, except that full data as to contracts let abroad for planes have not been at hand, and the matter of spruce production on the Pacific coast has been gone into only to the extent that this could be done by the examination of witnesses at Washington. From the investigation made it has been concluded that the taking of the additional time necessary for obtaining complete data from Europe in regard to the contracts in question, or for a trip of in-

vestigation to the Pacific coast, where most of the spruce is produced, was not justified. During the period referred to Judge Hughes has given practically his entire time to this work and has been in direct charge of the investigation, which has been conducted by him with the co-operation of myself and other officials of the department of justice. The investigation has now been completed.

Some three weeks ago, at the conclusion of the taking of testimony, in order that you might have the independent judgment of both Judge Hughes and myself, each without conference with the other considered the evidence, reached his own conclusion, and prepared a report. On the afternoon of last Saturday, Oct. 26, Judge Hughes handed to me a copy of his report, together with a letter asking me to transmit it to you with whatever statement of views I wished to make. The report consists of 182 printed pages. By far the greater portion is devoted to a remarkably accurate statement of substantially all the transactions had since the beginning of the war in the course of the development of the aircraft program. After carefully examining this statement of the transactions had, I find myself in substantial accord therewith, and do not consider it necessary to present to you a somewhat full report which has heretofore been prepared in the department of justice. As hereinafter shown, I also find myself in accord with the conclusions presented by Judge Hughes on questions of dishonesty and malversation.

I do not consider it germane to this investigation to enter into criticisms of the program or of mistakes in policy or in the exercise of judgment.

I send you herewith Judge Hughes' report and present herein my conclusions and briefly supplement Judge Hughes' findings of fact in a few instances.

General Character of Charges.

When the investigation began in May it was sweepingly charged that \$691,851,866.47 appropriated for the fiscal year beginning July 1, 1917, had been expended with practically no results; that members of the aircraft boards had been financially interested in aircraft contracts; that German and disloyal influences had retarded the progress of the work, and that these influences, together with graft of various kinds, had entered into the transactions involved. It therefore seems desirable to state briefly what sums have been expended and what has been accomplished.

Amount Expended.

The \$691,851,866.47 appropriated was for all aviation purposes, including many things besides the building of aircraft. Contracts for airplanes and motors let here and abroad, it was estimated, would require \$474,910,706.55, but in May last this amount had by no means been expended. The actual disbursements for this purchase up to the close of the fiscal year ending June 30, 1918, were as follows:

For production in this country.....	\$106,741,490.77
For production abroad.....	25,605,074.31
For experimental and development work	1,697,830.19

Total\$134,044,395.27

This amount includes not only the cost of planes and motors delivered, but also large payments for special tools and for labor and materials in planes and motors not then finished. The figures are not now available to show just how much more has been disbursed on this account since June 30, though the total amount disbursed for all aviation purposes between that date and Sept. 30 was \$139,186,661.33.

Planes and Motors Acquired.

To provide for the needs of the army until production in this country could be expected contracts were let in the summer of 1917 in France for 875 training planes with engines and for 5,000 service planes and 8,500 service

engines, deliveries to begin in November and be completed in June, 1918, and in Italy for 700 service planes with engines. These contracts were not carried out as contemplated, partly because of unavoidable delay by this government in delivering materials, but largely because the unexpected increase in the needs of the French government overtaxed the capacity of the manufacturers. However, up to July 31, 1918, there had been acquired under foreign contracts 1,617 training and 1,513 service, or a total of 3,129 planes with engines. The deliveries of planes and engines produced in this country up to July 1, 1918, were:

Planes—Elementary training	4,572
Advanced training	1,148
Service	553

Total	6,171
Engines—Elementary training	7,662
Advanced training	2,579
Service	2,392

Total	12,633
-------------	--------

Since July 1 production has been such that up to Oct. 11, 1918, the figures were:

Planes—Elementary training	5,187
Advanced training	2,137
Service	2,350

Total	9,674
Engines—Elementary training	10,256
Advanced training	4,479
Service	9,937

Total	24,672
-------------	--------

When the 3,129 acquired abroad are added we have total planes 12,803, and 27,801 engines. While the only service planes thus far produced in this country have been observation and bombing planes, those acquired abroad include pursuit and combat planes.

Conduct of Members of Aircraft Board.

The results, as above set out, in view of the inherent difficulties of hurriedly expanding the signal corps from almost nothing to an immense organization, selecting upon more or less conflicting information from abroad the proper types of planes and engines, securing responsible and efficient contractors to engage in a new line of work, the designing and making of enormous quantities of machinery and tools, and the development of an industry almost unknown in this country and undergoing constant changes abroad, cannot be said to indicate dishonesty or malversation.

An exhaustive examination into the entire conduct of aircraft matters fails to show that any member of either board has had any desire to retard or delay production, or has done anything intended to accomplish that result, or has intentionally caused the waste of funds, or been actuated by a disloyal motive, or been guilty of dishonesty or malversation, unless there be truth in the specific charges which will now be referred to.

A. Interest in contracts.—I agree with the conclusion reached by Judge Hughes that there is no evidence upon which it can fairly be charged that any member of the aircraft boards, including Howard E. Coffin, Gen. Squier, Col. E. A. Deeds, Col. R. L. Montgomery, Col. S. D. Walden, Richard F. Howe, Harry B. Thayer, Admiral Taylor and other naval officers, has been unlawfully interested in any contract or transaction relating to aircraft production. Indeed, as to this charge, there has at no time been ground for a question involving any of these gentlemen except Col. Deeds.

B. Form of contracts.—Growing largely out of the popular understanding that contracts for aircraft provide that the compensation of the contractor shall be a fixed per cent of the cost of production, and thus make it to the interest of the contractor to increase that cost, the charge has been made that these contracts are themselves instruments for practicing frauds upon the treasury.

The fact is that no such contracts have been made. The government is to pay the cost of production, plus a fixed sum, which cannot be enhanced by increasing the cost of production. On the contrary, it is provided that the contractor shall share in the saving if the actual cost shall be less than an "estimated cost" stated in the contract. Hence, whatever other objections there may be to the contract, it is to the interest of the contractor to keep the cost of production as low as possible. Moreover, the right is reserved to the government to terminate the contract at any time by paying the amount expended plus the fixed profit on finished articles and 10 per cent of the cost of labor and materials in unfinished articles. If, therefore, experience should demonstrate that the contract would be unfair, the government could terminate it unless the contractor would agree to a readjustment of terms.

In the case of the Liberty motor contracts the practical result has been, first, a reduction of the estimated cost from \$6,087 to \$5,000, and of the fixed profit from \$913 to \$625, and finally the putting of the contracts on a fixed price basis when experience had shown what would be a fair price.

In view of the fact that when this form of contract was adopted there were no available data as to what the cost ought to be, it seems to have been devised to protect the interest of the government. I am unable to see how an inference of bad faith or official dereliction can be drawn from it.

C. Awarding of contracts.—There have been charges of unfair discrimination and favoritism in the awarding of contracts. These complaints relate almost entirely to contracts for planes, for which there were many applicants. Selections had to be made. It cannot be said that plausible reasons were wanting for those made. If mistakes were made nothing has been developed which would justify the charge that they resulted from corrupt motives.

D. Profits of contractors.—It has been charged that exorbitant profits to contractors have been allowed. On their face they appear to be unusually liberal, but when it is remembered that 60 per cent or more of them must be paid to the government as income and excess profits taxes and that most of the net profits will be invested in buildings and facilities which may or may not be capable of profitable use for an indefinite period after the termination of the contract, my conclusion is that no such profits have been allowed as to justify a charge of bad faith.

E. Cross-license agreement.—Whatever may be said of the charge that this arrangement tends to discourage future inventions, one of its results was to enable the government, through contractors, to secure the use of all necessary patents at a fixed cost and without friction. It was not entered into until the attorney-general had given an opinion that it did not conflict with the antitrust law. I find no basis for the suggestion that in bringing it about the members of the aircraft board were actuated by any unlawful or dishonest motive.

F. Conduct of Col. E. A. Deeds.—Of all the members of the aircraft boards the one most severely criticized and against whom most charges have been brought has been Col. E. A. Deeds. The evidence does not disclose any violation by Col. Deeds of the criminal laws. In the early part of 1918 public statements were issued with official authority purporting to set out the progress which had been made in the production of engines and planes and the prospects of the immediate future. These publications were not only misleading but they contained false statements, and were issued in reliance upon information principally furnished by Col. Deeds, who was acquainted with the actual facts. While the conduct of Col. Deeds in this matter was not criminal and cannot be said to have affected actual production, it was inexcusable and reprehensible.

I also find that Col. Deeds was guilty of censurable conduct in acting as confidential

adviser of H. E. Tabott and in conveying information to the latter with respect to transaction of business between the Dayton Wright Airplane company and the division of the signal corps of which Col. Deeds was the head. Whether or not Col. Deeds should be subjected to disciplinary measures for the acts referred to is a matter to be determined by the war department. I acquiesce in the recommendation of Judge Hughes that the facts be submitted to the secretary of war.

Officers and Employes of the Signal Corps.

When war was declared and the carrying out of the aircraft program was entrusted to the signal corps, its official personnel was hurriedly increased from a small organization to one of enormous proportions. It has been impossible, of course, to critically examine the conduct of all the military officers and civilians connected with this branch of the service. The official acts of the more prominent ones have been gone into and the general situation has received as much consideration as was possible. The investigation has failed to show, unless the instances hereinafter noted constitute exceptions, that any person, military or civilian, connected with the signal corps has desired to retard or delay production, or has done anything intended to accomplish that result, or has intentionally caused waste of funds, or has been actuated by disloyal motives, or been guilty of dishonesty or misversation. The incidents referred to are as follows:

A. Conduct of Lieut.-Col. J. G. Vincent, Lieut.-Col. George W. Mixter, and Second Lieutenant Samuel B. Vrooman, Jr.—Many successful business men tendered their services to or were invited to take part in the activities of the signal corps. Naturally the men selected were chosen as far as was practicable from lines of business similar to those in which the government expected to utilize their services. With the business interests of the country so largely involved in war work, many of these men in the course of the performance of their official duties not infrequently were brought in contact with corporations in which they held stock. It is to their credit that only three instances have been found in which officers or employes of the signal corps have apparently transacted business for the government with corporations in which they were interested.

One of these was Lieut.-Col. Vincent, who had been vice-president of the Packard Motor Car company, in charge of engineering, and who after he became an officer in the signal corps continued to hold certain shares of stock in that company. He was one of the original designers of the Liberty motor, held several important positions in the engineering department, and is now in charge of the airplane engineering division of the bureau of aircraft production. Under the circumstances set out in Judge Hughes' report, Lieut.-Col. Vincent was instrumental in having certain payments made to the Packard Motor Car company for drawings, models, tests, etc., and for eleven standardized engines. The course of procedure which resulted in the payments of this money was without a written contract and otherwise irregular and unusual. I agree with Judge Hughes' conclusion that Lieut.-Col. Vincent violated section 41 of the criminal code, which prohibits any person directly or indirectly interested in the pecuniary profits or contracts of a corporation from acting as an officer or agent of the United States for the transaction of business with such corporation. I further agree with Judge Hughes that the evidence does not afford ground for the conclusion that the government was defrauded, or that there was any intent to defraud on the part of any of the parties concerned, or that the services rendered were not worth the amount paid therefor, or that the estimates of the cost of the Packard company were not fair estimates.

Lieut.-Col. George W. Mixter held twenty-five shares (par value \$2,500) of the preferred

stock of the Curtiss Airplane and Motor corporation. This corporation had important contracts with the government for the production of airplanes. While holding stock Lieut.-Col. Mixter was in charge of the organization for the inspection of materials and products at one of the corporation's plants, and visited it from time to time in the exercise of his authority as head of the inspection department and as production manager. He stated on examination that he had bought a small amount of common and preferred stock of the corporation mentioned some years before and remembered selling some of it, but that he did not remember whether he retained any and had not thought of it after entering the service. It appears that he had parted with ownership of the common stock, but still owned the preferred. I agree with the conclusion of Judge Hughes that this was a violation of section 41 of the criminal code.

Second Lieutenant Samuel B. Vrooman, Jr., was the owner of \$10,000 in par value of the stock of the S. B. Vrooman company of Philadelphia, which had a contract with the government for supplying mahogany. While holding this stock Lieut. Vrooman was put in charge of the inspection of poppeller lumber, including mahogany. He selected the district officers, who in turn selected the inspectors; he issued instructions to the district officers and visited various plants to see that the inspectors were doing their duty and to pass on disputed points. The plant of the S. B. Vrooman company was one of those subject to his jurisdiction, but he denies that he ever personally inspected its lumber. I agree with Judge Hughes' conclusion that he violated section 41 of the criminal code.

B. Conduct of Mahogany Manufacturers and Importers' association—For a short period of time J. C. Wickliffe, J. Edward McCullough and Second Lieutenant Samuel B. Vrooman, Jr., while representing the government in dealing with mahogany manufacturers, received from one or more of these manufacturers salaries in addition to those paid by the government. I agree with Judge Hughes that under the circumstances this was a gross impropriety on the part of those paying and those receiving the additional salaries, but that there is no statute making it a criminal offense unless a case is made out of bribery or of a conspiracy to defraud the government. I am likewise of the view expressed by Judge Hughes that whether a charge of the sort indicated could be properly made would largely depend upon whether the terms and prices of the mahogany manufacturers were fair and reasonable, or excessive and the result of improper influence, and that the federal trade commission, with its special facilities for conducting an examination of that kind, should be requested to make a survey of the mahogany industry and the cost of delivering the lumber involved and reach a conclusion as to the reasonableness of the prices paid.

C. Matters of Minor Importance—In one office of the signal corps there seems to have been discovered petty graft fostered by a civilian employe, and evidence has been brought to our attention tending to establish dishonest inspection on a rather small scale in one of the least important plants. These matters are now under investigation by grand juries and indictments will be found if justified.

Contractors.

A searching inquiry has been made into the conduct of the work by the principal contracting companies. Agreeing substantially as I do with the statement of facts made by Judge Hughes, I am of opinion that it cannot fairly be charged that a managing officer of any contracting corporation has desired or attempted to delay production or been actuated by disloyal motives. To what extent, if any, inefficiency or mismanagement to be inferred from the facts stated, I do not deem it within my province to determine.

German Sympathizers.

In some of the factories a considerable number of alien enemies and persons of German birth or descent who, at least before our entry into the war, were German sympathizers, have been employed. No facts have been developed which would justify the belief that these men have been retained through any willingness on the part of their employers to have production retarded or defective planes produced. On the contrary, the government itself provided a system of permits under which they could be used. They were employed and retained because the manufacturer felt that the great difficulty of obtaining skilled laborers in sufficient numbers justified such risk as might be incurred.

In some instances the employer had faith in an old employe and was unwilling to discharge him because of mere rumors as to his loyalty. As an illustration of this the head of the drafting department at the Ford company's plant was of German birth and there were such persistent rumors that he was pro-German that some of the officers of the company thought it unsafe to retain him. He had been in the employ of the company for nine years, professed to be loyally interested in the work and the officers referred to testified that nothing definite could be proved against him. Mr. Ford stated that at a time when all citizens were called to make sacrifices one of German birth might do so by helping to produce motors to be used for his adopted and against his native country. He stated further that he had absolute confidence in this man's loyalty and, in the absence of any proof of disloyalty, refused to discharge him. While this indicated the application of an almost idealistic policy of being just to employes, results seem to have justified the course pursued. Though this man has been the object of the greatest watchfulness on the part of officers of the company who suspected him, nothing has been discovered indicating that he has been other than a loyal and efficient employe. It is fair to say that no sinister or disloyal influence has affected production in the Ford plant. The factory manager testified that there had been no sabotage and no efforts to retard production. Results in the Ford Motor company compare favorably with those in the best of the companies manufacturing Liberty motors. Its contract for 5,000 motors was let in November, 1917, nearly three months after contracts had been let to the Packard and Lincoln companies for 6,000 each. Up to Oct. 11, 1918, it had produced 1,868, while the Packard company had produced 3,864 and the Lincoln company 2,787. Not a case of sabotage has been reported to the department of justice from this plant. Indeed, it can be said that but little trouble has been traced to aliens or alleged German sympathizers in any of the plants.

Sabotage.

To what Judge Hughes has said on this subject I wish to add that since his report was handed to me I have had the records of the department of justice examined for the purpose of ascertaining the number of substantial complaints of sabotage in the factories engaged in manufacturing aircraft motors or parts for the government. The result shows twelve such complaints. Upon these complaints and the investigations which followed seven men have been indicted, two of whom have pleaded guilty and five of whom are awaiting trial. In this connection it is interesting to note that during the past eighteen months somewhere between 100,000 and 200,000 laborers have been engaged on government work in the factories indicated. Respectfully yours,

T. W. GREGORY,
Attorney-General.

JUDGE HUGHES' RECOMMENDATIONS.

The report made by Judge Hughes is too elaborate and lengthy to be reproduced here.

but his conclusions and recommendations are given herewith:

1. The controlling facts and the conclusions in relation to the matters reviewed have been stated under appropriate headings. It would be impossible to restate them in a brief summary. The defective organization of the work of aircraft production and the serious lack of competent direction of that work by the responsible officers of the signal corps, to which the delays and waste were chiefly due, were matters for administrative correction through unification of effort under competent control. The provisions of the criminal statutes do not reach inefficiency.

It is not within the province of this report to make recommendations with respect to administrative policy, but it should be said that under the direction of Mr. Ryan and Mr. Potter there has been improvement in organization, and progress has been made in gratifying measure.

2. The evidence discloses conduct which although of a reprehensible character cannot be regarded as affording a sufficient basis for charges under existing statutes, but there are certain acts shown, not only highly improper in themselves, but of especial significance, which should lead to disciplinary measures. The evidence with respect to Col. Edward A. Deeds should be presented to the secretary of war to the end that Col. Deeds may be tried by court-martial under articles 95 and 96 of the articles of war for his conduct (1) in acting as confidential adviser of his former business associate, H. E. Talbot of the Dayton Wright Airplane company, and in conveying information to Mr. Talbot in an improper manner with respect to the transaction of business between that company and the division of the signal corps of which Col. Deeds was the head; and (2) in giving to the representatives of the committee on public information a false and misleading statement with respect to the progress of aircraft production for the purpose of publication with the authority of the secretary of war.

3. The absence of proper appreciation of the obvious impropriety of transactions by government officers and agents with firms or corporations in which they are interested compels the conclusion that public policy demands that the statutory provisions bearing upon this conduct should be strictly enforced. It is therefore recommended that the officers found to have had transactions on behalf of the government with corporations in the pecuniary profits of which they had an interest should be prosecuted under section 41 of the criminal code.

4. The federal trade commission should be requested to report upon the proper cost of mahogany for airplane propellers to the end that upon the coming in of its report the question of the propriety of further action with respect to the transactions of the Mahogany Manufacturers and Importers' association may be determined.

5. It is recommended that the representatives of the department of justice should keep in touch with the progress of the audit of accounts so that it may be advised of the complete enforcement of the rights of the government in final settlement of accounts, and that the government has been fully protected against unnecessary loss through waste and the absence of suitable factory supervision.

6. Permit me also to suggest that a special division, or subdivision of the present bureau of investigation, in the department of justice should be assigned to the consideration of suspected delinquencies in connection with aircraft production, so that the work already done may be appropriately followed up. In particular, it is recommended that the activities in relation to spruce production, which being largely centered on the Pacific coast it was unattractable to embrace in the present inquiry, should be carefully scrutinized.

I have the honor to remain respectfully yours,
CHARLES E. HUGHES.

Mixer and Vincent Pardoned.

It was announced at the white house Dec. 3 that the president had pardoned Lieut.-Col. George W. Mixer and Lieut.-Col. J. G. Vincent, whom the report on aircraft production showed to be technically guilty of a breach of statutes because he entirely concurred in the views of the attorney-general with regard to these two cases. He believed that the two gentlemen concerned were entirely innocent of any improper or selfish intention, that their guilt was only technical and that their services to the government, which have been of the highest value and of a most disinterested sort, deserved the most cordial recognition.

SOME AVIATORS WHO DIED IN THE WAR.

Following is a list of American and other aviators who were killed in battle or by accident, chiefly on the western front in France. It is by no means complete, as details in the great majority of cases were lacking. Only a few of the accidental deaths are given:

Ash, Alan N., American; killed in combat; May 31, 1918.
 Ball, Capt. Albert, British, May 7, 1917.
 Baracca, Maj., Italian, missing after aerial battle; reported June 21, 1918.
 Baron, Ajt., French, killed in raid Oct. 12, 1916.
 Baughan, James H., American, fatally wounded in combat, July 2, 1918.
 Baylles, Frank L., American, killed in combat, June 17, 1918.
 Baine, J. Alexander, American, killed in battle; reported May 21, 1918.
 Bellows, Lieut. F. B., American, in battle; Sept. 13, 1918.
 Biddle, Julian, American, Aug. 20, 1917.
 Billings, David K., American, Sept. 15, 1917.
 Blumenthal, Arthur, American, killed in combat, June 7, 1918.
 Booth, Jr., Sergt. W. Vernon, American, fatally wounded in combat, June 28, 1918; died July 14.
 Brooks, Flight Lieutenant Robert E., American, killed in accident at Ayr, Scotland, April 15, 1918.
 Buckley, Corporal Everett C., American, Sept. 6, 1917.
 Byers, Sergt. Louis L., American, missing, July 24, 1918.
 Campbell, Andrew Courtney, American, Oct. 1, 1917.
 Carpenter, Charles M., American, at Shrewsbury, England, March 21, 1918.
 Castle, Capt. Vernon, British, Feb. 15, 1918.
 Chamberlain, Sergt. Cyrus F., American, killed in combat, June 18, 1918.
 Chapman, Charles W., Jr., American, killed in combat, May 3, 1918.
 Chapman, Sergt. Victor, American, June 23, 1916.
 Chaput, Lieut., French, killed in action, May 7, 1918.
 Chopin, Minor J., American, April 12, 1918, seaplane accident.
 Clapp, Lieut. Roger H., American, killed in action; announced July 25, 1918.
 Collins, Phelps, American, March 13, 1918.
 De Laage, Capt., French, May 24, 1917.
 Demeuldre, Sublieutenant, French, killed in action May 8, 1918.
 Drew, Corporal R. Sidney, American, killed in air fight, May 18, 1918.
 Durand, Lieut. Elliott, American, killed in action; reported Oct. 30, 1918.
 Ely, Lieut. Dinsmore, American, April 21, 1918.
 Garros, Roland, French, killed in action Oct. 5, 1918.
 Geikel, Lieut., German, killed in battle; reported May 13, 1918.
 Genet, Edmond C. C., American, April 16, 1917.
 Gilbert, Eugene, French, accidentally killed May 17, 1918.
 Goad, Lieut. John M., American, killed in combat June 20, 1918.
 Goettler, Lieut. Harold, American, killed in battle, Oct. 6, 1918.

Grisard, Lieut. John, American, in France, May 1, 1918; accident.
 Gundelach, Lieut. Andre H., American, killed in action Sept. 12, 1918.
 Guynemer, Capt. Georges, French, Sept. 11, 1917.
 Hall, Capt. James Norman, American, May 6, 1918; missing after fight inside German lines.
 Hirth, Lieut. F. K., American, killed in battle, July 16, 1918.
 Hobbs, Warren T., American, killed in France by anti-aircraft shell, June 26, 1918.
 Hoehndorf, Lieut. Walter, German, Sept. 13, 1917.
 Hollingsworth, Lieut. Frank E., American, killed in battle; reported Oct. 30, 1918.
 Hoskier, Corporal Ronald, American, April 23, 1917.
 Houdek, Sergt. George, American, Jan. 4, 1918.
 Hough, Frederick W., American, March 13, 1918; accident.
 Hugaenin, Lieut. S., American, in England, April 3, 1918.
 Ingersoll, First Lieut. Clayton E., American, killed by accident in France; reported May 1, 1918.
 Jones, Lieut. Eugene B., American, killed in battle Sept. 13, 1918.
 Jordan, Lieut. Marcus A., American, reported March 29; accident.
 Karl, Prince Friedrich, German, March 22, 1917.
 Kiss, Lieut., Austrian, killed in combat; reported May 27, 1918.
 Kobayashi, Sergt., Japanese, killed in battle in France; reported June 21, 1918.
 Lawrence, Lieut. Edgar A., American, killed in action June 4, 1918.
 Lloyd, Richard E., American, killed in accident in France; reported July 26, 1918.
 Lufbery, Maj. Raoul, American, killed in battle, May 19, 1918.
 Macklin, Lieut. Charles G., Kenilworth, American; missing May 30, 1918.
 McConnell, Sergt. James R., American, March 17, 1917.
 McCormick, Lieut. Alexander A., Jr., American, in combat, Sept. 24, 1918.
 McCudden, Maj. James B., British, killed in accident on French coast, July 9, 1918.
 McMonagle, Sergt. Douglas, American, Sept. 24, 1917.
 Marquardt, Lieut. James C., American, killed in France, April 24, 1918; accident.
 Middleditch, Lieut. George O., American; reported March 21, 1918.
 Mieffre, Capt. French, killed in action, May 8, 1918.
 Miller, Lieut. Walter B., American, killed in combat, Aug. 3, 1918.
 Misenhimer, Lieut. W. Kay, American, by accident in England; reported Sept. 13, 1918.
 Mitchell, John Purroy, American, near Lake Charles, La., July 6, 1918.
 Mueller, Max, German, Jan. 15, 1918.
 Nathan, Lieut. T. Cushman, American, in France, March 23, 1918.
 Nichols, Alan, American, died from wounds received in air battle; death reported June 13, 1918.
 Norton, Lieut. Fred, American, died from wounds received in battle, Aug. 17, 1918.
 O'Loughlin, Lieut. George O., American, killed in accident in France; reported June 29, 1918.
 Orr, Lieut. Edward, American, Sept. 14, 1918.
 Ortmayer, Andrew C., American, reported March 16, 1918.
 Ovington, Lieut. Carter L., American, killed in combat, May 29, 1918.
 Pavelka, Sergt. Paul, American, in Macedonia, Nov. 12, 1917; accident.
 Perry, Ensign Lloyd A., U. S. N. R., killed in seaplane accident in France, April 12, 1918.
 Poague, Lieut. Walter S., American, killed in accident at Azores; reported Nov. 8, 1918.
 Potter, Ensign Stephen, American, killed in battle over North sea, April 25, 1918.

Preston, Lieut. H. W., American, in England, May 14, 1918.
 Prince, Adjt. Norman, American, Oct. 15, 1916.
 Putnam, David E., American, killed in air battle, Sept. 18, 1918.
 Quette, Adjt., French, missing, June 5, 1918.
 Read, Curtis S., American, Feb. 28, 1918.
 Reinhard, Capt., German, July 16, 1918.
 Resnati, Capt. Antonio, Italian, killed in accident at Mineola, N. Y., May 17.
 Richthofen, Baron von, German, leading German "ace," killed in battle, April 21, 1918.
 Robbens, Lieut. William D., American, killed in accident in France, July 5, 1918.
 Robinson, Lieut. William, British, April 5, 1917.
 Rockwell, Lieut. Kiffin Yates, American, Sept. 23, 1916.
 Roosevelt, Lieut. Quentin, American, killed in battle at Chateau Thierry, France, July 14, 1918.
 Saxon, Harold, American, reported missing, June 13, 1918.
 Spencer, Dumaresku, American, Jan. 22, 1918.
 Sprague, Ensign William G., American, killed in seaplane accident in France, Nov. 1, 1918.

Sturtevant, Ensign Albert O., American, reported Feb. 18, 1918.
 Tailer, William S., American, Feb. 4, 1918.
 Thaw, Lieut. Blair, American, Aug. 18, 1918.
 Thierry, Lieut., Belgian, Feb. 23, 1918.
 Thomas, Gerald P., American, killed in air battle, Aug. 23, 1918.
 Thompson, Lieut. William A., American, July 19, 1918.
 Tonny-Charente, Lieut. Prince de, French (missing), March 20, 1918.
 Velle, Harry Glenn, American, March 15, 1918.
 Verdier, Lieut. Louis, French, killed in action, Aug. 23, 1918.
 Vertongen, Rene, Belgian, Feb. 4, 1918.
 Vosse, Lieut., German, Sept. 3, 1917.
 Walcott, Corporal Stuart, American, Dec. 12, 1917.
 Weddell, Thomas McMillan, American, killed in accident in France, July 1, 1918.
 West, Lieut. George O., American, killed in battle, Oct. 10, 1918.
 Wilford, Second Lieutenant John, American, killed in accident in France, July 5, 1918.
 Winter, Wallace, American, killed in France, March 8, 1918.
 Wohl, Lieut. Benjamin, American, killed in accident in France; reported Oct. 28, 1918.

NATIONAL COUNCIL OF DEFENSE REPORT.

The second annual report of the council of national defense, composed of the secretaries of war, navy, interior, agriculture, commerce and labor, made public Dec. 4, 1918, by Grosvenor B. Clarkson, acting director in reviewing the story of the work of the council during the fiscal year ending June 30, 1918, tells also the story of a very large part of the government's activities in the war of a nonmilitary character. Particularly is this true of the transition period included in the first six or eight months of the war, during which the initial mobilization of the country's industrial and commercial resources took place. The present report becomes, therefore, an important contribution to the official records of the war.

The report was made by W. S. Gifford, director of the council, until Nov. 1, last, to the secretary of war, as chairman to be transmitted by him to the president for submission to congress. At the end of the period covered by the report, Mr. Gifford points out, the work of initial mobilization, the main task which the council undertook in the emergency, was largely completed. The council set out to act as a connecting link between the nation in its normal state and the nation as a machine for making war. The transition period past, the council's role as a main link in the war government naturally became less active, though it continued to perform functions of a most vital nature, especially through the great council of defense system, made up of state, county, municipal and community organizations, reaching practically every hamlet in the country.

Nucleus for New Bodies.

A perusal of the report shows that the council served as a nucleus for innumerable new functions and relations which the war made necessary and for which no administrative agency existed at the outbreak of the conflict. Some of these after being initiated and partially developed by the council were passed on to existing executive departments; for some the council created new agencies, either acting under its jurisdiction or given separate jurisdiction by executive order or congressional act.

Perhaps the best example of the latter case was the war industries board, whose work was begun by and developed by the council and which was separated from it only on May 28 last. Other tasks which received their initial impulse from the council were: The food conservation program, aircraft program, war-labor adjustment, housing and many functions supplementary to those of the regular departments, such as those involved in

the storage, shipping, transportation, fuel and medical problems.

The director's report points out that in the act creating the council congress has included among its duties "the creation of relations which will render possible in time of need the immediate concentration and utilization of the resources of the nation." This phrase, "the creation of relations," expresses the main contribution of the council to the winning of the war. "It has been through the performance of the duty thus defined," the director says, "and liberally interpreted in the light of a great national emergency, that the council has performed its most important service during the year just past. In a sense the council has served as a great administrative laboratory through which new plans and new and necessary functions could be initiated and developed, and, where effective action demanded, passed on to permanent or emergency executive agencies of the government."

In saying that the date of the formal separation of the war industries board from the council of national defense marked the virtual end of the council's task in planning emergency machinery to meet new war functions, the director points out that this in no way diminishes the usefulness of the work which remains under the council's organization.

Mobilized Resources.

The report emphasizes that in mobilizing America's material resources for the government the council has at the same time been vitally concerned in the mobilization of the national spirit. In the effort the council has been aided particularly by the organizations under the state councils section with its state, county, municipal and community councils, numbering well over 100,000 at the date of the report. Through these local agencies acting with the local agencies of the woman's committee of the council, the government has been able to bring home to every section of the country in a way possible only to local agencies the meaning of its policies and the opportunities for individual service in the war.

The other branches of the council still active at the date of the report were the committee on labor, committee on engineering and education, medical section and general medical board, highways transport committee, national research council acting as the department of science and research of the council, and the naval consulting board, acting as a committee on inventions.

The report is divided into three sections, the first dealing with the history of the branches of the council still under its jurisdiction, the second with the war industries board up to

May 28, the date of its separation from the council, which, of course, includes much of its most significant work, and finally the story of the agencies dissolved or transferred to other jurisdiction during the year. Among the latter is the highly impressive story of the commercial economy board, transferred in May to become the conservation division of the war industries board. Almost the whole story of commercial conservation in the United States is summed up in the report of the commercial economy board.

In the history of the war industries board is summarized the government's policy in meeting the tremendous demand of the government departments for steel, copper, lead, tin, for finished products of all kinds and the way that they were met; the story of the transference of plants from peacetime to war work; the story of the transformation under war conditions of the government's purchasing policy, and the initial development of a general industrial policy.

Development of Price Fixing

Particularly valuable from the historical point of view, as well as that of immediate interest, is a record of the development of price fixing, which had its beginnings in the early days of the council of national defense with informal voluntary agreements on prices negotiated between representatives of industry and members of the advisory commission and of the council staff. The report reviews the story of the way in which these informal agreements with nothing but voluntary co-operation to bind them developed finally into a definite price fixing organization under the war industries board.

From similar modest beginnings the original first attempts at regulating priorities through voluntary co-operation developed into the existing large priorities organization, which at the time of the date of the report was issuing hundreds of orders with binding power behind them.

The Committee on Labor.

Much space is given to the work of the large committee on labor, with its many subdivisions, which assumed so significant a place in government activities in maintaining the hearty co-operation of the labor movement with national war policies. Among the specific accomplishments of the committee was the initiation of the soldiers' and sailors' war insurance plan, later turned over to the treasury department for administration. An account is also given of the council's part in developing a plan for war labor administration, turned over by the president to the jurisdiction of the secretary of labor.

The report reviews the work of the committee on transportation and communication, which organized the voluntary railroad administrative organization in effect prior to the

creation of the United States railroad administration. The council undertook much work in drawing together for the purposes of the war the railroads, the waterways and national highways. The individual report of the highways transport committee tells of the pioneer work done in developing of motor truck routes to relieve congested railroads and a report is also included of the inland waterways transportation committee of the council.

National Research Council.

"Special acknowledgment," the report says, "should be made of the valuable activities of the national research council, which has served as a department of the council of national defense, mobilizing and directing the research work of the country's scientific men. Its work has been invaluable in giving the government war agencies the benefit of scientific research, both directly and indirectly applicable to the purposes of the war."

In reviewing the first steps toward industrial mobilization the report states:

"From the outset the purpose of the council and the subordinate committees of the council was to offer a channel through which the voluntary efforts of American industrial and professional life could be focused. The story of the way in which the members of these committees, practically all of them serving without compensation, rallied to aid in the common cause and the extent of the practical accomplishment of their voluntary service has probably not been equaled anywhere. The general spirit underlying these original committees was fundamentally that of business organizing itself in aid of the government. Lack of time for complete organization by industry made impossible the formal election of the members of these committees by the industries which they represented. In choosing the membership the council sought for a representation from the industry as wide as practicable."

Results of the Plan.

It is probable that at this particular stage in the progress of the war no plan could have produced such effectual results in so brief a time as this voluntary system was able to show. The natural processes of administrative evolution gradually eliminated the old large committee system in the case of the industrial committees and substituted for it a closely knit scheme of sections under the general head of the war industries board, in which each section head had general authority over dealings with the industry with which he was particularly familiar. At the same time the industries of the country were rapidly organizing to assist the government in carrying on the war and were creating representative war service committees of their own, thus simplifying and strengthening the method of co-operation of business with the government.

LARGEST SEAPLANE IN THE WORLD.

All records for the number of passengers carried in any type of airplane were broken on Wednesday, Nov. 27, at the naval aviation station, Rockaway, when the navy's newest type seaplane, the giant NC-1, the largest seaplane in the world, made a flight with fifty men on board.

The pilot was Lieut. David H. McCullough of the naval reserve flying corps, and the flight was made to demonstrate the enormous lifting power of the latest model of bomb-carrying seaplanes. No special modifications were made for this test flight, most of the fifty men being accounted for in the large boat body.

The design and the construction of the NC-1, with its triple motors, huge size, and other distinctive features, was carried out by the navy in co-operation with the Curtiss Engineering corporation. It was not specifically a flying boat nor was it of the pontoon variety of seaplane, but combined the most valuable advantages of both, its size and purpose being considered. While it was entirely new and original in type, the NC-1 incorporated proved

essentials in aircraft construction and even before it was tested was regarded in naval circles as a preinsured success rather than as an experiment.

This was the first American trimotored seaplane, being propelled by three Liberty motors that develop a maximum of 1,200 horse power, at a cruising speed of eighty miles an hour. The flying weight of the machine was 22,000 pounds, while the weight of the seaplane itself, unloaded and without a crew, was 13,000 pounds.

An idea of the size of the big seaplane is shown by the fact that the wing spread is 126 feet, the breadth of wing 12 feet and the gap between wings 12 feet.

Late in 1918 the NC-1 made the trip from Rockaway to Washington, about 350 miles, in 5 hours and 20 minutes. The flight from Washington to Hampton roads, 150 miles, was covered in 2 hours and 15 minutes, and the trip from Hampton roads to New York, 300 miles, took 4 hours and 20 minutes.

OPERATIONS OF AMERICAN EXPEDITIONARY FORCE.

The following report made by Gen. Pershing on Nov. 20, 1918, to Secretary of War Baker is a document of great historical importance, and hence is reproduced in full. It gives the first comprehensive outline of the work of the American soldiers in France at the most critical period of the war, and makes public many details withheld by the censorship from general knowledge.

"Nov. 20, 1918.—My Dear Mr. Secretary: In response to your request, I have the honor to submit this brief summary of the organization and operations of the American expeditionary force from May 26, 1917, until the signing of the armistice, Nov. 11, 1918:

"Pursuant to your instructions, immediately upon receiving my orders I selected a small staff and proceeded to Europe in order to become familiar with conditions at the earliest possible moment. The warmth of our reception in England and France was only equaled by the readiness of the commanders in chief of the veteran armies of the allies and their staffs to place their experience at our disposal. In consultation with them the most effective means of co-operation of effort was considered. With French and British armies at their maximum strength, and all efforts to dispossess the enemy from his firmly entrenched positions in Belgium and France failed, it was necessary to plan for an American force adequate to turn the scale in favor of the allies. Taking account of the strength of the central powers at that time, the immensity of the problem which confronted us could hardly be overestimated. The first requisite being an organization that could give intelligent direction to effort, the formation of a general staff occupied my early attention.

General Staff.

"A well organized general staff through which the commander exercises his functions is essential to a successful modern army. However capable our divisions, our battalions and our companies as such, success would be impossible without thoroughly co-ordinated endeavor. A general staff broadly organized and trained for war had not hitherto existed in our army. Under the commander in chief, this staff must carry out the policy and direct the details of administration, supply, preparation and operations of the army as a whole, with all special branches and bureaus subject to its control. As models to aid us we had the veteran French general staff and the experience of the British, who had similarly formed an organization to meet the demands of a great army. By selecting from each the features best adapted to our basic organization, and fortified by our own early experience in the war, the development of our great general staff system was completed.

"The general staff is naturally divided into five groups, each with its chief, who is an assistant to the chief of the general staff. G. 1 is in charge of organization and equipment of troops, replacements, tonnage, priority of overseas shipment, the auxiliary welfare association and cognate subjects; G. 2 has censorship, enemy intelligence, gathering and disseminating

information, preparation of maps and all similar subjects; G. 3 is charged with all strategic studies and plans, movement of troops and the supervision of combat operations; G. 4 co-ordinates important questions of supply, construction, transport arrangements for combat, and of the operations of the service of supply, and of hospitalization and the evacuation of the sick and wounded; G. 5 supervises the various schools and has general direction and co-ordination of education and training.

"The first chief of staff was Col. (now Maj.-Gen.) James G. Harbord, who was succeeded in March, 1918, by Maj.-Gen. James W. McAndrew. To these officers, to the deputy chief of staff, and to the assistant chiefs of staff, who, as heads of sections, aided them, great credit is due for the results obtained not only in perfecting the general staff organization but in applying correct principles to the multiplicity of problems that have arisen.

Organization and Training.

"After a thorough consideration of allied organizations it was decided that our combat division should consist of four regiments of infantry of 3,000 men, with three battalions to a regiment and four companies of 250 men each to a battalion, and of an artillery brigade of three regiments, a machine gun battalion, an engineer regiment, a trench mortar battery, a signal battalion, wagon trains, and the headquarters staffs and military police. These, with medical and other units, made a total of over 28,000 men, or practically double the size of a French or German division. Each corps would normally consist of six divisions—four combat and one depot and one replacement division—and also two regiments of cavalry, and each army of from three to five corps. With four divisions fully trained, a corps could take over an American sector with two divisions in line and two in reserve, with the depot and replacement divisions prepared to fill the gaps in the ranks.

"Our purpose was to prepare an integral American force which should be able to take the offensive in every respect. Accordingly, the development of a self-reliant infantry by thorough drill in the use of the rifle and in the tactics of open warfare was always uppermost. The plan of training after arrival in France allowed a division one month for acclimatization and instruction in small units from battalions down, a second month in quiet trench sectors by battalion, and a third month after it came out of the trenches when it should be trained as a complete division in war of movement.

"Very early a system of schools was outlined and started which should have the advantage of instruction by officers direct from the front. At the great school center at Langres, one of the first to be organized, was the staff school, where the principles of general staff work as laid down in our own organization were taught to carefully selected officers. Men in the ranks who had shown qualities of leadership were sent to the school of candidates for commissions. A school of the line taught younger officers the principles of leadership, tactics and the use of

the different weapons. In the artillery school, at Saumur, young officers were taught the fundamental principles of modern artillery; while at Issoudun an immense plant was built for training cadets in aviation. These and other schools, with their well considered curriculums for training in every branch of our organization, were co-ordinated in a manner best to develop an efficient army out of willing and industrious young men, many of whom had not before known even the rudiments of military technique. Both Marshal Haig and Gen. Petain placed officers and men at our disposal for instructional purposes, and we are deeply indebted for the opportunities given to profit by their veteran experience.

American Zone.

"The crucial place the American army should take on the western front was to a large extent influenced by the vital questions of communication and supply. The northern ports of France were crowded by the British armies' shipping and supplies, while the southern ports, though otherwise at our service, had not adequate port facilities for our purposes, and these we should have to build. The already overtaxed railway system behind the active front in northern France would not be available for us as lines of supply and those leading from the southern ports of northeastern France would be unequal to our needs without much new construction. Practically all warehouses, supply depots and regulating stations must be provided by fresh constructions. While France offered us such material as she had to spare after a drain of three years, enormous quantities of material had to be brought across the Atlantic.

"With such a problem any temporization or lack of definiteness in making plans might cause failure even with victory within our grasp. Moreover, broad plans commensurate with our national purpose and resources would bring conviction of our power to every soldier in the front line, to the nations associated with us in the war, and to the enemy. The tonnage for material for necessary construction for the supply of an army of three and perhaps four million men would require a mammoth program of shipbuilding at home, and miles of dock construction in France, with a correspondingly large project for additional railways and for storage depots.

"All these considerations led to the inevitable conclusion that if we were to handle and supply the great forces deemed essential to win the war we must utilize the southern ports of France—Bordeaux, La Pallice, St. Nazaire and Brest—and the comparatively unused railway systems leading therefrom to the northeast. Generally speaking, then, this would contemplate the use of our forces against the enemy somewhere in that direction, but the great depots of supply must be centrally located, preferably in the area included by Tours, Bourges and Chateauroux, so that our armies could be supplied with equal facility wherever they might be serving on the western front.

Growth of the Service of Supply.

"To build up such a system there were talented men in the regular army, but more experts were necessary than the army could fur-

nish. Thanks to the patriotic spirit of our people at home, there came from civil life men trained for every sort of work involved in building and managing the organization necessary to handle and transport such an army and keep it supplied. With such assistance the construction and general development of our plans have kept pace with the growth of the forces, and the service of supply is now able to discharge from ships and move 45,000 tons daily, besides transporting troops and material in the conduct of active operations.

"As to organization, all the administrative and supply services, except the adjutant-general's, inspector-general's and judge-advocate-general's departments which remain at general headquarters, have been transferred to the headquarters of the services of supplies at Tours under a commanding general responsible to the commander in chief for supply of the armies. The chief quartermaster, chief surgeon, chief signal officer, chief of ordnance, chief of air service, chief of chemical warfare, the general purchasing agent in all that pertains to questions of procurement and supply, the provost marshal general in the maintenance of order in general, the director general of transportation in all that affects such matters, and the chief engineer in all matters of administration and supply, are subordinate to the commanding general of the service of supply, who, assisted by a staff especially organized for the purpose, is charged with the administrative co-ordination of all these services. "The transportation department under the service of supply directs the operation, maintenance and construction of railways, the operation of terminals, the unloading of ships and transportation of material to warehouses or to the front. Its functions make necessary the most intimate relationship between our organization and that of the French, with the practical result that our transportation department has been able to improve materially the operations of railways generally. Constantly laboring under a shortage of rolling stock the transportation department has nevertheless been able by efficient management to meet every emergency.

"The engineer corps is charged with all construction, including light railways and roads. It has planned and constructed the many projects required, the most important of which are the new wharves at Bordeaux and Nantes, and the immense storage depots at La Pallice, Montoir and Vievres, besides innumerable hospitals and barracks in various ports of France. These projects have all been carried on by phases keeping pace with our needs. The forestry service under the engineer corps has cut the greater part of the timber and railway ties required.

"To meet the shortage of supplies from America, due to lack of shipping, the representatives of the different supply departments were constantly in search of available material and supplies in Europe. In order to co-ordinate these purchases and to prevent competition between our departments, a general purchasing agency was created early in our experience to co-ordinate our purchases and, if possible, induce our allies to apply the principle among the allied armies. While there was no authority for the general use of ap-

HODGES.

proprations, this was met by grouping the purchasing representatives of the different departments under one control, charged with the duty of consolidating requisitions and purchases. Our efforts to extend the principle have been signally successful, and all purchases for the allied armies are now on an equitable and co-operative basis. Indeed, it may be said that the work of this bureau has been thoroughly efficient and businesslike.

Artillery, Airplanes and Tanks.

"Our entry into the war found us with few of the auxiliaries necessary for its conduct in the modern sense. Among our most important deficiencies in material were artillery, aviation and tanks. In order to meet our requirements as rapidly as possible, we accepted the offer of the French government to provide us with the necessary artillery equipment of 75s, 155 millimeter howitzers and 155 G. P. F. guns from their own factories for thirty divisions. The wisdom of this course is fully demonstrated by the fact that, although we soon began the manufacture of these classes of guns at home, there were no guns of the calibers mentioned manufactured in America on our front at the date the armistice was signed. The only guns of these types produced at home thus far received in France are 109 75 millimeter guns.

"In aviation we were in the same situation, and here again the French government came to our aid until our own aviation program should be under way. We obtained from the French the necessary planes for training our personnel, and they have provided us with a total of 2,676 pursuit, observation and bombing planes. The first airplanes received from home arrived in May, and altogether we have received 1,379. The first American squadron completely equipped by American production, including airplanes, crossed the German lines on Aug. 1, 1918. As to tanks, we were also compelled to rely upon the French. Here, however, we were less fortunate, for the reason that the French production could barely meet the requirements of their own armies.

"It should be fully realized that the French government has always taken a most liberal attitude, and has been most anxious to give us every possible assistance in meeting our deficiencies in these as well as in other respects. Our dependence upon France for artillery, aviation and tanks was, of course, due to the fact that our industries had not been exclusively devoted to military production. All credit is due our own manufacturers for their efforts to meet our requirements, as at the time the armistice was signed, we were able to look forward to the early supply of practically all our necessities from our own factories.

"The welfare of the troops touches my responsibility, as commander in chief to the mothers and fathers and kindred of the men who came to France in the impressionable period of youth. They could not have the privilege accorded European soldiers during their periods of leave of visiting their families and renewing their home ties. Fully realizing that the standard of conduct that should be established for them must have a permanent influence in their lives and on the character of their future citizenship, the Red

Cross, the Young Men's Christian association, Knights of Columbus, the Salvation Army and the Jewish welfare board, as auxiliaries in this work, were encouraged in every possible way. The fact that our soldiers, in a land of different customs and language, have borne themselves in a manner in keeping with the cause for which they fought is due not only to the efforts in their behalf but much more to their high ideals, their discipline and their innate sense of self-respect. It should be recorded, however, that the members of these welfare societies have been untiring in their desire to be of real service to our officers and men. The patriotic devotion of these representative men and women has given a new significance to the golden rule, and we owe to them a debt of gratitude that can never be repaid.

Combat Operations.

"During our periods of training in the trenches some of our divisions had engaged the enemy in local combats, the most important of which was Seicheprey by the 26th on April 20, in the Toul sector, but none had participated in action as a unit. The 1st division, which had passed through the preliminary stages of training, had gone to the trenches for its first period of instruction at the end of October and by March 21, when the German offensive in Picardy began, we had four divisions with experience in the trenches, all of which were equal to any demands of battle action. The crisis which this offensive developed was such that our occupation of an American sector must be postponed.

"On March 28 (1918) I placed at the disposal of Marshal Foch, who had been agreed upon as commander in chief of the allied armies, all of our forces to be used as he might decide. At his request the 1st division was transferred from the Toul sector to a position in reserve at Chaumont en Vexin. As German superiority in numbers required prompt action, an agreement was reached at the Abbeville conference of the allied premiers and commanders and myself on May 2, by which British shipping was to transport ten American divisions to the British army area, where they were to be trained and equipped, and additional British shipping was to be provided for as many divisions as possible for use elsewhere.

"On April 26 the 1st division had gone into the line in the Montdidier salient on the Picardy battle front. Tactics had been suddenly revolutionized to those of open warfare, and our men, confident of the results of their training, were eager for the test. On the morning of May 28, this division attacked the commanding German position in its front, taking with splendid dash the town of Cantigny and all other objectives, which were organized and held steadfastly against vicious counterattacks and galling artillery fire. Although local, this brilliant action had an electrical effect, as it demonstrated our fighting qualities under extreme battle conditions, and also that the enemy's troops were not altogether invincible.

"The German Aisne offensive, which began on May 27, had advanced rapidly toward the River Marne and Paris, and the allies faced

BUNDY.

a crisis equally grave as that of the Picardy offensive in March. Again every available man was placed at Marshal Foch's disposal, and the 3d division, which had just come from its preliminary training in the trenches, was hurried to the Marne. Its motorized machine gun battalion preceded the other units and successfully held the bridgehead at the Marne, opposite Chateau Thierry. The 2d division, in reserve near Montdidier, was sent by motor trucks and other available transport to check the progress of the enemy toward Paris. The division attacked and retook the town and railroad station at Bouresches and sturdily held its ground against the enemy's best guard divisions. In the battle of Belleau wood, which followed, our men proved their superiority and gained a strong tactical position, with far greater loss to the enemy than to ourselves. On July 1, before the 2d was relieved, it captured the village of Vaux with most splendid precision.

"Meanwhile our 2d corps, under Maj.-Gen. George W. Read, had been organized for the command of our divisions with the British, which were held back in training areas or assigned to second line defenses. Five of the ten divisions were withdrawn from the British area in June, three to relieve divisions in Lorraine and the Vosges and two to the Paris area to join the group of American divisions which stood between the city and any farther advance of the enemy in that direction.

"The great June-July troop movement from the States was well under way, and although these troops were to be given some preliminary training before being put into action, their very presence warranted the use of all the older divisions in the confidence that we did not lack reserves. Elements of the 42d division were in the line east of Reims against the German offensive of July 15, and held their ground unflinchingly. On the right flank of this offensive four companies of the 28th division were in position in face of the advancing waves of the German infantry. The 3d division was holding the bank of the Marne from the bend east of the mouth of the Surlin to the west of Mezy, opposite Chateau Thierry, where a large force of German infantry sought to force a passage under support of powerful artillery concentrations and under cover of smoke screens. A single regiment of the 3d wrote one of the most brilliant pages in our military annals on this occasion. It prevented the crossing at certain points on its front while, on either flank, the Germans, who had gained a footing, pressed forward. Our men, firing in three directions, met the German attacks with counterattacks at critical points and succeeded in throwing two German divisions into complete confusion, capturing 600 prisoners.

"The great force of the German Chateau Thierry offensive established the deep Marne salient, but the enemy was taking chances, and the vulnerability of this pocket to attack might be turned to his disadvantage. Seizing this opportunity to support my conviction, every division with any sort of training was made available for use in a counteroffensive. The place of honor in the thrust toward Soissons on July 18 was given to our 1st and 2d divisions in company with chosen French di-

visions. Without the usual brief warning of a preliminary bombardment, the massed French and American artillery, firing by the map, laid down its rolling barrage at dawn while the infantry began its charge. The tactical handling of our troops under these trying conditions was excellent throughout the action. The enemy brought up large numbers of reserves and made a stubborn defense both with machine guns and artillery, but through five days' fighting the 1st division continued to advance until it had gained the heights above Soissons, and captured the village of Bery-le-Sec. The 2d division took Beaurepaire farm and Vierzy in a very rapid advance and reached a position in front of Tigny at the end of its second day. These two divisions captured 7,000 prisoners and over 100 pieces of artillery.

"The 26th division, which, with a French division, was under command of our 1st corps, acted as a pivot of the movement toward Soissons. On the 18th it took the village of Forcy, while the 3d division was crossing the Marne in pursuit of the retreating enemy. The 26th attacked again on the 21st, and the enemy withdrew past the Chateau Thierry-Soissons road. The 3d division, continuing its progress, took the heights of Mont St. Pere and the villages of Charteves and Jaulgonne in the face of both machine gun and artillery fire.

"On the 24th, after the Germans had fallen back from Trugny and Epieds, our 42d division, which had been brought over from the Champagne, relieved the 26th and, fighting its way through the Forest de Fere, overwhelmed the nest of machine guns in its path. By the 27th it had reached the Ourcq, whence the 3d and 4th divisions were already advancing, while the French divisions with which we were co-operating were moving forward at other points.

"The 3d division had made its advance into Roncheres wood on the 29th and was relieved for rest by a brigade of the 32d. The 42d and 32d undertook the task of conquering the heights beyond Clerges, the 42d capturing Serzy and the 32d capturing Hill 250, both American divisions joining in the pursuit of the enemy to the Vesle, and thus the operation of reducing the salient was finished. Meanwhile the 42d was relieved by the 4th at Chery-Chartreuve and the 32d by the 28th, while the 77th division took up a position on the Vesle. The operations of these divisions on the Vesle were under the 3d corps, Maj.-Gen. Robert L. Bullard commanding.

Battle of St. Mihiel.

"With the reduction of the Marne salient we could look forward to the concentration of our divisions in our own zone. In view of the forthcoming operation against the St. Mihiel salient, which had long been planned as our first offensive action on a large scale, the 1st army was organized on Aug. 10 under my personal command. While American units had held different divisional and corps sectors along the western front, there had not been up to this time, for obvious reasons, a distinct American sector; but, in view of the important parts the American forces were now to play, it was necessary to take over a per-

BELL, JR.

manent portion of the line. Accordingly, on Aug. 30 the line beginning at Port sur Selle, east of the Moselle and extending to the west through St. Mihiel, thence north to a point opposite Verdun, was placed under my command. The American sector was afterward extended across the Meuse to the western edge of the Argonne forest, and included the 2d colonial French, which held the point of the salient, and the 17th French corps, which occupied the heights above Verdun.

"The preparation for a complicated operation against the formidable defenses in front of us included the assembling of divisions and of corps and army artillery, transport, aircraft, tanks, ambulances, the location of hospitals and the molding together of all of the elements of a great modern army with its own railheads, supplied directly by our own service of supply. The concentration for this operation, which was to be a surprise, involved the movement, mostly at night, of approximately 600,000 troops, and required for its success the most careful attention to every detail.

"The French were generous in giving us assistance in corps and army artillery with its personnel, and we were confident from the start of our superiority over the enemy in guns of all calibers. Our heavy guns were able to reach Metz and to interfere seriously with German rail movements. The French independent air force was placed under my command, together with the British bombing squadrons and our air forces, gave us the largest assembly of aviation that had ever been engaged in one operation on the western front.

"From Les Eparges around the nose of the salient at St. Mihiel to the Moselle river, the line was roughly forty miles long and situated on commanding ground greatly strengthened by artificial defenses. Our 1st corps (82d, 90th, 5th and 2d divisions), under command of Maj.-Gen. Hunter Liggett, restrung its right, on Pont-a-Mousson, with its left joining our 3d corps (the 89th, 42d and 1st divisions), under Maj.-Gen. Joseph T. Dickman, in line to Xivray, where it was to swing in toward Vigneulles on the pivot of the Moselle river for the initial assault.

"From Xivray to Monville the 2d colonial French corps was in line in the center and our 5th corps, under command of Maj.-Gen. George H. Cameron, with our 26th division and a French division at the western base of the salient, were to attack three difficult hills—Les Eparges, Combres, and Amaranthe. Our 1st corps had in reserve the 78th division, our 4th corps the 3d division, and our 1st army the 35th and 91st divisions, with the 80th and 33d available. It should be understood that our corps organizations are very elastic, and that we have at no time had permanent assignments of divisions to corps.

"After four hours' artillery preparation the seven American divisions in the front line advanced at 5 a. m. on Sept. 12, assisted by a limited number of tanks manned partly by Americans and partly by the French. These divisions, accompanied by groups of wire cutters and others armed with Bangalore torpedoes, went through the successive bands of barbed wire that protected the en-

emy's front line and support trenches, in irresistible waves on schedule time, breaking down all dense of an enemy demoralized by the great volume of our artillery fire and our sudden approach out of the fog.

"Our 1st corps curved back to the southwest through Nonsard. The 2d colonial French corps made the slight advance required of it on very difficult ground and the 5th corps took its three ridges and repulsed a counter-attack. A rapid march brought reserve regiments of a division of the 5th corps into Vigneulles in the early morning, where it linked up with patrols of our 4th corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles and beyond Fresnes-en-Woevre. At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of materiel, released the inhabitants of many villages from enemy domination and established our lines in a position to threaten Metz. This signal success of the American 1st army in its first offensive was of prime importance. The withdrawal of his forces had a formidable army to aid them and the enemy learned finally that he had one to reckon with.

Meuse-Argonne Offensive, First Phase.

"On the day after we had taken the St. Mihiel salient much of our corps and army artillery which had operated at St. Mihiel and our divisions in reserve at other points were already on the move toward the area back of the line between the Meuse river and the western edge of the forest of Argonne. With the exception of St. Mihiel, the old German front line from Switzerland to the east of Reims was still intact. In the general attack all along the line the operation assigned the American army as the hinge of this allied offensive was directed toward the important railroad communications of the German armies through Mezieres and Sedan. The enemy must hold fast to this part of his lines or the withdrawal of his forces with four years' accumulation of plants and materiel would be dangerously imperiled.

"The German army had as yet shown no demoralization and, while the mass of its troops had suffered in morale, its first class divisions and notably its machine gun defense were exhibiting remarkable tactical efficiency as well as courage. The German general staff was fully aware of the consequences of a success on the Meuse-Argonne line. Certain that he would do everything in his power to oppose us, the action was planned with as much secrecy as possible and was undertaken with the determination to use all our divisions in forcing decision. We expected to draw the best German divisions to our front and to consume them while the enemy was held under grave apprehension lest our attack should break his line, which it was our firm purpose to do.

"Our right flank was protected by the Meuse, while our left embraced the Argonne forest, whose ravines, hills and elaborate defense screened by dense thickets had been generally considered impregnable. Our order of battle from right to left was the 3d corps from the Meuse to Malancourt, with the 33d, 80th and 4th divisions in line, and the 3d division as

corps reserve; the 5th corps from Malancourt to Vauquois, with 79th, 77th and 61st divisions in line, and the 32d in corps reserve; and the 1st corps from Vauquois to Vienne le Chateau, with 35th, 28th and 77th divisions in line, and the 92d in corps reserve. The army reserve consisted of the 1st, 29th and 82d divisions.

"On the night of Sept. 25 our troops quietly took the place of the French, who thinly held the line in this sector, which had long been inactive. In the attack which began on the 26th we drove through the barbed wire entanglements and the sea of shell craters across "no man's land," mastering all the first line defenses. Continuing on the 27th and 28th, against machine guns and artillery of an increasing number of enemy reserve divisions, we penetrated to a depth of from three to seven miles, and took the village of Montfaucon and its commanding hill and Exermont, Gercourt, Cuisy, Septsarges, Malancourt, Ivroiry, Epinonville, Charpeny, Very and other villages. East of the Meuse one of our divisions, which was with the 2d Colonial French corps, captured Marcheville and Rieville, giving further protection to the flank of our main body. We had taken 10,000 prisoners, we had gained our point of forcing the battle into the open and were prepared for the enemy's reaction, which was bound to come, as he had good roads and ample railroad facilities for bringing up his artillery and reserves.

In the chill rain of dark nights our engineers had to build new roads across spongy, shell torn areas, repair broken roads beyond "no man's land," and build bridges. Our gunners, with no thought of sleep, put their shoulders to wheels and drakropes to bring their guns through the mire in support of the infantry, now under the increasing fire of the enemy's artillery. Our attack had taken the enemy by surprise, but quickly recovering himself, he began to fire counterattacks in strong force, supported by heavy bombardments with large quantities of gas. From Sept. 28 until Oct. 4 we maintained the offensive against patches of woods defended by snipers and continuous lines of machine guns, and pushed forward our guns and transport, seizing strategical points in preparation for further attacks.

Other Units with Allies.

"Other divisions attached to the allied armies were doing their part. It was the fortune of our 2d corps, composed of the 27th and 30th divisions, which had remained with the British, to have a place of honor in co-operation with the Australian corps on Sept. 29 and Oct. 1 in the assault on the Hindenburg line where the St. Quentin canal passes through a tunnel under a ridge. The 30th division speedily broke through the main line of defense for all its objectives, while the 27th pushed on impetuously through the main line until some of its elements reached Gouy. In the midst of the maze of trenches and shell craters and under cross fire from machine guns the other elements fought desperately against odds. In this and in later actions, from Oct. 6 to Oct. 19, our 2d corps captured over 6,000 prisoners and advanced over thirteen miles. The spirit and aggressiveness of these di-

visions have been highly praised by the British army commander under whom they served.

"On Oct. 2-9 our 2d and 36th divisions were sent to assist the French in an important attack against the old German positions before Reims. The 2d conquered the complicated defense works on their front against a persistent defense worthy of the grimmest period of trench warfare and attacked the strongly held wooded hill of Blanc Mont, which they captured in a second assault, sweeping over it with consummate dash and skill. This division then repulsed strong counterattacks before the village and cemetery of Ste. Etienne and took the town, forcing the Germans to fall back from before Reims and yield positions they had held since September, 1914. On Oct. 9 the 36th division relieved the 2d and in its first experience under fire withstood very severe artillery bombardment and rapidly took up the pursuit of the enemy, now retreating behind the Aisne.

Meuse-Argonne Offensive, Second Phase.

"The allied progress elsewhere cheered the efforts of our men in this crucial contest, as the German command threw in more and more first class troops to stop our advance. We made steady headway in the almost impenetrable and strongly held Argonne forest, for despite this re-enforcement it was our army that was doing the driving. Our aircraft was increasing in skill and numbers and forcing the issue and our infantry and artillery were improving rapidly with each new experience. The replacements fresh from home were put into exhausted divisions with little time for training, but they had the advantage of serving beside men who knew their business and who had almost become veterans overnight. The enemy had taken every advantage of the terrain, which especially favored the defense, by a prodigal use of machine guns manned by highly trained veterans and by using his artillery at short ranges. In the face of such strong frontal positions we should have been unable to accomplish any progress according to previously accepted standards, but I had every confidence in our aggressive tactics and the courage of our troops.

"On Oct. 4 the attack was renewed all along our front. The 3d corps tilting to the left followed the Brioules-Cunel road; our 5th corps took Gesnes while the 1st corps advanced for over two miles along the irregular valley of the Aire river and in the wooded hills of the Argonne that bordered the River used by the enemy with all his art and weapons of defense. This sort of fighting continued against an enemy striving to hold every foot of ground and whose very strong counterattacks challenged us at every point. On the 7th the 1st corps captured Chatel-Chehery and continued along the river to Cornay. On the east of Meuse sector one of the two divisions co-operating with the French captured Consenvoye and the Haumont woods. On the 9th the 5th corps, in its progress up the Aire, took Fleville, and the 3d corps, which had continuous fighting against odds, was working its way through Brioules and Cunel. On the 10th we had cleared the Argonne forest of the enemy.

"It was now necessary to constitute a second

COL. J. B. SANBORN.

army, and on Oct. 9 the immediate command of the 1st army was turned over to Lieut.-Gen. Hunter Liggett. The command of the 2d army, whose divisions occupied a sector in the Woivre, was given to Lieut.-Gen. Robert L. Bullard, who had been commander of the 1st division and then of the 3d corps. Maj.-Gen. Dickman was transferred to the command of the 1st corps, while the 5th corps was placed under Maj.-Gen. Charles P. Summerall, who had recently commanded the 1st division. Maj.-Gen. John L. Hines, who had gone rapidly up from regimental to division commander, was assigned to the 3d corps. These four officers had been in France from the early days of the expedition and had learned their lessons in the school of practical warfare.

"Our constant pressure against the enemy brought day by day more prisoners, mostly survivors from machine gun nests captured in fighting at close quarters. On Oct. 18 there was very fierce fighting in the Caures woods, east of the Meuse, and in the Ormont woods. On the 14th the 1st corps took St. Juvin, and the 5th corps, in hand to hand encounters, entered the formidable Kriemhilde line, where the enemy had hoped to check us indefinitely. Later the 5th corps penetrated further the Kriemhilde line, and the 1st corps took Champrignettes and the important town of Grandpre. Our dosed offensive was wearing down the enemy, who continued desperately to throw his best troops against us, thus weakening his line in front of our allies and making their advance less difficult.

Divisions in Belgium.

"Meanwhile we were not only able to continue the battle, but our 37th and 91st divisions were hastily withdrawn from our front and dispatched to help the French army in Belgium. Detraining in the neighborhood of Ypres, these divisions advanced by rapid stages to the fighting line and were assigned to adjacent French corps. On Oct. 31 in continuation of the Flanders offensive they attacked and methodically broke down all enemy resistance. On Nov. 3 the 37th had completed its mission in driving the enemy across the Escaut river and army established itself along the east bank included in the division zone of action. By a clever flanking movement troops of the 91st division captured Spitaals Bosschen, a difficult wood extending across the central part of the division sector, reached the Escaut, and penetrated into the town of Audenarde. These divisions received high commendation from their corps commanders for their dash and energy.

Meuse-Argonne—Last Phase.

"On the 23d the 3d and 5th corps pushed northward to the level of Bantheville. While we continued to press forward and throw back the enemy's violent counterattacks with great loss to him, a regrouping of our forces was under way for the final assault. Evidences of loss of morale by the enemy gave our men more confidence in attack and more ardor in enduring the fatigue of incessant effort and the hardships of very inclement weather.

With comparatively well rested divisions, the final advance in the Meuse-Argonne front was begun on Nov. 1. Our increased artillery force acquitted itself magnificently in support of

the advance, and the enemy broke before the determined infantry which, by its persistent fighting of the past weeks and the dash of this attack, had overcome his will to resist. The 3d corps took Anceville, Doulecon and Andevanne, and the 5th corps took Landres et St. Georges and pressed through successive lines of resistance to Bayonville and Chenery. On the 2d the 1st corps joined in the movement, which now became an impetuous onslaught that could not be stayed.

"On the 3d advance troops surged forward in pursuit, some by motor trucks, while the artillery pressed along the country roads close behind. The 1st corps reached Authe and Chailion-sur-Bar, the 5th corps Fosse and Nouart and the 3d corps Halles, penetrating the enemy's line to a depth of twelve miles. Our large caliber guns had advanced and were skillfully brought into position to fire upon the important lines at Montmedy, Longuyon and Conflans. Our 3d corps crossed the Meuse on the 5th and the other corps, in the full confidence that the day was theirs, eagerly cleared the way of machine guns as they swept northward, maintaining complete co-ordination throughout. On the 6th, a division of the 1st corps reached a point on the Meuse opposite Sedan, twenty-five miles from our line of departure. The strategical goal which was our highest hope was gained. We had cut the enemy's main line of communications, and nothing but surrender or an armistice could save his army from complete disaster.

"In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Between Sept. 26 and Nov. 6 we took 28,059 prisoners and 468 guns on this front. Our divisions engaged were the 1st, 2d, 3d, 4th, 5th, 26th, 28th, 29th, 32d, 33d, 35th, 37th, 42d, 77th, 78th, 79th, 80th, 82d, 89th, 90th and 91st. Many of our divisions remained in line for a length of time that required nerves of steel, while others were sent in again after only a few days of rest. The 1st, 5th, 26th, 42d, 77th, 80th and 90th were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best.

Operations East of the Meuse.

"On the three days preceding Nov. 10, the 3d, the 2d colonial and the 17th French corps fought a difficult struggle through the Meuse hills, south of Stenay, and forced the enemy into the plain. Meanwhile, my plans for further use of the American forces contemplated an advance between the Meuse and the Moselle in the direction of Longwy by the 1st army, while, at the same time, the 2d army should assume the offensive toward the rich coal fields of Briey. These operations were to be followed by an offensive toward Chateau-Salins east of the Moselle, thus isolating Metz. Accordingly, attacks on the American front had been ordered and that of the 2d army was in progress on the morning of Nov. 11, when instructions were received that hostilities should cease at 11 o'clock a. m.

At this moment the line of the American sector from right to left, began at Port-sur-Seille, thence across the Moselle to Vandieres and through the Woivre to Bezanvaux in the foothills of the Meuse, thence along to the foothills and through the northern edge of the

Woevre forests to the Meuse at Mouzey, thence along the Meuse connecting with the French under Sedan.

Relations with the Allies.

"Co-operation among the allies has at all times been most cordial. A far greater effort has been put forth by the allied armies and staffs to assist us than could have been expected. The French government and army have always stood ready to furnish us with supplies, equipment, and transportation and to aid us in every way. In the towns and hamlets wherever our troops have been stationed or billeted the French people have everywhere received them more as relatives and intimate friends than as soldiers of a foreign army. For these things words are quite inadequate to express our gratitude. There can be no doubt that the relations growing out of our associations here assure a permanent friendship between the two peoples. Although we have not been so intimately associated with the people of Great Britain, yet their troops and ours when thrown together have always warmly fraternized. The reception of those of our forces who have passed through England and of those who have been stationed there has always been enthusiastic. Altogether it has been deeply impressed upon us that the ties of language and blood bring the British and ourselves together completely and inseparably.

Strength.

"There are in Europe altogether, including a regiment and some sanitary units with the Italian army and the organizations at Murmansk, also including those en route from the States, approximately 2,053,347 men, less our losses. Of this total there are in France 1,338,169 combatant troops. Forty divisions have arrived, of which the infantry personnel of ten has been used as replacements, leaving thirty divisions now in France organized into three armies of three corps each.

"The losses of the Americans up to Nov. 18 are: Killed and wounded, 36,145; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160. We have captured about 44,000 prisoners and 1,400 guns, howitzers and trench mortars.

Commendation.

"The duties of the general staff, as well as those of the army and corps staffs, have been very ably performed. Especially is this true when we consider the new and difficult problems with which they have been confronted. This body of officers, both as individuals and as an organization, has, I believe, no superiors in professional ability, in efficiency, or in loyalty.

"Nothing that we have in France better reflects the efficiency and devotion to duty of Americans in general than the service of supply, whose personnel is thoroughly imbued with a patriotic desire to do its full duty. They have at all times fully appreciated their responsibility to the rest of the army and the results produced have been most gratifying.

"Our medical corps is especially entitled to praise for the general effectiveness of its work both in hospital and at the front. Embracing men of high professional attainments, and

splendid women devoted to their calling and untiring in their efforts, this department has made a new record for medical and sanitary proficiency.

"The quartermaster department has had difficult and various tasks, but it has more than met all demands that have been made upon it. Its management and its personnel have been exceptionally efficient and deserve every possible commendation.

"As to the more technical services, the able personnel of the ordnance department in France has splendidly fulfilled its functions both in procurement and in forwarding the immense quantities of ordnance required. The officers and men and the young women of the signal corps have performed their duties with a large conception of the problem and with a devoted and patriotic spirit to which the perfection of our communications daily testifies. While the engineer corps has been referred to in another part of this report, it should be further stated that the work has required large vision and high professional skill, and great credit is due the personnel for the high proficiency that it has constantly maintained.

"Our aviators have no equals in daring or in fighting ability and have left a record of courageous deeds that will ever remain a brilliant page in the annals of our army. While the tank corps has had limited opportunities its personnel has responded gallantly on every possible occasion and has shown courage of the highest order.

"The adjutant-general's department has been directed with a systematic thoroughness and excellence that surpassed any previous work of its kind. The inspector-general's department has risen to the highest standards and throughout has ably assisted commanders in the enforcement of discipline. The able personnel of the judge-advocate general's department has solved with judgment and wisdom the multitude of difficult legal problems, many of them involving questions of great international importance.

"It would be impossible in this brief preliminary report to do justice to the personnel of all the different branches of this organization which I shall cover in detail in a later report.

"The navy in European waters has at all times most cordially aided the army, and it is most gratifying to report that there has never before been such perfect co-operation between these two branches of the service.

"As to Americans in Europe not in the military services, it is the greatest pleasure to say that, both in official and in private life, they are intensely patriotic and loyal, and have been invariably sympathetic and helpful to the army.

"Finally, I pay the supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country.

"I am, Mr. Secretary, very respectfully,
"JOHN J. PERSHING,
General, Commander in Chief American Expeditionary Forces.
"To the Secretary of War."

MARINE CORPS WINS GLORY.

Josephus Daniels in his annual report for 1918 pays a glowing tribute to the deeds of the United States marine corps in the fighting on the western front in France. Because of its historical value this part of the report is herewith reproduced in full:

This efficient fighting, building and landing force of the navy [the marine corps] has won imperishable glory in the fulfillment of its latest duties upon the battle fields of France, where the marines, fighting for the time under Gen. Pershing as a part of the victorious American army, have written a story of valor and sacrifice that will live in the brightest annals of the war. With heroism that nothing could daunt, the marine corps played a vital role in stemming the German rush on Paris, and in later days aided in the beginning of the great offensive, the freeing of Reims and participated in the hard fighting in Champagne, which had as its object the throwing back of the Prussian armies in the vicinity of Cambrai and St. Quentin.

With only 8,000 men engaged in the fiercest battles, the marine corps casualties numbered 69 officers and 1,531 enlisted men dead, and 73 officers and 2,435 enlisted men wounded seriously enough to be officially reported by cablegram, to which number should be added not a few whose names did not appear in the official reports. However, with a casualty list that numbers nearly half the original 8,000 men who entered battle the official reports account for only 57 United States marines who have been captured by the enemy. This includes those who were wounded far in advance of their lines and who fell into the hands of Germans while unable to resist.

Stopped Drive on Paris.

Memorial day shall henceforth have a greater, deeper significance for America, for it was on that day, June 30, 1918, that our country really received its first call to battle—the battle in which American troops had the honor of stopping the German drive on Paris, throwing back the Prussian hordes in attack after attack, and beginning the retreat which lasted until imperial Germany was beaten to its knees and its emissaries were appealing for an armistice under the flag of truce. And to the United States marines, fighting side by side with equally brave and equally courageous men in the American army, to that faithful sea and land force of the navy fell the honor of taking over the lines where the blow of the Prussian would strike the hardest, the line that was nearest Paris and where, should a breach occur, all would be lost. The world knows to-day that the United States marines held that line; that they blocked the advance that was rolling on toward Paris at a rate of six or seven miles a day; that they met the attack in American fashion and with American heroism; that marines and soldiers of the American Army threw back the crack guard divisions of Germany, broke their advance, and then, attacking, drove them back in the beginning of a retreat that was not to end until the "cease firing" signal sounded for the end of the world's greatest war. In this connection Melville E. Stone, general manager of The Associated Press, said, following an exhaustive trip of investigation in Europe:

"They [the marines] had before them the best Prussian guards and shock troops—the Germans were perfectly sure they could drive the 'amateurs' back. It was a dramatic situation, for success meant that the Germans could probably push for Calais and other channel ports; but Foch dangled Paris before their eyes by putting raw Americans at a point across the direct road to Paris, in the pocket between Reims and Soissons. Instead of driving back the 'amateurs' the 'amateurs' drove them and gave them also a very sound thrashing. Their losses were heavy, but they did the work, and in doing it also did three things: They saved Paris; they seriously injured the morale of the best German troops,

and they set a standard and fixed a reputation for American troops that none other dared tarnish.

Such is the opinion of the head of a great newsgathering force regarding the achievements of the United States marines at Chateau Thierry, where in the battle field of Bois de Belleau, now named the Bois de la Brigade de Marine, by official order of the French staff, this branch of the navy met the Germans and blocked their drive on Paris.

Ordered to Front on Memorial Day.

It was on the evening of May 30, after a day dedicated to the memory of their comrades who had fallen in the training days and in the Verdun sector, that the 5th and 6th regiments and the 6th machine gun battalion, United States marines, each received the following orders:

"Advance information official received that this regiment will move at 10 p. m. 30 May by bus to new area. All trains shall be loaded at once and arrangements hastened. Wagons, when loaded, will move to Serans to form train."

All through the night there was fevered activity among the marines. Then, the next morning, the long trains of camions, busses and trucks, each carrying its full complement of United States marines, went forward on a road which at one place wound within less than ten miles of Paris, toward Meaux and the fighting line.

Through the town of Meaux went the long line of camions and to the village of Montriell-aux-Lions, less than four miles from the rapidly advancing German line. On this trip the camions containing the Americans were the only traffic traveling in the direction of the Germans; everything else was going the other way—refugees, old men and women, small children, riding on every conceivable conveyance, many trucking along the side of the road driving a cow or calf before them, all of them covered with the white dust which the camion caravan was whirling up as it rolled along; along that road only one organization was advancing, the United States marines.

Got Into Line on June 2.

At last, their destination reached early on the morning of June 2, they disembarked, stiff and tired after a journey of more than seventy-two miles, but as they formed their lines and marched onward in the direction of the line they were to hold they were determined and cheerful. That evening the first field message from the 4th brigade to Maj.-Gen. Omar Bundy, commander of the 2d division, went forward:

"Second battalion, 6th marines, in line from Le Thiolet through Clerebaults woods to Triangle to Lucy. Instructed to hold line. First battalion, 6th marines, going into line from Lucy through Hill 142. Third battalion in support at La Voie du Chatel, which is also the post command of the 6th marines. Sixth machine gun battalion distributed at line."

Meanwhile the 5th regiment was moving into line, machine guns were advancing and the artillery taking its position. That night the men and officers of the marines slept in the open, many of them in a field that was green with unharvested wheat, waiting the time when they should be summoned to battle. The next day at 5 o'clock, the afternoon of June 2, began the battle of Chateau Thierry, with the Americans holding the line against the most vicious wedge of the German advance.

Battle of Chateau Thierry.

The advance of the Germans was across a wheat field, driving at Hill 165 and advancing in smooth columns. The United States marines, trained to keen observation upon the rifle range, nearly every one of them wearing a marksman's medal or better, that of the sharpshooter or expert rifleman, did not wait

for those gray clad hordes to advance nearer. Calmly they set their sights and aimed with the same precision that they had shown upon the rifle ranges at Paris island, Mare island and Quantico. Incessantly their rifles cracked and with their fire came the support of the artillery. The machine gun fire, incessant also, began to make its inroads upon the advancing forces. Closer and closer the shrapnel burst to its targets. Caught in a seething wave of machine gun fire of scattering shrapnel, of accurate rifle fire, the Germans found themselves in a position in which further advance could only mean absolute suicide. The lines hesitated. They stopped. They broke for cover, while the marines raked the woods and ravines in which they had taken refuge with machine gun and rifle to prevent them making another attempt to advance by infiltrating through. Above a French airplane was checking up on the artillery fire. Surprised by the fact that men should deliberately set their sights, adjust their range and then fire deliberately at an advancing foe, each man picking his target, instead of firing merely in the direction of the enemy, the aviator signaled below "Bravo!" In the rear that word was echoed again and again. The German drive on Paris had been stopped.

Fierce Fighting in Belleau Wood.

For the next few days the fighting took on the character of pushing forth outposts and determining the strength of the enemy. Now the fighting had changed. The Germans, mystified that they should have run against a stone wall of defense just when they believed that their advance would be easiest, had halted, amazed; then prepared to defend the positions they had won with all the stubbornness possible. In the black recesses of Belleau wood the Germans had established nest after nest of machine guns. There in the jungle of matted underbrush, of vines, of heavy foliage, they had placed themselves in positions they believed impregnable. This meant that unless they could be routed, unless they could be thrown back, the breaking of the attack of June 2 would mean nothing. There would come another drive and another. The battle of Chateau Thierry was therefore not won and could not be won until Belleau wood had been cleared of the enemy.

It was June 6 that the attack of the American troops began against that wood and its adjacent surroundings, with the wood itself and the towns of Torcy and Boursches forming the objectives. At 5 o'clock the attack came, and there began the tremendous sacrifices which the marine corps gladly suffered that the German fighters might be thrown back.

Fought in American Fashion.

The marines fought strictly according to American methods—a rush a halt, a rush again, in four wave formation, the rear waves taking over the work of those who had fallen before them, passing over the bodies of their dead comrades and plunging ahead, until they, too, should be torn to bits. But behind those waves were more waves, and the attack went on.

"Men fell like flies"; the expression is that of an officer writing from the field. Companies that had entered the battle 250 strong dwindled to fifty and sixty, with a sergeant in command; but the attack did not falter. At 3:45 o'clock that night Boursches was taken by Lieut. James W. Robertson and twenty-odd men of his platoon; these soon were joined by two re-entrancing platoons. Then came the enemy counterattacks, but the marines held.

Charging on Machine Gun Nests.

In Belleau wood the fighting had been literally from tree to tree, stronghold to stronghold; and it was a fight which must last for weeks before its accomplishment in victory. Belleau wood was a jungle, its every rocky formation forming a German machine gun nest, almost impossible to reach by artillery or grenade fire. There was only one way to

wipe out these nests—by the bayonet. And by this method were they wiped out, for United States marines, bare chested, shouting their battle cry of "E-e-e-e y-a-a-h-h-h yip!" charged straight into the murderous fire from those guns, and won! Out of the number that charged, in more than one instance, only one would reach the stronghold. There, with his bayonet as his only weapon, he would either kill or capture the defenders of the nest, and then swinging the gun about in its position, turn it against the remaining German positions in the forest. Such was the character of the fighting in Belleau wood; fighting which continued until July 6, when after a short relief the invincible Americans finally were taken back to the rest billet for recuperation.

Held the Line for Many Weary Days.

In no other history of the marine corps there is no other such battle as that one in Belleau wood. Fighting day and night without relief, without sleep, often without water, and for days without hot rations, the marines met and defeated the best divisions that Germany could throw into the line. The heroism and doggedness of that battle are unparalleled. Time after time officers seeing their lines cut to pieces, seeing their men so dog tired that they even fell asleep under shellfire, hearing their wounded calling for the water that they were unable to supply, seeing men fight on after they had been wounded and until they dropped unconscious; time after time officers seeing these things, but seeing that the very limit of human endurance had been reached, would send back messages to their post command that their men were exhausted. But in answer to this would come the word that the lines must hold, and if possible those lines must attack. And the lines obeyed. Without water, without food, without rest, they went forward—and forward every time to victory. Companies had been so torn and lacerated by losses that they were hardly platoons; but they held their lines and advanced them. In more than one case companies lost every officer, leaving a sergeant and sometimes a corporal to command, and the advance continued. After thirteen days in this inferno of fire a captured German officer told with his dying breath of a fresh division of Germans that was about to be thrown into the battle to attempt to wrest from the marines that part of the wood they had gained. The marines, who for days had been fighting only on their half their nerve, who had been worn out from a lack of sleep, from lack of rations, from terrific shell and machine gun fire, straightened their lines and prepared for the attack. It came—as the dying German officer had predicted.

German Crack Troops Repulsed and Beaten.

At 2 o'clock on the morning of June 13 it was launched by the Germans along the whole front. Without regard for men, the enemy hurled his forces against Boursches and the Bois de Belleau, and sought to win back what had been taken from Germany by the Americans. The orders were that these positions must be taken at all costs; that the utmost losses in men must be endured that the Bois de Belleau and Boursches might fall again into German hands. But the depleted lines of the marines held; the men who had fought on their nerve alone for days once more showed the mettle of which they were made. With their backs to the trees and bowlders of the Bois de Belleau, with their sole shelter the scattered ruins of Boursches, the thinning lines of the marines repelled the attack and crashed back the new division which had sought to wrest the position from them.

And so it went. Day after day, night after night, while time after time messages like the following traveled to the post command:

"Losses heavy. Difficult to get runners through. Some have never returned. Morale excellent, but troops about all in. Men exhausted."

Exhausted, but holding on. And they con-

tinued to hold on in spite of every difficulty. Advancing their lines slowly day by day, the marines finally prepared their positions to such an extent that the last rush for the possession of the wood could be made. Then, on June 24, following a tremendous barrage, the struggle began.

The barrage literally tore the woods to pieces, but even its immensity could not wipe out all the nests that remained, the emplacements that were behind almost every clump of bushes, every jagged, rough group of bowlders. But those that remained were wiped out by the American method of the rush and the bayonet and in the days that followed every foot of Belleau wood was cleared of the enemy and held by the frayed lines of the Americans.

Praise from French Staff.

It was, therefore, with the feeling of work well done that the depleted lines of the marines were relieved in July, that they might be filled with replacements and made ready for the grand offensive in the vicinity of Soissons July 18. And in recognition of their sacrifice and bravery this praise was forthcoming from the French:

"Army Headquarters, June 30, 1918.—In view of the brilliant conduct of the 4th brigade of the 2d United States division, which in a spirited fight took Bouresches and the important strong point of Bois de Belleau, stubbornly defended by a large enemy force, the general commanding the 6th army orders that henceforth, in all official papers, the Bois de Belleau shall be named 'Bois de la Brigade de Marines.'"

"DIVISION GENERAL DEGOUTTE,

"Commanding 6th Army."

Gen. Pershing Personally Congratulates Marines.

Gen. Pershing's congratulations also were contained in the following order, issued by the brigade commander, dated June 9, 1918, to the units of his command:

"The brigade commander takes pride in announcing that, in addition to the commander in chief's telegram of congratulation to the 4th brigade, published in an indorsement from the division commander, dated June 9, Gen. Pershing has to-day visited division headquarters and sent his personal greetings and congratulations to the marine brigade. He also added that Gen. Foch, commander in chief of the allied armies in France, especially charged him this morning to give the marine brigade his love and congratulations to their fine work of the past week.

"By command of Brig.-Gen. Harbord,

"H. LAY, Major, Adjutant."

Gen. Harbord's Commendation.

On July 18 the marines were again called into action in the vicinity of Soissons, near Tigny and Vierzy. In the face of a murderous fire from concentrated machine guns, which contested every foot of their advance, the United States marines moved forward until the severity of their casualties necessitated that they dig in and hold the positions they had gained. Here, again, their valor called for high official praise, which came in the following:

"General Orders No. 46.—France, July 21.—It is with keen pride that the divisional commander transmits to the command the congratulations and affectionate greetings of Gen. Pershing, who visited the divisional headquarters last night. His praise of the gallant work of the division on the 18th and 19th is echoed by the French high command, the 3d corps commander, American expeditionary forces, and in a telegram from the former divisional commander. In spite of two sleepless nights, long marches through rain and mud, and the discomfort of hunger and thirst, the division attacked, side by side with the gallant 1st Moroccan division, and maintained itself with credit. You advanced over six miles, captured over 3,000 prisoners, eleven batteries of artillery, over 100 machine guns, minenwer-

fers and supplies. The 2d division has sustained the best traditions of the regular army and the marine corps. The story of your achievements will be told in millions of homes in all allied nations to-night.

"J. G. HARBORD, Major-General, N. A."

In Battle for St. Mihiel Salient.

Then came the battle for the St. Mihiel salient. On the night of Sept. 11 the 2d division took over a line running from Remenauville to Limey, and on the night of Sept. 14 and the morning of Sept. 15 attacked, with two days' objectives ahead of them. Overcoming the enemy resistance, they romped through to the Rupt de Mad, a small river, crossed it on stone bridges, occupied Thiaucourt, the first day's objective, scaled the heights just beyond it, pushed on to a huc running from the Zammes-Jouney ridges to the Binvaux forest, and there rested, with the second day's objectives occupied by 2:50 o'clock of the first day. The casualties of the division were about 1,000, of which 134 were killed. Of these about half were marines. The captures in which the marines participated were 80 German officers, 3,200 men, 90-odd cannon and vast stores. In his congratulations following the battle Gen. Lejeune said:

"Sept. 17, 1918.—General orders No. 54: I desire to express to the officers and men my profound appreciation of their brilliant and successful attack in the recent engagement.

"Our division maintained the prestige and honor of the country proudly and swept the enemy from the field."

"JOHN A. LEJEUNE,

"Major-General, United States Marine Corps."

Capture of Blanc Mont Ridge.

But even further honors were to befall the fighting, landing and building force, of which the navy is justly proud. In the early part of October it became necessary for the allies to capture the bald, jagged ridge twenty miles due east of Reims, known as Blanc Mont ridge. Here the armies of Germany and the allies had clashed more than once, and attempt after attempt had been made to wrest it from German hands. It was a keystone of the German defense, the fall of which would have a far reaching effect upon the enemy armies. To the glory of the United States marines, let it be said that they were again a part of that splendid 2d division which swept forward in the attack which freed Blanc Mont ridge from German hands, pushed its way down the slopes, and occupied the level ground just beyond, thus assuring a victory the full import of which can best be judged by the order of Gen. Lejeune, following the battle:

"France, Oct. 11, 1918.—Officers and Men of the 2d Division: It is beyond my power of expression to describe fitly my admiration for your heroism. You attacked magnificently and you seized Blanc Mont ridge, the keystone of the arch constituting the enemy's main position. You advanced beyond the ridge, breaking the enemy's lines, and you held the ground gained with a tenacity which is unsurpassed in the annals of war.

"As a direct result of your victory, the German armies east and west of Reims are in full retreat, and by drawing on yourselves several German divisions from other parts of the front you greatly assisted the victorious advance of the allied armies between Cambrai and St. Quentin.

"Your heroism and the heroism of our comrades who died on the battle field will live in history forever, and will be emulated by the young men of our country for generations to come.

"To be able to say when this war is finished, 'I belonged to the 2d division; I fought with it at the battle of Blanc Mont ridge,' will be the highest honor that can come to any man.

"JOHN A. LEJEUNE,

"Major-General, United States Marine Corps, Commanding."

Marksmanship Amazes Allies.

Thus it is that the United States marines have fulfilled the glorious traditions of their corps in this their latest duty as the "soldiers who go to sea." Their sharpshooting—and in one regiment 93 per cent of the men wear the medal of a marksman, a sharpshooter, or an expert rifleman—has amazed soldiers of European armies, accustomed merely to shooting in the general direction of the enemy. Under the fiercest fire they have calmly adjusted their sights, aimed for their man and killed him, and in bayonet attacks their advance on machine gun nests has been irresistible. In the official citation lists more than one American marine is credited with taking an enemy machine gun single handed, bayoneting its crew and then turning the gun against the foe. In one battle alone, that of Belleau wood, the citation lists bear the names of fully 500 United States marines who so distinguished themselves in battle as to call forth the official commendation of their superior officers.

Corps Fulfilled Every Glorious Tradition.

More than faithful in every emergency, accepting hardships with admirable morale, proud of the honor of taking their place as shock troops for the American legions, they

have fulfilled every glorious tradition of their corps, and they have given to the world a list of heroes whose names will go down to all history. Let one, therefore, stand for the many; one name denote all, one act of heroism tell the story of the countless deeds of bravery that stand forth brilliantly upon the victorious pages of America's participation in this the world's greatest war:

"First Sergeant Daniel Daly, 73d (machine gun) company, twice holder of the medal of honor, repeatedly performed deeds of valor and great service. On June 5 he extinguished, at risk of his life, fire in the ammunition dump at Lucy-le-Bois. On June 7, while sector was under one of its heaviest bombardments, he visited all gun crews of his company, then posted over a wide section of front, cheering the men. On June 10, single handed, he attacked enemy machine gun emplacement and captured it by use of hand grenades and his automatic pistol. On the same date, during enemy attack on Bouresches, he brought in wounded under fire. At all times, by his reckless daring, constant attention to the wants of his men, and his unquenchable optimism, he was a tower of strength until wounded by enemy shrapnel fire on June 30. A peerless soldier of the old school, twice decorated for gallantry in China and Santo Domingo."

REPORT OF THE CHIEF OF STAFF, GEN. PEYTON C. MARCH.

Following is the full text of the annual report of the army chief of staff, Gen. Peyton C. March, to the secretary of war. It includes a chronology of the major operations of the American army in France up to and including Nov. 11, 1918, the date of the signing of the armistice and consequent cessation of hostilities:

Office of Chief of Staff,
Washington, Nov. 11,
1918.

The Honorable the Secretary of War—Sir: The signing of the armistice on Nov. 11, 1918, has brought to a successful conclusion the most remarkable achievement in the history of all warfare.

The entry of the United States into the war on April 6, 1917, found the nation about as thoroughly unprepared for the great task which was confronting it as any great nation which had ever engaged in war. Starting from a minimum of organized strength, within this short period of sixteen months the entire resources of the country in men, money and munitions have been placed under central control, and at the end of this period the nation was in its full stride and had accomplished, from a military standpoint, what our enemy regarded as the impossible. The most important single thing, perhaps, in this record of accomplishment was the immediate passage by congress of the draft law, without which it would have been impossible to have raised the men necessary for victory. In organizing training and supplying the vast numbers of men made available by the draft law, very many changes have been made necessary in the organization of the war department and in the methods existing therein which were inherited from the times of profound peace.

Interchange of Staff Personnel.

Shortly after my installation as chief of staff I adopted the principle of interchange of the personnel of the various staff corps of the war department with men who had training in France, and in the application of this principle placed as the heads of various bureaus officers selected on account of

their ability and experience in the system of warfare as conducted in France.

At this time also, I found that the divisions organized in our armies were still regarded as separate units, designated by different titles in accordance with their origin. This made three different kinds of divisions in the United States army—the regular army, the national guard and national army divisions. All these distinctions were abolished and the entire army consolidated into a United States army, without regard to the source from which drawn. The source of supply of all replacements for the various elements of the army, without regard to their origin, was drafted men; and the titles had no significance whatever and were a source of possible disturbance from the standpoint of military efficiency. There was, in fact, no actual difference between these divisions with respect to efficiency—all have done high-grade work from whatever source drawn. All have shown courage and capacity for quick absorption of the fundamentals of modern military training and irresistible dash and force in actual fighting.

Promotion by Selection.

Accompanying this change, with your approval, I also introduced throughout the army the principle of promotion by selection. In order to conform to its legal organization, officers who belonged to the regular army continued to be promoted by seniority as a matter of record on paper, but the promotion of all officers, whether obtained from the regular army, national guard or national army, in the consolidated United States army was by selection, based entirely upon the merit of the officers as determined by boards organized in the different units and personally familiar with the work of the officers concerned. Without this principle the success which has been attained would have been literally out of the question. The necessity for promotion by selection was at an early date profoundly impressed upon all officers in authority in the American expeditionary forces, and on my return to this country from France to become chief of staff the principle was adopted for the entire army.

Results of Visit to France.

When I returned from France on March 1, 1918, I came back with the belief that the most fundamental necessity, both for the American expeditionary force and for the suc-

GEN. PEYTON C. MARCH.

cess of the allies, was that the shipment of troops to France should be vastly increased and should have priority over everything else; and as this policy became effective a study was instituted looking to our putting in France, if that was possible, enough men to bring the war to a conclusion in the shortest period possible. After a study of the entire situation, including as accurate an estimate of the potential strength of our allies on the western front and of the probable German strength as was possible, I came to the conclusion that the war might be brought to an end in 1919, provided we were able to land in France by June 30 of that year eighty American divisions of a strength of 3,360,000 men. On July 18, 1918, I submitted to you a formal memorandum, accompanied by a study of methods by which the men could be obtained, the supplies procured, and an analysis of the shipping which must be obtained in order to accomplish this very large military program. This was accompanied by an estimate of the cost of the proposed program.

Formation of Military Program.

In this study I recommended to you the adoption, as the American program, of eighty divisions in France and eighteen at home by June 30, 1919, based on a total strength of the American army of 4,850,000 men. This was approved by you and by the president of the United States and adopted as our formal military program. To carry this program into effect required the adoption by congress of a change in the draft ages so as to include men between the ages of 18 and 45 years, and also created a deficiency over the enormous appropriations already made by congress of some \$7,000,000,000. The presentation of the program to congress, accompanied by the statement that this increase in the army, if laws were passed by congress which would make it effective, would lead to success in 1919, produced prompt and favorable consideration by that body. Up to the signing of the armistice troops were being transported to France monthly in accordance with that program. The results speak for themselves. Another vital requirement which was early impressed upon us in France was the organization of a general staff for the American expeditionary force upon the lines which the experience of warfare by our allies had developed. It can be stated without qualification that the success of an army is impossible without a well-organized general staff.

Organization of General Staff.

On April 6, 1917, the date of the declaration of the war, the general staff was organized under the provisions of the act of June 3, 1916. Under this act the strength of the general staff was limited to fifty-five officers, exclusive of the chief of the militia bureau and the chief of coast artillery, with the proviso that "not more than one-half of all the officers detailed in said corps shall at any time be stationed, or assigned to, or employed upon any duty in or near the District of Columbia." On the date referred to, under the limitations imposed by this act, the general staff consisted of nineteen officers stationed in Washington and twenty-two stationed elsewhere. The task of preparing the plans for creating, mobilizing, organizing, training, equipping, transporting to Europe, and of maintaining and supplying there the present army of the United States accordingly devolved upon a group of nineteen officers, who constituted the general staff authorized by law to be stationed in the city of Washington. This personnel was, of course, ridiculously inadequate, not only for the gigantic task confronting them but for any general staff work commensurate with the responsibilities of that corps.

Increased by Act of May 12.

The act of May 12, 1917, increased the general staff to ninety-one and removed, for the

period of the emergency only, the restrictions of the act of June 3, 1916, relative to the number of these officers authorized to be stationed in Washington. This act was followed by the act of May 18, 1917, which authorized the president "to provide the necessary officers, line and staff," for the forces raised under this act, and removed for the period of the emergency the legislative restrictions as to the strength and organization of the general staff corps. On July 1, 1917, the personnel of the general staff corps consisted of ninety-four officers, seventy-three of whom were detailed under the provisions of the act of congress approved May 12, 1917, and twenty-one under the provisions of the act approved May 18, 1917. Of this number sixty-four were on duty in Washington. During the period covered by this report the personnel on duty with the general staff was increased until it reached a total of 1,222 officers, with an increase in the clerical force from 107 clerks to 2,884. The low ebb to which the general staff had been brought immediately previous to the war by restrictive legislation is indicated by the fact that of the officers so detailed in Washington only four had previous general staff experience; all of these were general officers. That the general staff of the army has been able, notwithstanding the legislative limitations heretofore imposed upon its organization and development, to develop and expand to meet with efficiency and promptitude the exacting and unprecedented demands and conditions that have confronted it bears eloquent testimony to the energy, resourcefulness and breadth of views of its personnel, as well as to the professional ability and the zeal of experts in every line of work who have in various capacities patriotically assisted and co-operated in carrying to its present state our tremendous military program.

Removal of Restrictions Advised.

Modern war involves the co-ordination and control of activities of a scope and magnitude hitherto not conceived of and requires on the part of the general staff a thorough study and knowledge of problems of construction, transportation, shipping, labor, manufacture, and finance, and demands skill and service comparable to that of the foremost experts in these lines of endeavor. It is now evident to everybody that present legislative restrictions upon the organization of the general staff should be removed, and its organization based upon a broad conception of its duties.

During the year, the most important in the history of the country both from a military and civil standpoint, there have been four heads of the general staff: Maj.-Gen. Hugh L. Scott, from the outbreak of the war until his retirement, Sept. 22, 1917; Gen. Tasker H. Bliss, from that date until May 19, 1918; Maj.-Gen. John Biddle, acting chief of staff at periods during the absence of Gen. Bliss in France, from Oct. 29, 1917, to Dec. 16, 1917, and from Jan. 9, 1918, to March 3, 1918. I assumed the duties of acting chief of staff on March 4, 1918, became chief of staff May 20, 1918, and have continued on that duty since.

Certain Regulations "Out of Date."

It was evident as the war progressed that the general staff was acting under an organization and in accordance with regulations which were not only unsuited to the duties and responsibilities confronting it, but were wholly out of date and were not suited to any general staff organization. Successive revisions of the orders under which the general staff was acting were made as events demanded, until the experience of the year crystallized the organization of the general staff into that set forth in General Order No. 80 of the war department. This order divides the work of the general staff into four primary divisions: 1. Operations; 2. Purchase, Storage, and Traf-

fic; 3. Military Intelligence; 4. War Plans. Each of these divisions is under the direction of a director, who is assistant chief of staff and is a general officer.

The Operations Division.

The operations division under the charge of Maj.-Gen. Henry Jervey, United States army, as director of operations and assistant chief of staff. This division is a consolidation of the former operations committee and equipment committee, which pertained to the war college under the previous organization. The operations division has had charge of the increase in the personnel of the army during the year. On June 30, 1917, the regular army consisted of 250,357 officers and enlisted men. On Aug. 5, 1917, 379,323 officers and men of the national guard were drafted into the federal service. There were a few special drafts of small numbers of national guardsmen into the federal service after Aug. 5, 1917. During the period covered by this report this division handed the calls into service of men obtained under the draft, the organization of these men into divisions and units necessary for the army, and turned over for shipment overseas up to Nov. 8, 1918, 2,047,667 men. The grand total of men in the army from returns for the period ending Oct. 15 is 3,624,774. The force was organized into divisions, the proper proportion of corps, army, and service of supply troops, and of replacement camps and training centers for infantry, field artillery, and machine guns in the United States. Central officers' training schools were organized at each of the replacement camps. Replacement camps and training centers for the various staff departments were also organized. Development battalions were organized at all division camps and large posts and camps for the purpose of developing men of poor physique and the instruction of illiterates and non-English-speaking men of the draft. During the fiscal year 5,377,468 officers and men were moved by railroad to and from the camps.

The operations division has during the year also handled all matters connected with the adoption of new types of equipment, fixing allowances for various units, the preparation of tables of equipment for them, and the distribution and issue of equipment, and the determination of priorities of such issue.

It has supervised and studied the needs of camps and construction work therein, and this work in general has been characterized by marked ability and devotion to duty.

Purchase, Storage and Traffic Division.

The division of purchase, storage and traffic is under the charge of Maj.-Gen. George W. Goethals, United States army, as assistant chief of staff and director of purchase, storage and traffic. This division was organized by merging divisions previously created, and which had been called "storage and traffic" and "purchase and supply." The new division thus organized was subdivided into embarkation service, storage, inland traffic service, and purchase and supply branch.

Embarkation—At the outbreak of the war the quartermaster's department had charge of the transportation of troops and supplies and continued to exercise these functions until Aug. 4, 1917, when they were transferred to a separate division of the general staff, specially created for the purpose, and designated as the embarkation service. As already noted, this was subsequently merged with the storage and traffic division.

Two primary ports of embarkation were established, one with headquarters at Hoboken, N. J., the other at Newport News, Va., each under the command of a general officer.

Use of Hoboken Piers.

The quartermaster's department was operating a service to Panama from New York, but

with the shipment of troops to France a new condition arose which was met only in part by taking over the Hoboken piers, formerly owned by the Hamburg-American and North German Lloyd Steamship companies, and the magnitude of the undertaking necessitated additional facilities. The situation at New York is complicated by the large amount of general shipping using the port, the diversified interests, even those of the government, and the complicated jurisdiction. An effort was made to bring about such a consolidation and unification as to secure greater co-operation with increased efficiency. To this end the war board for the port of New York was established in November, 1917. It was vested with full power and authority to make rules and regulations for operating the facilities of the port, to determine priorities, and to do what was necessary to provide for the prompt and economical dispatch of the business of the government in and about the port. Irving T. Bush was selected as the board's representative, with the title of chief executive officer. In addition to representing the board he was to arrange for the co-operative use of piers, warehouses, lighterage, terminals, railroads, trucking, and all other transportation facilities in and about the port.

In addition the need was felt for having a shipping expert closely associated with the embarkation service, familiar with the facilities at various ports, so that he could properly assign ships, select ships for the cargo to be moved, and arrange for their loading. Joseph T. Lilly was selected for this work and appointed director of embarkation.

Cargo Ships Taken Over.

In February, 1918, the available cargo ships were not sufficient to carry the supplies needed for maintaining the troops overseas. To secure the requisite additional tonnage necessitated taking ships from the existing trade routes and determining from what imports and exports they could best be spared without interference with those which were absolutely necessary. This brought about a new situation which could be handled only by those having a knowledge of the trades as well as the characteristics of various ships serving them, since some of them were suitable for war department needs and some were not. It had happened that an advantageous exchange of ships could have been made with the allies by which valuable time could have been saved in getting over cargo, but there was lack of knowledge as well as lack of authority. The whole situation was gone over at a conference between the secretary of war and the chairman of the shipping board, as a result of which the shipping control committee was created, consisting of P. A. S. Franklin, chairman; H. H. Raymond; and Sir Connop Guthrie, representative of the allies' shipping interests. The allocation and distribution of available tonnage, as well as questions of exchange of ships, was vested in this committee. So far as the work of the war department was concerned the committee was charged with the loading and unloading of cargo, coaling, supplies, repairs, and, except where vessels are commanded by the navy of inspection and manning. They also have charge of the management and operation of docks, piers, ships, loading, and discharging facilities under the control of the department, or of any board, officers, or agency operating such facilities, together with the direction and management of minor craft to be used in connection with the handling of steamers and their cargoes in port. The amount of cargo shipped overseas, the efficiency of the loading, and the reduction of the time of stay in the ports attest to the efficient manner in which the committee has operated, and it is not too much to say that they are to be largely credited with the results that have been accomplished.

Facilities at Newport News.

At Newport News the existing facilities were enlarged and increased under the direction of the commanding general of that port. At all the ports from which shipments are regularly made a representative of the shipping-control committee, selected and appointed by the chairman and designated the director of shipping for the port, performed the functions vested in the committee.

The commanding general of embarkation has the management and control of all matters pertaining to the movement of troops, their discipline and inspection, guard and police for terminal facilities connected with the port, assigning passengers to ships, whether army transports, naval transports, or commercial liners, storage facilities, operation and upkeep of all docks wharves, and terminal facilities, the payment of all rolls, rentals, and other accounts of the government in connection with the embarkation service.

New York Port of Embarkation.

The port of embarkation at New York, in addition to the activities pertaining exclusively to the embarkation of troops, includes Camp Merritt, N. J., and Camp Mills, Long Island, where troops are sent for final inspection, deficiencies in clothing and equipment are made up, and they are held waiting the arrival of transports. This port has been in command of Maj.-Gen. David C. Shanks and Brig.-Gen. William V. Judson.

At Newport News the embarkation service included, in addition to wharves and the administration pertaining to the embarkation of troops, an animal embarkation depot, Camp Stewart, for use as a rest and embarkation camp; Camp Hill for organizing labor units for overseas service, military administration of storage and terminal facilities at Lamberts Point, Pig Point, and a signal corps depot at Morrison, all in Virginia. This port was in command of Brig.-Gen. Grote Hutcheson.

Expeditionary depots were operated at Boston, Mass.; Philadelphia, Pa., and Baltimore, Md., primarily for the movement of freight. When cargo ships having accommodations for troops were loaded at these ports troops for the available space were sent from the camps under the direction of the commanding general at Hoboken; similarly shipments of troops were made from Montreal, Canada, and Halifax, Nova Scotia, when practicable. Cargo shipments were also made from other ports on the Atlantic and gulf coasts.

On May 25, 1918, the water transport branch of the quartermaster's department was transferred and made a part of the embarkation service.

Speeding Up Troop Shipments.

In April conditions abroad necessitated the speeding up shipments of troops, and brought to the service such transports as the British government could spare for the purpose, which have been continued in use. The army transports are officered and manned by the navy, as is the greater number of the cargo ships. The arrangements for transferring ships to naval control, as well as for convoys for troop and cargo ships are handled through the chief of operations of the navy, who has given every assistance. The way in which the work has been handled by the navy is shown by the loss of no troopships which were under their protection on the eastbound trips.

Storage—Congestion at the ports was caused by the shipment direct to seaboard, as soon as procured and purchased, of all supplies for overseas use, and this was complicated by the fact that the allies were pursuing the same practice; consequently confusion and delay were the result.

To prevent congestion it was necessary to provide the necessary reservoirs to absorb the shipments so that storage facilities had to be secured or provided not only at the ports but

at interior points at or near the centers of supply and production to take care of the materials until they could be dispatched overseas.

At the time that the division of storage and traffic was organized the engineer department had taken the necessary steps to secure or provide storage facilities in the vicinity of New York harbor and at Norfolk.

Storage Warehouse Construction.

Storage warehouses for the quartermaster's department were under construction at Governors island, Newark port terminals, and work had just been started at Norfolk.

Estimates were submitted for an appropriation of \$150,000,000 for the purpose of creating storage, and this was subsequently increased by an additional appropriation of \$138,500,000. The amount of space that should be provided was fixed by the general staff at one month's supply at the seaboard, one month's supply adjacent to the seaboard, and two months' supply at interior points.

The policy was adopted of acquiring all land necessary for storage purposes in fee and the construction of permanent buildings. The question of terminals at the seaboard had become a very vital one prior to the war, and such facilities would be of value at the conclusion of hostilities, especially in view of the upbuilding of our merchant marine.

The limited amount of shipping available and the necessity of securing as rapid turnaround as possible led to the selection of Boston, New York, Philadelphia, Baltimore, Norfolk and Charleston as the locations for the expeditionary depots at the seaboard. The Bush terminals were commandeered and plans prepared for an expeditionary depot at South Brooklyn in advance of the appropriation, work to be begun as soon as money became available.

Letting of Construction Contracts.

The construction division had in the meantime been vested with sole authority in all matters pertaining to the design, engineering and letting of contracts and the supervision of building operations in connection with all army projects, and therefore the work has been carried on by that division. The storage branch employed engineers to keep in touch with the work and indicate changes. It also determined the types of freight handling equipment required in the operation of the warehouses, prepared specifications for such equipment and effected purchases through the various procurement divisions of the several supply bureaus.

Under the appropriations secured for storage, work was begun on the expeditionary depots at Boston, New York, Norfolk and Charleston. While plans were under consideration for the construction of warehouses and piers at Baltimore and New Orleans, additional facilities for the storage of explosives were constructed at Raritan, N. J.; Curtis Bay, Md., and Pig Point, Va.; and an explosive depot is under construction at Charleston, S. C. Joint reserve depots for army supplies were constructed at Newark port terminal, Columbus, New Cumberland, South Schenectady and Springfield. Additional quartermaster depots were provided at Baltimore, Chicago, Jeffersonville, Newport News (purchased), Philadelphia, Pittsburgh and St. Louis.

Inland Traffic Service.

The inland traffic service was established on Jan. 10, 1918. As the government had taken over all of the railroads, the necessity for working in harmony with the organization that was placed in charge was apparent, and the railroad administration was requested to recommend a competent traffic man to handle the work. This resulted in the selection and assignment of H. M. Adams as chief of the section. He in turn secured his expert as-

sistants through the railroad administration.

At the time the section was formed approximately 15,000 carloads of war department property held in cars were congesting various Atlantic ports. Steps were taken which relieved this condition and brought about an orderly movement of the traffic when and in the quantities desired. The value of the inland traffic service was soon demonstrated and led to a reorganization, with authority to take over the transportation organizations of the various bureaus of the war department, both at Washington and throughout the country, so that as now organized the chief control of the transportation of troops, of the supplies of and for the various bureaus of the war department and for the contractors working for the several bureaus. This control extends over the entire country through the medium of representatives stationed at various traffic centers.

Working in conjunction with the railroad administration has resulted in minimizing the burdens of the carriers. The work has been performed most efficiently. More than 5,000,000 troops have been moved from their homes, from one camp to another, and from camps to the points of embarkation within the period covered by this report.

Arrangements have been made by which this branch will take charge of all express movements for the war department as well as the tracing of the movements of all war department property, including the contractors and others for the various bureaus.

Purchase and Supply Branch.

The purchase and supply branch is organized into the following subsections: Supply program, purchase, production, finance and emergency.

The supply program section receives the army program and compiles the requirements of the army in terms of both articles of issue and commodities, which are furnished to the war industries board, shipping board, war trade board and other government agencies. A comprehensive study of the requirement obligations of the United States and the allies is in preparation, and a large number of outstanding questions of displacement have been disposed of and supplied.

The purchase section provides for the consolidation of procurement of numerous articles of issue and raw material; has evolved a standardization in the form of contracts; prepared standard clauses for insertion in contracts to establish a standard purchase policy and legal procedure therewith; conducted investigation for reducing the number of types of articles purchased; leased and purchased all the real estate theretofore negotiated for by different departments, and supervised the commandeering and appraisal of all property for the use of the war department. It also co-operated with the war industries board for clearances on behalf of the war department.

The emergency section supervised the preparation of and issued standard specifications for paint, boxing, crating and baling, and established a surplus inactive supply service to provide for the utilization or disposition of obsolete inactive surplus supplies.

The production section provides for the fulfillment of promised deliveries of products in accordance with approved schedules.

The finance section has standardized accounting, fiscal methods and daily reports to show allotments, expenditures and requisitions on the treasury—in fact, a brief and complete statement in consolidated form of the daily financial operations of the war department.

A liaison officer has been appointed for each of the supply agencies. These officers and their representatives form a centralized liaison organization under the direction of an officer of this branch, from which radiate lines of

direct and speedy communication to each of the bureaus and corps. All conduct with these supply agencies is carried on through this liaison organization, which furnishes an effective means of co-ordination.

In the administrative section of the division a branch was set up for industrial research, having for its object the saving of cargo space, and investigations were made with this end in view. Regulations were issued with reference to boxing, baling and crating, and marking overseas shipments in co-operation with the various bureaus and outside experts. Special investigations were undertaken on the practicability of transporting boned beef to France instead of the complete carcass, as at present; the practicability of various substitutes for woolen cloth; the extent to which fiber containers can be substituted for metal containers. The work has been in charge of Dr. Arthur A. Hamerschlag.

Military Intelligence Division.

The military intelligence division has as director Brig.-Gen. Marlborough Churchill, United States army, assistant chief of staff. This division, which had been a branch, first of the war plans division and then of the executive division of the general staff, was separated completely and made an independent division by general orders which reorganized the general staff, thus putting the military intelligence division on a par with similar services of general staffs of other nations of the world.

The duties of the military intelligence division, in general, in the organization of the intelligence service, positive and negative, including the collection and co-ordination of military information; the supervision of the department intelligence officers and intelligence officers at posts, stations, camps and with commands in the field, in matters relating to military intelligence; the direction of counter-espionage work; the preparation of instruction in military intelligence work for the use of our forces; the consideration of questions of policy promulgated by the general staff in all matters of military intelligence; the co-operation with intelligence branches of the general staffs of other countries; the supervision of the training of officers for intelligence duty; the obtaining and issuing of maps, and the disbursement of and accounting for intelligence funds.

Co-ordination of Work.

One of the important functions of the director of the military intelligence division is that of co-ordinating the work of this service with other intelligence agencies. Possible duplications of work and investigation by the state department, treasury department, department of justice, navy department, war trade board and the war department are avoided or adjusted at weekly conferences held at the department of justice and attended by representatives of these departments who consider matters of common interest. For a similar purpose the director of military intelligence is a member of the fire prevention committee, the war industries board and the national research council.

For the purpose of securing close co-operation between the military intelligence services of the nations associated in the war, the British and French governments were requested by the United States to send officers to this country for liaison duty. These officers have been of great assistance in accomplishing this end because of their knowledge of the details of intelligence work in Europe.

Eight Sections Established.

For the performance of the service for which the military intelligence division was developed, eight sections have been established, each dealing with its peculiar problems and

working in close liaison with its fellows. They are as follows:

M. I. 1. This is the administrative and co-ordinating section. Its duties are to assist the director in supervising the work of the various sections, to account for the intelligence funds, to keep accurate records and files of the correspondence and reports of the division, to select and commission officers for this division, and to hire and supervise civilian personnel.

M. I. 2. This is the positive intelligence section. It is the province of this section to gather combat information and supply it to our fighting forces. It gathers political information from all countries now in the war against the United States or likely to enter the war on the side of the enemy. It attempts to estimate the psychological situation in enemy or prospective enemy countries. Further than this M. I. 2 develops plans for propaganda in foreign countries, prepares monographs on conditions in foreign countries and keeps them up to date. It distributes this information to the proper authorities.

M. I. 3. The functions of this section consist in the organization, instruction and supervision of the negative intelligence service within the military establishment; more specifically it protects the army by the prevention and detection of enemy and disloyal activity among the military, including civilian personnel under military authority and in volunteer auxiliary organizations.

Watch on Enemy Agents.

M. I. 4. The function of M. I. 4 is the collection, collation and proper dissemination of information with respect to the activities of enemy agents and propagandists in this country, and movements outside the army calculated to hinder the successful prosecution of the war.

M. I. 5. This section is concerned with the maintenance of close correspondence with military attaches abroad who collect information concerning the activities of enemy agents and other matters of military value. It digests all such information and places it in the proper channels for use.

M. I. 6. The work of this section is to translate for the war department the mass of material in foreign languages which it receives and which may be of value to the military organizations.

M. I. 7. This section is charged with obtaining maps issued by foreign countries, with making maps of foreign countries, with keeping them up to date, with their reproduction by photography and lithography, and with the censorship of motion and still pictures of the United States forces at home and abroad.

Code and Cipher Section.

M. I. 8. Code and cipher is handled by this section. Its duties are to code and decode messages, to prepare new code material, new code books and cipher systems, to train officers and military attaches in the use of the army code book and the official cipher, to decipher or decode messages submitted by various agents and to test for secret writing. This section also receives and transmits messages from and to military attaches and intelligence officers, and encodes and decodes those that require secrecy. The messages of the American Protective league are also handled here.

It may not be amiss to call attention to the enthusiastic co-operation which this division has consistently received from the various other intelligence agencies, civilian and others. The American Protective league, the department of justice, the office of naval intelligence, the customs, the war trade intelligence have all co-operated in the heartiest manner with each and every effort of the military in-

telligence division. Indeed, it is hardly saying too much to state that the success of the military intelligence division has in a very large measure been due to the loyal assistance which it has received at all times from the various agencies whose functions are similar to its own.

War Plans Division.

The war plans division of the general staff is under the direction of Brig.-Gen. Lyle Brown as director and assistant chief of staff. A very large volume of work has been accomplished by this division during the year. Exclusive of subjects pertaining to the historical branch, the inventions section and routine matters, 9,287 cases were handled by the division during the year.

These included studies as to policies for defense and the organization of the military forces in general as published in tables of organization, completed studies on the policy and plans for training the army in general, training replacement troops, training cadres, training centers, training schools, schools for senior and staff officers, and plans for physical reconstruction and vocational training of wounded soldiers.

In addition, through the training section, the war plans division has supervision of training in general and has kept in touch by inspections by its officers with methods used and progress made.

The legislative, regulations and rules branch of the war plans division has handled numerous changes in army regulations and war department orders made necessary by the present emergency, and has considered bills before congress pertaining to the army.

The Historical Branch.

The historical branch of the general staff was organized March 5, 1918, to collect and compile the records pertaining to the war under the approved policy, and satisfactory progress is being made. To June 30, 1918, 67,022 photographs and 2,590 feet of motion picture film had been received.

The inventions section was organized April 16, 1918. This section has taken over from the different agencies of the government the preliminary consideration of inventions and ideas of inventions of a military nature, with a view to placing before the proper bureaus of the war department those having sufficient military value to warrant test and development at the expense of the government. From April 16, 1918, to June 30, 1918, 4,645 cases were handled, a number of which were of exceptional merit and have already been put to use.

The work of the inventions section is not the development of ideas or inventions, but is to give them such preliminary study and consideration as to determine whether or not development should be pursued, and to forward them, if the consideration has been favorable, to such agencies as are particularly interested in the development and have the necessary funds for the purpose.

The chief of staff has as his principal assistant Maj.-Gen. Frank McIntyre, United States army, who acts as executive officer for the general staff and also for the chief of staff in his absence.

The Morale Section.

Besides the general staff divisions which have been referred to in the foregoing, there has been established in the general staff a morale section, under charge of Brig.-Gen. E. L. Munson, United States army, which has for its object primarily the stimulation of morale throughout the army, and maintaining a close connection and liaison with similar activities in civil life. This section had only gotten fairly into operation before the signing of the armistice, but had already shown its value, as a military asset.

Another important addition to the organization of the general staff has been the establishment of a personnel section, under charge of Brig.-Gen. F. P. Bishop, United States army. In this section has been consolidated the handling of appointments, promotions and commissions of the entire official personnel of the United States army. This section has proved to be of the greatest value and has come to stay.

"Lost Motion" Revealed.

A general survey of the staff activities of the war department revealed to me clearly that there was a great deal of lost motion in the matters of procurement of supplies of all kinds and in its storage and transportation. All the different staff corps were competing with each other for standard articles of purchase, and no attempt was made by the department to centralize the supply of such standard articles. The same thing was true of storage—each one of the staff corps having its own system of storage with the most uneconomical organization possible. The same situation was true with reference to the personnel, all the different arms of the service seeking the same class of men, instead of the men themselves being assigned by selective process to the position in the army for which they were best suited by their previous education and where they could do the most toward the common good.

In the matter of supplies the director of purchase, storage and traffic was given authority by me to take over from the various bureaus of the war department certain functions of procurement and storage, not interfering in any way with engineering or technical matters pertaining to specialized corps. This process was accompanied by the establishment of the office of director of finance, in whom has been vested the handling of certain portions of the appropriations which hitherto have been handled by heads of the staff corps.

The Personnel Section.

The same general idea is the basis of the establishment of the personnel section. Under the new system, if the head of a staff bureau desires the appointment of officers possessing certain special qualifications, instead of himself submitting names of men to be appointed officers, he calls upon personnel for the appointment of a number of men having the qualifications he has in mind, and the personnel section, from its classification of all men in the United States suitable for the work in question, is able to have commissioned for all the technical bureaus men with qualifications desired.

The signing of the armistice has interrupted the conclusion of the organization now under way for the consolidation of procurement and storage under the director of purchase, storage and traffic, but the principle is sound from the standpoint of organization and extremely economical in its results.

In addition to the changes indicated in the foregoing, a number of entirely new organizations have been created in the war department. The handling of production and personnel pertaining to the gas service, which I found was scattered among four different staff bureaus, was consolidated in the chemical warfare service and placed under the charge of Maj.-Gen. William L. Sibert, United States army, with a resulting marked increase in efficiency of the service itself.

A similar consolidation of all the motor transport facilities, which were scattered throughout the various supply bureaus of the government into a motor transport corps, under Brig.-Gen. Charles B. Drake, United States army, has placed this important development of modern warfare under a sound organization.

Similar Organizations Overseas.

The organization of these services in the United States was accompanied by similar organizations in the American expeditionary force in France.

The supply of officers for the very large military program has been throughout one of the most important problems which confronted the general staff. I have already indicated in the statement of the functions of the operations division of the general staff of the organization of central training camps for officers throughout the United States. When, however, we embarked upon the final program of placing eighty divisions in France and eighteen at home by June 30, 1919, which involved an army of approximately 4,800,000, the problem of the supply of officers became so serious that an understanding was obtained with the great mass of educational institutions throughout the United States resulting in the development of the student army training corps. This scheme absorbed for military purposes the academic plants of some 518 colleges and universities throughout the country and for vocational training in the army embraced some eighty more. This corps was put under the charge of Brig.-Gen. Robert I. Rees, United States army, and in its development we have had the energetic co-operation of college presidents and responsible college authorities throughout the entire United States. At the same time, in order to increase the supply of officers, the course at West Point was cut down to one year's intensive training, with the idea of planning at the disposal of the government 1,000 officers a year graduated from that extremely efficient plant rather than the graduation of about 200, which had been the case previously throughout the war.

Air Service and Signal Corps.

The separation of the air service from the signal corps under the provisions of the Overman bill, and the establishment of a bureau of military aeronautics, under Maj.-Gen. William L. Kenly, United States army, and of a bureau of aircraft production, under John D. Ryan, marked an extremely important step forward in the development of this portion of the military establishment. The armistice closes out this matter with the two branches of the air service in a state of marked efficiency and establishes unquestionably the necessity for the permanent separation of the air service from the signal corps in the reorganization of the army.

During this period another new agency created in the war department by executive order was the office of the chief of field artillery. This office has been filled by Maj.-Gen. William J. Snow, United States army. This establishment was accompanied by the creation in the American expeditionary force in France of the office of chief of artillery on Gen. Pershing's staff, having similar relation to all the artillery of the expeditionary force, which the chief of field artillery has toward the whole artillery at home. The work of this office has been accompanied by a marked increase in the efficiency of the training system in the various field artillery camps, and the office itself has proved to be of distinct value.

Plan for Army Reorganization.

I have directed the divisions of the general staff concerned to study and submit for your consideration a plan for the reorganization of our army, which will take advantage of our experience in this war, which has brought about many changes in organization of all arms of the service and has developed new arms not known when the war started. The air service, the tank corps, the development of heavy mobile artillery, the proper organization of divisions, corps and armies, all will be set forth in the scheme which will be submitted to you with the recommendation that it be transmitted for the consideration of Congress.

The historical section of the general staff, which has been organized for the purpose of digesting all information concerning the operations of all American forces, will in due process of time be able to completely summarize the work of the American expedition-

ary force in France, but at this time it has been out of the question for a complete statement of our operations to be more than indicated. I have therefore had prepared a chronology of the major American operations in France, covering the period from the first occupation of a sector of the line by American troops in April, 1918, to the time of the armistice, which is appended hereto as a matter of historical interest.

America's Pride in Her Armies.

The conduct of the American troops in France, their progressive development in military experience and ability, the fine staff work and the modesty and gallantry of the individual soldier are a matter of pride to all Americans. Gen. Pershing and his command have earned the thanks of the American people.

The work of Gen. Tasker H. Bliss as military representative of the war department with the American section of the supreme war council at Versailles has been of the greatest value to the war department.

I cannot close this report without making of record the appreciation of the war department of the work of the many trained and patriotic officers of the army whom the destiny of war did not call to France. These officers, forced to remain behind in the United States by the imperative necessity of having trained men to keep the machine moving, have kept up their work with such intelligence, zeal and devotion to duty as to show a high order of patriotism. The officers and men who have not been able on account of the armistice to be transported to France deserve also, with their comrades in France, the thanks of the American people.

P. C. MARCH,
General, Chief of Staff.

Chronology of Major Operations.

The chronology referred to in the foregoing report follows:

April 23-26—A sector in the vicinity of Breteuil, northwest of Montdidier, was occupied by the 1st division.

May 28—Cantigny was captured by the 1st division. A detachment of our troops, reinforced by French artillery, successfully attacked the enemy on a front of about 2,220 yards. We occupied Cantigny, captured some 200 prisoners and inflicted severe losses on the enemy.

June 10—The 2d division attacked in Bois de Belleau, advancing the line 900 yards on a front of one and one-half miles, capturing 300 prisoners, thirty machine guns, four trench mortars and stores of small arms ammunition and equipment. Held all of Hill 204 down to the village on the northeast slope, thus preventing the enemy from concentrating his forces in the northern part of Chateau Thierry.

June 11—The 2d division continued its advance in the Bois de Belleau, capturing more prisoners and machine guns and two 77 millimeter fieldpieces. Our aviators executed their first bombing raid, dropping numerous bombs on the railway station at Dommary-Baran court, northwest of Metz. All of our planes returned in safety. The artillery of the 2d division shelled the enemy in their areas, preventing concentration near Torcy, Monthiers, Hill 128 and La Gonetrie farm. It discovered and dispersed a group of 210 machine guns in the wood south of Etrepilly. The 2d division captured the last of the German positions in the Bois de Belleau, taking fifty prisoners, machine guns and trench mortars.

July 18—French and American troops advanced under the cover of a heavy storm on the front between Soissons and Chateau Thierry. The greatest advance was in the northern part of the sector, where a depth of five miles was attained, and we reached the heights southwest of Soissons, dominating the railroad and highways.

July 24.—The advance of the Franco-Amer-

ican forces continued and in the evening the line ran east of Bouzancy to Tigny, to Hartennes, Grand Rozoy, Ouchy-le-Chateau Armentieres, Coigny, Courpoil, and then joined the old line at Jaulgonne. West of Reims, Marfaux was retaken and the line ran from Aulilly, through Mezy, and joined the old line at Coulommies.

July 25.—The line ran from the Ourcq to the Marne where the allied troops advanced six kilometers in the center and three to four kilometers on the flanks. The line in the evening ran from Armentieres to Bruvères, the eastern edge of the Bois de la Tournelle, the eastern edge of Beuvardes, the eastern edge of Le Charnel, the crossroads at Gros Chene, La Boulangers, the northern edge of Treloup, Chassins.

July 26.—The line ran: Nanteuil, Notre Dame, Hill 123, Hill 118, La Misere, Hill 100, southwestern part of Bois de la Tournelle, Hill 111, Le Charnel. Hard fighting continued all day and the French and American steadily advanced on Fere.

July 27.—The 42d division tried to cross the Ourcq, but was driven back by heavy artillery fire.

July 28.—The 42d division renewed the assault, crossed the river and after vigorous fighting took Seringes-et-Nesles, Nesles and Sergy. The 28th division held the line about one kilometer north of the Ourcq. During the day slow progress was made, the enemy slowly falling back after bitter rear guard action.

July 29.—Franco-American troops advanced three kilometers from Aulilly to Villers-Agron and Bouteux. Sancy, Seringes, Nesles and Clerges were included within our lines.

July 30.—Our pressure continued on the right bank of the Ourcq. The railroad station at Fere and Cayenne farm remained in our possession. We lost Seringes-et-Nesles, but re-occupied Sergy, Hill 312 and the woods eight kilometers north of Ronchères.

July 31.—The 28th division retook Seringes-et-Nesles. The 32d division attacked in Crimettes woods with success; the woods were taken, and troops advanced to Clerges. German counterattacks were brilliantly repulsed with the bayonet and an immense amount of materiel and equipment was taken from the enemy.

Aug. 3.—After continuous fighting late in the evening Soissons was taken, and a line extending along the Vesle to between Braisne and Bazoches was being consolidated. South of the Aisne our troops drove back the enemy rear guard. Acting with the 4th division, the 32d division reached a line from Ville Savoye to a point just north of St. Gilles.

Aug. 4.—A large enemy patrol attacked in the vicinity of Coules, but was driven off by a combat group of the 5th division, which had been re-enforced. Our troops were very active in patrolling, having sent out over seven reconnaissance, combat and ambush patrols. The 32d division took Fismes. In an eight-day battle this division forced the passage of the Ourcq, took prisoners from six enemy divisions, met, routed and decimated a crack division of the Prussian guards, a Bavarian division and one other enemy division, and drove the enemy line back for sixteen kilometers.

Aug. 6.—The 28th division launched an attack the objective of which was the north bank of the Vesle. The attack was met by exceedingly heavy machine gun and artillery fire. On the right our troops succeeded in crossing the river and advancing to the highway which runs from Reims to Soissons. On the left the advance was held up by the enemy's fire.

Aug. 7.—The units on the left advanced across the river and occupied the railroad lines on the north bank. The casualties resulting from this operation were considerable. A violent enemy counterattack was completely repulsed and a number of prisoners and machine guns were left in our hands.

Aug. 8.—As a result of successful operations on the evening of Aug. 8, eleven companies of

infantry and some machine gun attachments of the 28th division reached the north bank of the Vesle.

Aug. 10.—The 28th division launched an attack in Fismette. A creeping barrage moved ahead of them. They made some progress, but were soon exposed to flanking fire from both the east and the west and were forced to fall back to Fismette. The position here was very difficult. Flanking machine gun fire came from both sides and heavy casualties were reported. A box barrage was placed around the town and ammunition was sent up. The town was held by one battalion, with one machine gun platoon, which received orders to hold the position at all costs.

Aug. 17.—After strong artillery preparation the infantry of the 5th division captured the village of Frapelle and consolidated the lines north of the road running into the town from the southeast.

Aug. 19.—The enemy continued shelling Frapelle positions and the artillery of the 5th division replied actively.

Aug. 21.—The 5th division repulsed hostile attack with heavy loss to the enemy and with no casualties to ourselves. The 32d division, acting with the 10th French army, advanced to and held Juvisy. The 77th division cleared the small wood between the Vesle and the railroad west of Chateau du Diable.

Sept. 3.—During the five days prior to Sept. 3 the 32d division made daily advances against the enemy, gaining six kilometers through very difficult terrain and against violent opposition. It captured eleven officers and 920 enlisted men. A large amount of guns and munitions was captured. A patrol of the 77th division penetrated to Bazoches.

Sept. 5.—French and American units advanced in the Oise-Reims area as far as Conde. Strong patrols of the 77th division were pushed forward north of the Vesle and were encountered by machine gun resistance. Our casualties were slight. The 28th division crossed the Vesle in force and pursued the enemy to the north.

Sept. 6.—The artillery of the 28th division directed harassing and destructive fire on the Aisne bridges while the enemy harassed the villages in our rear areas, using a great number of gas shells.

Sept. 7.—The 28th division repulsed two enemy counterattacks. The 77th division drove the enemy out of La Cendriere farm and passed the Aisne canal.

Sept. 12.—After four hours' bombardment our troops advanced on the south and west flanks of the St. Mihiel salient at 5 a. m. By 7:30 a. m. the forces operating on the south had reached the southern edge of the Bois Jullé, the Quart de Reserve, and the northern edge of the Bois de Mort Mare. By noon they had reached Essey and Vieville and the army operating in the difficult ground in the west had captured Les Eparques. At 6 p. m. the troops had reached a point one kilometer east of Senzey and had taken St. Remy and Combres. During the night the troops on the western flank of the salient advanced five miles in five hours, reaching Vigneulles by 3 a. m.

Sept. 14.—There was general advance along the entire line, and the American army established itself on the following front: Menheulles, Fresnoy, Pintheville, St. Hilaire, Doncourt, northeast of Woel, south end of the Etang de Lachaussee, Vandieres and across the Moselle at Champey.

Sept. 17.—American troops advanced along the Moselle within 300 yards of Paguy.

Sept. 18.—The 26th division made two raids during the night. One against St. Hilaire was without result, as the enemy had retired; the other against the Bois de Warville resulted in the capture of fifteen prisoners.

Sept. 19.—The 92d division repulsed an attempted enemy raid in the St. Die sector.

Sept. 20.—The 92d division repulsed two enemy raids in the region of Lessoux.

Sept. 26.—The 1st army attacked northwest of Verdun on a front of twenty miles and penetrated to an average depth of seven miles.

Sept. 27.—The 107th regiment of the 27th division attacked east of Bellicourt and attained its objectives.

Sept. 29.—In the Argonne the Americans met with furious resistance. Their losses were heavy, and they were unable to do more than hold their own.

Sept. 30.—The 27th and 30th divisions took prisoners north of St. Quentin totaling 210 officers and more than 1,300 men.

Oct. 1.—The 28th division repulsed a hostile counterattack on the entire divisional front in the Aire valley, with very heavy losses to the enemy.

Oct. 3.—The 2d division, operating with the 4th French army, made an advance of two kilometers, reaching Medeah farm in the afternoon. In the evening the 2d division advanced about three kilometers, and their line ran from Medeah farm southwest along the road to Blanc Mont. They captured 1,000 prisoners and casualties were estimated at 500.

Oct. 4.—The 1st division attacked on both sides of Exermont and made progress in spite of strong opposition from the enemy, who resisted with machine guns in organized opposition. Approximately 300 prisoners were taken and our casualties were 1,500.

Oct. 5.—The 1st division captured Arietal farm and the line was advanced 400 yards beyond. The 6th division repulsed a larger enemy raid on Sondernach.

Oct. 7.—A brigade of the 82d division advanced seven kilometers, occupying Hill 233, north of Chatel Chery; forty-six prisoners were captured, including one officer. Our casualties were light. Later the enemy counterattacked and reoccupied Hill 223, north of Chatel Chery.

Oct. 8.—The 59th brigade of the 30th division attacked at 5 a. m. over a front of 5,000 yards, gained all first objectives by 9 a. m. and second objectives by noon. Fifty officers, 1,500 men and four 101 millimeter guns were taken.

Oct. 8.—The 2d corps advanced about seven miles on a front of 4,000 yards and captured about 2,000 prisoners and thirty guns.

Oct. 9.—In spite of strong resistance the 1st division advanced in the sector east of Fleville and captured 230 prisoners. The 33d division, operating with the 17th French army corps, attacked early in the morning north of Consenvoye and reached its final objective about 9 a. m. About 650 prisoners were taken.

Oct. 10.—The 1st corps reached Cornay-La Besogne ridge and passed Mallassie farm, east of Grand Ham. The 60th brigade of the 30th division advanced six kilometers, reaching the Sellier, and held the St. Bem-St. Souplet-La Haie-Menfresse line. Up to the evening of the 9th fifty officers, 1,800 men and thirty-two guns were captured.

Oct. 12.—The 4th division repulsed two counterattacks by machine gun fire, with severe loss to the enemy.

Oct. 13.—An attack on Grandpre this morning met very heavy machine gun fire and troops of the 2d corps were finally forced to retire south of the Aire. A hostile counter-attack at 8 p. m. south of Landres-et-St. Georges was repulsed. The 81st division repulsed an enemy raid in St. Die sector. The 77th division took Grandpre.

Oct. 17.—The 29th division advanced to the summit of Bois de la Grande Montagne, east of the Meuse. The 42d division took Cote de Chatillon. The 2d battalion of the 76th division reached the northern edge of Bois des Loges, west of Champigneulle. In an attack on a 4,000 yard front from St. Souplet to Molain our troops advanced 3,000 yards against very stiff resistance. All counterattacks repulsed. Prisoners taken were estimated at 2,500.

Oct. 19.—The 30th division attacked with the British at dawn and advanced 2,000 yards. Prisoners captured since the morning of the 17th totaled forty-four officers and over 1,500 men. The 78th division pushed its lines for-

ward to Bellejoeyse farm and began to mop up the Bois des Loges.

Oct. 21.—In attacks on the Bois des Rappes the 5th division met with stubborn resistance by machine guns, supported by artillery and infantry fire. It captured the entire position with 170 prisoners, including five officers. An enemy counterattack, supported by heavy artillery fire, was repulsed with heavy losses. The 5th and 3d divisions took Hill 297 and Bois des Rappes. Attacking in the evening, the 89th division occupied the northern and eastern edge of the Bois de Bantheville.

Oct. 23.—Troops of the 3d corps reached the ridge north of the village of Bantheville, taking 171 prisoners. The 29th division captured the ridge of Bois d'Etraves and Hill 361.

Oct. 27.—The 78th division entered Bellejoeyse farm, northeast of Grandpre, and found it unoccupied. The occupation of the right of way north and northwest of Grandpre was completed.

Oct. 30.—On Oct. 30 patrols were active along the entire front of the 28th division. The 33d division, in the face of heavy artillery and machine gun fire, north of Grandpre, advanced its lines, and occupied the Bellejoeyse farm. On Oct. 30 2,000 high explosive and gun shells fell in the vicinity of Fresnes. One of the divisional patrols captured five prisoners.

Nov. 1.—The troops of the 1st army captured Clerly-le-Grand. North of Ancerville they took fifty-three additional prisoners and continued their advance into the Bois de Bantheville. During the night of Nov. 1-2 the troops of the 37th division consolidated their positions and effected a crossing of the River Scheldt, confronted by enemy machine gun and rifle fire. The 91st division, supported by artillery and machine gun fire, rapidly advanced over six kilometers in spite of enemy artillery and machine gun fire. The enemy was driven from the west bank of the Scheldt and at noon the heights northwest of Audenarde were taken.

Nov. 2.—On the evening of Nov. 2 the troops of the 78th division drove the enemy from the Bois des Loges and closely followed his retreat. The 92d division, in spite of machine gun resistance, pushed forward and advanced the line three kilometers.

Nov. 3.—The 91st division, in spite of active machine gun resistance, forced its way toward the bank of the Scheldt in the vicinity of Eyne.

Nov. 4.—On Nov. 4 a brigade of the 79th division attacked an enemy sector, taking eighty-one prisoners and eight machine guns, encountering strong resistance and repulsing several counterattacks.

Nov. 5.—On Nov. 5 the troops of the 77th division engaged in severe fighting, overcoming strong enemy resistance along the entire line. The artillery was active, firing on the enemy's retreating columns. Harassing artillery fire was returned by the enemy. Aviation was active on both sides. The enemy flew over our front lines and delivered machine gun fire on our advancing troops. Two enemy planes were brought down.

Nov. 6.—Our troops of the 1st corps continued their successful advance, forcing the

enemy to retire. The towns of Flabas, Raucourt, Haraucourt and Autrecourt were taken and patrols pushed on as far as the Meuse. Large quantities of material were captured during the advance. Following heavy bombardment on the enemy's divisions, the troops of the 5th division attacked, rapidly overcoming the enemy's resistance, capturing Liondevant-Dun, Murvaux, Fontaine and Vilosnes-sur-Meuse, taking more than 250 prisoners.

Nov. 7.—The troops of the 2d division cleared the west bank of the Meuse of the remaining machine guns and snipers in the vicinity of Mouzon. The 5th division, supported by artillery fire, continued its advance despite the enemy's continued resistance, principally with machine guns. Most of the artillery crossed to the east bank of the Meuse, following in support of the infantry. Additional prisoners were taken, including two officers and 132 men.

Nov. 8.—The patrols of the 2d division crossed the Meuse south of Mouzon. The troops of the 33d division, aided by barrage fire, carried out a successful raid on Chateau Aulnois, capturing one officer and twenty-two men. Strong combat patrols were sent out from the lines of the 32d division (colored). Prisoners were captured and casualties inflicted on the enemy.

Nov. 9.—On midnight of Nov. 9 the patrols of the 5th division drove back the enemy, inflicting many casualties and capturing six prisoners. The troops consolidated and, despite stubborn resistance, principally from machine guns, drove the enemy from Bois du Canol and La Sentinelle and captured Brandeville. In these operations forty-seven prisoners, 125 machine guns and other materiel were captured. A strong combat patrol was active along the entire front of the 33d division, meeting with heavy machine gun resistance from the enemy, and a patrol of one company captured eight prisoners in the Bois de Warville. The troops of the 79th division advanced in a generally northeasterly direction, with the right flank in Bois de Damvillers. The 42d and units of the 1st seized the heights south of Sedan.

Nov. 10.—The 33d division carried out a successful raid on Marcheville, occupying the town and taking eighty prisoners, including three officers. Strong patrols from the line engaged in sharp fighting. The 37th division, operating with the 34th French army corps, attacked in order to force a crossing of the Scheldt. Violent enflaming machine gun fire, heavy artillery and the flooded condition of the terrain delayed the construction of bridges and crossings. In the face of continuous heavy artillery fire, supported by machine guns, the troops advanced about two kilometers. The 90th division advanced toward Baalon, encountering no resistance. The 92d division reached Bois Frehaut and captured 710 prisoners.

Nov. 11.—The 3d division advanced three kilometers east of Breheville. Despite increased resistance by machine gun and artillery fire the 5th division continued to advance, capturing eighteen prisoners, three large caliber guns, six minenwerfers and considerable materiel. In accordance with the terms of the armistice hostilities on the front of the American armies ceased at 11 a. m.

NAVAL EVENTS IN LAST YEAR OF WAR.

No great naval battles occurred in 1918, but there were two events which will have a prominent place in the naval history of the world. One was the bottling up of Zeebrugge and Ostend on the Belgian coast, and the other the surrender of a large part of the German fleet in accordance with the terms of the armistice signed on Nov. 11, 1918. The official stories of the attacks on Zeebrugge and Ostend issued by the British admiralty follow:

BLOCKING OF ZEEBRUGGE.

The blocking of Zeebrugge and the attempt to block up the entrance to Ostend harbor, both used by the Germans as bases for submarines,

destroyers and other light war craft, took place on the night of April 22-23, 1918. The British admiralty on April 25 issued the following official narrative of the Zeebrugge affair:

"Those who recall High wood upon the Somme as it were after the battles of 1916 may easily figure to themselves the decks of H. M. S. Vindictive as she lies to-day in stark, black profile against the sea base of the harbor, amid the stripped, trim shapes of fighting ships which throng these waters.

"That wilderness of debris, that litter of used and broken tools of war, that lavish ruin, that prodigal evidence of death and battle, are as obvious and plentiful here as there. The

ruined tank, nosing at the stout tree which stopped it, has its parallel in the flame thrower hut at the port wing of the *Vindictive's* bridge; its iron sides flecked with rents from machine gun bullets and shell splinters. The tall white cross which commemorates the martyrdom of the Londoners is sister to the dingy pierced white ensign which floated over the flag at Zeebrugge mole.

"Looking aft from the chaos of its wrecked bridge, one sees snug against the wharf the heroic, bourgeois shapes of the two Liverpool boats, the *Iris* and *Daffodil*, which shared with the *Vindictive* the honors of the arduous fight.

"Their objectives were the canal at Zeebrugge and the harbor at Ostend. Three of the cruisers, the *Intrepid*, the *Iphigenia* and the *Thetis*, each duly packed with concrete and with mines attached to its bottom for the purpose of sinking it, *Merrimac* fashion, in the neck of the canal, were aimed at Zeebrugge. Two others, similarly prepared, were directed at Ostend.

"The functions of the *Vindictive*, with its ferry boats, were to attack the great half-moon mole which guards the Zeebrugge canal, to land bluejackets and marines upon it, to destroy what stores and guns of the Germans they could find, and generally create a diversion while the block ships ran in and sank themselves in the appointed places.

"Vice-Admiral Keyes, in the destroyer *Warwick*, commanded the operation.

"There had been two previous attempts to attack, capable of being pushed home if weather and other conditions served. The night of the 22d of April offered nearly all the required conditions and some fifteen miles off Zeebrugge the ships took up the formation for attack.

"The *Vindictive*, which had been towing the *Iris* and *Daffodil*, cast them off to follow under their own steam. The *Intrepid*, *Iphigenia* and *Thetis* slowed down to give the first three time to get alongside the mole.

"The night was overcast and there was a drifting haze. Down the coast a great searchlight swung its beam to and fro in the small wind and short sea. From the *Vindictive's* bridge, as she headed in toward the mole, with the faithful ferry boats at her heels, there was scarcely a glimmer of light to be seen shoreward.

"Ahead, as she drove through the water, rolled the smoke screen, her cloak of invisibility wrapped about her by small craft. This was the device of Wing Commander Brock, without which, acknowledged the admiral in command, the operation could not have been conducted.

"A northeast wind moved the volume of it shoreward ahead of the ships.

"There was a moment immediately afterward when it seemed to those on the ships as if the dim, coast hidden harbor exploded into light. A star shell soared aloft, then a score of star shells.

"A wild fire of gun flashes leaped against the sky, strings of luminous green beads shot aloft, hung and sank.

"It was in a gale of shelling that the *Vindictive* laid her nose against the thirty foot high concrete side of the mole, let go her anchor and signaled to the *Daffodil* to shove her stern in.

"The *Iris* went ahead and endeavored to get alongside likewise. The fire was intense, while the ships plunged and rolled beside the mole in the seas, the *Vindictive* with her greater draft jarring against the foundations of the mole with every plunge. They were swept diagonally by machine gun fire from both ends of the mole and by the heavy batteries on shore.

"Commander [now captain] Carpenter conned the *Vindictive* from the open bridge until her stern was laid in, when he took up his position in the flame thrower hut on the port side.

"It is to this hut that reference has already been made. It is marvelous that any occupant should have survived a minute, so riddled and shattered is it.

"The men gathered in readiness on the main lower decks, while Col. Elliott, who was to lead the marines, waited on the false deck just abaft the bridge. Capt. Halahan, who commanded the bluejackets, was amidships. The gangways were lowered, and they scraped and rebounded upon the high parapet of the mole as the *Vindictive* rolled in the seaway.

"The word for the assault had not yet been given when both leaders were killed, Col. Elliott by a shell and Capt. Halahan by machine gun fire, which swept the decks. The same shell that killed Col. Elliott also did fearful execution in the forward Stokes mortar battery.

"The men were magnificent; every officer bears the same testimony.

"The mere landing on the mole was a perilous business. It involved a passage across the crashing and splintering gangways, a drop over the parapet into the field of fire of the German machine guns which swept its length, and a further drop of some sixteen feet to the surface of the mole itself. Many were killed and more wounded as they crowded up to the gangways, but nothing hindered the orderly and speedy landing by every gangway.

"Lieut. Walker, who had his arm carried away by a shell on the upper deck, lay in the darkness while the storming parties trod him under foot. He was recognized and dragged aside by the commander. He raised his arm in greeting. 'Good luck to you!' he called as the rest of the stormers hastened by."

Capt. Carpenter's Story.

In the course of a long account of the part taken by the *Vindictive* in the raid, Capt. Carpenter said:

"Our chief purpose in the expedition was to distract the attention of the battery while the block ships ran in, especially the battery of eleven inch guns which occupied a commanding position at the tip of the mole. Our ship was elaborately prepared for the business of landing our soldiers on the mole, which is of stone forty feet high and fifteen feet above the *Vindictive's* top deck at the state of the tide when the attack took place.

"We had a special superstructure over the upper deck and three long gangways or 'brows,' which were designed to take the men up to the level of the mole as soon as we got alongside. Exactly according to the plan we ran alongside the mole, approaching it on the port side where we were equipped with specially built buffers of wood two feet wide.

"As there was nothing for us to tie up to we merely dropped anchor there while the *Daffodil* kept us against the mole with its nose against the opposite side of our ship. In the fairly heavy sea two of our three gangways were smashed, but the third held, and 500 men swarmed up this on to the mole. This gangway was two feet wide and thirty feet long.

"The men who went up it included 300 marines and 150 storming seamen from the *Vindictive* and fifty or so from the *Daffodil*. They swarmed up the steel gangway carrying hand grenades and Lewis guns. No Germans succeeded in approaching the gangway, but a hard hand to hand fight took place about 200 yards up the mole toward the shore.

"The *Vindictive's* bow was pointed toward the shore, so the bridge got the full effect of enemy fire from the shore batteries. One shell exploded against the pilot house, killing nearly all of its occupants. Another burst in the fighting top, killing a lieutenant and eight men who were doing excellent work with two pompons and four machine guns.

"The battery of eleven inch guns at the end of the mole was only 300 yards away and it kept trying to reach us. The shore batteries also were diligent. Only a few German shells hit our hull because it was well protected by the wall of the mole, but the upper structure, masts, stacks, and ventilators showed above the wall and were riddled. A considerable proportion of our casualties were caused by splinters from these upper works.

"Meanwhile, the *Daffodil* continued to push us against the wall as if no battle was on,

and if the Daffodil had failed to do this none of the members of the landing party would have been able to return to the ship.

"Fifteen minutes after the *Vindictive* arrived alongside the mole our submarine exploded under the viaduct connecting the mole with the mainland. The Germans had sent a considerable force to this viaduct as soon as the submarine arrived, and these men were gathered on the viaduct attacking our' submersible with machine guns. When the explosion occurred the viaduct and Germans were blown up together. The crew of the submarine, consisting of six men, escaped on board a dinghy to a motor launch.

"Early in the fighting a German shell knocked out our howitzer, which had been getting in some good shots on a big German seaplane station on the mole half a mile away. This is the largest seaplane station in Belgium. Unfortunately our other guns could not be brought to bear effectively upon it.

"The shell which disabled the howitzer killed all the members of the gun crew. Many men also were killed by a German shell which hit the mole close to our ship and scattered fragments of steel and stone among the marines assembling on the deck around the gangway.

"The German fire was hot all the time we lay alongside the mole. At times the German guns reached as high as forty shots a minute. During the hottest part of the fighting I left my station in the flame house and went all around the ship to see how things were going. The spirit of the men was excellent. All they asked was, 'Are we winning?'

"Half an hour after the block ships went in we received the signal to withdraw. The *Vindictive's* siren was blown and the men returned from all parts of the mole and thronged down the gangway. We put off after having laid alongside just about an hour. The Germans made no effort to interfere with our getaway other than continuing their heavy firing."

"The total British losses in this attack on Zeebrugge and Ostend were 588, of whom 160 were killed. The port was effectively blockaded and of little use to the Germans thereafter.

BLOCKING OF OSTEND CHANNEL.

The cruiser *Vindictive* was sunk in the channel leading to Ostend harbor on the night of May 9-10, 1918. The official account of this enterprise was as follows: Operations designed to close the ports of Ostend and Zeebrugge were successfully completed last night when the obsolete cruiser *Vindictive* was sunk between the piers and across the entrance to Ostend harbor. Since the attack on Zeebrugge April 22-23 the *Vindictive* had been filled with concrete as a block ship for this purpose. Our light forces have returned to their base with the loss of one motor launch which had been damaged and was sunk by orders of the vice-admiral to prevent its falling into the hands of the enemy. Our casualties were light."

Commander Lynes, who conducted the blocking operation at Zeebrugge, was in command of the second expedition to blockade Ostend. He told the following story:

"Weather conditions at the start were in every way suitable. There was a light north-west wind. The sea was favorable to small craft. There was a clear sky and the visibility was good.

"The outward passage was made without interference on the part of the enemy. The small craft were all dispatched to their stations with destroyers in support, and two coastal motor boats were told off to torpedo the piers. Before the arrival of the *Vindictive*, until 1:45 o'clock, the enemy was remarkably quiet, but just at this time the Germans began to open fire. Star shells showed that the smoke screens were progressing excellently.

"At about this time the sky, which hitherto had been almost unclouded, began to be partly obscured by low drifting clouds. In about ten minutes before the *Vindictive* was due at its destination a sea fog set in. This stopped our air attack. Indeed, for a time

even the searchlights could not be seen. This state of things continued for almost an hour, when it cleared sufficiently for the air attacks to be recommenced.

"It was a lurid scene when the *Vindictive* arrived at 2 o'clock, practically program time. There was a thundering of guns on sea and land. The exploding of bombs from airplanes added to the din and there was an occasional cry of agony from some one mortally wounded. Searchlights criss-crossed above and the whole scene was illuminated with flashes and star shells. This was the picture for a full hour.

"The *Vindictive* cruised about for twenty minutes in the fog, looking for the entrance to the harbor, which it eventually found. It sank itself about 200 yards inside the eastern entrance. The *Vindictive's* crew was rescued by a motor launch, which brought off two officers and thirty-eight men, and another which went alongside and took off a lieutenant and two men. Two other motor boats detailed for rescue work searched the shores carefully under very heavy fire, but found no one."

"The *Vindictive* had a complement of fifty-two officers and men. The effect of the operation was to restrict greatly the use of the harbor, making it impossible for cruisers to go in and out.

Before describing the surrender of the German fleet mention may be made of another naval incident which occurred early in the year. This was a battle between British and Turkish warships near the entrance to the Dardanelles strait.

DARDANELES NAVAL BATTLE.

Early Sunday morning, Jan. 20, 1918, a naval battle occurred off the island of Imbros, north of the entrance to the Dardanelles strait, in which the Turks lost the cruiser *Breslau* and the British the monitors *Raglan* and the *M-28*. The *Breslau* was sunk by striking a mine. Both the monitors were destroyed by gunfire as they lay in Kuan bay, on the northeastern side of Imbros.

The British destroyer *Lizard* first encountered the *Breslau* at 5:30 a. m. The *Breslau* was then steaming in a northerly direction south and east of Cape Cephalo on Imbros with the battle cruiser *Goeben* following about a mile astern. The *Lizard* gave the alarm but could do little more. The *Goeben* discovered the monitors in the bay and engaged them at a distance of about 11,000 yards. The British destroyer *Tigress* joined the *Lizard* and attempted to protect the monitors with smoke screens, but in this they were unsuccessful. The *Raglan* was hit heavily and sank and the *M-28*, which had been set on fire, blew up and disappeared about 8 a. m. After this the enemy ships turned and proceeded southward toward the entrance of the strait. At 7 a. m., when it was six miles south of Cape Cephalo, the *Breslau* apparently struck a mine, as there was a heavy explosion abreast the after funnel. Other explosions followed and the ship went down by the stern.

On seeing the *Breslau* go down the *Goeben* turned and circled around once and then continued on a southerly course. Four Turkish destroyers came out of the strait accompanied by an old cruiser, but on being attacked by the British destroyers turned and fled. The *Goeben* was made a target for bombs from British aircraft and fled into the strait. In the act of turning it seemed to have struck a mine, as it began to settle down aft with a list of from 10 to 15 degrees. Its speed slackened, enabling the British airplanes to obtain two direct hits. Apparently badly damaged, it steered for the shore and soon was aground on the beach at the extreme end of Nagara point. A Turkish report subsequently claimed that the ship was not damaged, that it had run aground by accident and that it would soon be afloat. This was verified Jan. 28, when it was officially announced that the *Goeben* had been refloated and brought back to Constantinople.

The *Breslau* had a tonnage of 4,478 and the

Raglan 4,500. The M-28 was a small craft. The Goeben was renamed the Sultan Selim by the Turks, while the Breslau bore the name Midulla.

SURRENDER OF GERMAN NAVY.

Under the terms of the armistice Germany was compelled to give up to the allies and the United States 160 submarines, six battle cruisers, ten battle ships, eight light cruisers and fifty destroyers of the most modern type. This naval surrender, the greatest in history, took place Nov. 20, 21, 24 and Dec. 1, 1918. On Nov. 20 twenty German submarines were turned over to Rear-Admiral Reginald T. Tyrwhitt of the British navy at a point thirty miles at sea from Harwich, England, to which port they were brought on the evening of the same day. The British took every precaution to guard against treachery, and had an adequate force of ships present, together with seaplanes, an observation balloon and an airship. The twenty German submarines were accompanied by two German destroyers, the Tibania and the Sierra Zentana, which were assigned to take the submarine crews back to Germany after the surrender.

All the submarines were on the surface with their hatches open and their crews standing on deck. The largest carried two 5.9 inch guns; twenty-three officers and men were counted on her deck. The craft was estimated to be nearly 300 feet in length. Its number had been painted out. Each German submarine commander at the transfer was required to sign a declaration to the effect that his vessel was in running order; that its periscope was intact; that its torpedoes were unloaded, and that its torpedo heads were safe. Orders had been issued forbidding any demonstration, and these instructions were obeyed to the letter. There was complete silence as the submarines surrendered and as the crews were transferred.

In the presence of Sir Eric Geddes, first lord of the admiralty, twenty-eight more German "U" boats surrendered Nov. 24. This was the most imposing flotilla of its kind to haul down the German flag. It included several very large submarines and four of the cruiser type, one being nearly 350 feet in length.

The noted cruiser submarine Deutschland U-153 was among the number. It carried two American officers, who had been rescued from the American army cargo ship Ticonderoga, torpedoed on Sept. 30 last. The officers were taken to Kiel by the Deutschland, which was returning from a three months' cruise in American waters, and were landed Nov. 24 at Harwich.

Another surrendered boat was the U-139, which had just returned to a German port after a sixty-four-day cruise, commanded by Lieutenant-Commander Arnauld de La Perriere, who in 1916 was awarded the Order Pour le Merite for sinking 126 vessels. The U-139, however, was brought in by a first lieutenant, who explained that Perriere was too sad to undertake the duty.

Up to Dec. 1 the Germans had surrendered 122 submarines.

Giant Ships Given Up.

From a spectacular point of view the surrender of a large part of the German grand fleet, including battle ships, cruisers and destroyers, was the most impressive. It occurred on Nov. 21, 1918, off the Firth of Forth on the north coast of Scotland, the Germans turning over seventy-one vessels. In a cable dispatch to The Daily News Edward Price Bell, its London correspondent, described the surrender, which he witnessed, as follows:

Aboard the United States Flagship New York, Thursday Night, Nov. 21.—Fine, calm weather, itself seeming to symbolize peace, favored the final formalities to-day of the surrender of the German battle ships, battle cruisers, light cruisers and destroyers—seventy-one vessels.

These formidable warships are now interned in the Firth of Forth, surrounded by fighting craft of the allies and the United States. Their

ultimate destination, pending the peace conference, is probably Scapa Flow bay. Thence their officers and crews, except enough men to keep them in good condition, will be sent back to Germany.

To-day's proceedings, both spectacularly and emblematically, are regarded as surpassing any like event in history; indeed, as standing alone. Trafalgar and Waterloo as crucial moments in European progress are seen as of limited importance compared to Germany's naval surrender to the allies and America.

British and American ships, the former in overwhelming numbers as compared with the latter, threw two lines far out to sea opposite the Firth of Forth and the Germans steamed in a line ahead into the channel thus formed. When they were within it the outer ends of the entente columns closed behind the captives. Then the entente ships reversed their course and the whole array moved in triple order toward the great British anchorage.

How many square miles of sea were occupied I do not know, but it was a gigantic area. Six miles separated the entente columns and at a point three miles from each ran the German line, led by the Cardiff trailing a sausage balloon, as if to beckon the enemy's ships forward.

Off both flanks of the entente formation steamed scouting and screening destroyers, thus extending for a mile or so on either side the width of six miles covered by the three columns of the great host of between 250 and 300 warships that made up the spectacle. Though the sea was only moderately rough, the winter sun was shining on and gilding the long gray hulls for many miles farther than one could see.

The visibility was imperfect. For example, we on this ship, which, with the stars and stripes aloft at three points, led the 6th battle ship squadron, composed of the New York, the Wyoming, the Florida, the Texas and the Arkansas, could not catch a glimpse of our complementary column six miles away. Even the huge German vessels opposite us we could discern only in broad outline. Not until the whole formation contracted to enter the harbor, which took place in much brighter weather, did the more distant details emerge from the sunny haze.

As for the destroyers engaged in the operation, they literally swarmed. Of these Germany furnished fifty traveling in line ahead and behind the heavy ships. Britain furnished all, or nearly all, the rest. Her scouting and screening craft began to pour out of the Firth of Forth at 10 o'clock in the morning and they were still pouring out at sunset. These vessels either steamed out fifty miles at sea to pick up the Germans at dawn or assumed their appointed stations on either side of the proposed area of envelopment.

Britain and America's main fleet weighed anchor several hours before daybreak and sunrise found it in its two parallel lines moving eastward at from six to sixteen knots and behind the five miles from dawn 7:25 the most advanced destroyers signaled contact with the Germans and less than two hours later the Cardiff with its sausage balloon hove in sight, three miles off the starboard quarter of the New York. Behind the Cardiff at three cable lengths was the Friedrich der Grosse, the flagship of Admiral von Reuter, and following in unbroken procession were the German heavy ships stretching far beyond the vision into the mist touched with gold by the newly risen sun.

Not a cheer rose from the New York. Admiral Sims, Rear-Admiral Rodman and many other officers stood silent on the quarterdeck intently scrutinizing the German vessels as one after another they loomed dimly through the murky atmosphere.

"It is all over," said a commander at my side.

Interned in Scapa Flow.

Following is a list of the principal ships turned over and subsequently interned in Scapa Flow:

Battle ships—Kaiser, 24,113 tons; Kaiserin,

24,113 tons; Koenig Albert, 24,113 tons; Kronprinz Wilhelm, 25,000 tons; Prinzregent Luitpold, 24,113 tons; Markgraf, 25,293 tons; Grosser Kurfuerst, 25,293 tons; Bayern, 28,000 tons; Koenig, 25,293 tons, and Friedrich der Grosse, 24,113 tons.
Battle cruisers—Hindenburg, about 27,000

tons; Derflinger, 28,000 tons; Seydlitz, 25,000 tons; Moltke, 23,000 tons, and Von der Tann, 18,800 tons.
Light cruisers—Bremen, 4,000 tons; Brummer, 4,000 tons; Frankfurt, 5,400 tons; Koeln, tonnage uncertain; Dresden, tonnage uncertain, and Emden, 5,400 tons.

WAR ORGANIZATIONS IN WASHINGTON.

Following is a list of the main war and allied organizations and their chiefs or directors in Washington in November, 1918:

Aerial coast patrol commission, national—Rear-Admiral Robert E. Peary, chairman.

Aeronautic cognizance, joint army and navy board—Maj.-Gen. George O. Squier, chairman.

Air Service Clubs association—Maj.-Gen. William L. Kenly.

Alien enemy relief committee—Dr. Norman Bridge, chairman.

Alien property custodian—A. Mitchell Palmer, chief.

American Library association (unofficial)—G. B. Utley, secretary.

Argentine naval commission—Capt. Julian Irizar, president.

Arlington memorial amphitheater commission—Col. Clarence S. Ridley, executive and disbursing officer.

Arsenals and navy yard wage commission—F. D. Roosevelt, chairman.

British artillery mission—Maj.-Gen. Headlam.

British aviation mission—Lieut.-Col. C. F. Lee, commanding officer.

British military mission—Brig.-Gen. G. F. Trotter.

British war mission—Maj.A.J.Nutter, secretary.

Canadian war mission—Lloyd Harris, commissioner.

Capital issues committee—Charles S. Hamlin, chairman.

Censorship board—F. B. Hyde, secretary.

Committee on public information—George Creel, chairman.

Service bureau—F. W. McReynolds.

Council of national defense—Newton Diehl Baker, chairman.

Advisory commission—Walter S. Gifford,* director.

Field division—Grosvenor B. Clarkson, director.

District council of defense—William H. Baldwin, chairman.

Efficiency, bureau of—Herbert D. Brown, chief.

Emergency construction wage commission—E. M. Hopkins, chairman.

Emergency Fleet corporation—Charles M. Schwab, director-general.

Employees compensation commission—Arthur H. Deibert, secretary.

Farm organizations, federal board of—Charles W. Holman, secretary.

Federal trade commission—William B. Colver, chairman.

Food administrator of United States—Herbert C. Hoover.

Food purchase board—G. C. Babcock, secretary.

French aviation mission—Joseph Tulasnc, in charge.

French high commission—Andre Tardieu, high commissioner.

Fuel administrator of United States—Harry A. Garfield.*

Government Recreation league—Lieut.-Col. George P. Ahern, head.

Government Research, Institute for (unofficial)—William F. Willoughby, director.

Gun forging specifications, joint army and navy board—Maj. A. E. White, secretary.

Highway council, United States—Logan Waller Page, chairman.

Hampton roads district, labor, joint committee on—Ethelbert Stewart (for labor).

Industrial Research, Institute of (unofficial)—Dr. Allerton S. Cushman.

Italian high commission—Cav. Ing. Francesco Quattrone.

Jewish welfare board—Col. Harry Cutler, chairman.

Knights of Columbus—Charles P. Neill, representative.

Mail transportation, committee on—Rudolph Braner, chairman.

Mediation and conciliation board—W. L. Chambers, commissioner.

Minerals and derivatives, joint information board on—Pope Yeatman, chairman.

Munitions patent board—Hon. Thomas Ewing.

National advisory committee for aeronautics—William F. Durand, chairman.

National adjustment commission—Robert P. Bass, chairman.

National Institution for Moral Instruction (unofficial)—Milton Fairchild, chairman.

National research council—Dr. John Johnston, executive secretary.

National war labor board—William H. Taft and Frank Walsh,* joint chairmen.

Naval consulting board—Thomas A. Edison, chairman; Admiral William F. Smith, representing the navy; David W. Brunton, in charge.

Patent board, army and navy—Paul A. Blair, chairman.

Pecuniary claims arbitration commission—Chandler P. Anderson, arbitrator.

President's commission—William B. Wilson, secretary of labor, chairman.

Railroads, director-general of—William G. McAdoo.*

Red Cross, national (American)—Dr. Stockton Axson, secretary.

Saddlery adjustment commission—Stanley King, chairman.

Salvation Army (unofficial)—Maj. Allan Neil.

Shipbuilding labor adjustment board—L. E. Macy, chairman.

Shipping board—Edward Hurley, chairman.

Smithsonian institution—C. D. Walcott, secretary.

Training camp activities commission—Raymond B. Fosdick, chairman.

War camp community service—Harold Keats.

Vocational education, federal board of—Charles A. Prosser, director.

War committee of national technical societies—D. W. Brunton, chairman.

War finance corporation—W. P. G. Harding, manager-director.

War industries board—Bernard M. Baruch, chairman.

Chemical division—C. S. MacDonald, director.

Conservation division—A. W. Shaw, chairman.

Finished products division—George N. Peck, commissioner.

Labor division—Hugh Frayne, chairman.

Lumber section—Charles Edgar, director.

Nonferrous metals section—Pope Yeatman, chief.

Planning and statistics—Edwin F. Gay, director.

Price fixing committee—Robert S. Brookings, chairman.

Priorities board—Judge E. B. Parker, commissioner.

Resources and conversion—Charles A. Otis, chief.

Steel division—J. Leonard Replogle, director.

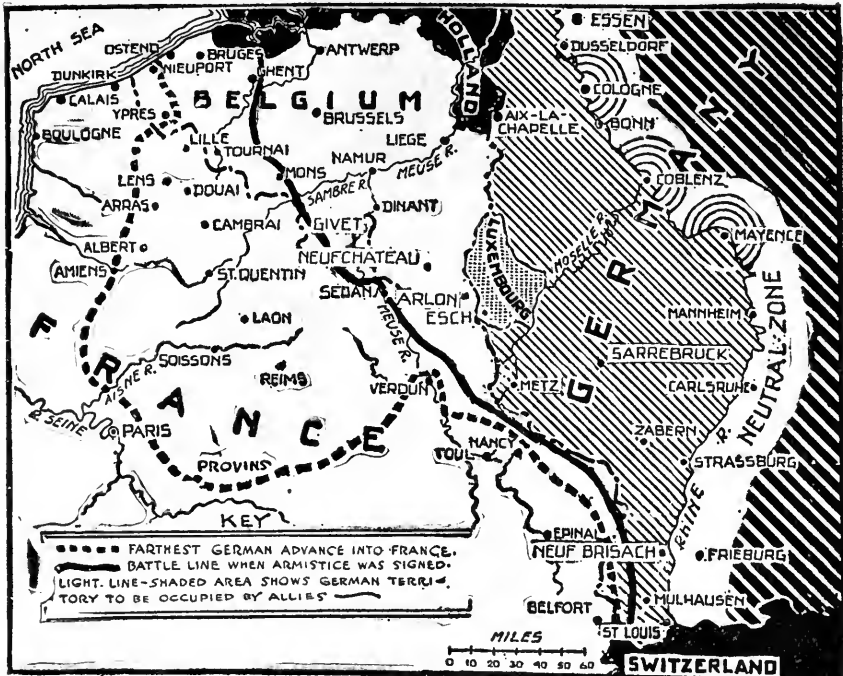

Textile division—John W. Scott, director.

War trade board—Vance C. McCormick, chairman.

Wire board and wage commission—Albert S. Burleson.

*Resigned.

WESTERN FRONT WHEN THE ARMISTICE WAS SIGNED.

Describing the military situation when fighting ended, Gen. Peyton C. March, chief of staff, said:

"At the beginning of the armistice the final line on the Belgian, British and French fronts was approximately as follows: Along the west bank of the Scheldt from the Dutch frontier to Eccke; thence to the Dendre river at Grammont; along the west bank of the Dendre river to Ath; thence to a point four miles east of Mons; thence one to three miles east of the Belgian border to the vicinity of Recroi; through Recroi to Mezieres; along the Meuse to Sedan and Bazelles.

"The American front can be given exactly. The front of the 1st army, beginning at Bazelles, followed the west bank of the Meuse to a point one mile southeast of Mouzon, crossed there to the east bank; cut the bend to Inor, and followed the east bank to Stenay. Thence it ran: Baalon, northern and eastern outskirts of the Forest de Woevre, Remoiville, one mile northeast

of Jametz, eastern edge of the Bois de Jametz; Damvillers inclusive; one mile northeast of Chaumont-Devant-Damvillers, then through Villers, Bois Herbedois, west of Ornes; one-half mile west of Dieppe; Abaucourt, west of Grimacourt, three-quarters of a mile northeast of Ronvaux, one mile east of Manheulles, Chateau d'Aulnois.

"The 2d army began at that point and ran: Riaville, Marcheville, St. Hilaire, Butgheville, one and one-half miles south of Jonville; across the northern end of the Lachaussee lake, south of Dempvitoix, south of Charey, south of Rembercourt, three-quarters of a mile south of Preny; crossed the Moselle one-half mile southwest of Champey, one mile north of Les Menils, the German frontier on the Seille river two miles east of Les Menils, the west bank of the Seille river to a point one-half mile southeast of Port-Sur-Seille, which was the end of the second army front.

"The entire front of the American armies covered fifty-two miles."

WATER SYSTEM IN JERUSALEM.

American Red Cross workers who arrived in Jerusalem in the fall of 1918 were enthusiastic in their praise of the way that ancient city had benefited at the hands of the English. The most remarkable change was the installation of a modern water system, an achievement accomplished by the royal engineers in the face of tremendous difficulties in about two months. Water carriers, always picturesque to those unacquainted with the fact that their leather bags were the mobilization points for microbes are no longer seen. The cisterns in each home are no longer insanitary. Neither is it necessary to wait for rain to fill them. There is no limit to the

water each citizen may now consume and as a result the ensuing personal cleanliness has made for improved health in the community.

During the 400 years of Turkish domination Jerusalem obtained a meager water supply which had its source in the Spring of Solomon and was carried through an aqueduct built by the Romans in Herod's time. The British engineers located various water sources within a short distance of the town and brought them together in a great reservoir. From this point the water is pumped to the top of the hill on which Jerusalem stands and is piped through the city.

STORY OF WORLD WAR FROM BEGINNING TO END.

Am. Press Association.
MARSHAL
FERDINAND FOCH.

Am. Press Association.
GEN. PETAIN.

Am. Press Association.
GEN. GOURAUD.

When the story of the world war, which began on July 29, 1914, with the bombardment of Belgrade, the capital of Serbia, by the Austrians and virtually ended Nov. 11, 1918, with the signing of terms of armistice by German plenipotentiaries at the headquarters of the allied commander in chief in France, is told in detail it will require many volumes—many more than the 130 or more volumes comprising the official records of the American civil war, for it was a vastly greater conflict. It will be long before any such history can be written, for the task will be a gigantic one and the difficulties on account of the secrecy surrounding most of the plans and operations will be enormous. Even to attempt to give a bare outline of the main events and results of the fighting on land and sea and in the air within a reasonable space is not an easy task. The story here given is based upon the reviews published in *The Daily News* and to some extent upon those previously appearing in *The Daily News Almanac and Year-Book* from year to year, with the addition of much fresh material, particularly concerning the extraordinary developments after the entrance of the United States into the struggle as a deciding factor in the summer of 1918. Most of these will be found in greater detail under separate heads in this volume.

1914.

Causes of the War.

The underlying reason for the war, as it developed in the course of the conflict, was the desire of Emperor William II, and the Junker or military class in Germany to dominate the world. That is now the settled judgment of all unprejudiced students. Other causes were also frequently mentioned immediately after the conflict began. These as set forth in *The Daily News Almanac and Year-Book* for 1915 were:

1. Commercial and industrial rivalry, especially as developed between Germany and Great Britain.
2. International jealousy as to power and predominance in the world. This involved—
3. Excessive armaments entailing heavy burdens on the people and developing a spirit of—
4. Militarism and growth of military parties and military castes.
5. Conflict of Slav and Teuton races resulting from national aspirations for territorial expansion; racial antagonism.
6. Desire of certain rulers to put an end to internal strife by consolidating public opinion through the agency of a foreign war appealing to the patriotism of the people.
7. Desire to preserve the status quo in Europe by preserving the neutrality and independence of the smaller nations.
8. Revenge resulting from former conflicts, such as the war of 1870 between the German states and France and the more recent Balkan wars.

9. Conflict of national ideals or "cultures."
10. Conflict of democracy as opposed to autocracy and bureaucracy.

11. Personal ambitions of men high in position, authority and power.

12. Persistent talk of war by yellow journals and jingoists.

13. Publication of books, like those of Gen. von Bernhardi, declaring war to be a blessing, a necessity and a great factor in the furtherance of culture and power.

14. Formation of international alliances preventing the localizing of any conflict.

Murder of Archduke Ferdinand.

The immediate or precipitating cause of the war was the assassination in Sarajevo, Bosnia, June 28, of the Archduke Francis Ferdinand, nephew of the emperor of Austria, heir to the throne of the dual monarchy and commander in chief of its army, and his wife, the duchess of Hohenberg, by a Serbian student, Gavrilo Princip, aided by a number of others. It was the outcome of years of ill feeling between Serbia and Austria-Hungary due to the belief of the people in the smaller state that their aspirations as a nation were hampered and blocked by the German element in the Hapsburg empire. The countries had been on the verge of war several years before over the annexation of Bosnia and Herzegovina by Austria-Hungary, and later over the disposition of Scutari and certain Albanian territory conquered in the Balkan-Turkish struggle.

Ultimatum to Serbia.

Resentment in Austria-Hungary because of the murder of the heir to the throne was deep and bitter and apparently the authorities decided immediately to take radical measures against Serbia. July 23 an ultimatum was delivered at Belgrade with a time limit of forty-eight hours. One of the demands was construed by Serbia and its protector, Russia, as amounting to interference with Serbia's independent sovereignty, a thing to which Serbia could not accede. July 25 a reply was returned which the Austrian government declared to be unsatisfactory. Diplomatic relations were terminated and two days later Austria-Hungary formally declared war. Fighting began immediately on the Danube and Belgrade, the Serbian capital, was bombarded from the Austrian side of the Danube. In the meantime the diplomats and statesmen of the principal powers were exchanging telegrams in a final effort to avert the calamity of a general war. Russia insisted that an attack on Serbia was equivalent to an affront to itself and it began to make military preparations on the western frontiers which indicated that it meant to support its views with the sword. On the last day of July, Germany, as Austria's ally, issued an ultimatum with a twelve hour limit demanding that Russia cease mobilization. Russia demanded assurances from Austria that were not forthcoming, and it continued to mobilize. On Aug. 1 Germany declared war. Mobilization began at once throughout Germany. France also began to mobilize.

Britain Enters Conflict.

Events of worldwide importance followed swiftly. Germany invaded the duchy of Luxembourg and demanded free passage for its troops across Belgium to attack France at that country's most vulnerable point. King Albert of Belgium refused his consent on the ground that the neutrality of his country had been guaranteed by the powers of Europe, including Germany itself, and appealed for diplomatic help from Britain. That country, which, it was asserted, had sought through its foreign secretary, Sir Edward Grey, to preserve the peace of Europe, was now aroused. Aug. 4 it sent an ultimatum to Germany demanding that the neutrality of Belgium be respected. As the demand was not complied with, Britain formally declared war against Germany.

Joined with Germany and Austria-Hungary in what is known as the triple alliance was Italy, but that power held that it was not bound by the terms of the compact to assist the others in what it looked upon as a war of aggression. It declined to be drawn into conflict so long as its own interests were not threatened. The sympathies of its people were openly with the British and French. Its attitude of neutrality, though disappointing to Germany and Austria-Hungary, was not a surprise to them nor to the rest of Europe.

Before the end of the second week in August Germany and Austria-Hungary were at war with Russia, Britain and its dominions, France, Belgium, Serbia and Montenegro. Aug. 23 Japan, Britain's ally in the far east, entered the fray by declaring war against Germany and attacking the fatherland's colony of Kiaochow in China. Oct. 29 Turkey suddenly attacked Russia and as a de facto ally of Germany was itself attacked a little later by Britain and France. Thus by Nov. 5 ten nations and their dependencies were at war, while Italy, Bulgaria, Greece, Roumania, Spain, Switzerland, the Netherlands and the three Scandinavian kingdoms were maintaining a state of armed neutrality. Portugal declared itself ready to join the allies when they should desire it to do so.

Occurring as it did in midsummer, the general mobilization caused inconvenience, serious hardship and heavy financial loss to thousands of Americans traveling in Europe on business or for pleasure. The war upset the whole system of international credit, the railroads were monopolized for the transportation of troops and for a time the ocean steamship service was at a standstill. Tourists suddenly found themselves completely stranded, without money that could be used, without means of getting to the seaports, or if they managed to get there without steamers to bring them back to their own country. The automobiles of hundreds were seized for war purposes and many more lost most of their baggage. There were in the early days numerous complaints of harsh and even brutal treatment at the hand of local officials who saw in every foreigner a spy and an enemy of their country. The resentment aroused in America by this treatment brought about a change in the attitude of officials and by the middle of August the tourists had little reason to complain of lack of courtesy or help. In

response to urgent appeals for help congress Aug. 5 appropriated \$2,500,000 for the relief of stranded Americans in Europe. The state department also did much to trace missing travelers and place them in communication with their relatives at home. American ambassadors, ministers and consuls were of immense assistance to their countrymen in enabling them to escape from the war zone.

No time was lost by the belligerents in getting their troops into the field. Mobilization in Germany proceeded like clockwork and armies were hurried both to the east and the west to attack Russia and France. The largest and strongest force was sent against France by way of Belgium, Luxembourg, Longwy and Nancy. The first real fighting took place at Liege, a strongly fortified Belgian city. It was vigorously defended and was not taken until Aug. 17, after nearly two weeks of fighting in which the Germans sustained heavy losses. The forts were finally reduced by the heavy siege guns built by the Krupps and throwing shells having unprecedented destructive power. Brussels, the capital of Belgium, was entered Aug. 20 by the Germans without opposition. The Belgian army retreated toward Antwerp, the seat of government having been transferred to that city.

Leaving the new capital to be invested by a comparatively small force, the main German army swept on through Belgium, taking and partly destroying Louvain, Charleroi and other towns and cities. The progress of the armed host was attended by much of the waste inevitable in war and by many acts which the Belgians declared to be incompatible with the rules of civilized warfare. It was claimed, for instance, that noncombatants were shot without cause, farms and villages laid waste without reason and architectural masterpieces wantonly destroyed.

By the end of August the Germans were across the French border and were driving back the French and their British allies from one position to another. The British had sent to France an expeditionary force of approximately 100,000 men under Field Marshal Sir John French, and Lord Kitchener, the best organizer in the kingdom, had been made secretary of war. The allied forces were numerically inferior to the German armies in Belgium and northern France and were compelled to give way. The fighting was of the most desperate character, the Germans probably losing most heavily because of their policy of attacking in mass formations. Their right wing under Gen. von Kluck advanced steadily, taking town after town and position after position, until it was within a few miles of the outer defenses of Paris. German airplanes appeared over that city and dropped bombs into its streets, killing a few persons and doing some damage to property.

Halted at the Marne.

Sept. 2 the government of France was transferred to Bordeaux and on the following day martial law was declared in Paris. The Germans occupied Amiens Sept. 1 and the next day they appeared near Chantilly. Then the

thunder of the guns could be heard in Paris. The world expected that the investment of Paris would be attempted. But the Germans, after having crossed the Marne river, met such strong opposition that they were suddenly compelled to fall back. They retreated under heavy attacks as far as the Aisne river, fighting vigorously, but losing many men and considerable war materiel. Here along the Aisne they entrenched themselves and stopped the pursuit. The fighting was desperate for days and weeks. Then the trenches were gradually extended to the northwest, as a result of rival flanking operations, to the sea at Nieuport, Belgium. They had previously been extended as far south and east as Switzerland and the German border. Along this long line there were innumerable skirmishes and in some cases violent battles for the rest of the year without material advantage to either side.

But this was not all there was of the war, it was only the part of the struggle nearest to the greatest centers of population and news distributing points and consequently it attracted the most attention. There was fighting between huge armies, in East Prussia, Russian Poland, Galicia and Serbia and on a smaller scale there were combats in South Africa, in the South Sea islands, in China and in other places where the belligerents have or had colonies or possessions. In Belgium also the struggle continued to the end of the year, the king and a remnant of his army successfully defending a portion of West Flanders bordering on the North sea. Antwerp was captured by the Germans Oct. 9, the Belgian government going first to Ostend and later to Havre, France. French government officials returned from Bordeaux Dec. 9 and Paris once more became the capital for France.

Fighting on the German left and the French right began Aug. 7, when the French forces entered Alsace-Lorraine. There were heavy battles in the vicinity of Muelhausen, which was taken and retaken several times by the contending armies. The Germans captured Longwy Aug. 27 and Maubeuge Sept. 7.

On Eastern Front.

One of the first acts of Russia in its campaign against Germany and Austria-Hungary was to promise Poland autonomy, a proclamation announcing this intention being issued by the Russian commander in chief, Grand Duke Nicholas, Aug. 15. Two days later a large Russian force had advanced as far as Gumbinnen in East Prussia. At first the czar's troops carried everything before them in that part of Germany, driving the defenders back to Koenigsberg and Allenstein by force of superior numbers. The Germans, receiving reinforcements from the west, turned on the invaders and Aug. 29-Sept. 2 inflicted a heavy defeat on the Russians at Allenstein and at Tannenburg and in a few days drove them back across the border, where the Germans were themselves checked.

While attacking East Prussia, Russia sent other heavy forces into Galicia. These captured Lemberg Sept. 2 and advanced as far west as the strong fortress of Przemysl, which was besieged, and threatened Cracow, the capital of Austrian Poland. They occupied the

Carpathian passes and detachments of troops penetrated into Hungary.

Battling for Warsaw.

On the center of the Russian line, which extended from near Memel on the Baltic to a point south of Cracow, there was also heavy fighting. The Germans advancing from the direction of Breslau won a number of victories in the vicinity of Lodz, but were checked for a time. Later they made a sudden and swift advance toward Warsaw and arrived within a few miles of that city. Then they were decisively defeated by the Russian forces between the Vistula and the Warta rivers, narrowly escaping a complete rout. This was between Nov. 15 and 23. Nov. 25 the Russians won another victory near Lodz.

Reorganized and re-enforced, the German forces, led by Gen. von Hindenburg, hero of the victories in east Prussia, made another advance toward Warsaw early in the month. They captured Lodz Dec. 6 and drove the Russians eastward. The latter made a stand along the Bzura and Vistula rivers and here many desperate encounters took place with varying results. The Germans seemed to be determined to take Warsaw at any cost and make that city their winter headquarters, while the Russians were equally determined to prevent them from doing so.

In Galicia the fortunes of war inclined first to one side and then to the other. The Austro-Hungarians had some success in defending Cracow and Przemysl, but they also suffered heavy reverses at some points and lost many men and guns to the Russians.

Serbia Wins Victories.

Serbia's veterans, though somewhat exhausted from two recent wars, fought with extraordinary success the Austro-Hungarian legions which invaded their country. At the beginning of hostilities in August they defeated the forces of the dual monarchy at Shabats, Jedar, Visegrad and even captured Semlin, Belgrade itself held out against a long bombardment until Dec. 2, when it was occupied by the Austrians. Outnumbered and lacking money and supplies of food and ammunition, the Serbians were compelled to fall back farther and farther into the interior and for a time in the first half of this month it looked as though their power of resistance had been lost. But they suddenly turned the tables on their opponents, who, apparently, were overconfident, and drove them out of Serbia, recapturing Belgrade Dec. 14. For this result the Austrian commander in chief, Oskar Potiorek, was suspended by the authorities in Vienna Dec. 23.

Japan Acts in Orient.

Japan sent an ultimatum to Germany Aug. 15 to withdraw its warships from Japanese and Chinese waters and to evacuate the neutral territory of Kiaochow by Aug. 23. No attention was paid by Germany to the demand and on the date named in the ultimatum Japan formally declared war on Germany and began sending land and naval forces to attack the strongly fortified port of Tsingtao at the entrance to the Gulf of Kiaochow. Japan did

this as an ally of Britain and to assist in freeing the Pacific from German cruisers, which were playing havoc with British commerce. It may also be taken for granted that the opportunity to get even with Germany for the part the fatherland played in preventing Japan from acquiring the Liaotung peninsula in 1895 after the war with China was too good to be overlooked.

Though hampered by bad weather and many natural obstacles, the Japanese besieged Tsing-tao by sea and land and, with some assistance from British troops, captured the stronghold Nov. 7 without great loss of life. The ultimate disposition of the neutral territory has not yet been determined.

Turkey Is Involved.

Turkey, incited by German agents, entered the war Oct. 29 by attacking Russian ports on the Black sea. It was assisted in this enterprise by the possession of the German cruisers Goeben and Breslau, which escaped pursuing British and French warships by entering the Dardanelles and proceeding to Constantinople, where they were "sold" to the Turks. A holy war was proclaimed by the head priests in the Turkish capital against Russia, France and Britain in the hope of causing uprisings among the Mohammedan inhabitants in those countries or in their colonial possessions. This hope was not realized. The Turks threatened the Suez canal and Britain was obliged to divert considerable Australian forces to defend the waterway.

Britain Takes Egypt.

One of the direct results of Turkey's entrance into the war was the taking over of Egypt by Britain. It was formally announced Dec. 17 that henceforth the land of the Pharaohs would constitute a British protectorate.

Roumania, Bulgaria and Greece remained neutral, though strong efforts were made to induce them to join the allies. Bulgaria, which felt that it had been robbed of the fruits of its victory over Turkey, assumed an independent attitude which caused uneasiness in Serbia, Roumania and Greece and prevented the two last named states from getting into the great conflict. Dec. 22 it was announced that Roumania had decided to belong to most of the territory taken from that country under the treaty of Bukharest and that in return Bulgaria had agreed not to attack either Greece or Roumania if they entered the war. This was interpreted as meaning that at least two more of the Balkan states would soon be assisting the allies in the field. Portugal, which early in the campaign announced that its sympathies were with Britain, took steps through its parliament Dec. 23 to give military aid to the allies. Reported German attacks upon Portuguese colonies in Africa had met with this with the exception of Angola.

King Gustav V of Sweden, King Haakon VII. of Norway and King Christian X. of Denmark met at Malmo, Sweden, Dec. 18 and 19 and entered into an agreement to act in concert should the neutrality of their respective countries be threatened or violated.

Though maintaining strict neutrality, Holland was obliged to mobilize its army to guard its frontiers and was put to heavy expense in caring for the many thousands of refugees flocking into the country from Belgium. An idea of the heavy burden laid upon the peaceful nation may be gained from the fact that Queen Wilhelmina signed a bill Dec. 23 for a war loan of \$110,000,000.

Warfare at Sea.

While the war on land was wide in extent and determined in character, that on the seas was no less so. Of battles between great and evenly matched fleets there were none, but encounters between units or small squadrons were frequent and in some of these the loss of life was large. The main German fleet remained sheltered in or near the Kiel canal; that of Britain was somewhere near

the coast of the united kingdom, but just where was not known and the exact whereabouts of the French fleet was also kept a secret. Very early in the war it became evident that it was Germany's policy to depend upon floating mines and submarines to wear down the British naval strength little by little, and to a certain extent this policy was successful. The German mine laying ship, the Koenigin Louise, was sunk Aug. 5 by a British torpedo boat destroyer; on the evening of the same day the British cruiser Amphion was sunk when it struck a mine probably laid by the German ship. Aur. 27 the great ocean steamship Kaiser Wilhelm der Grosse, which was being used by the Germans as an auxiliary cruiser, was sunk by the British cruiser Highflyer on the west coast of Africa and on the following day the German cruisers Ariadne, Mainz and Koeln were sent to the bottom by a superior British squadron near Helgoland. Sept. 4 the British cruiser Pathfinder was struck by a mine or submarine and Sept. 8 the British auxiliary cruiser Oceanic was wrecked off the coast of Scotland. Sept. 22 the British sustained a serious loss when the cruisers Aboukir, Cressy and Hogue were torpedoed and sunk in the North sea by one or more German submarines with heavy loss of life. Oct. 28 the British navy lost its first dreadnought, the Audacious, which was sunk by a mine or was torpedoed near the north coast of Ireland.

Battle Off Chile.

The first real naval battle of any consequence took place off the coast of Chile Nov. 1, when a German squadron, consisting of the cruisers Scharnhorst, Gneisenau, Leipzig and Nürnberg, met and sank the large British cruisers Monmouth and Good Hope with a loss of 1,450 men.

Falkland Islands Battle.

Dec. 8 the German squadron, which had disposed of the Good Hope and Monmouth and had destroyed many British merchant vessels, approached the Falkland islands in the South Atlantic. A strong British squadron, consisting of the battle cruisers Invincible and Inflexible, the armored cruisers Carnarvon, Cornwall and Kent, the second class cruisers Glasgow and Bristol, the light cruiser Macedonia and the old battle ship Canopus, had arrived at Port Stanley the day before and were coaling when the approach of the German war vessels was signaled. In the battle which followed the German cruisers Scharnhorst, Gneisenau, Leipzig and Nürnberg were sunk with a total loss of about 2,500 men. The cruiser Dresden managed to escape by its superior speed. The British ships were under command of Sir F. C. Doveton-Sturdee.

In commerce raiding the Germans were highly successful, destroying scores of British merchant vessels in various parts of the world. Their ships winning the greatest renown in this respect were the Emden, the Dresden, the Prinz Eitel Friedrich, the Karlsruhe, the Kronprinz Wilhelm and the Koensigsberg. The Emden, after destroying British merchantmen valued at between \$5,000,000 and \$10,000,000 and sinking a Russian cruiser and a French destroyer, was put out of commission by the Australian cruiser Sydney at Cocos island Nov. 10.

There were other naval encounters and disasters in which the loss fell now on one side and now on the other. One of the most serious was the sinking of the British battle ship Bulwark at Sheerness, England, Nov. 26, but this, after an examination, was declared to be due to an internal explosion and not to a hostile act.

England received a shock when German cruisers approached its east coast Dec. 16 and bombarded Scarborough, Whitby and Hartlepool, killing 101 persons and wounding many more. The victims were in many instances women and children, and nearly all were civilians. It was claimed by the Germans that these towns were fortified and subject to at-

tack, but this was denied by the British, especially as to Scarborough and Whitby, where there were no fortifications of any kind.

Indiscriminate planting of mines in the North sea caused the sinking of many Norwegian, Swedish Dutch and other neutral vessels, with a considerable loss of life.

New Things in the War.

Some of the modern inventions figured conspicuously even in the first months of the war. Mention has been made of deadly work of the submarines and the heavy siege guns, especially the 42 centimeter mortar used by the Germans, but an even more important part was played by the flying machines. Airplanes were used extensively by all the belligerents for scouting purposes, for range finding and for dropping bombs and steel arrows on the enemy. Dirigibles like the German Zeppelins were also used, but were found more vulnerable to attack. Both airplanes and dirigibles were used in dropping bombs on large cities like Paris and Antwerp, a practice condemned in many quarters because it necessarily involved the killing of women and children and other non-combatants without inflicting any particular military damage. Automobiles were found extremely useful for the rapid transportation of men, war material and supplies and for ambulance purposes. Some were armored and equipped with rapid fire guns. Armored trains on the railroads at the front were found effective at times. Portable wireless outfits were used as well as the telegraph and telephone.

Effect on Markets.

When it became evident that the great powers of Europe had decided to engage in a life and death struggle the whole system of international credit collapsed and but for such heroic measures as establishing moratoriums and closing the bourses and stock exchanges in all the principal countries of the world, widespread financial ruin would have been inevitable. As it was there were some serious failures in London and New York before these steps were taken. From July 20 to July 30 the depreciation in the value of 387 representative securities dealt in on the London stock exchange amounted to \$940,000,000, while from July 23 to July 30 the shrinkage in the capital value of 135 American stocks was \$898,900,000. The cotton market suffered severely from the closing of Europe's factories, and but for loans made by the banks the growers in the United States would have been ruined. The "buy a bale of cotton" movement in August and September was intended to help the cotton men in the crisis.

United States Neutral.

To guard against the possibility of the United States' becoming involved in any way in the war, President Wilson issued a proclamation of neutrality Aug. 4, and, in accordance with its terms, this country maintained a strict attitude of noninterference toward all the belligerents. The chief executive also asked all citizens of the country to refrain from expressions of opinion liable to arouse resentment and disorder. This request was generally commended and complied with. Congress, in addition to providing relief for Americans abroad, passed a number of bills designed to protect and increase commerce, such as the act providing for the admission of foreign built ships to American registry (Aug. 16) and the act creating a bureau of war risk insurance. Dec. 28 the president protested against the interference of Britain with American shipping.

President Wilson Aug. 5 sent a message to the heads of the warring powers offering his services as a mediator at any time that might be deemed suitable. Courteous replies were received, but no opportunity for mediation came.

Free from alliances with or obligations to any of the belligerents, the United States was in a position to be of special service to all of

them. A Red Cross ship was sent to Europe with hospital supplies and nurses to aid in caring for the wounded and ill of the combatants, and grain and flour were sent in large quantities to relieve the extreme destitution in Belgium. These supplies were distributed by an American committee with the advice and help of the official representatives of the United States, and while privation and suffering on a large scale could not be prevented, the unfortunate victims of war were saved from actual starvation. The interests of the warring countries were for the most part looked after by the ambassadors, ministers and consuls of this country. To meet the expenses of this extra service congress Sept. 11 appropriated \$1,000,000.

1915.

In the early part of 1915 a new Russian army advanced into East Prussia and had things its own way until German troops under Gen. von Hindenburg again came to the rescue. In a battle lasting several days in the second week of February the Russians were defeated in the Mazurian lake region, losing, it was reported, 30,000 men in killed and wounded and 50,000 taken prisoners.

In April and May the Germans began an advance into the Russian Baltic region from the East Prussian border. This continued steadily, the invaders capturing Libau, an important port on the Baltic, and other places, the Russians not being able to offer effective resistance.

Invasion of Russian Poland.

Russian Poland was invaded by Austro-Hungarian troops in the first days of the war, but they were soon driven out by the czar's southern armies. On the last day of August the Austrians were badly defeated near Lemberg and two days later the Russians entered that city to remain there until June 22, 1915, when they were compelled to evacuate it. They advanced to the west and southwest, coming close to Cracow and occupying the principal passes in the Carpathians. Cossacks rode down into the plain of Hungary, but their projected raid on Budapest had to be abandoned when their comrades were forced by reverses elsewhere to retire from the dearly bought positions in the passes.

One of the most brilliant exploits of the Russian forces in Galicia was the capture of the fortress of Przemyśl. After a siege lasting seven months it surrendered March 22, with its garrison of nearly 120,000 officers and men. Its fall had a depressing effect upon the Germanic allies and a correspondingly encouraging effect upon the Russians, who counted confidently upon the capture of Cracow and the invasion of hostile territory on the other side of the Carpathians. Fate willed it otherwise and the stronghold had to be abandoned when the combined German and Austro-Hungarian armies began their great drive. Przemyśl was recaptured by the Austrians June 3, but the victors this time found little in the way of booty and took few prisoners.

In January and February, 1915, the fighting line before Warsaw was along the Bzura river, south of Rawa, thence south to the Pilica river and thence east to Ivangorod. Both sides were protected by trenches and the battles, while bloody, were as indecisive as those in France and Belgium. There were numerous encounters in the course of the winter and spring along the whole line from the Baltic to Bukowina, and the names of such places as Tilsit, Kovno, Grodno, Lomza, Czenstochowa, Jaroslau, Stanislaw, Kolomea, Czernewitz, Dukla pass, Uszok pass, Stryl, Tarnow, Mlawka and Kielce, with those of scores of others, became familiar to readers of the war news from the east. There were victories and defeats, advances and retreats, following each other in rapid and bewildering succession.

Disaster Overtakes Russians.

On the whole the Russians until May had the advantage in that they occupied nearly the whole of Galicia and Bukovina and were on the defensive only on a line not far from their own frontier in Russian Poland and the Baltic region. Then disaster befell them, chiefly, it was claimed, because of lack of artillery, small arms and ammunition. The Germans and Austro-Hungarians, possessing an abundance of these, massed huge armies under Field Marshal von Hindenburg, Field Marshal von Mackensen, Gen. von Buelow, Gen. von Weyrsch, and Field Marshal Archduke Frederick against the right and left wings of the extended Russian lines. The Germans under Hindenburg advanced to the north of Warsaw while the Austrians under Archduke Frederick assisted by Gen. von Mackensen made an onslaught on the Russian positions in the neighborhood of the Carpathians in western Galicia. The "drive" was a spectacular one, especially in Galicia, where the Russians were forced to give up all their conquered territory. They had to abandon successively the Dukla and Lupkow passes, Malatow, Gorlice and Gromik, losing 100,000 men in prisoners alone. In June they were forced to give up Strz. Radom, Przemysl, Stanislaw, Mosciska, Grodek and Lemberg. In July the Teuton armies had driven the Russians entirely out of Galicia and back to the last line of forts defending Warsaw. Hindenburg and his hosts came from the west and north and Mackensen and Woyrsch from the south and southeast. The Russians made a stand at the fortresses of Novo Geor-gievsk on the north and Ivanorod on the south. The fortress of Ossowetz, farther to the north, which had withstood a siege of many months, also was a rallying point for Grand Duke Nicholas' hard pressed forces.

On Aug. 5 the Germans entered Warsaw and captured Ivanorod. Thereafter it was a continual retreat by the Russians until finally they made a stand at Riga and Dvinsk far to the north in the Baltic region. For a time it was thought that the Germans would succeed in taking Riga and also reach Pograd. Lengthening communications, bad roads and some naval disasters on the Baltic prevented this outcome of the campaign. The Russian retreat was conducted skillfully by Grand Duke Nicholas until he was deposed by the czar and sent to Transcaucasia, his place being taken by the czar himself with Gen. Russky second in command. In December Gen. Russky was also relieved of his command.

Russia was more successful against Turkey than against her nearest European foes. Late in December and early in January several Turkish army corps invaded the territory of Kars in the southwestern part of the Caucasus. One column got as far as Ardahan to the northwest of Kars, while another was operating in the vicinity of Sari Kamysh. Both these columns were routed, the one at Sari Kamysh losing an entire corps consisting of 38,400 men, who were nearly all captured. The Russians inflicted further losses on the Turks at Kara-Urganf and Jenikici. Turkish operations in the region of the Caucasus were thereafter of a less serious character, though 30,000 Ottomans and Kurds attempted to invade the Khomi-Dilam region, close to the borders of the Caucasus and Persia, in the latter part of April. The Russians defeated them in a two days' battle, the Turks leaving 3,500 dead on the field.

The Dardanelles Campaign.

Turkey, as a matter of fact, could not spare many troops to fight Russia, as it had its hands full in combating strong enemies much nearer home. The warships of the allies bombarded some of the fortified Turkish positions on the coasts late in December and in January, but no serious work was attempted until Feb. 19, when a combined fleet of British and French warships began to shell the forts at the Aegean sea entrance to the Dardanelles. These, after a bombardment lasting until Feb.

26, were finally reduced and men were landed at Kum Kale and Sedd-el-Bahr. Efforts were made to clear the straits of mines and to reduce the inner forts by bombarding them heavily from both sides of the Gallipoli peninsula, but it was soon discovered that this could not be done without the assistance of large forces of infantry. Before this conclusion was arrived at the British lost the battle ships irresistible and Ocean and the French the battle ship Bouvet with many men. The vessels were said to have been sunk by torpedoes fired from shore.

Strong forces of British, Australian and French troops, with the co-operation of the naval forces, succeeded in making a landing April 25 at several points at the tip of the Gallipoli peninsula, suffering heavy casualties in so doing. Here they maintained themselves for a considerable time, though fiercely attacked by large Turkish forces with German officers and bombarded by heavy artillery. They inflicted a number of severe defeats on the foe and progressed slowly in the direction of Krithia and the fortress of Achi Baba. They lost more than 40,000 men in killed, wounded and missing. In May the British battle ships Goliath, Triumph and Majestic were torpedoed and sunk. The British land operations on the peninsula were under command of Gen. Sir Ian Hamilton. Gen. Liman von Sanders, a German, was in command of the Turks until he was wounded. Gen. H. J. E. Gouraud, commander of the French expeditionary force, was also wounded.

In August a landing was made at Suvla bay and considerable ground was taken, but the movement eventually proved a failure, and the soldiers were re-embarked and taken elsewhere. The British and French lost more than 100,000 men in their operations on the Gallipoli peninsula.

Deadlock in the West.

Though a number of bloody battles were fought on the western front in the course of the year the line remained nearly as it was at the close of 1914. Here and there the British and French advanced a few miles at the cost of thousands of men killed or wounded and at tremendous expenditure of ammunition; on one or two occasions the Germans did the same, but there was never any substantial gain. The fiercest conflicts of the year on this front were at Soissons, Jan. 8-13; at Neuve Chapelle, March 10; and at Ypres, April 23-28, and at Champagne in the last days of September and the first of October.

Entrance of Italy Into War.

Italy, after remaining neutral nearly ten months, declared war on Austria-Hungary May 24, 1915. Though a member of the triple alliance, Italy considered that Austria-Hungary had broken the treaty by making an unjust war on Serbia. May 4 Italy itself formally renounced the alliance after vainly attempting to secure certain concessions from Austria-Hungary. The extension of the Italian boundary in Trentino, a new boundary on the Isonzo, special provision for Trieste, the surrender of certain islands of the Cuzolari archipelago, the abandonment of Italian claims in Albania, the recognition of the Italian possession of Avlona and the islands in the Aegean sea, which Italy occupied in its war with Turkey. Prince von Buelow, on behalf of Germany, made strong efforts to induce Italy to remain neutral, but Austria-Hungary was obstinate and nullified his words by refusing to meet the Italian demands, except to a very unsatisfactory extent. There was also a strong feeling among the people that the British, French and Russians were fighting the battles of democracy and defending the rights of the smaller nations.

Having decided upon its course of action, Italy formally joined the triple entente on equal terms, making it a quadruple entente. Its military forces of something like 1,000,000 men, which had been kept in readiness for months, were set in motion under the leadership of Lieut.-Gen. Cadorna, chief of staff.

and of King Victor Emmanuel himself. The first step was to throw a strong force of infantry and cavalry across the Austro-Hungarian frontier and occupy a stretch of territory along the River Isonzo. They took Caporetto, Cormons, Cervignano and Terzo and subsequently captured Monfalcone and besieged Goritz and Malborgeth. The Austrian positions, strong by nature, had been heavily fortified and progress was necessarily slow and costly. The Alpine regiments in the Italian army performed surprising feats in taking some of these positions by climbing the high peaks dominating them. The Italians spared the towns as much as possible, as the majority of the inhabitants were of their own race, and directed their attention chiefly to attacking the Austrian troops in such a manner as to do little damage to property. The fighting along the Isonzo continued with heavy losses on both sides, but with the Italians taking the initiative and going forward steadily. The Alps was also true of their advance along Lake Garda in the direction of Trent. The Italians fought well and accomplished some remarkable feats in capturing difficult positions, but up to the close of the year neither side had won a decisive victory.

Defeat in Mesopotamia.

Numerous encounters between British-Indian troops advancing up the Tigris and Euphrates valleys in Mesopotamia and Turkish troops sent from Bagdad and Constantinople took place in the spring and later in the year. In April a Turkish force of from 15,000 to 20,000 was badly defeated near Shaiba. The battle was considered of importance in that it placed the British in possession of that part of Mesopotamia through which the projected German railway from Bagdad to the Persian Gulf was to run. In July the British won another victory at Sukut and Sheykh on the Euphrates river. They advanced until they were close to Bagdad, but in October they were attacked by a strong force of Turks and driven back as far as Kut-el-Amara.

Fighting Near Suez Canal.

In January the Turks assembled considerable forces on the Sinal peninsula for the purpose of taking or destroying the Suez canal. They were led by Djemel Pasha and they carried with them a number of pontoons with which to cross the canal. They succeeded in crossing the desert and early in the morning of Feb. 3 attacked along the greater part of the eastern canal front between Serapeum and Toussoum. The British had been advised of their approach and met them with such a deadly fire that they were compelled to flee at all points, leaving 400 killed and 600 prisoners. It was estimated that the attacking party numbered 12,000 men, who were supported by six batteries. The main attack was at Toussoum, but there was also an assault at El Kantara, which was easily repulsed. The British loss was small, while the total casualties of the Turks on the expedition were about 3,000. No further attacks were made on the canal, though it was reported that mines had been placed in it which did some damage to shipping.

Massacres by Turks.

Turkish forces occupied Tabriz, capital of the province of Azerbaijan, Persia, in January, for the purpose of making a base for attacking the Russian positions in the province of Erivan, north of the Persian border and south of Tiflis. Taking advantage of the warlike situation, bands of Kurds and in some instances Turks began making raids on the Christian population of the Urumiah district, killing hundreds. It was later estimated that between 5,000 and 10,000 persons had met their death by violence or by starvation in their efforts to escape. Safety came only when the Russians reoccupied Tabriz at the end of the month. Thousands were saved by taking refuge in the American mission stations under the protection of the American flag.

Uprising in South Africa.

In October, 1914, an uprising by German sympathizers, led by Col. Solomon G. Maritz, Gen. Christian K. deWet, Gen. Christian F. Beyers and others, occurred in the Union of South Africa. Gen. Louis Botha, premier, and Gen. J. C. Smuts, minister of defense, remained loyal and after a campaign lasting into January routed the rebels and captured most of their leaders. Gen. Botha then turned his attention to German Southwest Africa, and here, too, after a strenuous campaign ending July 9, 1915, he succeeded in capturing all the German military forces and taking possession for Great Britain of a territory having an area of 322,450 square miles. Other British forces were operating against the Kamerun and German East Africa, the only colonies remaining to Germany. Before the conquest of German Southwest Africa Germany had lost to Australia and Japan all its possessions in the Pacific ocean.

Bulgaria Helps to Crush Serbia.

Bulgaria, after making a bargain with Turkey for certain territorial and railway concessions, cast her lot with Germany and Austria and in October declared war on Serbia. That country, after its successful campaign against the Austrians in 1914, was exhausted and was moreover attacked by a severe epidemic of typhus fever. It remained at peace for eight or nine months, in which time it reorganized its army to some extent and with anything like an even chance might have put up another successful fight. But Serbia had only about 200,000 men to pit against 600,000 Austrians, Germans and Bulgarians, well equipped with heavy guns and an abundance of ammunition and other supplies. The result was a foregone conclusion. After a campaign of about six weeks almost the entire country was in the hands of the enemy, the army was scattered and the king and government officials were in flight.

With a view of helping the Serbians, French and British troops were landed at Saloniki, Greece, early in the fall, but they were not strong enough to accomplish anything.

Greece managed to keep out of the war, though subjected to great pressure from all sides. As in Bulgaria, popular sympathy seemed to be with the allies, but the royal families and military chiefs were with the Germans at heart. M. Venizelos, the leading statesman of Greece and the strongest friend of the entente, was in power from June to October, but was then practically forced out by King Constantine, who did not approve of the premier's proally policy.

War on the Sea.

Jan. 24, 1915, a fight occurred in the North sea between a British squadron under command of Vice-Admiral Sir David Beatty and a German squadron, the most important result of which was the sinking of the German cruiser Bluecher with heavy loss of life. No other general encounters occurred between the fleets, the bulk of the British navy being kept in reserve to the north of Scotland, while the most powerful vessels of the German navy were sheltered in the Kiel canal or its vicinity.

The cruiser Dresden, after escaping from the battle at the Falkland islands, was sunk by British warships at Juan Fernandez island in the Pacific, March 1, 1915. The Karlsruhe was bottled up in the Ruffin river, East Africa, Oct. 30, 1914, and was finally destroyed July 11, 1915. The Prinz Eitel Friedrich and the Kronprinz Wilhelm took refuge at Newport News, Va., March 10 and April 11, respectively, and were interned for the remainder of the war.

Floating mines planted by the belligerents in the North sea and other waters caused many disasters, especially to merchant vessels, those firing neutral flags included. They were less effective against ships of war, as these took greater precautions.

Activity of the Submarines.

Submarines played a conspicuous part in the war at sea, and also in diplomatic controversies arising from the manner in which they were used in violation of international law. German undersea craft torpedoed and sank the British battle ships *Formidable*, *Triumph* and *Majestic*; the cruisers *Pathfinder*, *Aboukir*, *Cressy*, *Hogue* and *Hermes*; the auxiliary cruisers *Oceanic* and *Bayano* and various other naval ships. The undersea craft winning the most renown in this work were the U-29, commanded by Capt. Otto Weddigen, and the U-51, commanded by Capt. Otto Hersing. The latter submarine traveled 5,000 miles from Germany to the Dardanelles, where it sank two British battle ships. The former, after destroying three British cruisers and a considerable number of merchant vessels, was itself sunk in March by a British vessel. The French, Italians and Russians also suffered from the activities of German and Austro-Hungarian submarines. The French lost the cruiser *Leon Gambetta*, the Italians the cruisers *Amalfi* and *Giuseppe Garibaldi* and the Russians the battle ship *Panteleimon* and the cruiser *Pallada*. On the other hand, British submarines destroyed the German cruiser *Hela*, the Turkish cruiser *Medjidieh* and battle ship *Messoudieh*. An English undersea boat caused the destruction of Turkish craft not only in the Sea of Marmora but in the harbor of Constantinople itself.

It was, however, in the destruction of merchant vessels that the submarines showed the greatest activity. There being no German freight or passenger vessels on the seas anywhere after the first week or two of the war, the victims of the undersea terrors were necessarily craft belonging to other nations. Britain naturally suffered the most, its merchant fleet being the largest in the world and its ports being near Germany; but the other belligerent countries had to pay their share of the toll. The German submarine warfare was not confined to attacks upon the vessels of the countries with which the empire was at war. They extended in numerous cases to vessels belonging to neutral countries, when such craft ventured into the so called "war zone," covering the waters about the coasts of the British Isles, France, Germany, Russia and Italy. Scores of ships belonging to Norway, Sweden, Holland, Denmark and the United States were sent to the bottom in the North sea, the English channel, the Irish sea and the Baltic, in some cases without warning and without giving the crews a chance to escape with their lives.

Reply to Starvation Policy.

Germany held that it was justified in adopting this mode of warfare, because Great Britain had blockaded German ports and was attempting to starve the people of the empire by preventing the admission of food supplies, either directly or through the Scandinavian countries and Holland. Feb. 4 the German government issued a proclamation declaring the waters surrounding Great Britain and Ireland, including the whole English channel, to be a war zone. "On and after Feb. 18, 1915," continued the proclamation, "every enemy merchant ship found in the said war zone will be destroyed without its being always possible to avert the dangers threatening the crews and passengers on that account. Even neutral ships are exposed to danger in the war zone, as, in view of the misuse of neutral flags ordered on Jan. 31 by the British government and the accidents of naval war, it cannot always be avoided to strike even neutral ships in attacks that are directed at enemy ships." Between Feb. 18 and July 30 more than 300 merchant vessels had fallen victims to the German submarines. This included steamers and sailing craft ranging in size from the 32,000 ton *Lusitania* to fishing boats. The number of noncombatants losing their lives in this warfare was nearly 2,000.

When Germany issued the proclamation of Feb. 4 the United States, through Secretary

of State William J. Bryan, notified Germany that "if commanders of German vessels of war should act upon the presumption that the flag of the United States was not being used in good faith and should destroy on the high seas an American vessel or the lives of American citizens, it would be difficult for the government of the United States to view the act in any other light than as an indefensible violation of neutral rights which it would be very hard to reconcile with the friendly relations now so happily subsisting between the two governments. If such a deplorable situation should arise the imperial German government can readily appreciate that the government of the United States would be constrained to hold the imperial German government to a strict accountability for such acts of their naval authorities and to take any steps it might be necessary to take to safeguard American lives and property and to secure to American citizens the full enjoyment of their acknowledged rights on the high seas."

Sinking of the *Lusitania*.

This plain statement of the position taken by the American government apparently had no effect on the German submarine policy, as the American vessel *Gulflight* was torpedoed May 1, as a result of which two or more American citizens met their death, and the liner *Lusitania*, on which it was known that a large number of Americans were passengers, was torpedoed and sunk off the coast of Ireland May 7. More than 1,000 persons, of whom 102 were Americans, lost their lives on that occasion. The world was horrified that a passenger ship carrying such a large number of noncombatants, including women and children, should be sent to the bottom without a moment's warning by an unseen craft.

President Wilson on May 13 addressed a note to the German government calling attention to the position taken by the United States with regard to the German war zone proclamation of Feb. 4 and asking the German government to take immediate steps to prevent the recurrence of anything so obviously subversive of the principle of warfare for which it had previously contended.

"The imperial German government," read the closing paragraph of the note, "will not expect the government of the United States to omit any word or act necessary to the performance of its sacred duty of maintaining the rights of the United States and of safeguarding their free exercise and enjoyment."

Contention of Germany.

It was contended by the German government that it had the right to destroy the *Lusitania* because it carried war supplies. It was also pointed out that Americans had been warned by advertisements inserted in leading newspapers in the United States that it would be dangerous to take passage on the vessel. The claim was further made that the *Lusitania* was armed with concealed cannon, but this was emphatically denied by the port authorities of New York.

In the correspondence which followed President Wilson contended that the principles of humanity and international law must be maintained in spite of the fact, upon which Germany stressed, that the invention of the submarine had created a new situation to which recognized international law was not applicable. The president insisted that citizens of the United States had the right to travel in safety upon the merchant vessels of belligerent nations and that such vessels could not be sunk under any circumstances until the safety of those on board had been assured. In his note dated July 21 the president, after impressing upon the German government the necessity for a scrupulous observance of neutral rights, concluded:

"Friendship itself prompts it [the government of the United States] to say to the imperial government that the repetition by the commanders of German naval vessels of acts in contravention of those rights must be re-

garded by the government of the United States, when they affect American citizens, as deliberately unfriendly."

These and other notes which were exchanged resulted in a promise by Germany that no more liners should be sunk, but the promise was not kept.

Cushing and Falaba Incidents.

Diplomatic correspondence with Germany was also had concerning an attack April 28 by a German airplane on the American steamer Cushing; the torpedoing of the British steamer Falaba March 27, by which at least one American life was lost; the torpedoing of the American steamship Nebraskan on the evening of May 25 and the destruction of the American steamship William P. Frye on Jan. 28, 1915, by the German armed cruiser Prinz Eitel Friedrich. In the last named case it was contended by the United States and admitted by Germany that the sinking of the ship was in contravention of the Prussian-American treaties of 1799 and 1828, which provided that contraband belonging to the subjects or citizens of either party cannot be confiscated by the other in any case, but only detained or used in consideration of payment of the full value of the same. Germany insisted, however, that the case should be submitted to the German prize court and to this the United States refused its consent. In this connection it is of interest to note that another American steamer, the American ship Leelanaw, carrying a cargo of flax, was sunk off the Orkney Islands July 25 by a German submarine after it had been taken off the crew. The case was held by the American authorities to be identical with that of the William P. Frye.

Germany entered a protest April 11 against the exportation of munitions of war from the United States to the entente powers. This it declared to be contrary to the spirit of true neutrality. In reply the American government maintained that any change in its own laws of neutrality which would affect unequally the relations of the United States with the nations with whom war would be an unjustifiable departure from the strict neutrality by which it had sought to direct its actions. In other words, the United States could not be held responsible for the fact that the German empire, owing to Britain's command of the sea, was unable to import war supplies from the United States.

Resignation of Mr. Bryan.

Owing to a difference of opinion as to the proper manner of conducting the diplomatic correspondence with the belligerent nations and especially with Germany concerning the Lusitania case, the American secretary of state, William Jennings Bryan, resigned his position June 8. He maintained that both he and President Wilson desired to keep the United States from becoming embroiled in the European war, but that they disagreed as to methods. Mr. Bryan was succeeded by Robert Lansing, counselor of the state department.

British interference with American commerce, not only with Germany and Austria-Hungary but with neutral countries, by the seizure and detention of ships under its "orders in council" led to much correspondence between the state department in Washington and the foreign office in London. This covered a wide and intricate field and the views expressed appeared at times to be irreconcilable. American exporters were annoyed by the delays they experienced in the British prize court, while British officials held that matters were expedited as much as possible and that there was less complaint from American business men and bankers than from government officials and international lawyers. The correspondence was conducted with moderation and restraint and there was no hint that the differences could not be amicably adjusted through the ordinary diplomatic channels.

Cases calling for the exchange of notes included those of the *Wilhelmina*, which, with its cargo of foodstuffs destined for the civil population of Germany, was seized by Britain; of the *Greenbrier*, which was similarly seized

with a cargo of cotton, and of the *Dacia*, also loaded with cotton. The last named vessel, with its cargo, was subsequently seized by the French authorities, but the owners of boat and cargo received satisfactory compensation.

Dr. Berahard Dernburg, a former colonial secretary in the German foreign office, was engaged in presenting the German side of the European war to the people of this country. Some remarks made by him after the sinking of the *Lusitania* aroused criticism of a kind which led him to end his mission here and return to Berlin.

Plots in the United States.

Not all of the international troubles of the Washington authorities were occasioned by deeds on the other side of the Atlantic. Many originated in the United States through the propaganda of official representatives of the belligerent nations and of the machinations of self-appointed agents of these countries. Some of the mischiefmakers were undoubtedly men in whom love of the land of their birth was greater than love of the land of their adoption and who thought they were doing their fatherland a service by burning or blowing up munition factories. Still others were dangerous cranks such as come to the surface in all times of popular excitement.

Early on the morning of Feb. 2 an attempt was made to blow up with dynamite the international bridge between Vanceboro, Me., and New Brunswick, Canada. Werner Horn, claiming to be a German reservist, was arrested. He admitted the act and tried to justify it on the ground that his country was at war with Canada. He was held on the technical charge of illegally transporting explosives.

Frank Holt, also known as Erich Muentzer, an educator, attempted to blow up the capitol in Washington, D. C., July 2, and on the following day tried to kill J. Pierpont Morgan, the financier at Glen Cove, L. I. Both attempts were failures; the damage to the capitol was slight and Mr. Morgan's wounds proved not serious. The motive alleged in each case was to put an end to the war in Europe. Holt, who seemed to be mentally unbalanced, was arrested, but on the night of July 6 he committed suicide by throwing himself to the ground floor of the Mineola (L. I.) jail from a height of twenty feet. It was learned that he had been making fire bombs which, on being hidden in vessels, would cause them to burn at sea.

On Dec. 24 two Germans were arrested near New York city while they were testing explosives in a secluded wood. One of them gave the name of Robert Fay and said that he was a lieutenant in the German army. He claimed that he came to New York at the instance of the German secret service to develop means of blowing up munition ships leaving New York for Europe. Four other men were arrested and all were subsequently indicted for conspiracy.

Charles C. Crowley, a private detective, was arrested in San Francisco, Cal., Nov. 26, charged with plotting to dynamite ships carrying munitions to the allies.

Karl Bueuz and a number of other officials of the Hamburg-American line were placed on trial in New York city in November on the charge of conspiracy to deceive and defraud the United States by dispatching ships with supplies to German cruisers at sea in the early part of the war. They were found guilty and sentenced to prison terms.

Dumba, Von Papen and Boy-Ed.

Constantin Dumba, ambassador of Austria-Hungary to the United States, was understood to be particularly active in fomenting strikes in American munition factories, but positive proof was lacking until James J. F. Archibald, an American war correspondent, was detained by the British naval authorities at Falmouth, England, when he arrived there Aug. 30 on his way to Germany and Austria. Among the papers found on him was one from Constantin Dumba addressed to Baron Stephan Burian, the

Austro-Hungarian minister of foreign affairs. In this letter the ambassador wrote, among other things:

"It is my impression that we can disorganize and hold up for months, if not entirely prevent, the manufacture of munitions in Bethlehem and the middle west, which, in the opinion of the German military attaché, is of great importance and amply outweighs the expenditure of money involved."

Because of the statements made in this letter, and also because he employed as a messenger an American citizen carrying American passports, the recall of Ambassador Dumbauld was asked by the United States Government, and after some delay the demand was complied with by the Vienna authorities.

Capt. von Papeu, the German naval attaché, also lost standing in Washington by the publication of one of his letters found in the possession of Mr. Archibald. Referring to the sinking of the Arabic, Capt. von Papeu wrote: "I always say to these idiotic Yankees that they had better hold their tongues."

It was not until later in the year, or Dec. 3, that it was exact, that Capt. von Papeu and Capt. Boy-Ed, the German military attaché, were declared by the king acceptable to the government in Washington. Their recall followed as a matter of course, though, as they were the personal appointees of Emperor William, their enforced departure caused a sensation both in this country and in Europe.

Raids by Zeppelins.

Many raids by Zeppelin dirigibles were made over the eastern counties of England in the course of the year. In all 177 persons were killed and 384 injured, the victims in practically all instances being civilians, including women and children. The property loss was considerable. The most serious raid was that of Oct. 13, when the central part of London was bombarded, with a loss of fifty-six killed and 114 injured. From a military point of view the raids were apparently of no value.

Execution of Edith Cavell.

Miss Edith Cavell, an English nurse, was arrested by the Germans in Brussels, Belgium, Aug. 5, and was executed Oct. 12, after having been convicted of assisting fugitive British and French soldiers to escape from Belgium. Brand Whitlock, American minister to Belgium, and his assistants made every effort to save her life, but their pleas were ignored.

In December, 1915, Gen. Sir John French, commander of the British forces in France, was recalled to England and his place given to Gen. Sir Douglas Haig. Gen. Joffre, the commander in chief of the French, was given greater authority and began to make many changes among the division generals in the field.

1916.

The outstanding features of the war in 1916 were these:

The struggle for the possession of Verdun, the battle of the Somme, the naval battle on the North sea off Jutland, the great Russian offensive in Galicia and Bukovina, the conquest by the Germans of Roumania, which had entered the struggle on the side of the allies, the restoration of the Polish kingdom by Germany, and the death by drowning of Earl Kitchener, the great military organizer.

Struggle for Verdun.

It is probable that the desire of the Germans to take Verdun was based upon the moral effect which such a victory would have and not upon the military value of the position. It is equally probable that the same reason impelled the French to defend the fortress so heroically and successfully. Defeat at this point would have discouraged soldiers and citizens, though it might not have impaired the line of defense to any serious extent. Fighting in this region began Feb. 22, and

with some temporary intermissions continued until the end of the year. It was continuous for nearly so until September, though the attacks of the Germans were less determined than they were before the battle of the Somme began in July. At the beginning of September the Germans were within about three miles of Verdun itself and shells fell into the city regularly.

Then, on Sept. 9, the French made a swift advance and recaptured Fort Douaumont, one of the strongest of the outer forts. This was followed five weeks later by another rapid advance which brought back into French possession nearly all the territory east of Verdun lost to the Germans since February. How many lives were lost and how many men were maimed for life in this region in the course of the year cannot be told, as no reliable figures were made public, but the number must have been appallingly great. Probably no other area of similar size on any of the battle fronts has been more thoroughly drenched in human blood.

Battle of the Somme.

Partly to relieve the pressure on Verdun and partly to take the initiative from the enemy, the British and French began a vigorous offensive north and south of the Somme river, July 1. It was preceded by a severe bombardment which caused much havoc among the German trenches, and when the infantry moved forward the resistance, at least at the start, was comparatively weak. The allies advanced over a thirty mile front to a depth of a mile or more. In the course of the following weeks and months progress was made from time to time until the allies reached a line running parallel with the road between Peronne and Bapaume. In some places they even crossed that road. German defensive works, which it had taken more than a year to construct and which were supposed to be impregnable, were battered down by the heavy guns of the allies until they could no longer be successfully held.

Greatest Naval Battle in History.

What is generally recognized as the greatest naval battle in history was fought between the main British and German fleets on the North sea fifty miles west of Jutland May 31. It was by no means a decisive encounter, as both sides claimed the victory. The losses were heavier on the British side both in ships and men, but it was claimed that relatively the German loss was the more serious. The tonnage of British ships lost was 114,100, while that of the German ships lost was 63,015. In men the British lost 6,104 killed and 513 wounded, the Germans 2,414 dead and 449 missing. Both fleets returned to their bases for repairs and both in the course of a few weeks were reported to be ready for another encounter. The Germans sent out several small raiding squadrons, which did some damage, but the main fleet remained in its home port and the British remained in control of the sea until the end of the war.

Britain Loses Kitchener.

Field Marshal Earl Kitchener, British secretary of state for war, met an untimely death June 5 when he and his staff were on their way to Russia. The cruiser Hampshire, on which they were passengers, either struck a mine or was torpedoed while passing the Orkney islands. A heavy sea was running and such boats as were launched were smashed or swamped. Only a dozen men who clung to a raft escaped with their lives. Earl Kitchener went down to death with the others on the ship. His death was greatly regretted by the allies, but it was also felt that the better part of his work as an organizer had been completed.

Russia Takes Initiative.

During the winter and spring of the year the Russians, who, in the fall of 1915 had been driven out of Galicia, Bukovina and a part of the northwestern provinces, reorgan-

ized and re-equipped their armies, which, under the able leadership of Gen. Brussloff, began a sudden offensive resulting in the recovery of a considerable part of the lost territory in the southwest and the capture of a large number of prisoners. The whole of Bukovina was taken and in Galicia the Russians came within a short distance of Lemberg before they were stopped. On the northern part of the front there was little change, the lines on both sides being thinly held while greater operations were in progress elsewhere.

Grand Duke Nicholas carried on a successful campaign in the Caucasus and Armenia, capturing among other places the important towns of Trebizond, Erzerum, Baiburt, Bitlis and Erzincan.

Kul-el-Amara Disaster.

Two reverses were suffered by the British in the east. Maj.-Gen. Charles Townshend, with a force of about 12,000 men, was forced to surrender by the Turks at Kul-el-Amara in Mesopotamia April 29. Prior to that time the British had to evacuate the Gallipoli peninsula, where so many lives were lost in 1915 in an attempt to get command of the Dardanelles.

Several attempts were made by the Turks to approach the Suez canal, but all were disastrous failures. In Africa the Germans managed to retain some remote sections of their colony of East Africa, but otherwise their possessions in the dark continent passed into enemy hands.

In the Saloniki region the event of the year was the return of the rehabilitated Serbian army, which, with French, British and Italian help, recaptured the city of Monastir Nov. 19. Russians assisted in the Macedonian campaign and also on the front in France.

Italians Lose and Win.

On the Austro-Italian front there were two movements of importance. One was by the Austrian forces which, beginning May 15, drove the Italian troops to their own frontier. The latter, under the direct command of Gen. Cadorna, rallied and not only stopped the Austrians, but drove them back about to the line from which they had started. The other movement was by the Italians, who took the Austrian trenches along the Isonzo river and finally, on Aug. 9, took Goritz by assault. Later they occupied a number of strong positions on the Carso plateau and threatened Trieste with capture.

Roumania Meets Serbia's Fate.

Roumania declared war on Austria-Hungary Aug. 27 because among other things the dual empire had violated its assurance that the war against Serbia was not inspired by a spirit of conquest or a desire for territorial gains. Generally the people of Roumania were in sympathy with the allied cause and there was also a desire to incorporate the Roumanian part of Transylvania into the kingdom. Immediately after declaring war the Roumanian authorities sent their armies across the Carpathians into Transylvania, where Kronstadt, Hermannstadt and various other towns were taken. This success was merely temporary for the Germans under Field Marshal von Mackensen invaded Roumania from the south, east and north and advanced with such rapidity that by Dec. 6 they took possession of the capital, Bukharest, and all but annihilated the defending armies. Jassy was made the temporary capital of Roumania.

Polish Kingdom "Restored."

Emperor William and Emperor Francis Joseph issued a manifesto Nov. 5 proclaiming the restoration of a hereditary monarchy and constitutional government for the Polish districts taken from Russia. Subsequently Archduke Carl Stephen of Austria was chosen to be regent of the new state.

Venizelists Join Allies.

Greece was divided into two camps. The royalists, led by King Constantine, favored the

central powers, while a large proportion of the people, with the statesman Venizelos at their head, sympathized with the entente. The Venizelists set up a provisional government, organized regiments of troops and after declaring war on Germany took an active part in the fighting in Macedonia. The allies gradually deprived King Constantine of power to do harm and to enforce their demands upon him they declared a blockade of all the ports of Greece.

Ireland Scene of Revolt.

In addition to carrying on a gigantic war against the central powers Britain was called upon to face a serious revolt in Ireland. This uprising, which seems to have been fostered mainly by the Sinn Fein society and to have had assistance from certain sources in America and Germany, lasted one week, or from Monday, April 24, to Sunday, May 1. It was confined to Dublin and one or two smaller places and was suppressed without great difficulty, but not until some 300 persons had been killed and more than 1,000 wounded. In Dublin 179 buildings were burned and wrecked by shells, the value of the property destroyed amounting to \$15,000,000. About 1,000 of the insurgents were captured and fifteen of the leaders were executed after trials by court-martial. Many others were sentenced to various terms of imprisonment. Among those executed were Padraic H. Pearse, provisional president of the proposed Irish republic, Thomas J. Clarke, Thomas MacDonagh, Joseph Plunkett, John McBride and Edmund Kent.

One of the most prominent men connected with the revolt in Ireland was Sir Roger Casement, a former consular official, but a resident of Germany after the beginning of the war. He incited the German government to send him with a cargo of arms to Ireland, but on arriving there, April 21, he was arrested and the vessel carrying the arms was sunk to avoid capture. He was tried for treason, found guilty and executed in Pentonville jail Aug. 3.

Zeppelins Raid England.

Zeppelins continued to raid England at intervals, confining their operations chiefly to the seacoast counties, but occasionally getting as far inland as London and as far north as Scotland. They killed some 200 civilians and destroyed some property, but caused no appreciable military damage. The defensive air service of Britain showed a marked improvement and several of the raiding Zeppelins were brought to earth or sea in flames, their crews perishing under the most appalling conditions. In the course of the year more than a dozen of the German dirigible ships were destroyed and a number of others were wrecked by storms.

On all the fronts the work of the airmen was an important feature of the year's campaigns. Their aid in directing artillery fire was invaluable and their raids on enemy bases, railroad and ammunition depots were in numerous cases successful. Among the noted airmen who lost their lives were Immelmann, Wintgens, Mulzer and Boelke, Germans, and Chapman, Rockwell and Prince, Americans fighting for France.

French and Belgian Deportations.

In April and May some 25,000 French women and girls were forcibly taken from their homes in Lille, Arras and Roubaix and sent by the German authorities to work in the harvest fields and factories in the Alsace and Ardennes districts. In October the German authorities in Belgium began forcibly removing able-bodied men from their homes and sending them into Germany to do such work as might be assigned to them. This raised an outcry not only throughout Belgium but throughout the civilized world, but it had no effect on the policy adopted by Germany and defended by it as necessary to counteract the evil effects of unemployment. President Wilson, in a note presented to the German for-

sign office Nov. 20, strongly protested against these deportations.

Execution of Capt. Fryatt.

One of the painful events of the year was the execution in Bruges, Belgium, July 27, of Capt. Charles Fryatt, commander of a British steamship. He had been captured with his ship and was tried on the charge of attempting, though a noncombatant, to ram a German submarine. He was found guilty and shot.

"Tanks," or armored tractors, made their appearance in the battle of the Somme and proved successful. It was a British invention which took the Germans by surprise and caused no little commotion among them. The so called tanks or land ships ran over all kinds of obstacles and even crossed trenches. Ordinary rifles and machine guns were ineffective against them.

Merchant Marine Suffers Heavily.

Germany continued its submarine warfare not only against the merchant vessels of the entente powers but against those of neutral countries as well. Norway, which is a maritime nation, was a heavy loser and at one time when its coasts were virtually blockaded by the underwater boats it looked as though friendly relations with Germany might have to be discontinued. Complaint was general that even when the crews of the vessels destroyed were given time to take to small boats they were often left far out at sea exposed to great peril and hardship. It was also charged that in numerous cases, contrary to the promises made by the German government, merchant and passenger vessels were torpedoed without warning, involving in some instances a considerable loss of life. One operation of the German "U" boats extended from the Arctic ocean to the Mediterranean and from the eastern to the western boundary of the Atlantic. Some German and Austrian vessels were sunk by entente submarines, but they were comparatively few, owing to scarcity of Teutonic ships venturing out upon the seas.

Break with Germany Near.

Germany's submarine policy, which came near causing a break in the friendly relations of the empire with the United States after the sinking of the *Lusitania* May 7, 1915, again brought about a critical situation when on March 24, 1916, the French channel steamer *Sussex* was torpedoed without warning. About eighty of the 325 passengers aboard were killed or wounded, the victims including a number of Americans. The circumstances were patiently investigated and it was established beyond a doubt even to the satisfaction of the German authorities that the channel steamer had been attacked without warning. Feeling ran high and on April 15 President Wilson appeared before congress in joint session, explained the situation in detail and announced that unless Germany changed its method of dealing with passenger and freight carrying vessels the American government would have no choice but to sever diplomatic relations with the German government.

Germany's response to the speech was an announcement made May 4 that no more merchant vessels would be "sunk without warning and without saving human lives." The reply was accepted as satisfactory and the crisis ended, though numerous cases arose after that requiring investigation by the agents of the American government as to whether the promise made to it by Germany had been kept or disregarded. The torpedoing by a German submarine of three British, one Norwegian and one Dutch vessel off the Rhode Island coast Oct. 8 did not improve the situation.

Congress Sustains President.

Beginning early in January there was a movement among certain members of the house of representatives and the senate in

Washington to warn Americans to refrain from traveling on armed merchantmen or liners belonging to the European belligerents. Resolutions to this effect were introduced by Congressman Jeff McLemore and Senator Thomas P. Gore, but were strongly opposed by the president and those who believed with him that American rights should not be abridged in any degree. Both the resolutions were defeated by decisive majorities.

Germany Offers "Peace."

On Dec. 12 Germany in a formal note offered to enter into peace negotiations, but did not specify any terms. The offer was practically rejected by the entente powers, which had been making extensive preparations to carry on the war with greater energy. The cabinets of Britain, France and Russia had been reconstituted with a view to concentrating power in fewer hands and thus obtaining quicker and more decisive action. In Britain Herbert H. Asquith was succeeded as prime minister by David Lloyd George, who in a speech delivered in the house of commons Dec. 15 declared there would be no peace except on the basis of reparation, restitution and guaranties by Germany. In France Gen. Nivelle was made commander in chief and Gen. Joffre was created marshal of France.

Wilson Suggests Pacific Step.

President Wilson in a note dated Dec. 18 and addressed to all the belligerent nations asked them to indicate precisely on what terms they would make peace.

Deutschland Visits America.

Germany partially evaded the allies' blockade by sending to the United States a merchant submarine, the *Deutschland*, commanded by Capt. Paul Koenig. The craft brought a valuable cargo of dyestuffs and other articles and took back rubber and various articles badly needed in the fatherland. Two trips were made, one in July and August and the other in November and December. Another merchant submarine, the *Bremen*, left Germany between the first and second voyages of the *Deutschland*, but was lost at sea.

Plots against the neutrality of the United States were not so numerous or successful as in 1915, prior to the recall of the Austrian ambassador and the German military and naval attaches. There were a number of suspicious explosions in munitions factories and an explosion and fire in Jersey City, N. J. July 30, causing a loss of about \$20,000,000 which was attributed to the enemies of the entente powers.

Campaign for National Defense.

National defense, or "preparedness," as it was popularly called, occupied the attention of the public and congress during a large part of the year, as it did to some extent in 1915. The controversies with Germany and Great Britain and the Mexican trouble made the military weakness of the United States more apparent than ever, and there was a strong demand that the country should be placed in a position that would defy aggression from any quarter. President Wilson made a tour of the east and middle west in January and February advocating the formation of a reserve of 500,000 citizen soldiers to assist the regular army. The secretary of war, Lindley M. Garrison, advocated larger national forces, holding that because of constitutional limitations no reliance could be placed upon state troops in time of emergency, no matter how efficient they might be as soldiers. The president disagreed with this view and the result was that Mr. Garrison resigned Feb. 10. He was succeeded by Newton D. Baker of Cleveland, O.

In May, June and July elaborate preparedness parades were held in some of the chief cities of the country with a view of impressing upon congress the earnestness of the people's desire for a stronger national defense. The largest of these parades took place in

New York city May 13 and in Chicago June 3. In each city more than 125,000 persons were in line.

Congress responded by passing laws for increasing the size and efficiency of the army and the navy, for a larger number of cadets at West Point and Annapolis, and for stronger fortifications on the coasts. Appropriations amounting to nearly \$700,000,000 for these and similar purposes were passed. The bill for increasing the navy was especially noteworthy. It provided for the building of ten first class battle ships, six battle cruisers, ten scout cruisers, fifty torpedo boat destroyers, sixty-seven submarines and various other ships. It also provided for a government armor plant and additional navy yards, as well as for the extension of the yards already in existence.

1917.

Naturally, from the American point of view, the entry of the United States into the war was the great outstanding feature of 1917. The chances are that history will so record it, for it proved to be the decisive factor in the struggle. Aside from that history will note that the year 1917 marked the departure of America from its traditional policy of political isolation from Europe. It will also note that it was not a voluntary but a forced departure, due to the total disregard shown by Germany for American rights on the seas.

Second in importance only to the entrance of America into the war was the revolution in Russia. Some might even rank it first because of its unexpected and sensational features. That the United States would eventually take a hand in the struggle between autocracy and democracy in Europe was more or less of a foregone conclusion in 1916, but that the czar of Russia should be deposed was not foreseen until Nicholas II. had actually lost his crown and was a prisoner.

Pro-German Greek King Ousted.

In glancing back over the developments in 1917 there are a number of other things that stand out with some distinctness. One is the forced abdication of the pro-German king of Greece, Constantine, and the substitution in his place of his son Alexander as nominal and M. Venizelos as the virtual ruler of the nation. Another is the capture of Jerusalem by the British—an event not of great military importance, perhaps, but of tremendous sentimental and moral significance. The taking of Bagdad and a large portion of Mesopotamia by the British, considered in connection with the success of the Palestine campaign, was also a matter of moment in that it vastly strengthened the position of the allies in the Moslem world—a world in which the Germans were ambitious to rule, and in which before the war they were rapidly obtaining pre-eminence.

In December, 1916, Germany and her allies made a peace offer without giving definite terms, but referring in boastful language to their victorious armies. That offer was rejected by the allies in January, 1917, with emphasis.

Wilson's Peace Address.

President Wilson appeared before the senate on the 22d of that month and made his famous "peace without victory" address, in which he advocated a world league for peace. His views were received sympathetically in most quarters, though the allies pointed out that no peace based on the condition of things existing before the war could be durable and that as matters stood it would be a virtual victory for the Germanic alliance.

This address was the last effort made by the president to bring peace to the world without resorting to armed force. He could see then that America was rapidly being forced into a position where no argument save that of the sword would avail. It was also the last appeal for peace made by any person commanding respectful attention save that is-

sued by Pope Benedict XV. on Aug. 15, to which President Wilson himself was obliged to reply firmly in the negative. He had then come to the conclusion that no peace treaty with the autocratic rulers of Germany would be worth the paper it was written on and that any peace to compensate for the huge price paid by the democratic nations of the world must be a peace based on victory over autocracy.

German Peace Resolutions.

On July 19 the German reichstag adopted resolutions in favor of peace on the basis of mutual understanding and lasting reconciliation among the nations. The resolutions sounded well, but they were accompanied by expressions indicating that Germany in this war was the victim of aggression and that it approved the acts of the government. They referred to the "men who are defending the fatherland," to the necessity of assuring the freedom of the seas and to the impossibility of conquering a united German nation. The allies, which with nearly all neutral nations were convinced that the German government was the real aggressor and that the freedom of the seas had never been restricted except by Germany herself were not in a mood to accept this as a serious move toward peace. The resolutions figured largely in German internal politics, but elsewhere they were without effect.

There were a number of peace conferences in Stockholm, but as the parties concerned were socialists of an extreme type and others holding views usually classed as anarchistic no serious attention was paid to them. The "pacifists" in the allied and neutral countries were more or less active, but received little encouragement. Their arguments did not appear to be taken or patriotic people.

Within a week after President Wilson's "peace without victory" speech before the senate the German government replied to it by announcing that beginning on Feb. 1 it would carry on unrestricted submarine warfare in certain extensive zones around the British isles, France and Italy. It would, however, graciously permit the United States to use a narrow lane to Falmouth with one sailing a week, provided the American ships were painted red and white and carried various sorts of distinguishing marks.

Bernstorff Dismissed.

This program was, of course, in direct violation of all the promises made by Germany to the United States and President Wilson acted promptly. On Feb. 3 at a joint session of the house and senate he announced that Ambassador Bernstorff had been given his passports and that all diplomatic relations with the Teuton empire had been severed. Mr. Wilson asked the co-operation of other neutral nations in ending the submarine depredations, but for various reasons none of them at that time could see their way clear to do so. The United States senate approved the action of the president in breaking with Germany by a vote of 78 to 5. The five voting in the negative were Kirby, Vardaman, Gronna, Works and LaFollette.

On Feb. 26 the president appeared before congress and asked for formal permission to arm American merchantmen so that they could protect themselves from attacks by submarines. This permission was promptly granted by the house, which appropriated \$100,000,000 for the arming and insuring of American merchant ships. In the senate, however, a similar measure was defeated by means of a filibuster led by Robert M. LaFollette of Wisconsin. This was made possible by the rules of the senate, which did not provide for cloture. Congress expired by limitation March 4, but the senate was called into extra session and within four days it adopted a cloture rule acceptable to the president.

It may be said at this point that Senator LaFollette's antiwar activities and especially some of his utterances in public speeches outside the senate led to a demand for his expulsion from that body. An investigation was ordered, but no action was ever taken.

Deeming himself authorized by existing law to arm merchantmen defensively, President Wilson gave formal notice March 12 that American ships traversing the barred areas of the seas would carry armed guards for the protection of the vessels and the lives of the persons on board.

Ruthless "U" Boat War On.

In the meantime the German submarine commanders were doing their best to carry out the policy of sinking all ships found in the barred zones without warning and without taking any steps to insure the safety of crews or passengers. On March 18 it became known that the American steamers *City of Memphis*, *Vigilancia* and *Illinois* had been sunk in this manner and that at least fifteen lives had been lost. It was felt that action could no longer be delayed and a special session of congress was called for April 2. The national lawmakers assembled that day and in the evening President Wilson delivered a message asking that war be declared against Germany. In this message, which has become historic, he said that armed neutrality had proved to be impracticable and that in the end it would draw the country into the war without its having the status of a belligerent.

"With a profound sense of the solemn and even tragical character of the step I am taking," he said, "and of the grave responsibility which it involves, but in unhesitating obedience to what I deem my constitutional duty, I advise that the congress declare the recent course of the imperial German government to be in fact nothing less than war against the government and people of the United States; that it formally accept the status of belligerent which has thus been thrust upon it and that it take immediate steps not only to put the country in a more thorough state of defense, but also to exert all its power and employ all its resources to bring the government of the German empire to terms and end the war."

Congress Votes War April 6.

Congress was overwhelmingly in favor of the course advised by the president and on April 6 a joint resolution was adopted formally declaring the existence of a state of war between the United States of America and the imperial German government. Only six senators and fifty representatives voted in the negative. After taking this momentous step congress, urged by the president, passed measures providing for the immediate creation of a national army and the increase to war strength of the national guard, the marine corps and the navy. It passed laws against espionage, trading with the enemy and the unlawful manufacture and use of explosives in time of war. It provided for the insurance of soldiers and sailors, for priority of shipments, for the seizure and use of enemy ships in American harbors, for conserving and controlling the food and fuel supply of the country, for stimulating agriculture, for increasing the signal corps of the army, especially in the matter of aviation, for extending additional credit to foreign governments, for issuing bonds and for providing additional revenues for war expenses by increasing old and creating new taxes.

War Budget Is \$21,390,730,940.

Between April 2, the day when the extra session began, and Oct. 6, the day it adjourned, the 65th congress passed all these measures and others of less importance. Altogether it appropriated or authorized the expenditure of \$19,321,225,908.41. Including the amount appropriated at the second session of the 64th congress the total reached the enormous sum of \$21,390,730,940.46. Most of the acts of the new congress were accepted with approval by the people of the country as a whole, though objection was made to certain features of the taxing policy, which were deemed by many to be unfair and confiscatory.

At the regular session of congress beginning Dec. 3 President Wilson asked for a declaration of war on Austria-Hungary, and this ac-

tion was taken. This was received with especial favor by Italy, which had been urging the United States for some time to take the step.

War to Victory, U. S. Slogan.

Once having determined its course, the United States bent all its energies toward prosecuting the war to a successful conclusion. Its first step was to increase its armed strength by the creation of a new national army through the selective draft system and by securing as many volunteers as possible for the national guard, the marine corps and the navy. The enlistments were numerous, but it was soon seen that without the selective draft satisfactory results would not have been achieved. To provide for officers for the new army, which was capable of almost indefinite expansion, training camps were established in various parts of the country. The course was about three months and as two series of these training schools were held thousands of promising officers were turned out. Men between the ages of 21 and 30 inclusive registered June 5 under the act of May 18 providing for the temporary increase of the military establishment of the United States. The total number thus inscribed was 9,683,445. The quota of men to be supplied by each state and territory was determined according to its population. The total number to be summoned on the first call was fixed at 687,000. The official drawing of numbers took place in Washington July 20. The men whose numbers brought them within those subject to the first call were then summoned, examined and either accepted or rejected.

Training a Great Army.

In the meantime sixteen great cantonments had been constructed at convenient points in the country and on Sept. 5 the first contingents of the new troops were sent to them to begin training. Soon thereafter half a million men or more were in these camps and in spite of some drawbacks, such as lack of sufficient guns and other equipment, rapid progress was made in making soldiers out of them. Only a few companies of men having special technical qualifications were sent from the national army to join the American expeditionary force in France in 1917.

Mobilization camps were established for the national guard in the south, and there, with the exception of those sent to France, they underwent intensive training. The guardsmen had much to do early in the spring and summer in the way of guarding bridges, canals, tunnels and other points where German plotters could work mischief. They did excellent work and were highly commended by the authorities. The naval training stations and the regular army mobilization camps were also the scene of great and continued activity. The middle west was an especially fruitful field in producing candidates for the navy and the marine corps. The mobilization of the national guard by President Wilson was proclaimed July 9.

Great activity was also shown in building up the aviation service of the country. Congress made liberal provision for the manufacture of airplanes and the training of aviators. The invention of the Liberty motor was hailed as a distinct triumph in the field of aviation. This motor, or one similar to it, was adapted for use in the trucks with which the army was supplied. Many college and university men entered the aviation service.

Hoover as Food Administrator.

But increasing the military strength of the country was only one step, though a most important one. The conservation of the country's material resources, especially its food and fuel, and their proper distribution, was another step. Congress supplied the needed legislative and President Wilson provided the administrative machinery. He appointed Herbert C. Hoover as food administrator Aug. 19 and on Aug. 23 Dr. Harry A. Garfield was appointed fuel administrator. The food admin-

istration was throughout the year extremely active in impressing upon the people the necessity of economy in the preparation and use of foods. To save wheat and meat for the allies wheatless and meatless days were established in homes, hotels and restaurants, with excellent results. The whole country was placarded with cards and posters proclaiming the value of food economy as a factor in winning the war.

Through the council of national defense, its advisory commission and its numerous committees an immense amount of work was done in classifying and making available the country's resources for defense and war. It was especially active in providing and standardizing munitions, in the purchase of army supplies, in stimulating inventions and research and in co-ordinating the work of the states and departments. It enlisted women in the cause of national defense, and in every way promoted the objects for which it was created. Some of the leading business and professional men of the country devoted all their time and energy, without cost to the government, to the national cause.

Creation of the Shipping Board.

To counteract the ravages of the submarine warfare the United States undertook to provide enough merchant tonnage to supply the transportation needs of the allies as well as of the United States. This was to be accomplished through the agency of a shipping board created by the act of Sept. 7, 1916. Maj.-Gen. George W. Goethals, the builder of the Panama canal, was made manager of the construction department and William Denman chairman of the board. Unfortunately irreconcilable differences of opinion arose between them as to the policy of building steel or wooden ships, and the result was that in July President Wilson accepted the resignations of both men. Edward N. Hurley became chairman, Charles Piez manager of the Emergency Fleet corporation and Edward F. Carry the director of the department of operations.

Issues of Liberty Bonds.

To meet in part the tremendous expense involved in creating an adequate army and navy, in carrying on the war and in making loans to the allies the secretary of the treasury issued bonds, the first series bearing interest at the rate of 3½ per cent and the second series 4 per cent. The loans were known as "liberty loans" and the bonds as "liberty bonds." The first bonds were offered May 2 and the second series Oct. 1. The allotments were \$2,000,000,000 and \$3,000,000,000, respectively. The subscriptions for the 3½ per cent bonds amounted to \$3,035,226,850 and those for the 4 per cent bonds to \$4,617,532,800. The secretary of the treasury, however, accepted only 50 per cent of the oversubscription on 4 per cents, bringing the total to \$3,808,766,150.

Besides being called upon for subscriptions to bonds the people of the country were asked to contribute to the American Red Cross, the Young Men's Christian association, the Knights of Columbus, the Salvation Army and various other agencies doing relief work in Europe and America or providing comforts for the soldiers at the training camps and in the field in France. To the Red Cross more than \$1,000,000,000 was given in May and June and additional millions in December. In November \$35,000,000 was raised in a week for the Y. M. C. A. fund. All the agencies named were active. The Red Cross, after creation by President Wilson of a war council under the chairmanship of Henry P. Davison, was especially active in France, Italy and Russia and brought relief to unnumbered thousands.

Work of the Navy.

When America entered the war the United States navy became active. Its operations were veiled in more or less secrecy, but it was known that it relieved the other allies of patrolling the greater part of the seas outside

the submarine area and that within that area it had a fleet of destroyers under command of Vice-Admiral William S. Sims chasing submarines—and destroying some of them—and acting as convoys to troopships and merchantmen. In this duty it met with some losses. The destroyer Cassin was torpedoed Oct. 16, one man being killed and five wounded, but was not sunk. The patrol boat Alcedo was sunk Nov. 6 with the loss of twenty-one lives. The destroyer Jacob Jones was torpedoed and sunk Dec. 6, with a loss of sixty-four lives. The destroyer Chauncey was sunk in a collision Nov. 19 and a score of men were drowned. The transport Antilles was sunk Oct. 17 when it was homeward bound, and seventy lives were lost. The transport Finland was torpedoed Oct. 28, but not sunk, though nine lives were lost, due to a panic on board the ship.

The Expeditionary Force.

It was announced May 14 that an expeditionary force of about one division of regulars under command of Maj.-Gen. John J. Pershing would be sent to France. Gen. Pershing had become well known in connection with the expedition to Mexico and the choice was a popular one. He arrived in England June 8 and in France June 13. The first contingent of troops reached France June 27 and the second contingent a little later. It afterward became known that the departure of the troops had been communicated to Germany and submarines were lying in wait for the transports. Only the vigilance of the American destroyers convoying the transports prevented the sinking of one or more of them with heavy loss of life. The first arrivals in France were at once given intensive training in the methods of modern warfare, their teachers being veteran French officers and troops. Their numbers were augmented from time to time until all branches of the service were represented. The command of the American forces in France was raised to the full rank of general by act of congress.

First American Army Casualties.

To give the troops actual experience in trench fighting a number of them, including artillery and infantry, were sent into a part of the line held by the French. Here the first casualties occurred. On Nov. 3 a German raiding party attacked a trench occupied by the Americans, killing three, wounding five and taken eleven prisoners. A number of other men were killed or wounded by shell fire. What casualties the Germans suffered was not learned, as they were able to carry off their dead and wounded.

While American sailors and soldiers were facing the enemy on sea and on land the people at home were menaced in various ways by German plotters. Some of these were alien enemies and others citizens of the United States of German birth or descent. To recount all the acts of violence committed and attempted would require much more space than is here available. They were mainly in the direction of destroying munition plants, bridges, food depots, ships and everything of military value. Hundreds of lives were lost through explosions undoubtedly caused by persons acting for Germany either officially or of their own accord. Even Ambassador Bernstorff himself was concerned in some of these plots involving bribery and violence. Other plots took the form of pacifist propaganda, lies about the liberty bonds and the Red Cross work, strikes and general obstruction to the government's war work. In this campaign the German agents were assisted by the majority of the socialists and by the notorious Industrial Workers of the World, many of whose leaders were arrested Sept. 5 in various parts of the United States.

Zimmermann and Luxburg.

In connection with the underground work of the German government the most sensational disclosures were made by the state department.

Everything made public was capable of documentary proof and the enemies of the United States soon learned that it was inadvisable to deny anything coming from this source. The revelation Feb. 28 of the attempt by the German foreign secretary, Dr. Alfred Zimmermann, to cause Mexico and Japan to make war on the United States helped materially to bring about the break in the relations between this country and Germany. Another revelation which aroused worldwide interest was the publication of the famous Luxburg cables from Buenos Aires to the Berlin foreign office advising that Argentine ships be sunk without trace ("spurious versenkt") and speaking of the acting minister of foreign affairs in the republic as a "notorious ass and Anglophile."

Because of plottings similar to those recounted, but chiefly because of the feeling of animosity aroused by Germany's continued violation of international law and the laws of humanity through her submarine campaign, the following nations in 1917 followed the example of the United States in formally declaring war on Germany: Cuba, Panama, Brazil, Greece, Siam, Liberia and China. In addition the following severed diplomatic relations with Germany: Bolivia, Guatemala, Honduras, Nicaragua, Haiti, Costa Rica, Peru and Uruguay. Thus at the end of the year nineteen countries with a combined population of nearly 1,800,000,000 were arrayed against Germany, Austria-Hungary, Turkey and Bulgaria, with a population of a little more than 142,000,000.

The Russian Revolution

With regard to the upheaval in Russia the facts are briefly these: The duma was dissolved by the czar March 11, but on the following day it declared that the government had been overthrown and that a new democratic government was in process of formation. In the town of Pskoff on March 15 Czar Nicholas was forced to abdicate and was imprisoned in his palace at Tsarskoe-Selo. Later he was sent to Tobolsk. The new government at first was in the hands of such well known men as Michael V. Rodzianko, Prince George E. Lvoff and Prof. Paul N. Milyoukov. It soon developed, however, that the more radical elements of the revolutionists were in control of the army and the working classes in the cities and that these were determined to quit the war and make peace according to their formula of "no annexations and no indemnities."

Because the new government did not stick close enough to this formula, but preferred to keep faith with the allies by refusing to make a separate peace, it was compelled in May to give way to a new ministry, in which Alexander Kerensky, a socialist, was the ruling spirit. Recognizing the difficulties the Russian democracy had to deal with, the United States sent several important missions to Petrograd to give such assistance as might be deemed possible. One of a political nature was headed by former Senator Elihu Root; another was an engineering commission led by John Stevens and a third was a Red Cross mission led by Dr. Frank Billings of Chicago.

On July 20 Kerensky became premier and in spite of increasing insubordination in the army continued in the saddle for some weeks. One of the incidents of his career as the head of the state was the proclamation on Sept. 14 of Russia as a republic. Kerensky, however, was not radical enough for the extremists and on Nov. 7 he was deposed by a counter-revolution led by Leon Trotzky and Nikolaï Lenin. Later Lenin was made premier and Trotzky foreign minister and they promptly made overtures to Germany for an armistice. This was granted and peace negotiations were under way in December. The country was in a state of anarchy with Finland, the Ukraine, Siberia and other districts proclaiming their independence and with the Cossacks fighting the bolsheviks, as the ruling extremists called themselves. A con-

stituent assembly was elected Nov. 24-26, but the bolsheviks, fearing that they could not control it, threatened forcibly to prevent its holding a session.

Constantine Deposed.

Constantine I., king of Greece, was deposed by the protecting powers—France, Great Britain and Russia—June 13 and his place on the throne was given to his second son, Prince Alexander. The provisional government led by Eleutherios Venizelos was merged with the new administration in Athens and war was formally declared on the Teutonic powers and their allies. Constantine, it was shown, had contemplated attacking the allies in Macedonia from the rear and it was apparent that his removal from authority came none too soon.

Many Submarines Sunk.

In their ruthless submarine warfare the Germans had less success than had been predicted by them. The sinkings of merchant vessels were serious enough and for a time constituted a menace to the food and other importations of Britain, but after the United States entered the war and sent its fleet of destroyers and submarine chasers across the Atlantic for patrol work the danger gradually lessened. Many submarines were sunk in the course of the year and their operations were gradually restricted until it was felt that there was no longer any danger that they would become a decisive factor in the war.

Naturally the British were the heaviest losers in this species of warfare, but other nations suffered severely, especially seafaring Norway, which thus lost about one-third of her vessels and some 700 sailors murdered. Some of the actions of the German submarines and raiders were so atrocious as to arouse the resentment of the nation to the verge of war even in the face of tremendous odds.

No naval battles of importance were fought in 1917. All the engagements were between destroyers and other light craft.

Germany continued to send air raiders across to Britain to bombard the coast towns and interior cities, including London. No appreciable military losses were caused, but many innocent lives were taken. The announced purpose of the British to retaliate in kind was generally approved, it being felt that Germany must be given a dose of her own medicine.

Events on the Fighting Fronts.

On the fighting fronts in Europe, Asia and Africa the developments in the course of the year were numerous and important. Beginning with Africa, it may be noted that the last vestige of German authority on that continent was extinguished by the forces under Gen. Vandeventer, when on Dec. 1 they had cleared East Africa of the enemy. Germany at the present moment has not a single colony left in the world.

In Mesopotamia the British under Gen. Frederick Stanley Maude captured Kut-el-Amara toward the end of February and on March 11 entered the city of Bagdad, which had been the goal of Gen. Townshend's ill fated expedition the previous year. They drove the Turks far beyond that city and joined hands with the Russians who had come down through Persia. Gen. Maude died Nov. 18.

Capture of Jerusalem.

British forces from Egypt carried on a successful campaign against the Turks and Germans in Palestine. In January they routed the enemy troops at Raifa and on March 26 inflicted a severe defeat on them in the vicinity of Gaza. Under the able leadership of Gen. E. H. Allenby the British pressed on toward the north, taking Beersheba Oct. 31, Gaza Nov. 7, Jaffa Nov. 17 and Jerusalem Dec. 11. On Christmas day it was announced that Bethlehem had also been taken by the British. This successful campaign in Palestine appealed strongly to the entire Christian world.

Austrian Invasion of Italy.

On the Italian front there were two swift changes in the course of the year. In May and again in August Gen. Cadorna inflicted severe defeats on the Austrians on the Carso and Bainsizza plateaus. Then in October heavy Austrian and German forces under the leadership of Field Marshal von Mackensen attacked the northern part of the Isonzo line and, aided by the treacherous weakening of certain Italian troops at Caporetto, drove Gen. Cadorna's forces first to the line of the Tagliamento and then to the line of the Piave. Here the Italians made a stand and were able to hold back the enemy in the face of the most furious attacks, especially in the mountainous region toward the northwest, where the Austrian forces made desperate efforts to force their way down to the plains and turn the left flank of the Italian line. The Italians lost heavily in men and materiel during the retreat, but the forces were reorganized and reinforced by French and British infantry and artillery.

On the east front the Russians made their last advance July 1 when in eastern Galicia they captured Brezany, Halicz and other places with some 30,000 prisoners. After that the Russian armies refused to obey their commanders and it was an easy matter for the Germans to recover the lost ground and advance still farther. In the early part of September the Germans crossed the Dvina river and Riga soon fell into their hands, together with certain islands in the Baltic. Then came the truce and the peace negotiations. In Macedonia little was accomplished by the allies. Gen. Sarrail, the commander in chief, was recalled in December.

Pierce Struggles on West Front.

Fierce and bloody fighting continued on the western front throughout the greater part of the year. The advantage in the main was with the British and the French, who maintained the initiative and delivered many telling blows. The Germans were not able to do much in the way of retaliation, though they won a measure of success against the British at the extreme northern end of the line in Belgium and on Nov. 30 at Cambrai. On the other hand the British won notable victories in the vicinity of Lens, Arras and along the Ypres-Menin road. One of the notable features of the fighting was the capture by Canadian troops of Vimy ridge in April. Gen. Sir Julian Byng won a brilliant victory by a surprise attack in the Cambrai sector Nov. 20-22. He took a considerable area of fortified territory and about 10,000 prisoners, but the effect of the triumph was offset to some extent by the successful counterattack made by the Germans a few days later. The French also carried out a number of successful offensives. On April 16 they took the German first and second lines on a twenty-five mile front at the Soissons-Rims sector and captured 20,000 Germans, together with about seventy-five heavy guns. On May 4 they captured Craonne and the adjacent territory. They fought successfully along the Chemin des Dames, on the Calornie plateau, at Cerny and many other places. All the efforts of the German crown prince to advance in the Verdun sector proved costly failures. On Oct. 23 the French smashed through the German lines north of the Aisne to a depth of more than two miles, taking the strongholds of Allemant, Vaudesson, Malmaison fort and Chavignon.

In the air the year was one of increased activity. Numberless raids were made on all the fronts and it became increasingly apparent that to be successful modern armies must be supplemented by large aerial forces.

Foreign Missions to America.

Great Britain, France, Italy, Belgium, Russia, Japan, Roumania, Serbia and other countries sent some of their distinguished men to the United States on military and political

missions. Some of them after completing their work in Washington made extended tours through the country. Great Britain sent Arthur James Balfour, its foreign minister, and Lord Cunliffe, governor of the Bank of England. France was represented by Rene Viviani, minister of justice, and Gen. Joffre, military adviser of the French government. Italy had as the head of its mission Prince Ferdinando di Savoia of Udine. Russia sent Boris A. Bakhmetieff, Belgium Baron Ludovic Moncheur, Roumania Count Vassile Stoica, Norway Dr. Fridtjof Nansen and Japan Baron Ishii. Some of the leaders of these missions gave addresses before the houses of congress and laid wreaths on the tomb of Washington at Mount Vernon.

1918.

When the year 1918 opened the attention of the world was chiefly directed toward the negotiations in progress between Germany and the bolshevik extremists in Russia led by Lenin and Trotzky.

NOKOLAI LENIN.

Underwood & Underwood,
LEON TROTZKY.

The parleys were held at Brest-Litovsk, beginning Dec. 22, 1917, and ended March 3, 1918, when the Russian delegation signed a peace treaty, the terms of which were essentially in violation of all they had contended for and virtually dispossessed Russia of some of her richest provinces.

The bolshevik leaders made a curious attempt to end the war without any formal peace pact, but they were quickly brought to their senses when the German army resumed operations and captured Dvinsk, Lutsk and other cities and even threatened Petrograd to such an extent that it was abandoned as the seat of government in favor of Moscow, where the central soviet, or executive body of the soldiers, peasants and workmen, have since had their headquarters. The bolsheviks were greatly chagrined at the outcome of the peace negotiations, but at a congress of soviets held in Moscow March 14-16 last the terms of the peace imposed by the Germans were finally ratified. President Wilson sent to this gathering a message of sympathy because of the check suffered by Russia in her struggle for freedom. To this message the soviet returned a somewhat cool expression of appreciation.

Since the peace treaty was signed Russia has been in a most deplorable state. The Ukraine, one of the richest grain districts of the former empire, was the first to break away, declaring its independence and entering into a separate peace treaty with the central powers. Finland became the scene of civil war between the "red guards" representing the Russian bolshevik government and the "white guards," organized by the Finlanders with the help of Germany. In the end the white guards triumphed and a Finnish government absolutely under the control of Germany was established in Helsinki. The landed proprietors sent agents to Berlin and entered into a secret agreement by which the country was to be turned into a kingdom with a German prince on the throne. Germany's collapse in November put an end to this scheme as well as many others.

Siberia Forsakes Bolsheviki.

Siberia also broke away from the bolsheviki and set up an independent government which is now seeking to establish its control with allied and other aid. Other provinces also declared their independence. In the meantime famine and pestilence have been raging in many localities, while anarchy has reigned virtually everywhere. The whole of the immense Russian army, obsessed with the idea of a peace without annexations or indemnities and the self-determination of the rights of peoples, melted away and left nothing to take its place except such small bodies of inefficient and undisciplined troops as the soviets were able to maintain. This, of course, liberated millions of German and Austro-Hungarian soldiers for service on the Italian and French fronts where before this the strength of the opposing armies had been nearly equal.

Roumania, it may be noted in this connection, kept up the fight against the central powers as long as she had support from Russia, but when the latter made peace it was no longer possible to continue the struggle. On May 6 she signed a treaty of peace by which she lost the province of the Dobrogea and also control over her fine oil fields which under a long time lease were to be exploited by a German concern. Her western frontiers were "rectified" and she was obliged to submit to numerous economic restrictions. Thus Roumania, as well as Russia, was lost to the allies.

It having become apparent even before the close of the third year of the war that Russia could no longer be counted upon for support, the allies began preparations to meet, especially on the western front, the attack of the German armies soon to be immensely strengthened by forces released from the eastern front. All eyes were turned to America, for France, England and Italy had reached or almost reached the limit of their man power.

America to the Rescue.

America responded quickly with men, money and materiel. The training of national army men, national guards and officers in the numerous cantonments was intensified and hurried and as fast as the men were brought into condition they were shipped to France. At first much of the space on the transports was devoted to supplies and materials for the camps and depots in France, but as the situation became critical owing to successful enemy offensives in Italy and France fewer supplies and more men were sent. The number of transports was largely increased, with the result that each month, with one exception, showed a decided improvement in the movement of troops.

The troop movement record, in view of the danger from submarines, was a wonderful one and by November there were more than 2,000,000 American troops in France, England and Italy. This immense number of men was carried over without the loss of a single east bound American transport. The only disasters were those which occurred to the British transports Tuscania and Otranto, with the loss of several hundred American soldiers.

While soldiers were being sent across the seas at a rapid rate the assembling and training of new men at home was continued with accelerated speed. There were new registrations for the selective draft, the idea of the war department being to have more than 4,000,000 men in Europe by the summer of 1919, when it was thought Germany might finally be conquered.

The number of warships in commission was largely increased, especially in the matter of destroyers, submarine chasers and lighter craft.

Next in importance to the increase of the army and the navy was building of merchant vessels to offset the ravages of the submarine warfare. The shipping board was reorganized and galvanized into a high state of efficiency. Under the leadership of Charles M. Schwab, director-general of the Emergency Fleet corporation, and Edward N. Hurley, chairman of

the board, the work in the shipyards on the Atlantic and Pacific coasts and on the great lakes was speeded up until ships were being built at the rate of 5,000,000 tons a year. In the first three weeks of July twenty-three ships of 122,771 dead weight tons were completed, making a total of 223 new vessels built under the direction of the board, the aggregate tonnage being 1,415,922 tons. On July 4 alone eighty-two vessels were launched. This speed was maintained and even exceeded until the signing of the armistice, when the need for haste became less urgent.

This with the increased tonnage put out by the British, French and Italian shipyards, to say nothing of the output of neutral countries friendly to the allies, practically put an end to the submarine peril. In addition the United States requisitioned seventy-seven Dutch ships with an aggregate tonnage of about 600,000. Arrangements were made with Sweden for about 400,000 tons and contracts were let for the building of a considerable number of ships in Japanese yards.

In the matter of building fighting airplanes and heavy ordnance there was some delay owing partly to experimental work and partly, perhaps, to mismanagement in certain quarters, but better progress was made later. A fair number of fighting planes was shipped to Europe.

Food Economy Aids Allies.

With fairly good harvests in 1917, with the practice of economy in the consumption of wheat flour and meats in accordance with the recommendations of the food administration and with increased shipping facilities the United States was enabled not only to feed its own soldiers and sailors well, but to help out Britain, France and Italy to such an extent that they were relieved of the fear of starvation and want. The American record in this respect won many expressions of gratitude and admiration from the allies.

Prices of food and clothing and commodities in general advanced, but so did wages, and there was no acute suffering on account of war conditions on this side of the Atlantic. The administration took many steps to relieve the situation, such as fixing the prices of certain important articles like wheat, regulating exports and imports, taking over the main railroad lines and settling labor controversies without the intervention of disastrous strikes.

The taking over of the railroad lines was one of the most radical steps taken by the administration. It was done for the purpose of bringing to an end the congestion of freight, confusion in shipments and other serious evils which could be obviated by unified management and control. The express companies were also brought under one management. Later because of the threat of a strike by operators, congress passed a resolution authorizing the president to take over the telegraph, cable and telephone systems of the country, and this was done. These arrangements, like many others, are for the duration of the war.

In January a national war labor board was created for the purpose of furnishing an adequate and stable supply of labor to war industries, and in March a war industries board was appointed for the purpose, among others, of creating new facilities and improving present facilities or the production of military materiel and for making purchases for the allies.

Coal Shortage.

Owing to transportation difficulties and also to the exceptionally severe character of the winter, the coal situation became acute, and on Jan. 16 the United States fuel administration issued an order restricting the consumption of coal to certain industries and setting aside specified days on which no coal should be used. The head of the fuel administration, Dr. Harry A. Garfield, was criticized for some features of this order as unnecessarily drastic, but he defended the step as a war measure. Afterward the country

was divided into zones and the source of supply for each was designated.

In times of peace the government spent less than \$1,000,000,000 a year; in 1918 the outlay by midyear was at the rate of \$50,000,000 a day. The actual outlay for the fiscal year ending June 30, 1918, was more than \$12,600,000,000. The United States before the end of the war had loaned to the allies more than \$8,000,000,000. Two more liberty loans were issued by the government in 1918—one for \$3,000,000,000 and one for \$6,000,000,000. In both cases the amounts were largely oversubscribed.

To meet the heavy expenditures of the government President Wilson in a speech delivered before congress on May 27 asked for new tax legislation, and a committee of the house started framing a revenue law designed to bring in \$8,000,000,000 through taxation. That was the figure suggested by Secretary of the Treasury McAdoo, who estimated that the expenditures during the present fiscal year will amount to \$24,000,000,000.

Besides buying war bonds the people of the United States in May contributed considerably more than \$100,000,000 to the American Red Cross war fund. They also subscribed heavily to the Young Men's Christian association fund, to the Knights of Columbus, the Salvation Army and to numberless other organizations of a similar character. It was a year of generous giving.

New Laws by Congress.

Congress was engaged almost solely in war legislation. Here are a few of the measures enacted into law: Extending protection to the civil rights of members of the military and naval establishments; providing for the operation of transportation systems while under federal control; providing credits for industries and enterprises in the United States necessary to the prosecution of the war; authorizing the issue of additional bonds; to conserve the gold supply of the United States and to stabilize the price and encourage the production of silver; amending the espionage act; authorizing the president to provide housing for war needs; authorizing the president to consolidate executive bureaus and offices; providing for vocational rehabilitation of disabled soldiers and sailors; making appropriations amounting to billions of dollars for the army and navy and other departments of the government. In the main these and other war measures were passed without division on party lines.

In the course of the year President Wilson made a number of notable addresses all attracting worldwide attention. The peace discussion in which he, David Lloyd George, Chancellor Count von Hertling, Count Czernin, Richard von Kuehlmann and others of lesser note engaged, drew from him a speech before congress on Jan. 8, in which he demanded the righting of the Alsace wrong, the liberation of Poland, the evacuation of all Belgian and Russian territory and a readjustment of the frontiers of Italy. These and other terms were laid down in brief and remarkably businesslike utterances. Chancellor von Hertling in reply rattled the German sword, but Count Czernin, the Austro-Hungarian foreign minister, replied in more conciliatory language.

Four Basic Peace Principles.

On Feb. 11 President Wilson again addressed congress, and laid down four basic principles as essential to a just and lasting peace. These were: The final settlement must be just; peoples and countries must not be bartered about by the powers like chattels; territorial settlements must be for the benefit of the peoples concerned, and all well defined national aspirations should be granted so far as might be consistent with future peace. These principles were indorsed by the allies, but not by the central powers.

Previously to this the president had replied to Pope Benedict, who on Aug. 13, 1917, appealed to the belligerents to negotiate for peace on the basis of the restoration of

Belgium and Serbia and the return of the German colonies, that the German government as constituted could not be trusted and the United States would only negotiate with persons more truly representative of the German people. Pope Benedict made another appeal for peace at Easter, 1918, but without effect on the belligerents.

President Wilson's other addresses were: Feb. 6, asking congress for more power in directing war operations; April 6, in Baltimore, on the first anniversary of America's entrance into the war; May 18, in New York city, opening the Red Cross fund campaign; on July 4, to diplomats and foreign born at Mount Vernon; and on Labor day, Sept. 2. In most of these he reiterated in eloquent language the war aims of the United States.

Nations declaring war in 1918 were: Guatemala against Germany, April 21; Nicaragua against Germany, May 7; Costa Rica against Germany and Austria-Hungary, May 24; Haiti against Germany, July 15; Honduras against Germany, July 16.

Until March 1918, the American troops in France saw little actual warfare, though a number of them were under fire while getting the finishing touches of their training in the front trenches. On Jan. 21 Americans took informal charge of a sector of the French front near Toul. Minor encounters occurred Jan. 30 and Feb. 4, the latter on a Lorraine sector which the Americans were holding, several casualties being suffered. Other similar affairs took place from time to time. On Feb. 26 five Americans were killed and 100 or more disabled by a gas attack. On March 1 in the Toul sector they repulsed a heavy German raid, killing many. On March 6 it was announced that the Americans were holding an eight mile front in France alone.

Secretary of War Newton D. Baker arrived in France March 10 and inspected the American forces in France. He also visited England and Italy, conferring with the authorities there and returned home April 18. The result of his trip and the beginning of the great German offensive March 21 was a tremendous increase in the military activities of the United States, particularly in rushing troops to Europe.

German Offensive in March.

On March 21 the Germans attacked along the British front from the Oise to the Scarpe, a distance of fifty miles, and drove Gen. Halg's troops back for twenty miles or more, capturing Chauny, Ham, Peronne, Bapaume, Nesle, Roye and many other places. The French were also driven back and lost Montdidier, Noyon and other towns. The Germans attempted by driving toward Amiens to separate the French and British armies, intending to roll up each in turn, but after some victories in Flanders and on the French front they were finally stopped. They had advanced some thirty-five miles and retaken the greater part of the ground abandoned in the Hindenburg retreat. The allies lost heavily in killed, wounded and prisoners, but the Germans, being the aggressors, lost still more men. This was especially true in the battle of Ypres, on April 9 when they were defeated by the British and French.

On March 28, in the height of the great battle, the allies came to an agreement to place all their forces from the Arctic ocean to the Mediterranean under one supreme command. The man chosen was Gen. Foch, a leading French strategist. On March 29 Gen. Pershing placed all of the American forces at Gen. Foch's disposal and the offer was accepted. On the following day the American troops not already at the front began their march to take part in the battle. Since then they have been brigaded with the French and British all the way from the North sea to Switzerland.

On April 8 the Germans began a new offensive on the whole British front and won a number of victories in the La Basse canal region and elsewhere, forcing the defenders

to evacuate Armentieres and pushing them back to the line of Wytschaete, Messines ridge and Ploegsteert. They also attacked the French lines. By April 19 the Germans had taken Merin, Neuve Eglise, Bailleul, Wulverghem, Wytschaete, Poelcapelle, Paschendale and Langemark and part of Messines ridge.

Review of Great Battle.

In an illuminating cable message on April 21, sent by Paul Scott Mower, staff correspondent of The Daily News with the French armies, he said:

"Exactly a month ago to-day the world's greatest battle began. What has happened in this month?

"The history of such vast and complicated events never can be written until long afterwards. Not only are all the facts not yet collated, but many facts cannot yet be revealed because they would be useful to the enemy, who is much worried at present because he cannot discover whether the French army is still practically intact. Nevertheless, I will attempt in this dispatch to give a more detailed account of the month's developments than any other hitherto published.

"This account is in no way based on official reports, to which, indeed, I have not had access, but merely upon personal observations and opinions and to some extent upon the collation of miscellaneous information which has already been published.

"I shall not dwell upon the picturesque side of the battle; neither upon the myriad acts of individual heroism, nor upon the skill and devotion of the French and British armies as a whole. I shall confine myself to stating what I conceive to be the broad outlines of the battle. For clearness I shall number the headings from 1 to 9.

German Preparations for Blow.

"1. German Preparations—Having definitely settled the Russian situation, the German great general staff with the kaiser's consent decided in February to make a final effort to win a complete victory over the allies by vanquishing Britain and France before the United States could transport a decisive number of fighting men to Europe. The front to be attacked was chosen and the date set for March 21. The preliminary preparations had already been made. All that remained was to concentrate troops and materiel.

"This concentration was effected with the greatest secrecy. The troop trains were unlighted and ran only by night. Subdivisions while on the way were kept under shelter and out of sight in the daytime.

Two Hundred Divisions Gathered.

"Little by little about 200 divisions were gathered in France. Half of them, being destined to take part in the coming battle, were assembled in reasonable proximity to the British front. Not only were the divisions all raised to full strength, newly equipped and re-enforced with various kinds of specialists, but every possible contingency was foreseen and materiel provided accordingly. The troops were excited to a high pitch of enthusiasm and the greatest confidence prevailed.

Preparations by the Allies.

"2. In the expectation of a big German offensive the allies took important measures. The British took over the section of the French front between St. Quentin and Chauny in order to free more French divisions for maneuvering purposes. The question of a unified command was agitated but resulted in a compromise, namely, the creation of the Versailles council, which was to hold all the allied general reserves at its disposition. The general reserves were estimated by the Germans at forty-five French divisions and fifteen British. The allied reserves were carefully distributed at strategic points.

"I am not conversant with what took place behind the British lines, but behind the French there was a vast amount of labor, the digging of position behind position with trenches and

barbed wire complete to a depth of many kilometers.

Aimed to Split Allies' Lines.

"3. The German Plan—The Germans' conception was Napoleonic. They designed to break the French and British armies apart at the point of junction, then crush the British army by turning its right while leaving a strong force defensively opposite the French left. The death blow to the British was to be given by a second attack in Flanders following the first one on the Somme.

"The means whereby they were certain they would succeed were: (a) The vast secret concentration. (b) The surprise which would end everything before the allies' reserves could arrive.

"The German railways radiate to many points on the front, whereas the allies' railways mostly run in semicircles parallel with the front, thus giving the enemy a decided advantage.

Allies Expected Big Blow.

"4. The Allies' Plan—The allies' plan was simply to allow the Germans to attack and sustain the blow successfully. They expected the Germans to attack in the region of St. Quentin, but there were also reasons to suppose that the Germans would attack in the Champagne. The allies were no less confident of their ability to sustain the shock than the Germans were confident of victory.

Hit from Arras to Chauny.

"5. First Phase of the Battle—The sector chosen for attack was thirty-eight miles long, from Arras to Chauny, held entirely by the British. Against two armies three powerful German armies were concentrated. The British generals were Byng on the north and Gough on the south. The German generals from north to south were Von Below, Von Marwitz and Von Hutier. The British were outnumbered two to one, both in men and guns.

"What happened? Gen. Byng's army held admirably, maintaining the positions on the left and retreating on the right only to keep in contact with Gen. Gough. The latter's army, which had to bear the brunt of the German blow, was broken in two. Retreat was imperative.

Road to Paris Put in Danger.

"The peculiarities of this retreat were: (a) Its rapidity. (b) Its direction. Instead of retreating eastward and keeping a loop formation around the German advance, the British retired first due west and then northwest toward Amiens. The entire Oise valley, which is on the direct road to Paris, was in danger. The Germans' original objective had been Amiens. Two days after the battle began their objective became Paris.

"But the Germans had reckoned without the French. The French army began to check the danger in the Oise valley on March 23. The fighting literally was one against three. The general in command retired foot by foot and by March 26, having received re-enforcements, began to hold firmly along the line Chauny-Noyon.

"The Germans on March 31 made their last great attempt to break through the valley of the Oise. They were soundly repulsed. Paris ceased to be the German objective. Field Marshal von Hindenburg again turned his attention to Amiens.

Connecting Link Is Formed.

"Meanwhile another French army had begun intervention on March 27 on the left of the army that blocked the road to Paris, forming a connecting link between it and the remnant of Gen. Gough's army. On the first day the French, along a twenty kilometer (twelve mile) front from Hangard to Tilloy fought literally one to ten, yet disputed every foot of the ground. By March 31 this French army, having received re-enforcements, was holding firm along the lines from the Somme to Montdidier,

to which the commander had now extended his left.

The last general offensive against Amiens was made April 4. The French and British fighting against odds of two to one, repulsed the Germans with heavy loss. The Germans when stopped were still fifteen kilometers (nine miles) from Amiens. The first phase of the battle was ended.

Second Phase of Big Battle.

"6. Second Phase—Of the second phase, which began April 9 and 10 against the British and Portuguese on a front of about twenty-five kilometers (fifteen miles) from La Bassee to near Ypres, less can be said, for it is more recent and moreover I am less fully informed. The Germans broke the British center, which was being held by three Portuguese divisions. The situation on April 12 was critical, but since then it has been steady and improving.

"There can be little doubt now that the Germans have been stopped, French reinforcements have arrived and the offensive here will probably die out as did the offensive on Amiens.

Methods of Foe in Attack.

"7. German Tactics—The German method of attack was as follows:

"A preparatory bombardment, brief but intense, began at midnight on March 21 and lasted about six hours. Within this period 1,500,000 shells were fired by one single army. Most of the shells contained gas and were intended less to destroy the British trenches than to destroy their occupants.

"The infantry attacked in successive waves. The waves swept right over the zone of trenches, leaving such groups of British as still resisted to be dealt with by groups of special troops which followed the waves. Once in the open the waves advanced successfully under cover of a constant rifle and machine gun barrage. All units had orders to advance as far and as fast as possible. The troops were all provided with three days' rations and two days' water.

Reserves Behind the Lines.

"Behind the fighting troops a large number of reserves were assembled with which to fill the gaps in the ranks and reconstitute the divisions as quickly as possible. Airplanes played no great part in the German offensive, although bombardment planes were used nightly to bomb the French and British rear, with a view of terrorization.

Tactics Pursued by Allies.

"8. The Allies' Tactics—The allies' tactics were not complicated. Once open fighting was resumed they had simply to defend their ground stubbornly with rifle and machine gun fire, counterattacking with the bayonet whenever that seemed expedient. They were outnumbered and reserves were used sparingly.

"The first French troops engaged were cavalry, who fought dismounted. The infantry was transported on camions, which, during the critical days, went right into the zone of fire, the troops climbing down and forming a firing line immediately in a ditch along the road. The allies' artillery in most instances reached the battle field before the Germans and played a great part in checking the German advance. This was especially true of the French fieldpieces. As the allies were constantly endeavoring to stabilize the lines they dug trenches wherever possible.

Allies Superior in the Air.

"Throughout the battle the allies' aviation service completely dominated that of the enemy. French and British fighting planes attacked the German infantry from low altitudes with machine guns, while bombing planes both day and night dropped bombs not only on the enemy's reserves but on the actual firing line, thus temporarily replacing the heavy artillery.

Overestimated Their Strength.

"9. Conclusion—The Germans' plan was well conceived and executed with good strategy, good tactics and good morale, but reckoned on a superiority which they did not possess. The allies' preparation, strategy and tactics also proved good, and the situation, momentarily critical both in Picardy and Flanders, has apparently been firmly re-established. The Germans claim to have taken from the British more than 100,000 prisoners and about 2,000 guns, including trench mortars, and from the French 2,000 prisoners. The French and British each have taken about 2,000 German prisoners.

Fail to Separate Armies.

"In their purpose to separate the French and British armies and crush the latter the Germans have absolutely failed. The allies' lines have everywhere been re-established and the allies' command now is united. The Germans thus far have thrown into the fighting about 126 divisions. Their losses will probably reach more than 300,000. They have still more divisions which they can use for a new offensive and which will form the third phase of the mighty battle. This offensive, like the two preceding it, will fail. Then will come the allies' turn."

Americans' First Real Fight.

On the 20th of April the Americans had their first serious encounter with the Germans. This was at Seicheprey, a village near Renners forest. The Germans captured the place, but the Americans by a counterattack recovered the lost ground. On the 25th and 26th the Germans took Mount Kemmel, Dranoutre and St. Eloi, while the British recaptured Villers-Bretonneux. Fighting of a more or less local character continued throughout the month and in May with varying fortunes.

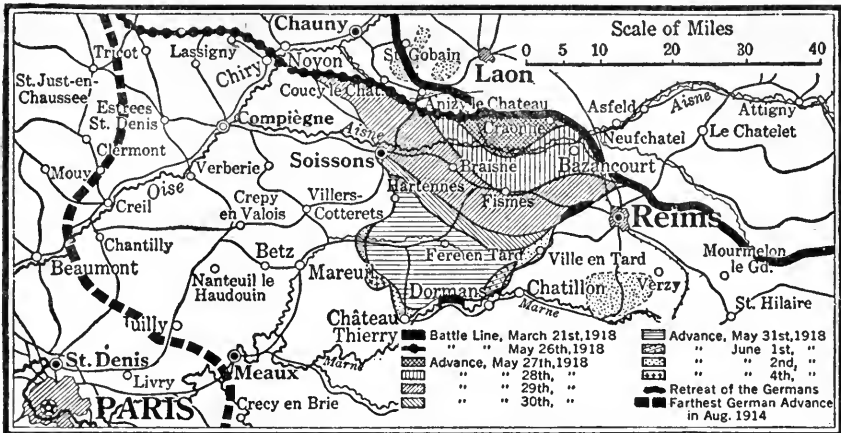

Third Phase of Offensive.

On May 27 the Germans began another great offensive, taking the Chemin des Dames from the French and crossing the Aisne. On the following day they crossed the Vesle river at Fismes. On this day also the Americans won their first notable victory by capturing the village of Cantigny and taking 200 prisoners. This position they held against many subsequent counterattacks. Soissons was taken by the Germans May 29 and on the 30th they occupied Fere-en-Tardenois and Verzy. On the 31st they reached Chateau Thierry and other points on the Marne, where they were halted by the French. Fighting of a spirited character continued for a few days longer, but the Germans could advance no farther in that direction at the time.

Chouy and Neuilly-St. Front fell to the Germans on June 1. On the following four days they took Pernant and a few villages, but the French by counterattacks recaptured Longpont, Corcy, Troches and some other places. On June 6 American marines by a spirited attack gained two miles on a two and a half mile front near Veully-la-Poterie, taking Hill 142 near Torcy and entering Torcy itself. On the following day, with French aid, they completed the capture of Vilny, Veully-la-Poterie, Bussaires, Belleau and the heights southeast of Haute Vesnes. In a second battle northwest of Chateau Thierry the Americans advanced nearly two and half miles on a six mile front, taking about 300 prisoners. In these battles the American troops confirmed the impression that as fighters they were equal to their allies and that with more experience they would be as good as the best.

Fourth Phase of Offensive.

On June 9 the Germans began the fourth phase of the offensive by attacking between Montdidier and the Oise, advancing about four miles and taking several villages. On the next day they took the villages of Merry, Belleu and St. Maur and claimed the capture of 8,000 French. On this day the American marines took the greater part of Belleau wood.

[Reproduced from the Literary Digest.]

MAP ILLUSTRATING ADVANCE AND RETREAT OF GERMANS IN MARCH AND JUNE, 1918.

On June 11 they completed the capture of Belleau wood, taking 300 prisoners and several machine guns and mortars. The French at the same time defeated the Germans between Rubescourt and St. Maur, taking 1,000 prisoners. There were other battles on the 12th and 13th, but on the 14th the German offensive was pronounced a costly failure.

From this time to the end of June the fighting was of a less serious character, though the Americans in the Belleau and Vaux region gave the Germans no rest, attacking them continually and taking prisoners. Public attention at this period was directed to Italy, where the Austrians took the offensive.

July 2 President Wilson announced that there were 1,019,115 American soldiers in France. July 4 was celebrated in England, France and Italy, as well as in the United States. On that day Americans assisted the Australians in taking Hamel, with many prisoners. On the 8th and 9th the French advanced in the region of Longpont and northwest of Compiègne. On the 15th they took Castel and other strong points near the west bank of the Avre river. July 14, the French national holiday, was observed in America and by the American soldiers in France.

Fifth and Last Phase.

Then on July 15 the Germans began the fifth and last phase of the offensive they initiated on March 21, attacking from Chateau Thierry on the west to Massignes, along a sixty-five mile front and crossing the Marne at several places. At Chateau Thierry the Americans put up a strong resistance, but by persistent efforts the enemy succeeded in gaining a footing on the south bank.

The battle continued both east and west of Reims, with the allies holding strongly everywhere and the Germans meeting heavy losses. The latter aimed at Chalons and Epernay and hoped by turning the Reims position to capture the cathedral city without having to assault directly its formidable defense. Gen. Gouraud, the hero of Gallipoli, was in charge of the French forces on the right, while Gen. Mangin and Gen. de Goutte held the left. Most of the Americans taking part in the fighting were under the command of these three noted warriors, and strong Italian and British detachments were with Gouraud's forces.

While the Germans were trying to force their

way regardless of cost in the direction of Chalons and Epernay—Gen. Foch, who seems to have had advance information of the German crown prince's plans, was preparing a surprise in the Villers-Cotterets forest on the German right flank. Large forces were gathered, including some of the best French regiments, together with the foreign legion, the Moroccan regiment and other crack troops and many Americans. On Thursday morning, July 18, a heavy blow was launched at the Germans all along the line from Chateau Thierry on the Marne to the Aisne river northwest of Soissons.

Turn of the Tide.

The Teutons were taken wholly by surprise and town after town was taken with comparatively little resistance. Later the resistance stiffened, but the allies continued to advance. Mounted cavalrymen assisted the infantrymen and tanks in large numbers helped to clear out machine gun nests. The Americans, who fought side by side with the French, did their work in a manner to excite the admiration of their comrades. Thousands of prisoners were taken with large numbers of heavy cannon and great quantities of ammunition, to say nothing of thousands of machine guns. It was a master stroke by Gen. Foch and his officers.

By the 20th Soissons was threatened. The Germans, finding themselves caught in a dangerous salient and attacked fiercely on both flanks by the allies, hurriedly retreated to the north bank of the Marne and still farther. They were in such a critical situation that the crown prince was forced to call for assistance from Prince Rupprecht in the north.

Austrian Offensive in June.

On the Italian front there were also indications that the Germanic alliance was in difficulties. After its reverse in October, 1917, and its retreat to the line of the Piave river the Italian army was reorganized and strengthened under Gen. Diaz, who had succeeded Gen. Cadorna. French and British regiments were sent to help hold the line. Later some American troops were also sent.

On June 15 the Austrians, urged on by the Germans, began an offensive along a 100 mile front, crossing the Piave in several places. On that day and the following two days they continued violent attacks, especially on the Montello plateau, along the Piave from St.

Andrea to San Dona di Piave and at Capo Sile twenty miles from Venice, where they made some progress. Then the Italians, British and French counterattacked with impetuosity and within two or three days had turned the Austrian offensive into a great rout, killing thousands, taking other thousands prisoners and obtaining possession of a large amount of war materiel, including many of the Austrian heavy caliber guns. The whole Austrian scheme to advance into the rich Italian plains, where they hoped to find great stores of food for their hungry soldiers, failed miserably.

The defeat added to the dissatisfaction in the dual empire and increased the bad feeling between Austria-Hungary and Germany.

Emperor's Peace Letter a Bomb.

In this connection it may be noted that Count Czernin, the Austro-Hungarian foreign minister, was forced to resign his position on April 15, 1918, following the publication of a letter published by the French government showing that Emperor Charles had favored giving Alsace-Lorraine to France and restoring Belgium and Serbia in order to bring about peace. The letter caused a sensation and added to the ill feeling existing between the central powers.

Naval Affairs.

On the seas the year 1918 was without events comparable in importance to the battle of the Falkland islands or of the Skager-Rak, though there were some minor affairs in which great heroism was shown. This was rotably the case in the British attacks on Zebrugge and Ostend by which these enemy naval bases were made practically useless. The entrances to the ports were obstructed by sinking old ships across the harbor entrances April 22 and again on May 9. The British lost many brave men in the operations, but it was worth the sacrifice for the activities of the German submarines were greatly hampered thereby.

In an encounter between British light craft and Turkish war vessels at the entrance of the Dardanelles Jan. 20, 1918, the Bressan, a former cruiser, was sent to the bottom and the Goeben damaged. Both were flying the Turkish flag. The British lost a destroyer and a small monitor. Two or three encounters occurred in the North sea, but they were of little consequence.

The German high seas fleet did not venture out from the harbor in which it had been anchored since the battle of Skager-Rak until it surrendered in accordance with the armistice terms. Most of the Russian warships in the Baltic escaped seizure by the Germans after the collapse of the Russian army, some being sunk by the Russians themselves and others taking refuge at Kronstadt. The Germans, however, obtained possession of some of the craft in the Black sea ports.

Italians' Notable Naval Feat.

Through the skill and bravery of Commander Pellegrini and Commander Rizzo of the Italian navy Austria-Hungary lost three battle ships and one coast defense ship. These were torpedoed either while lying in harbor or proceeding along the Dalmatian coast protected by swarms of torpedo boats. The coast defense ship *Wien* was sunk in December, 1917, and the battle ships in May and June, 1918. No finer exploits of this kind were produced by the war.

Some losses were suffered by the American navy, but under all the circumstances they were not heavier than might have been expected. Among the vessels lost by torpedoing or through other causes may be named the destroyers Jacob Jones and Chauncey, the collier *Cyclops*, the cruiser San Diego, the supply ship *Westover*, the tugs *Cherokee* and *Mariner* and a number of ships used as troop transports. Fortunately these were homeward bound and the loss of life was not large.

The work done by the navy was of a most arduous and exacting character, but it met every emergency and established a record, especially in the matter of conveying trans-

ports to Europe, of which it has every reason to be proud. Several transports were lost, but in each case they were homeward bound. The transport *Tuscania*, on which more than 200 American soldiers lost their lives Feb. 5, and the *Moldavia* and *Otranto* were British. The largest American transports lost were the President Lincoln, May 31, 1918, and the *Covington*, July 1.

Notwithstanding that many ships of the allied countries and neutral nations were sunk in the course of a year it became apparent that the German policy of ruthless submarine warfare was doomed to failure. The seas around the British Isles became so unpleasant for the "U" boats that they ventured farther from their bases and even came to this side of the Atlantic. In June they sank about a dozen ships off the American coast.

Torpedoing of Hospital Ships.

"Frightfulness" continued to be a strong feature of the German war policy, both on sea and land. Hospital ships were attacked and sunk on sight wherever they were encountered. The most striking example of this was the sinking of the British ship *Llandovery Castle* seventy miles off the Irish coast on the night of June 27 with the loss of 234 lives, among them a number of Canadian woman Red Cross nurses. On land the German aviators bombed many hospitals and continued their aerial raids on London and Paris.

Long Range Gun Bombards Paris.

The French capital was also subjected to a bombardment by guns having a surprisingly long range—said to be sixty or seventy miles—causing some loss of life. The greatest fatality occurred when a shell struck a church in Paris where services were being held on Good Friday, killing seventy-six persons. British, French and other aviators, in retaliation for the bombing of defenseless towns back of the battle line, dropped explosives on some of the Rhine towns, sparing as much as possible, however, civilians while attacking factories and public works. This action caused great alarm and the inhabitants demanded that an understanding should be reached on the subject of aerial bombardments outside the war zones proper.

Throughout the year the allied aviators continued to manifest their superiority over the German flyers. Fatalities on both sides were heavy and some of the greatest aces were killed. Among the dead may be mentioned Maj. Baracca, Italian; Frank L. Baylies, Arthur Blumenthal, W. Vernon Booth, A. Courtney Campbell, Charles W. Chapman, James B. McConnell, Raoul Lufbery, Paul Pavleka, Quentin Roosevelt, American; Baron Richt-hofen, German; Georges Guynemer, French, and James B. McCudden, British. In the training areas in America there were many fatal aerial accidents. Among the deaths attracting the most attention were those of John Purroy Mitchel, former mayor of New York, and Vernon Castle, the noted dancer.

Lichnowsky Memoirs.

Revelations made by Prince Lichnowsky, German ambassador in London at the time the war began, laying the blame for the great struggle on German and Austrian shoulders, caused a great sensation early in the spring of this year. His statement of the causes of the war confirmed the claims of the British and other allies and was a severe setback to the German assertion that the war was forced on the central powers and that they were fighting in self-defense.

Gavrio Prinzip, the man who killed Archduke Francis Ferdinand, heir apparent to the throne of Austria-Hungary, and thereby precipitated the European war, died in a fortress near Prague, Bohemia, April 30, 1918, of tuberculosis.

Decisive Campaign.

Having noted some of the less important occurrences of the year we may now turn

to the campaigns which resulted in the downfall of Germany and her allies. Bulgaria was the first of the quadruple alliance to give up the struggle. In July Italian and French troops began an operation between the Adriatic coast and the Romorica valley and in five days advanced from fifteen to twenty miles on a sixty mile front, until the whole of southern Albania was cleared of the enemy.

Bulgarians Forced to Surrender.

There were some minor operations in August, but Gen. Franchet d'Esperey, who was the commander in chief of the allied forces in Macedonia, waited until his preparations were complete. An official report issued by the French war office gave this concise account of the brief but brilliant campaign that followed:

"The operations began [Sept. 14] when a Serbian division moved forward and carried by assault the formidable mountain barriers of Vetrenik, Dobropole and Sokol. By Sept. 22 they had succeeded in cutting the communications of the first Bulgarian army operating along the Vardar and those of the Bulgarian second army and the Germans north of Monastir.

"Displaying extraordinary endurance, courage and a spirit of sacrifice, all the allied forces joined in the attack Sept. 18 against the enemy at Doiran, capturing this region from important Bulgarian forces.

"Beginning Sept. 21, the Italian, Greek and French troops in the region of Monastir moved forward in their turn. On Sept. 22 a general pursuit began. It was conducted with ardor and splendid energy.

Allies Cross Vardar.

"On the 23d the Serbians and French crossed the Vardar in the direction of Krivolak. On the 24th French cavalry entered Prilep. On the 25th Ishtib and the formidable barriers to Veles were captured. The British opened up the road to Strumnitza, which they entered Sept. 26. The same day the Serbians reached Kochana and Veles and the Italians, French and Greeks were marching on Kichevo.

"On the evening of Sept. 26 the Bulgarians asked that hostilities be suspended, announcing they were sending plenipotentiaries.

"At 11 p. m. on Sept. 29 the plenipotentiaries delegated by the Bulgarian government signed an armistice at Saloniki. On Sept. 30 at midday hostilities between Bulgarians and the allies ceased."

Though the Bulgarians had surrendered, the Austrian and German detachments in the Balkans offered some resistance. It was feeble, for they were meeting with severe reverses elsewhere and could spare no troops for this war theater. The allies, and particularly the Serbians, advanced steadily and occupied all the main towns and strategic centers. The Germans speedily found themselves cut off from Turkey, the famous Berlin to Bagdad line being cut and communication by the Danube closed. Before the war ended the Serbians were back in their old capital, Belgrade.

Abdication of King Ferdinand.

King Ferdinand had been in bad health and mentally depressed for some time before the surrender came. His pro-German cabinet resigned and another favorable to the allies came to the helm under the leadership of Mr. Malinoff. It was this government which made the surrender at Saloniki. King Ferdinand abdicated Oct. 3 and was succeeded by Prince Boris. In giving up the throne King Ferdinand issued the following manifesto:

"By reason of a succession of circumstances which have occurred in my kingdom and which demand from each citizen much sacrifice, even to the surrendering of oneself for the well being of all, I desire to give as the first example the sacrifice of myself.

"Despite the sacred ties which for thirty-two years have bound me so firmly to this country, for whose prosperity and greatness I have given all my powers, I have decided to renounce the royal Bulgarian crown in

favor of my eldest son, his highness the prince royal, Boris of Tirovo.

"I call upon all faithful subjects and true patriots to unite as one man about the throne of King Boris, to lift the country from its difficult situation and to elevate new Bulgaria to the height to which it is predestined."

The abdication of King Ferdinand was announced by Premier Malinoff at a crowded session of the Bulgarian parliament and the news was received by the deputies with the greatest interest.

It was announced on Nov. 2 that King Boris had also abdicated and that Bulgaria had been changed into a republic. Dispatches from Sofia were conflicting and details of the formation of the new state are lacking.

Turkey Next to Give Up.

Having been cut off from Germany, the Turkish government found itself in a hopeless position, which was made all the more so by the complete defeat of its army in Palestine by the forces under Gen. Allenby. The beginning of the decisive campaign in this part of the world was described thus in an official British communication issued from the war office in London Sept. 20:

"During the night of Sept. 18 our troops commenced a general attack on the front between the Jordan and the sea. East of the Jerusalem-Nablus road British and Indian troops advanced successfully and intercepted the Turkish road communication leading southeast from Nablus.

"At 4:30 a. m. of the 19th the main attack, in which French troops participated, was launched after a sharp bombardment between Rafat and the coast. Our infantry made rapid progress, overrunning the entire hostile defensive system on this frontage by 8 a. m. and penetrating to a maximum depth of five miles before sunrise east.

"The latest available reports indicate the Tulkeram railway junction was occupied by our infantry in the course of the afternoon, while a brigade of Australian light horse reached the main Tulkeram-Messudieh railway and the road in the vicinity of Anesta, cutting off large bodies of retreating enemy with their guns and transports.

"Meantime a strong cavalry force of British, Indian and Australian troops moving northward on the coast had seized the road junction at Haidra Lektara, nineteen miles from the point of departure, by midday.

"East of the Jordan a strong detachment of Arab troops of the king of the Hadjias, descending from the Turkish railway junction of Beraa, severed rail communication leading north, south and west from that center.

"The operations continued. By 8 p. m. of the 19th more than 3,000 prisoners had passed through our corps cages and many more were reported as not having been counted. Large quantities of materiel had been taken."

Another official statement issued by the British war office Sept. 22 said:

"By 8 p. m. on Sept. 20 the enemy resistance had collapsed everywhere save on the Turkish left in the Jordan valley.

"Our left wing, having swung around to the east, had reached the line of Bidieh, Baka and Messudieh junction, and was astride the rail and roads converging at Nablus.

"Our right wing, advancing through difficult country against considerable resistance, had reached the line of Kahn Jibeit, one and one-quarter miles northeast of El Muheir and Es-Sawieh, and was facing north astride the Jerusalem-Nablus road.

"On the north our cavalry had occupied Nazareth, Afuse and Beisan, and were collecting the disorganized masses of enemy troops and transport as they arrived from the south,

Close Trap on Turks.

"All avenues of escape open to the enemy, except the fords across the Jordan between Beisan and Jisr-ed-Dameer, were thus closed,

BATTLE LINES IN BALKANS AND PALESTINE IN 1918.

The arrows on the map show: No. 1: Battle line in Balkans at the beginning of 1918. No. 2: Battle line at the time the armistice with Austria-Hungary was signed. No. 3: Where allied fleet passed through the Dar-

danelles and the Bosphorus to the Black sea. No. 4: Battle line in Palestine at the beginning of 1918. No. 5: The battle line at the time of Turkey's surrender.

"East of the Jordan Arab forces of the king of the Hedjas had effected numerous demolitions on the railways radiating from Beraa, several important bridges, including one in the Yurmak valley, having been destroyed.

"Very severe losses have been inflicted on the masses of Turkish troops retreating over the difficult roads by our air service.

"A German airplane, later ascertained to have been carrying mails, landed in the midst of our troops at Afule. The pilot, who believed the place still to be in Turkish hands, destroyed the machine and its contents before he could be secured.

"By 9 o'clock on Saturday night on our left wing the infantry about Biratur had reached the line Beitdejan-Samaria-Kirafmer, shepherd-

ing the enemy on the west of the Jerusalem-Nablus road into the arms of our cavalry operating southward from Beisan.

Airmen Harass Fugitives.

"Other enemy columns vainly attempted to escape into the Jordan valley in the direction of Jisr-ed-Dameer, which still is held by us. These columns suffered adversely from our aircraft, which constantly harassed them with bombs and machine gun fire from low altitudes.

"In the vicinity of Lake Tiberias our cavalry detachments hold Nazareth, and the rail and road passages over the Jordan at Jisr-ed-Dameer. Already 18,000 prisoners have been captured and 120 guns collected."

In the course of the next few days the entire 7th and 8th Turkish armies were virtually annihilated. The mobility of the allied forces and the boldness of Gen. Allenby's plan of hitting at the strongest point in the Turkish defenses added to the success. The rush of the British cavalry completed the enemy's discomfiture.

The Turkish reserves consisted of troops which recently arrived from the Caucasus. Field Marshal Liman von Sanders, commander of the Turkish forces, and his staff escaped capture by only six hours. British cavalry, pushing up the Mediterranean coast of Palestine, occupied Haifa and Acre. The capture of these ports represented an advance of sixty miles in the operations. Allied troops reached Es-Salt, fifteen miles northwest of Amman.

Damascus Taken.

Troops of an Australian mounted division entered Damascus Monday night, Sept. 30. At 6 a. m. Oct. 1 the city was occupied by the British forces and by a portion of the Arab army of King Hussein. More than 7,000 prisoners were taken. British troops entered Aleppo Oct. 26.

Surrender Announced.

The surrender of Turkey was announced in the French chamber of deputies Oct. 31 by Admiral Leygues, minister of marine, who said:

"A few days ago Gen. Townshend was freed to go to inform the British admiral commanding in the Egean sea that the Turkish government asked that negotiations be opened with a view to conclusion of an armistice between Turkey and the allies.

"Rear-Admiral Calthorpe replied that if the Turkish government sent regularly accredited plenipotentiaries he had the necessary powers to inform them of the conditions under which the allies would consent to cease hostilities and that he had the power to act on behalf of the allies an armistice based on these conditions.

"The Turkish plenipotentiaries arrived at Mudros at the beginning of this week. The armistice was signed last night [Oct. 30] by Rear-Admiral Calthorpe on behalf of the allies, and it became effective this noon.

"It is impossible to publish the complete terms, but they include:

"Free passage of the allied fleets through the Dardanelles to the Black sea.

"Occupation of the Bosphorus and the Dardanelles forts as necessary to guarantee the security of this passage.

Must Return Prisoners.

"The immediate release and return of all allied prisoners of war."

Gen. Townshend was commander of the British Mesopotamian force which surrendered at Kut-el-Amara on April 29, 1916. Gen. Townshend had been sent as a prisoner to an island in the Sea of Marmora.

Collapse of Austria.

The collapse of Austria-Hungary followed close on the heels of that of Turkey. There were many minor engagements along the Piave and in the mountainous regions after the ill-fated Austrian drive in June, but there was nothing like a general offensive until after the middle of October. On the 23d of that month the Italians, aided by the French and British, attacked in the Monte Grappa region and on the Asiago plateau. They also struck along the upper reaches of the Piave river and before the 25th had taken 3,000 prisoners. On the Piave they captured the islands of Grave di Pappadopollo and Maggiore, which are in the vicinity of Odrizo. They took prisoner the enemy garrisons of these islands. A little farther to the north and west the Italians made important progress in the region of Monte Grappa, the scene of some of the hardest fighting of the war. They crossed the Ornic river and captured Monto Solarolo and part of

Monte Prassolan and Monte Pertica. On the Asiago plateau they took Monte Sisemol. An official Italian communique issued on Oct. 23 said:

"Our army, in conjunction with allied contingents, has crossed the Piave river by force of arms, engaging in bitter battles the enemy, who strove desperately to bar the way.

"Between the slope and heights of Val Dobbiadene and the mouth of the Soligo torrent our infantry assault troops passed during the night, under violent fire, to the left bank of the river, broke into the enemy's front lines and carried them.

"Supported by the fire of the artillery on the right bank, they gained ground and repulsed enemy counterattacks throughout the day.

"To the south the 10th army, taking advantage of the successes of the British at Grave di Pappadopollo, compelled the enemy to retire and repulsed two counterattacks in the direction of Borgo Malanotte and Boneadelle.

"The prisoners taken yesterday aggregated more than 9,000. Fifty-one guns were captured."

By the night of the 29th the allied troops were nearly eight miles east of the Piave river and still were driving the disorganized Austrians before them. Cavalry and light infantry detachments formed a crossing of the Montecano river, routed the enemy rear guards at Vazzola and headed in the direction of the Livenza river to the east.

Over the forty mile front from the region of Monte Grappa, in the north, eastward and then south nearly to Ponte di Piave, twenty miles north of the sea, Italian, British and French troops everywhere reported a victorious advance.

At the north end of the attack line on the Piave Italian troops stormed Val Dobbiadene, swept up and took the heights of Colfosto, overran the Susegana plain, and took the town of the same name. Conegliano, five miles north-east of the left bank of the Piave, was occupied and passed in the advance.

North of the Montello the French took Monte Pionar by storm, while Italian troops, north and west, crossed the Ornic river, an east and west stream which flows into the Piave, and drove the Austrians from Alano di Piave.

British units, far to the west of the Brenta, raided the enemy trenches opposite Asiago and found them unoccupied. The captured materiel were heavy, including not only field artillery but cannon of large caliber.

American troops under Maj-Gen. Charles G. Treat crossed the Piave river with the 10th army, composed of British, Italians and Americans, under Lieut.-Gen. the Earl of Cavan. This was the first army to begin operations by establishing a bridgehead across the Piave river at the island of Grave di Pappadopollo.

By Oct. 30 more than 50,000 Austrian prisoners had been taken, with 300 guns and great quantities of military stores. An official statement from Rome said that hordes of the enemy were streaming in rout from the mountain passes, seeking to cross the Tagliamento river, about ten miles east of the Livenza. The Italian, British and French troops crossed the Livenza at several places along its headwaters and were headed for the Tagliamento, beyond which lie the Isonzo and the Austrian frontier. To the south the 3d Italian army, which forced several passages of the lower Piave on the 29th, was driving the enemy before it, despite some show of resistance.

Italian troops reached Ponte delle Albi, northeast of the city of Belluno, in the north, thus definitely dividing the Austrian armies.

"The enemy is completely defeated east of the Piave," said an official Italian dispatch, "and is with great difficulty sustaining the incessant pressure of our troops in the mountain region, in the plain, and in the Alpine foothills of Venetia. Our armies are aiming

AUSTRO-ITALIAN BATTLE LINES IN 1918.

irresistibly toward the objectives which have been designated.

"The enemy masses are streaming in confusion down the mountain valleys in an attempt to reach passes on the Tagliamento. Prisoners, guns, war materiel and storehouses, scarcely touched, fell into our hands.

"The 12th army, after having completely taken possession of the height of Ceseme, is fighting to conquer the pass of Quero. The 8th army has conquered the ridge between the valley of Follina and the valley of the Piave and has occupied the pass of Seravelle, advancing toward the plain of Cansiglio, aiming at the plain of Pordenone. The 10th army has brought its front on the Livignza.

"The 3d army is pushing ahead, overwhelming and capturing the enemy, who offers a bitter resistance. Czecho-Slovak troops are participating in the action.

"In the Grappa region our troops renewed their attack and this morning succeeded in conquering Col Capriole, Col Bonatto, Asolone, Monte Prassolan, the salient of Solaro, Monte Spinonica and the plateau of Asiago.

On Nov. 1 the official Italian account of the battle operations read:

"The battle continues all along the front. The enemy is strongly maintaining his resistance from the Stelvio to the Astico, but he is wavering beyond the Asiago plateau and is in utter rout all along the rest of the front. The greatest defense that the enemy has is the natural obstacles along the road of its retreat.

"Our troops are full of enthusiasm and are following the enemy relentlessly.

"The 12th army, after conquering the pass of Quero, has rapidly advanced south of Belluno and after brilliantly rounding the depression of Vadalto has advanced on Belluno and occupied the city.

"The 3d army, re-enforced also by a regiment of marines, has occupied the whole intricate zone along the Adriatic.

"In the direction of Udine the Italian troops are also fast advancing. Pordenone has fall-

en into our hands. At the extreme eastern sector of the front Italian marines have occupied Caorle.

"Great numbers of airplanes are preceding our troops and are operating their machine guns on the retreating enemy columns.

"The number of prisoners is increasing rapidly and continuously. More than 700 guns captured have already been counted. The booty captured is of an enormous quantity."

Report of Nov. 2.

On Nov. 2 Rome reported:

"The Austrian armies have been completely defeated. The Italians already have captured 80,000 prisoners and 1,600 guns. The entire Austrian army in the Trentino has been cut off and another Austrian army on the southern end of the front is in the same situation.

"The Italians are on Austrian soil. The northern army crossed the frontier into Austrian territory in the Sugana valley yesterday evening, cutting the Austrian forces in that region in two.

"East of the Brenta the pursuit continues. On the Asiago plateau the enemy is resisting to give time for the masses in the rear to retire, but the troops of the 6th army have crossed by force of arms the pass between Rotzo and Roana, carrying in a bitter struggle Monte Cimone and Monte Lisser, and are advancing in the valley of the Nos.

"The 4th army has occupied the heights north of the hollow of Fonzaso and has pushed forward columns into the Sugana valley. The old frontier was passed yesterday evening. Alpine groups, having crossed the Piave with improvised means in the neigh-

borhood of Busche, have spread out in the area between Felitre and San Giustina.

"Italian troops which yesterday won in heavy fighting at the Passo di Boido, the hollow of Fadato, are going up the Cordevole valley. They have passed beyond Ponte delle Alpi and are marching toward Longarone.

"On the plains an Italian cavalry division under the count of Turin, having overcome the stubborn resistance of the enemy at Castello d'Aviano, Roveredo in Piano, San Martino and San Quierino, occupied Pordenone and passed the Cellina-Meduna line.

"Our own and allied aviators are complete masters of the air and continue without pause their daring activities. An Italian airship bombarded the railway station in the Sugana valley at night.

"It is not possible to calculate the number of guns abandoned on the lines of battle nor distant from the fighting fronts and in the roads. More than 1,000 have been counted.

"More than 80,000 prisoners have been counted. Our soldiers have liberated several thousand prisoners from captivity."

Austria Raises White Flag.

Even before this stage of the battle had been reached the Austrian authorities realized that it would be useless to continue the struggle any further and steps were taken to secure an armistice. This proceeding was thus described by a correspondent of the London Times:

"Toward the evening of Oct. 29 an Austrian officer was seen coming from the enemy trenches close to Serravalle, above Ala, in the Adige valley. It became evident at once that the white flag was genuine and Italian officers went forward to meet him.

"The officer, who was a captain, declared that he had come to discuss the conditions of an armistice. Taken to a neighboring command and questioned, he was found not to have any authoritative papers and was sent back with a message that a more representative and duly accredited mission should be sent if the matter was to be pursued.

"On Wednesday evening a white flag was again hoisted. The Austrians having evidently determined to make due sacrifice of their pride, this time more fitting personalities appeared. At the head of a small group that approached the Italian trenches was the Austrian Gen. von Weber, a corps commander. The party consisted of eight persons and included another general and naval and military officers. There were also civilians, either diplomatic or government representatives, and secretaries and typists.

"They were treated with every courtesy, and when Gen. von Weber had formally stated his mission and shown that he was the bearer of proper credentials he and his party were driven next day in motor cars to the Villa Giusti, close to Gen. Diaz' headquarters. At 9 o'clock in the morning Gen. Badoglio, the chief of the staff, drove with an escort of cavalry to the villa, and on his arrival all the troops present saluted and the bugles were sounded.

"Entering the villa, Gen. Badoglio found all the Austrian mission standing in a line in the drawing room awaiting him. Gen. von Weber was in full uniform, wearing the stars and ribbons of his orders. Gen. Badoglio saluted him and upon seating himself asked the Austrian general his errand. Gen. von Weber replied that he had come to ask the conditions upon which an armistice would be granted. Gen. Badoglio answered that within an hour he would let him know the general lines of such an armistice contained in a written message. He then left the room and the written message in question was at once sent to the villa.

"Meanwhile telegrams were exchanged with Versailles, and during the afternoon the precise details under which an armistice would be granted were received from Sir Orlando, the Italian prime minister, and again in written form handed to Gen. von Weber. During

the evening one of the Austrian envoys left by motor car for Serravalle with a draft of the conditions to communicate to the Austrian government.

"The Austrian plenipotentiaries were very much depressed and did not show themselves outside the villa nor walk in its ample gardens."

Armistice Signed.

The terms of armistice offered by the allies were accepted by the Austrian government and the document was signed by Gen. Diaz and the Austrian representatives on the afternoon of Sunday, Nov. 3. At 3 o'clock on the following day hostilities ceased all along the line. On the evening of Monday the Italian war office issued the following statement:

"The war against Austria-Hungary, which under the high guidance of the king, the supreme leader of the Italian army, inferior in numbers and material, began the 24th of May, 1915, and which, with unbending faith and intencions valor has been conducted uninteruptedly and bitterly for forty-one months, has been won.

"The gigantic battle engaged in on the 24th of October, in which fifty-one Italian divisions and three British, two French, one Czechoslovak and one American regiment participated against sixty-three Austro-Hungarian divisions, is ended.

"The daring and very rapid advance of the 29th army corps on Trent, closing up the enemy's armies in Trentino, who were overcome to the west by troops from the 7th army and to the east by the 1st, 6th and 4th armies, brought about the total collapse of the enemy's front.

"The Austro-Hungarian army is destroyed. It suffered very heavy losses in the fierce resistance of the first days of the struggle, and in pursuit it has lost an immense quantity of materiel of all kinds, nearly all its stores and depots, and has left in our hands about 300,000 prisoners, with their commands complete, and not less than 5,000 guns.

"This defeat has left what once was one of the most powerful armies in the world in disorder and without hope of returning along the valleys through which it descended with haughty assurance."

Victory Hour for the Allies.

On the anniversary of Britain's entry into the war, Aug. 4, Field Marshal Haig, commander in chief of the British forces in France, issued this special order of the day:

"The conclusion of the fourth year of the war marks the passing of the period of crisis. We can now with added confidence look forward to the future.

"The revolution in Russia set free large hostile forces on the eastern front, which were transferred to the west. It was the enemy's intention to use the great numbers thus created to gain a decisive victory before the arrival of American troops should give superiority to the allies.

"The enemy made his effort to obtain a decision on the western front and failed. The steady stream of American troops arriving in France has restored the balance. The enemy's first and most powerful blows fell on the British.

"The superiority of force was nearly three to one. Although he succeeded in pressing back parts of the fronts attacked, the British line remained unbroken.

"After many days of heroic fighting, the glory of which will live for all time in the history of our race, the enemy is held. At the end of four years of war the magnificent fighting qualities and spirit of our troops remain of the highest order.

"I thank them for the devoted bravery and unshaken resolution with which they responded to my appeal at the height of the struggle. I know they will show like steadfastness and courage in whatever task they may yet be called upon to perform."

That the field marshal spoke truly was proved by after events. The period of crisis had been passed, for thereafter and until the

surrender the Germans moved only in one direction, and that was in the direction of their own front. There was much sanguinary fighting, but it was a defensive war they waged, with numerous counteroffensives to give their harassed troops time to get away with guns and supplies. No real offensive was attempted after the end of July.

To give merely an outline of what happened on the western front between Aug. 1 and Nov. 11 is difficult because of the extended battle line, the number of troops engaged and the rapidity with which the allied commanders struck the enemy heavy blows in widely separate sections. An attempt will, however, be made to touch upon some of the more important movements from the North sea to the Swiss border in the order in which they occurred.

Capture of Fismes.

On Aug. 3 and 4 Gen. Pershing was able to report: "The full fruits of victory in the counteroffensive begun so gloriously by Franco-American troops on July 18 were reaped to-day, when the enemy, who met his second great defeat on the Marne, was driven in confusion beyond the line of the Vesle. The enemy, in spite of suffering the severest losses, has proved incapable of stemming the onslaught of our troops, fighting for liberty side by side with French, British and Italian veterans. In the course of the operations 8,400 prisoners and 133 guns have been captured by our men alone. Our troops have taken Fismes by assault and hold the south bank of the Vesle in this section."

Foch Made Marshal of France.

On Aug. 6 the French council of ministers elevated Gen. Ferdinand Foch to the rank of marshal of France. In connection with this event Premier Clemenceau said:

"At the hour when the enemy, by a formidable offensive, counted on snatching the decision and imposing a German peace upon us, Gen. Foch and his admirable troops vanquished him.

"Paris is not in danger, Soissons and Chateau Thierry have been reconquered and more than 200 villages have been delivered.

"Thirty-five thousand prisoners and 700 cannon have been captured and the enemy's high hopes of the week before have been crushed. The glorious allied armies have thrown him from the banks of the Marne to the Aisne. Such are the results of the high command's strategy, superbly executed by incomparable commanders. The confidence placed by the republic and by all the allies in the conqueror of St. Gond, the Yser and the Somme has been fully justified."

Smash in Picardy.

On Aug. 8 the British and French launched an offensive in Picardy and on a front of more than twenty miles astride the Somme pressed forward from six to seven miles, taking more than 10,000 prisoners and capturing Arruail, Hamel and numerous other places. In his report of the first day's operations Gen. Haig said:

"The operations commenced this morning on the Amiens front by the French 1st army under command of G. n. Debeney and the British 4th army under Sir Henry Rawlinson are proceeding successfully. The assembly of allied troops was completed under cover of night, unnoticed by the enemy.

"At the hour of assault French, Canadian, Australian and English divisions, assisted by a large number of British tanks, stormed the Germans on a front of over twenty miles from the Avre river at Braches to the neighborhood of Morlancourt. The enemy was taken by surprise, and at all points the allied troops have made rapid progress.

"At an early hour our first objectives had been reached on the whole of the front attacked. During the morning the advance of the allied infantry continued actively assisted

by British cavalry, light tanks and motor machine gun batteries.

"The assistance of German divisions in the line was overcome at certain points after sharp fighting, and many prisoners and a number of guns were captured by our troops. The French troops, attacking with great gallantry, crossed the Avre river, and despite the enemy's opposition carried hostile defenses. North of the Somme the great part of our final objectives were gained before noon, but in the neighborhood of Chipilly parties of the enemy offered prolonged resistance. In both localities the fighting was heavy, but ultimately our troops broke down the opposition of the German infantry and gained their objectives.

"South of the Somme the gallantry of the allied infantry and the dash and vigor of their attack had gained during the afternoon the final objectives for the day on practically the whole of the batt'e front.

"Assisted by our light tanks and armored cars, cavalry passed through the infantry and beyond our objectives, riding down the German transports and limbers in their retreat, and capturing villages and taking many prisoners."

Chipilly Ridge.

The hard fighting at Chipilly ridge mentioned in Gen. Haig's dispatch was done chiefly by Australian troops, but they were ably assisted by American soldiers, former national guardsmen from Chicago and vicinity, whose work won the highest praise. They fought like veterans and contributed materially to the victory. The battle was thus described in the dispatches of Aug. 10:

"Details of the brilliant battle which the Americans and British fought for the spur are now available. In order to go over the top at the appointed time yesterday afternoon the Americans were forced to make a rapid march in the last part of which they ran so as to be in to fight."

"The American machine gunners and infantry went into battle with their traditional enthusiasm. They met the Germans and defeated them here, just as they did along the Marne.

"At places stiff resistance developed, but all along the line the Americans, British and French smashed through the harassed enemy, who was trying to hold up their advance.

"Chipilly spur, north of the Somme, was captured by the American and British troops at 9 o'clock. The attack began at 5 o'clock when the allies drove forward between the Ancre and the Somme. They were supported by tanks and were preceded by a heavy barrage fire. The enemy was driven toward Bray, northeast of Chipilly.

"In the American attack the German infantry held for a while and then broke, and the Americans kept going, at some places without the assistance of the tanks. The ground, pitted with deep gullies, was unsuited for tank warfare.

"There were no trenches, but a thin smoke screen blowing across the ground indicated where the enemy's positions lay. At the same time the German artillery became active and dropped shells in the direction of the American troops which inflicted a few casualties. The Americans, however, ran on and reached the smoke line just as it lifted. There they found themselves at grips with the enemy.

"Meanwhile certain American units had reached positions in front of a wood when the Germans opened fire with machine guns. Many of these enemy machine gunners came up from deep dugouts after the American barrage had ceased and they placed their guns in prepared pits. The Americans faced a hail of bullets here. The Germans continued to fire until the Americans and English put them out of action.

On Aug. 14 Gen. March, chief of staff, announced that the American regiment officially commended for valorous deeds in the battle of Chipilly ridge was the 131st infantry, formerly the 1st Illinois infantry, from Chicago. The regiment was commanded by Col. Joseph B. Sanborn.

Fall of Montdidier.

Montdidier was taken by the French on Aug. 10 and further ground was gained. The British also continued to advance and by the 14th the allies had taken 38,000 prisoners including 1,000 officers, and had captured more than 500 guns. It was a heavy blow and even the *Deutsches Zeitung* of Berlin was compelled to say: "The events between the Somme and the Avre constitute the first serious defeat of the war."

On the Oise-Aisne front Gen. Mangin's 10th French army delivered an attack on Aug. 19-20 which netted 8,000 prisoners and liberated many towns. In the Lys salient to the north the British also advanced several miles. On the 21st Lassigny was taken by the French. This was the cornerstone of the German position south of the Avre river after the fall of Montdidier. At the same time Gen. Haig attacked on a ten mile front from Arras to Albert, advanced about three miles and inflicted heavy losses on the enemy. On Aug. 24 the British captured Thiepval and Bray and reached the vicinity of Bapaume. On the 26th Canadian troops captured Wancourt, Monchy-le-Preux and pressed on beyond. By the 28th the French had taken Chaules and Nesle.

Battle of Juvigny.

Accompanied by a fleet of tanks and covered by a heavy artillery barrage, the American troops swept forward early on Aug. 29 against the German lines on the Juvigny plateau. The battle was thus described by a correspondent:

"The Americans took the village of Juvigny after bitter resistance. Their positions extended north toward Chavigny late this afternoon, when the battle had developed into one of the most desperate in which Americans had yet fought. The Yankees' advance was slowed up by the bitter defense of the Germans as the afternoon advanced. The German positions were shelled most vigorously by heavy guns, mortars and light pieces, firing almost point blank, as well as by long range naval guns, which searched the positions far and near. And then the infantry advanced.

"Up over the plateau the infantrymen went toward Juvigny and across the little railroad running north and south. The Germans immediately began to employ the tactics of similar retreats, leaving their rear defended by a line of machine guns hidden behind every clump of brush, promontory and woods. Only a few detachments of infantry were left, the army again adopting measures calculated to save the most men possible. From Couronne woods and another little wood standing like sentinels behind Juvigny and the American lines the German guns delivered a deadly crossfire. Juvigny is only a village, but, located along the side of a hill, it offered a peculiar opportunity for defense, until the advancing forces moved into positions from which they were able to make it untenable. The resistance then stopped the Germans retiring farther east into more broken ground."

"On the same day that the Americans took Juvigny the French captured Noyon, an important center for which there had been severe fighting. The British reached the west bank of the Somme, opposite Brie and Peronne, and captured Bapaume. On Aug. 31 the British announced that the whole of the Lys salient, including the famous Mont Kemmel, the 'key to Ypres,' had been taken. On Sept. 1 they captured Peronne, Bullecourt and St. Denis. On the same day Americans for the first time fought on Belgian soil and captured Voormezele. On Sept. 2 the British pierced the Droocourt-St. Quant 'switch line' and began a drive toward Douai and Cambrai. By the 4th they had crossed the Canal du Nord. At the same time the Germans evacuated Lens. On this day the Germans were retreating on a front of 130 miles from Ypres south to Noyon. They withdrew before the Americans in the Vesle region. On Sept. 6 the French took Ham and began a drive on

La Fere. By the 9th the Germans had been driven back to the original Hindenburg line, where their resistance began to strengthen.

Enemy's Effort Spent.

On Sept. 10 Field Marshal Haig issued the following order of the day to the British armies in France:

"One month has now passed since the British armies, having successfully withstood all the attacks of the enemy, once more took the offensive in their turn. In that short space of time, by a series of brilliant and skillfully executed actions, we have repeatedly defeated the same German armies whose vastly superior numbers compelled our retreat last spring. What has happened on the British front has happened also on the front of our allies.

"Already we have pressed beyond our old battle lines of 1917 and have made a wide breach in the enemy's strongest defenses.

"In this glorious accomplishment all ranks, arms and services of the British armies in France have borne their part in the most worthy and honorable manner.

"The capture of 75,000 prisoners and 750 guns in the course of four weeks' fighting speaks for the magnitude of your efforts and the magnificence of your achievement.

"We have passed through many dark days together. Please God, these never will return. The enemy has now spent his effort and we rely confidently upon each one of you to turn to full advantage the opportunity your skill, courage and resolution have created."

Battle of St. Mihiel.

Sept. 12 will always be a red letter day in the American military annals, for it was on that day that the 1st army under the leadership of Gen. Pershing won the first really large operation undertaken by the expeditionary force in France. This was the attack on and wiping out of the famous St. Mihiel salient. A dispatch written on the first day of the attack described it as follows:

"The attack, which started early this morning, extended on the southern side for a distance of twelve miles, from St. Mihiel north-eastward to Pont-a-Mousson and northward from St. Mihiel for a distance of eight miles.

"French troops, co-operating with the Americans and under Gen. Pershing's direction, struck at the southern point of the salient at St. Mihiel. The offensive, the first undertaken on a pretentious scale by the Americans, was planned by the American staff and is being executed by American officers and troops. Tanks, artillery, airplanes, even down to the narrow gauge roads rushing forward ammunition—all are manned by Americans.

"To the east of St. Mihiel the Americans have captured Thiaucourt, Pannes and Nonsard. North of St. Mihiel, Gen. Pershing's men have taken Combes and have reached the western outskirts of Donmartin La Montaigne, about six or seven miles up toward Verdun, as well as Les Eperges and the neighboring hills, it is reported.

"The attack was launched this morning at 5 o'clock after a tomard of artillery preparation which lasted four hours. Light, medium and heavy artillery swept the German positions with gas, high explosives and shrapnel shells. The entire triangle for miles back was an inferno of blasting metal, fairly smothering the enemy positions.

"In many cases smoke screens were used to add to the demoralization of the boche and to render uncertain the aim of his machine gunners.

"Promptly at the zero hour the American troops left their trenches; some deployed as skirmishers where the nature of the ground permitted, others in platoon formation, wave following wave. There was not a hitch along the entire line. The infantry advance was synchronized with the artillery behind an intense rolling barrage timed for an advance of 100 meters every four minutes.

"When the infantry started to advance a perfect storm of aerial missiles was loosed over the German rear lines to supplement the devastation of the artillery.

"Railroad centers, bridges, hangars, munition supply centers, billeting areas and everything of value were subjected to an intense rain of bombs dropped by American aviators.

"Within a comparatively short time reports came back through liaison officers and signal corps centers that the advance was moving with clocklike regularity. The first objectives early were reached, and the troops, whose fighting is described as magnificent, stormed ahead to the next objective.

"In many instances the progress was so rapid that the troops reached their designated points ahead of schedule, and it was necessary to readjust the artillery fire. Soon after their progress was such that the order came back from the observation stations for the artillery to move forward. While certain batteries speeded up their fire, others hastily hooked up and, with horses galloping, rolled forward to new positions.

"The tanks did splendid service. Heavy concrete 'pill boxes,' sheltering machine guns, were encountered at frequent intervals, as well as other naturally strong machine gun placements. These the American manned tanks put out of action, either by direct fire or by charging over them, killing the crews and wrecking the pieces. Heavy belts of barbed wire were also were torn apart for the advance of the infantry.

"After the first hour there was never a question of who held supremacy in the air. At the outset of the assault there were a few boche flyers aloft, but within a few minutes they had been crashed by the American pilots or were speedily winging their way toward the rear lines.

"This left the American observation planes free to check and direct the artillery fire without molestation, while the heavy bombers worked without interference save for anti-aircraft guns, many of which were soon located and put out of action by the American light artillery.

"The enemy artillery fire fluctuated in intensity and accuracy. At some points the German heavies responded with a strong fire at first, while at other places the 'arriving' shells were infrequent and fired spasmodically. The enemy artillery at no time was able to interrupt the infantry schedule, and on the whole was altogether ineffective.

"As the action progressed the enemy's big gun fire dwindled, indicating that the Germans, aroused by the progress of the Yankees, were withdrawing their heavies for fear of losing them.

"Prisoners declared they had been expecting a drive by Gen. Pershing some place east of Verdun, but were uncertain as to the exact sector in which it would be made. They explain the recent raids made by their troops and the bonuses offered for American prisoners had been actuated by the desire of the commanders to keep track of the American units in the line in this region and the sectors farther east.

"The first village fell into the hands of the Americans within forty-five minutes, and from then on came reports of other villages that had been occupied.

"Meanwhile American cavalry was waiting at advantageous points for the order to move. When it seemed that the infantry had secured a sufficient break-through the horse troops galloped off through the hilly roads of this region and soon were reported operating several miles to the north, where they seized and held important places, ready to cut down fleeing enemy soldiers or to intercept the movement of reserves toward the front.

"By the 13th the St. Mihiel salient had been wiped out and the enemy is now virtually with his back to the famous Wotan Hindenburg line with the American and French forces paralleling him from Verdun to the Moselle."

Battles in Argonne Forest.

Gen. Pershing's troops continued fighting steadily and systematically advancing here and there and wearing out the Germans by a steady pressure. On Sept. 26 after due preparation they began another offensive, attacking along a front of twenty miles from the Meuse westward through the Argonne forest. The start of this battle, which developed into one of the bloodiest in the war for the Americans, was described thus by an Associated Press correspondent:

"The Americans attacked on a front from the Meuse river northwest of Verdun through the Argonne front to the Aisne. This front is northwest of the lines established by the Americans after wiping out the St. Mihiel salient.

"It was the St. Mihiel victory—Gen. Pershing's first great drive—that made possible today's offensive, because it freed the allies of flank attack from the old St. Mihiel salient and opened up necessary communications to supply the troops north and west of Verdun.

"The battle was opened with a terrific bombardment of the German lines, lasting eleven hours. The last hour of shelling consisted of intensive drum fire barrage.

"In a thick fog, at 5:30 o'clock this morning, Americans and French went over the top.

"Resistance at first was rather weak, but stiffened sharply as the Americans and French advanced. The Germans, according to all indications, were expecting the attack, and as the bombardment proceeded, withdrew a large part of their troops to rear positions.

"Evidently fearing loss of artillery, they also withdrew their cannon, leaving only machine gunners to harass the advance. As a result the losses of Americans and French were remarkably light.

"Pennsylvania, Kansas and Missouri troops of Maj.-Gen. Liggett's corps took Varennes, Montblainville, Vanquois and Cheppy by storm.

"Other American corps fought their way across Forges brook, northwest of Verdun, and captured the Bois de Forges. They wrested from the enemy the towns of Malancourt, Bethincourt, Montfaucon, Cussy, Nantillois, Septsarges, Danneux and Gerocourt-back soon after the attack opened, and before nightfall the Americans had counted more than 5,000."

Break Hindenburg Line.

On Sept. 29 British and American troops smashed through the Hindenburg line at its strongest point between Cambrai and St. Quentin and advanced several miles beyond it. British and American troops entered the suburbs of Cambrai and outflanked St. Quentin. Many large towns and scores of villages were freed of the invader. Twenty-two thousand prisoners and more than 300 guns were captured. Meanwhile the Belgian army to the north tore a great hole in the German lines running from Dixmude, ten miles from the North sea, southward.

Dixmude was captured and the Belgians pressed eastward, winning many important towns and heights, until they were within two miles of Roulers, the center of communications for the German line in the whole of Flanders and for the German submarine bases of Ostend and Zeebrugge. The Belgians captured 5,500 men and 300 guns.

"The breaking of the Hindenburg line below Cambrai was accomplished by one of the most remarkable feats of the war," wrote a correspondent. "The attack began when one English division crossed the wide and deep Scheldt canal near Belleglise on floats, rafts and improvised bridges, storming the line on the heights to the east. While they were sweeping over these lines and up the rising ground to the east, other troops crossed to the north and south to give support. It was a surprise for the Germans and the success is measured by the swiftness of the advance, once the canal was crossed.

"Town after town fell until the city of

Cambrai was passed both on the north and the south.

"The Canadian troops rushed down from the northwest to be the first to enter the city and soon won their way into the northwestern suburbs, but it is doubtful that they were the victors in the race, as almost at the same time the 63d naval division entered the southern outskirts.

"The stage where the American troops took part in the world drama was a little to the north of where the British divisions swam the river. At this point the canal is tunneled underground. The Americans advanced against the main Hindenburg line and captured the towns of Bellecourt and Naury. The Americans who made this advance were from New York, Tennessee and North and South Carolina."

Tribute to Americans.

"Never in this war have we seen keener or braver soldiers or more intelligent, high minded men than the two divisions in the fighting north of St. Quentin," wrote the official correspondent with the Australian forces in France in describing the American assault on the Hindenburg line in the direction of Joncourt on Sunday. "Some day, when the full story of this battle can be told, the American people will thrill with pride in these magnificent troops upon whom a tremendous task fell. They were faced by the most formidable task that could be imposed upon them—the breaking of two double systems of the greatest defense line the German empire ever constructed.

"On the left of their attack there was some uncertainty regarding the situation and this increased the difficulty of their work, yet these troops, working under the enthusiasm of their high ideals, carried through their assault, penetrated deeper even than had been intended and delivered a blow which attracted the greater part of the enemy's resistance. Beyond all question they made it possible to break the great defensive line in a position of the utmost importance to the allied cause."

Early in October the Germans began evacuating Lille and other towns in northern France and in Belgium and to remove their heavy artillery from the Belgian coast. On Oct. 3 the French launched three drives—one north of St. Quentin, another north of Reims and a third to the east in Champagne. All were successful, netting much territory and many prisoners.

On Oct. 4 the Americans resumed the attack west of the Meuse and advanced their lines from one to three miles, taking Hill 240 and the villages of Gesnes, Fleville, Chehery and La Forges. In the face of heavy artillery and machine gun fire, troops from Illinois, Wisconsin, Pennsylvania, Virginia and West Virginia forced the Germans back to the so called Kriemhilde line. In the Champagne American and French troops struck to the north and west, capturing St. Souplet and other places, this success having been made possible by the previous capture of Blanc Mont with some 3,000 prisoners. On the 6th the Americans captured St. Etienne. On Oct. 9 the Americans pressed on to the southern outskirts of Xivry and entered Chaune wood. In the course of the operation they took 2,000 prisoners.

On the same day (Oct. 9) the dispatches from the front told of the great, clean break through the Hindenburg system on the west. The armies of Field Marshal Haig, under Gens. Home, Byng and Rawlinson, reinforced by American divisions, swept through a twenty-mile gap torn in the enemy defenses. At its deepest points the advance, led by cavalry, swept from nine to twelve miles beyond the Cambrai-Le Catelet-St. Quentin line and almost reached the line of the La Selle and Sambre rivers. Caudry, Clary Bohain and a score of villages were freed. The advancing victorious divisions marched unopposed through the towns hastily deserted by the fleeing enemy.

Le Cateau was taken by the British on Oct. 10 and the advance was continued all along the line practically on the whole front. The en-

emy was forced to give up his positions north of the Suipe and the Arnes; on the 11th French cavalry entered Lancauville. The Argonne forest was finally cleaned up by the Americans and not a German remained in that great wooded area which had been the scene of such sanguinary fighting.

Congratulated by Rawlinson.

On Oct. 12 Gen. Sir Henry Rawlinson, commanding the British 4th army, with which an American division had been operating, sent to the general commanding the division, comprising troops from Tennessee and the Carolinas, the following telegram:

"On this occasion I desire to convey to you and all the members of the staff, as well as all other ranks of the ——— division, my heartiest congratulations on your victory.

"The gallantry of your infantry and the precision with which the staff arrangements worked fill me with admiration and it has given me great pleasure to report your unqualified success to Field Marshal Sir Douglas Haig."

Capture of La Fere.

French troops on Oct. 13 captured the fortress of La Fere, the strongest point on the whole of the south end of the old Hindenburg line. They also entered Laon and occupied the forest of St. Gobain.

In the north French troops captured Roulers on the 14th while the Belgians captured Hagebrook, Gitsberg and Beverin, with 3,000 prisoners. On Oct. 15 the Americans took and passed St. Juvin after desperate fighting.

Taking of Grandpre.

The American troops on Oct. 16 occupied the town of Grandpre, on the north bank of the Aire river, north of the Argonne forest. Grandpre is only a village and its normal population is less than 1,000, but the place is of great strategic importance. It was the junction of the railways feeding a great part of the German army. After their long struggle for mastery in the Argonne woods, the Americans moved several companies of infantry over the Aire river, which cuts across the northern end of the wood south of Grandpre, and under cover of heavy artillery fire moved, almost without stopping, along the eastern flank of the position and into the town.

On the western side the French had advanced along the roads, making possible a junction of the American 1st army and the French 4th army.

German Retreat in Belgium.

By this time (Oct. 16) it was made clear that the Germans had started a retreat on a tremendous scale from northern Belgium. French cavalry approached Thiel, seven miles from the banks of the Ghent-Bruges canal. The canal itself is only ten miles from the border of Holland. So fast was the enemy retreating that the French, British and Belgian infantry, at least in the center of the battle front, lost touch entirely with the enemy. The Belgians, advancing astride the Thourout-Bruges and Thourout-Ostend roads, defeated the Germans, who retreated rapidly.

Bruges and Ostend Taken.

Oct. 17 was a day of rejoicing for the allies, for Belgian cavalry entered Bruges, Zebrugge was abandoned, the British occupied Ostend, Lille was taken, practically undamaged, while the Germans, farther south, evacuated Douai. King Albert and Queen Elizabeth entered Ostend the same day.

Northeast of Bohain American and British troops, attacking over a nine mile front, gained nearly three miles at points. These advances were made despite seven German divisions hurled against them. Some 3,000 prisoners were taken.

The Americans on Oct. 11 advanced north of Romagne, taking Bantheville withoutartil-

lery preparation. The Americans pushed the German infantry and machine gunners back after fighting that lasted all day.

Northwest of Grandpre the Americans captured Talma farm in the face of a stiff machine gun resistance. There was much fighting at close quarters throughout the day.

Praised by Field Marshal Haig.

High praise was given to the 27th and 30th divisions of the 2d American army by Field Marshal Haig in a special communique devoted to their exploits issued Oct. 19. He said of these divisions:

"During the course of the last three weeks the 27th and 30th divisions of the 2d American army, co-operating with the 4th British army, have participated with great gallantry and success in three or more offensives and a number of lesser attacks.

"In the last three days the two divisions have fought their way forward to the high ground west of the Sambre-Oise canal, repulsing many counterattacks and advancing five miles." They took 5,000 prisoners and many guns.

Valenciennes, the last city of importance remaining in German hands in French Flanders, was reached by the British Oct. 20 and on the following day they drove through strong German defenses over a fifteen mile front extending from Valenciennes down to a point east of Le Cateau. Nearly a dozen villages were taken in the advance.

Victories Unbroken.

On Oct. 23 American troops captured strongly fortified hills in the Meuse region and took Tamla farm and the village of Bellevoise northwest of Grandpre. Victories continued to be announced from day to day on all parts of the front. Sometimes they were of comparatively little importance, but oftener they recorded decisive triumphs over large forces of the enemy. Armistice negotiations had been begun before this, but the allies on the one hand were pressing their advantage to the utmost, while the Germans in response to appeals from Marshal von Hindenburg, the crown prince and other leaders were resisting the best they could.

One of the last heavy battles in which the Americans took part was that on Nov. 1, when the 1st army took Champigneulle and Landres-et-St. Georges after a heavy artillery preparation. Their advance on this occasion and previously enabled them to threaten the enemy's most important line of communication, for which reason the opposition to them was stubborn. Valenciennes was finally taken by the British Nov. 2. Gen. Haig's forces then pressed on forward toward Maubeuge. On Nov. 4 the Americans reached Stenay and on the 6th they crossed the Meuse. By the 7th they entered Sedan, the place made famous by the downfall of Napoleon III. in the war of 1870. On other part of the American front the enemy retreated so fast that the infantry had to resort to motor cars to keep in touch with the foe. It was the same on the other fronts. By Nov. 10 Brussels was within range of Gen. Haig's guns. Here is the description of the last day's fighting on Nov. 11 as given in an Associated Press dispatch:

Final Fight by Americans.

"Thousands of American heavy guns fired the parting shot to the Germans at exactly 11 o'clock this morning. The line reached by the American forces at 11 o'clock to-day was being staked out this afternoon. The Germans hurled a few shells into Verdun just before 11 o'clock.

On the entire American front, from the Moselle to the river of Sedan, there was artillery activity in the morning, all the batteries preparing for the final salvoes.

"At many batteries the artillerymen joined hands, forming a long line as the lanyard of the final shot. There were a few seconds of silence as the shells shot through the heavy mist. Then the gunners cheered. American

flags were raised by the soldiers over their dug-outs and guns and at the various headquarters. Northeast of Verdun the American infantry began to advance at 9 o'clock this morning after artillery preparation in the direction of Ornes.

"The German artillery responded feebly, but the machine gun resistance was stubborn. Nevertheless, the Americans made progress. The Americans had received orders to hold the positions reached by 11 o'clock, and at those points they began to dig in, marking the advanced positions of the American line when hostilities ceased. Along the American front the eleventh hour was like awaiting the arrival of a new year. The gunners continued to fire, counting the shells as the time approached. The infantry were advancing glancing at their watches. The men holding at other places organized their positions to make themselves more secure.

"Then the individual groups unfurled the stars and stripes, shook hands and cheered. Soon afterward they were preparing for luncheon. All the boys were hungry, as they had breakfasted early in anticipation of what they considered the greatest day in American history."

Last French Communique.

The last French communique was as follows: "In the fifty-second month of a war without precedent in history, the French army, with the aid of the allies, has achieved the defeat of the enemy.

"Our troops, animated by the purest spirit of sacrifice, and giving, during four years of uninterrupted fighting, a sublime example of endurance and heroism daily, have fulfilled the task confided to them by the mother country, meeting at times with indomitable energy the enemy's assaults and at other times themselves attacking, thus bringing victory.

"They have, after a decisive offensive of four months, thrown into disorder, beaten and thrown out of France the powerful German army. They have compelled it to beg for peace.

"All the conditions required for the suspension of hostilities having been accepted by the enemy, an armistice came into force to-day at 11 o'clock."

Last British Report.

Field Marshal Haig sent the following report to the British war office on the evening of Nov. 11:

"Shortly before dawn this morning Canadian troops of the 1st army under Gen. Horne captured Mons.

"At the cessation of hostilities this morning we had reached the general line of the Franco-Belgian frontier, east of Avesnes, Jeumont, Xivry, four miles east of Mons, Chievres, Lessines and Grammont.

Part Played by American Soldiers.

In a brief review of the part played by the American troops in the fighting on the front in France, Junius B. Wood, correspondent of The Daily News attached to the expeditionary forces from the start, cabled Nov. 13, 1918, two days after the signing of the armistice:

"Gen. Pershing's offer to throw in the American troops wherever Marshal Foch deemed it necessary was taken advantage of continually. The French also put in a certain number of their own divisions under the command of the Americans, but they were inconsiderable.

"European newspapers mentioned American troops as assisting in the latest Belgian activities in Flanders. Military reasons have made it inadvisable to disclose the exact number of these troops, but they may be roughly indicated by the fact that the Belgian fighting force was composed of rather more than three Americans to every four Belgians.

"The Americans in the French, British and Italian armies were much less numerous in proportion to the total strength of the men of those nations. However, in these days when the fighting strength of armies is computed in

millions of men, it may be said that the fighting strength of the Americans in Europe was not far from half of that of the French and British combined.

One thing clearly stands out. When American divisions were included in the French and British armies they invariably received their full share of the fighting against the enemy. Time after time these fresh young soldiers from across the Atlantic were either the driving wedge in the allied attacks or the center around which the others rallied to withstand the German onslaughts. In either case they acquitted themselves nobly of their task.

This policy was started when the American 1st division was put in north of Montdidier on April 26. It was the division which was then the best trained American unit in France and it was used as the driving wedge in the attack to cut off the Montdidier salient. This is a piece of history which hitherto has not been told. The French realized that the Americans were keen to show their valor and that it was a gallant thing to offer the Americans an opportunity to cover their arms with glory. The German offensive interfered with that plan and all the division did was to capture Cantigny, which was the first American offensive operation.

On June 1 the 2d division, composed of a brigade of marines and a brigade of infantry resting near Gisors, received maps showing the billeting villages on the different nights which they were to march north to relieve the 1st division. On the same night a countermanding order came to prepare instantly to take motor trucks for a secret destination.

Before daylight thousands of French motor trucks driven by Chinese entered the different villages and loaded up. The next afternoon the division was in the midst of a fight with the German wave that was sweeping toward Paris. The 2d division met the Germans on that Sunday afternoon at Le Thillot-Faure crossroads on the national highway between Chateau Thierry and Paris.

The night which fell on the lot of this American division was the high water mark of the hitherto successful German offensive of 1918. The fighting at Belleau wood, Vaux and Torcy followed.

On the same day the 3d division and the 28th division, which were training in the area, helped the French to hold back the Germans at the bridgehead of Chateau Thierry on the western bank of the Marne. These gallant fights, where the young American soldiers received their baptism of blood, told at that time, as well as in the days of bitter fighting by the 2d division, before the Germans realized that their advance had been halted.

War-tired Europe sparred for breath until July 15, when the Germans launched their last offensive. The American 42d (Rainbow) division received the brunt of the attack north of Chalons-sur-Marne. The French largely outnumbered all the others on the long battle front, though British and Italian units and the 93d American division, composed of negro infantry from Chicago, New York, Washington, South Carolina, Ohio, Maryland, Tennessee and Mississippi, were involved. The allied line never budged and Germany was on the defensive from that time on.

Before the Germans had time to catch their breath the great allied offensive of July 18 was launched and turned the tide of the war. The 1st and 2d American divisions were again selected as the driving force. With a Moroccan division between them and with other French divisions on either side they smashed the German positions at daybreak, while other American divisions co-operating on the Chateau Thierry side of the salient, started hammering. Before the Aisne was reached after weeks of fighting the 3d, 4th, 26th, 28th, 32d, 42d and 77th American divisions had taken part.

Divisions trained with the British were in the meantime getting action on the northern front. The participation of the 33d division in the fighting at Hamel and Albert won the

personal praise of King George. Real fighting on the British front fell to the 27th and 30th divisions early in October, when they with a portion of the British forces were breaking the Hindenburg line across the Canal du Nord. The British took the outer works and the Americans swept over the main defenses. Australians who took part in the action on the following day said it was the hardest battle in their entire four years of desperate fighting.

The American divisions rapidly rounded into shape and the 1st army was organized, with Gen. Pershing in command, just before it nipped off the St. Mihiel salient on Sept. 12. This salient had been a troublesome thorn in the side of France for four years. The 52d, 89th, 42d and 1st divisions, with the 2d division in reserve, attacked on the south side of the salient. The 26th division, accompanied by the 15th French division and the 2d French cavalry, struck the hitherto impregnable Eparges on the north side. This brilliant operation, which was entirely American, was completed in twenty-two hours, when the French entered St. Mihiel.

Then on Oct. 3, almost on the identical spot north of Chalons, where the 42d division three months earlier had stopped the German drive, the American 2d division was the center or driving wedge in the French attack which forced the Germans back pellmell and liberated Reims and later Laon, with many square miles of country.

The rest of the fighting came in the last offensive, when the Americans were given the toughest spot on the entire line between Switzerland and the North sea—the hinge position pivoting on Verdun and swinging from the Meuse to the Aisne. The 33d, 18th, 4th, 79th, 37th, 91st, 35th, 28th and 77th divisions made the initial attack on Sept. 26, with the 3d, 32d and 92d divisions in support. Later in the days of fighting the 1st, 5th, 26th, 29th, 42d, 78th, 82d and 90th divisions took their places in the line.

In the midst of all this fighting some of these divisions and other new divisions were transferred to the 2d army, which had then been formed.

Determining Cause of Victory.

Gen. Pershing, in the name of President Wilson, presented the distinguished service medal to Marshal Joffre, the victor of the Marne, the ceremony taking place in Paris, Nov. 13, 1918, Gen. Pershing said:

"This medal is a symbol of our respect for your noble character and of our admiration for the great task you accomplished. Your name will always be associated with the results we have obtained."

Marshal Joffre in thanking Gen. Pershing said:

"I am proud to have been the godfather of the noble American army which was the determining cause of our victory. I love the American soldiers as though they were mine."

Negotiations for Armistice.

Long before the last shots were fired in the war the Germans, seeing that there could be but one outcome to the conflict, asked for terms of an armistice. On Oct. 3 Chancellor von Hertling resigned his office and was succeeded by Prince Maximilian of Baden, who immediately set about getting peace for his sorely tried country. He announced his policy to the reichstag and on Oct. 5 he addressed a note to President Wilson asking him to acquaint all the belligerents with Germany's request for an armistice. (That note and other official proceedings leading up to the preparation of armistice terms by the supreme war council of the allies in Versailles will be found in full in this volume beginning on page 450. Some additional details will be given here of the meeting of the armistice plenipotentiaries at Marshal Foch's headquarters and the events immediately preceding and succeeding it.)

On Oct. 29 the supreme war council and its military advisers had agreed upon tentative armistice terms; a resume of which was sent

to President Wilson for his approval. The men attending the conferences at which the decisions were reached divided the work into three sections. One attended by Premier Lloyd George and Foreign Minister Balfour of Britain, Premier Orlando and Foreign Minister Sonnino of Italy, Col. E. M. House, representing the United States, and the leaders of the French government, dealt with the whole question in a broad manner. A second section dealt with the strictly military questions. The United States representative on this was Gen. Tasker Bliss. A third conference dealt with naval affairs, and Admiral Benson and Vice-Admiral Sims of the American navy took part in this with the representatives of all the allied navies.

The first formal meeting of the representatives of the entente powers took place Oct. 31. An informal conference took place at the home of Col. E. M. House, President Wilson's personal representative, in the forenoon prior to the assembling at Versailles. Among others present were M. Clemenceau and M. Pichon, respectively the French premier and foreign minister; Sir, Orlando and Baron Sonnino, Italian premier and foreign minister, and David Lloyd George, the British prime minister. In addition to the French, Italian and British representatives, Dr. M. R. Vesnitch, the Serbian minister to France, and Eleutherios Venizelos, the Greek premier, attended. The Americans present, in addition to Col. House, were Arthur H. Frazier, secretary of the American embassy; Joseph C. Grew and Gordon Auchincloss, who acted as secretaries for Col. House; Gen. Tasker H. Bliss, United States representative in the war council, with Gen. Lockridge and Col. Wallace as secretaries, and Admiral Benson, with Commander Carter and Lieutenant Commander Russell as his secretaries. The last to arrive at the conference was Marshal Foch. He was alone, without aid or orderly.

At Versailles the business was over in a couple of hours and a long line of automobiles with the representatives of the powers returned to Paris.

Terms Are Drafted.

On Nov. 1 another conference took place soon after noon. Gen. Tasker H. Bliss, representative of the United States, was the first delegate to reach the Trianon palace, arriving at 1:50 p. m. He was followed shortly afterward by Premier Clemenceau, Marshal Foch, Field Marshal Sir Douglas Haig, Col. E. M. House, President Wilson's personal representative, and David Lloyd George, the British prime minister.

The session was held in the large chamber on the main floor of the Trianon palace, with windows overlooking the garden. The hall had little ornamentation beyond a marble clock and candelabra upon a mantel topped with massive mirrors. Immediately in front of this extended a wide mahogany table the entire length of the room, with the members facing one another on two sides. Col. House sat on the left side next to Premier Orlando of Italy, with Premier Clemenceau directly opposite.

The deliberations proceeded with complete privacy. Guards along the Boulevard of the Queen kept the crowds from approaching the iron gate leading to the palace. After several sessions the armistice terms were drafted and signed at Versailles Nov. 4, complete harmony having been reached by the conferees. (These terms will be found on page 458 of this volume.) On Nov. 5 President Wilson notified the German government that Marshal Foch, commander of the allies' armies in the field, was authorized and ready to receive accredited representatives to whom he would communicate the terms of armistice agreed upon by the supreme war council at Versailles. (The text of this note will be found on page 455, this volume.)

Germany Sends Envoys.

On the evening of Nov. 7, the following information was officially published in Paris:

"There was received the seventh of November at 12:30 a. m. the following from the German high command by order of the German government to Marshal Foch:

"The German government, having been informed through the president of the United States that Marshal Foch had received powers to receive accredited representatives of the German government and communicate to them conditions of an armistice, the following plenipotentiaries have been named by it:

"Mathias Erzberger, Gen. H. K. A. Winterfeld, Count Alfred von Oberdorff, Gen. von Gruenel and Naval Captain von Salow."

"The plenipotentiaries of the peace who they be informed by wireless of the places where they can meet Marshal Foch. They will proceed by automobile with subordinates of the staff to the place thus appointed."

"Orders were given to cease fire on the front at 3 p. m., until further orders."

"On Nov. 7, at 1:25 a. m., Marshal Foch sent the following to the German command:

"If the German plenipotentiaries desire to meet Marshal Foch and ask him for an armistice they will present themselves to the French outposts by the Chimay-Fourmies-La Capelle-Guise road. Orders have been given to receive them and conduct them to the spot fixed for the meeting."

"A German wireless dispatch received Nov. 7, at 1 p. m., said:

"German general headquarters to the allies' general headquarters: The German commander-in-chief to Marshal Foch: The German plenipotentiaries for an armistice leave Spa to-day. They will leave here at noon and reach at 5 o'clock this afternoon the French outposts by the Chimay-Fourmies-La Capelle-Guise road. There will be ten persons in all, headed by Secretary of State Erzberger."

"The following wireless dispatch in German was received at 1:50 p. m.:

"German general headquarters to the allied general headquarters: The supreme German command to Marshal Foch: From the German outposts to the French outposts our delegation will be accompanied by a road mending company to enable automobiles to pass the La Capelle road, which has been destroyed."

"The following wireless in German was received at 6 p. m.:

"The German supreme command to Marshal Foch: By reason of delay the German delegation will not be able to cross the outpost until between 8 and 10 o'clock to-night at Haudroy, two kilometers northeast of La Capelle."

In London on the same day it was announced that the British naval representative at the armistice negotiations would be Sir Rosslyn Wemyss, first sea lord of the admiralty.

On Thursday, Nov. 7, a false report that the armistice had been signed was sent broadcast and caused premature celebrations throughout the world.

Delegates Meet French Marshal.

The following official note was given out in Paris on the afternoon of Nov. 8:

"The German delegates arrived this morning at Marshal Foch's headquarters. They made a formal demand for an armistice. The text of the conditions of the allies was read and delivered to them. They asked a cessation of arms. It was refused them. The enemy has seventy-two hours to answer."

Marshal Foch reported that the German plenipotentiaries arrived at his headquarters with full power from the chancellor.

Soon after Marshal Foch had presented the allies' terms to the Germans the courier carrying them started for Spa. He was preceded by a wireless message from the German delegates.

"From the German plenipotentiaries for an armistice to the imperial chancellor and the German high command" the message read, "Friday morning at allied general headquarters the plenipotentiaries received the conditions of an armistice, as well as a formal demand

WESTERN RUSSIA AS IT APPEARED IN DECEMBER, 1918.

that they be accepted or refused within seventy-two hours, expiring on Monday morning at 11 o'clock, French time.

"The German proposal for an immediate conclusion and provisional suspension of hostilities was rejected by Marshal Foch.

"A German courier bearing the text of the conditions of the armistice has been sent to Spa, no other means of communication being practicable.

"Please acknowledge receipt and send back courier as soon as possible with your latest instructions. Sending of fresh delegates is not necessary for the moment."

The French wireless service also gave out a dispatch sent by Gen. Winterfeld of the German armistice delegation to the German high command, announcing that the courier, Capt. Helldorff, would cross the lines between 6 and 8 p. m., and that the French command had taken measures for his safety.

Describing the arrival of the German envoys at the French lines, the Intransigent

said the automobiles carried white flags and were preceded by a trumpeter. Some French soldiers under an officer approached them on the road just outside the line of the left wing of Gen. Debeney's army near La Capelle, at 10 o'clock on the evening of Nov. 7.

The delegates established their identity and showed their credentials. The eyes of the members of the German party were then blindfolded and the delegates proceeded to the place where they spent the night, arriving there about 2 o'clock on the morning of Nov. 8.

The company of German road menders which accompanied the envoys did not cross the lines. The party started early in the morning for the French headquarters, arriving there at 6 o'clock.

Gen. Winterfeld and Gen. von Gruennel wore uniforms of the rank of general. Von Salow was in the uniform of an admiral of the fleet. Mathias Erzberger and Count von Oberndorff were in plain civilian dress.

Historic Meeting Described.

The Paris correspondent of the London Times described the historic meeting somewhat more in detail. He telegraphed on Nov. 10:

The German parliamentaires did not reach the French lines until after 9 o'clock on Thursday evening, when the French party awaiting them near La Capelle saw three motor cars advancing, together with a working party of pioneers. The journey of the German delegates had been exceedingly difficult. The French had lit up the road with searchlights and fires.

"At La Capelle a French guard, under the command of a superior officer, met the delegates and scrutinized their papers, and a French motor car with officers attached to the German party, placed itself at the head of the convoy, and another French staff car brought up the rear. The mission proceeded at once to the Chateau Francport, the property of the Marquis de Laigle, quite close to Choisy-au-Bac, which had been set aside as their residence. There members of Marshal Foch's staff met them.

"On Friday morning the delegates were conducted to Bethonnes station, in the forest of Compiègne, on the Compiègne-Soissons line, where Marshal Foch's special train was lying. Marshal Foch was accompanied by Gen. Weygand and Admiral Sir Rosslyn Wemyss, first sea lord.

"Herr Erzberger at once informed Marshal Foch that he had been instructed to ask for an immediate suspension of hostilities. Marshal Foch in reply informed them that this request had been foreseen in the terms of the armistice settled at Versailles and could not be granted. With cold military precision Marshal Foch then read the full text of those terms.

"The delegates returned by car to their temporary residence at Francport, and after a brief consultation, requested authorization to send a courier to German headquarters at Spa. A wireless message was dispatched from the Eiffel tower informing the Germans of the journey of this courier so as to obtain a cessation of fire along the front in the neighborhood of La Capelle to enable him to return to his lines. The bombardment, however, increased in violence when he reached the front, and in spite of all efforts by wireless to persuade the Germans to cease fire the bombardment was maintained with great intensity throughout the night. In the morning the Germans suggested that it might be possible to get their messenger to German headquarters by airplane. The French high command at once agreed and the Germans, by wireless, undertook that the French airplane, which should bear two large white streamers, should not be fired upon. A French airplane was told to get ready for this unique journey and almost immediately afterward a further wireless came from the Germans announcing that the orders given for the cessation of fire along La Capelle road were going to be carried out and that the German officer could, therefore, proceed by road to his destination."

The German courier bearing the text of the armistice conditions arrived at German headquarters at 10 o'clock on Sunday morning, Nov. 10. Capt. Helldorf was long delayed, while the German batteries persisted in bombarding the route he had to follow, but he finally got through.

Armistice Signed.

The new German government considered the armistice conditions at a sitting late Sunday in Berlin. Having decided to accept them, it telephoned instructions from Berlin to Spa, German headquarters, authorizing the delegates to affix their signatures to the agreement.

The courier, who was waiting at Spa, departed immediately for the lines and crossed them without incident north of Chimay. He reached the Chateau de Francport at about 2 o'clock Monday morning and found the German plenipotentiaries waiting for him. They

asked, after they had read their instructions, to see Marshal Foch, who was in his special train on a switch near the chateau.

Marshal Foch, with Admiral Sir Rosslyn Wemyss, first lord of the British navy, received them. A discussion took place upon certain clauses, particularly that concerning the maintenance of the blockade. The German delegates signed the document at 5 o'clock. The news was immediately sent by telegraph, cable, telephone and wireless to all parts of the world, causing one of the most tremendous outbursts of enthusiasm in the history of the world. In Paris and London the celebration lasted three or four days.

Joy in Paris.

Scenes of the wildest enthusiasm were enacted in the chamber of deputies when Premier Clemenceau read the conditions of the German armistice. The whole chamber rose to greet the premier while the galleries, in which was a predominance of soldiers in uniform and women, cheered for several minutes.

Prolonged cheering greeted the announcement that Alsace-Lorraine would be occupied, and the name of Marshal Foch, as the signer of the document, was enthusiastically received.

The municipal council of Paris had the following posted on walls in all parts of the city: "Citizens, victory is here—triumphant victory! The vanquished enemy lays down his arms. Blood ceases to flow. Let Paris emerge from her ordered reserve. Let us give free course to our joy and enthusiasm and hold back our tears.

"Let us testify to our infinite gratitude to our grand soldiers and their incomparable chiefs by festooning our houses in the colors of France and our allies. Our dead can sleep in peace. The sublime sacrifice they have made for the future of their race and the salvation of their country will not be in vain.

"The day of glory has come. Long live the republic! Long live immortal France!"

In London.

Waving flags and cheering, an enormous crowd pressed into Downing street before noon on the 11th shouting "Lloyd George! Lloyd George!" Finally the cheers and shouts brought the premier and Andrew Bonar Law, chancellor of the exchequer, to a second floor window of the premier's residence. When they appeared pandemonium ensued.

For five minutes the crowd cheered and waved flags frantically, and then they sang, "For he's a jolly good fellow." The premier stood passive and unsmiling, but his face was serene. When order and silence had been secured he began to speak, as follows:

"You are entitled to rejoice. The people of this country and of their allies and the people of our overseas dominions and of India have won a glorious victory. It was the sons and daughters of the people who have won it. It is the most wonderful victory for liberty in the history of the world. Let us thank God for it."

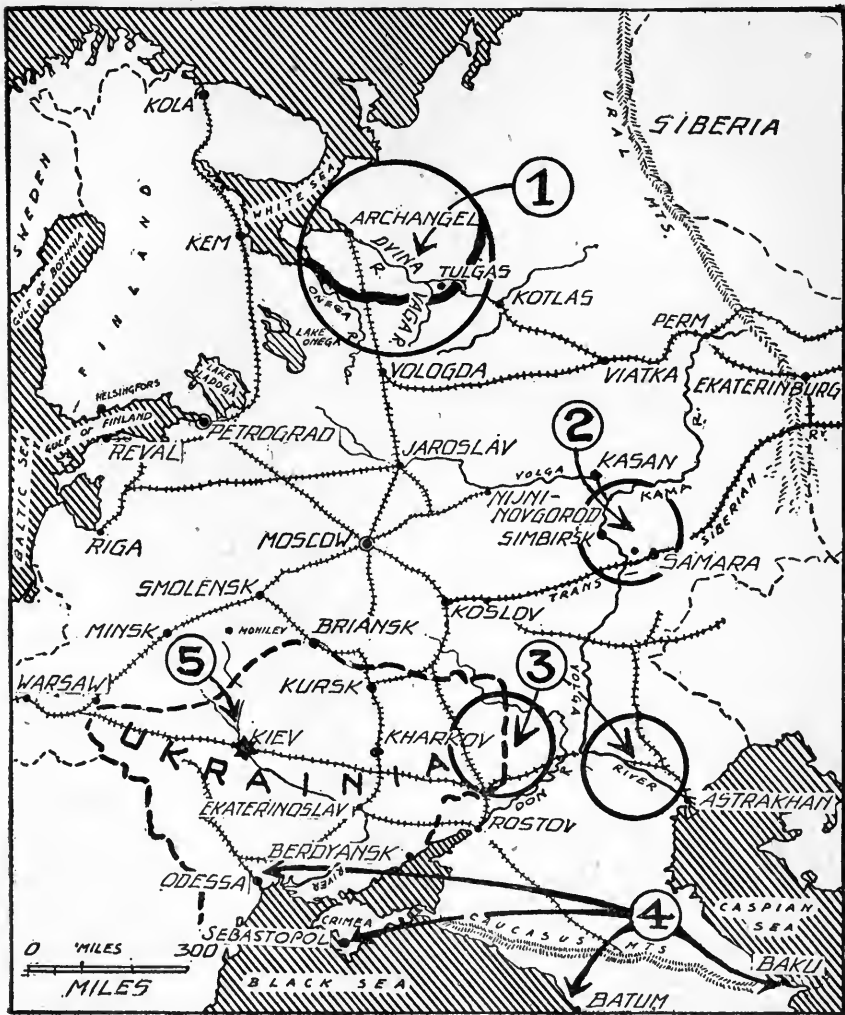

Premier Lloyd George bowed and disappeared. Chancellor Bonar Law after kissing his hand to the crowd as he pulled down the window, moved away.

Hardly had the premier finished talking when a long file of shouting soldiers—British, Canadians, Australians, Americans, and a few from other allied countries—wedged their way through the throng and managed to reach the front of the premier's house, where they gave him a great ovation.

A great multitude, waving flags, appeared before Buckingham palace shortly before noon and cheered until the king and queen, Princess Mary and the duke of Connaught appeared on the balcony. The national anthem was sung repeatedly by the crowd.

Speaking from the balcony, King George said:

"With you I rejoice and thank God." At the admiral's there were calls for a speech from Sir Eric Geddes, the first lord.

MAP SHOWING RUSSIAN MILITARY SITUATION IN DECEMBER, 1918.

To the north (No. 1) the bolsheviki were opposing American and allied forces coming south from Archangel along the Dvina river. To the east (No. 2) they had defeated the Czecho-Slovak troops after the latter on their westward march had reached the Volga and Kama rivers and taken the towns of Simbirsk

and Samara. To the south (No. 3) they were fighting the Cossacks on the Don river and in the Astrakhan district. The British (No. 4) were establishing bases at the points shown. (No. 5) Kiev, capital of the Ukrainian republic.

The crowds had collected there and hastily improvised platforms were erected for the first lord and the board of admiralty. Sir Eric Geddes called for three cheers for Vice-Admiral Beatty (commander of the grand fleet), and these having been given with great fervor, the crowds again asked for a speech, but the cheering drowned all else. The first

lord called for cheers for the British blue-jackets.

A special service of prayer was held at St. Paul's in the afternoon, the lord mayor and sheriffs attending.

Bands and the pipers of the Scots guards paraded through Whitehall, playing martial and patriotic airs. They were accompanied by

singing crowds who time and again sang the national anthem.

In the United States.

President Wilson issued the formal proclamation on Monday morning, Nov. 11, 1918:

"My Fellow Countrymen: The armistice was signed this morning. Everything for which America fought has been accomplished. It will now be our fortunate duty to assist by example by sober, friendly counsel, and by material aid in the establishment of just democracy throughout the world."
"WOODROW WILSON."

PEACE CELEBRATION NOV. 11, 1918.

There were two great peace celebrations over the signing of the armistice terms which virtually ended the world war. One of these, started by an erroneous report sent out from an American source in France on Thursday, Nov. 7, continued all day in the principal cities of the United States. The real celebration, however, began early on the morning of Nov. 11, when the fact that the armistice had been signed was made known through authentic and official channels. On that day the masses in all the allied countries gave themselves over to unrestrained manifestations of their joy. Stores and factories were closed, and for twenty hours or more the people surged through the streets shouting and singing while whistles were blowing and church bells ringing. The scenes witnessed in Chicago were typical of those in all the large cities of the world where the sympathy of the people was with the allies and the United States. They were thus described in *The Chicago Daily News*:

"Chicago turned topsy-turvy to-day. From one end of the city to another everything was turmoil. Its millions of citizens gave themselves without bounds to the delirium of joy the news of the war's grand finale had evoked in them. Pandemonium was in the saddle wherever the citizens congregated.

"And the whole thing, as a score or more funeral corteges seemed to indicate, was a tribute—or what would you call it?—to former Kaiser William. It was Chicago's way of joyously mourning the German emperor. Moreover, it was a part of the world's expression of its emotions at the downfall of the Hohenzollerns.

"Thursday's premature outburst of feeling paled into insignificance against to-day's demonstration of the popular feeling, not to mention the altogether tame and really innocent New Year's celebration that heretofore held the records for noisiness in Chicago.

"There was no semblance to order in the mass of pushing, howling, yelling, cheering, laughing humanity that packed Clark, State and LaSalle streets, Michigan boulevard and the cross-town thoroughfares from as early as 3 o'clock in the morning. And what feeble attempts were made on the part of the police to re-establish order were nonchalantly and persistently overlooked by the public.

"What did this happy crowd care whether the street cars were delayed or automobiles could not get through? What if a few plate glass windows were smashed by the great rush? The one big idea in the public mind was that the war was over and nothing else mattered.

"As on Thursday, so to-day, the streets were showered with makeshift confetti and ticker tape. The carnival-New Year's-election day spirit of Thursday again found its expression in the sudden appearance of all manner of noisemaking devices, from paper horns to rattles.

"And the motormen on the street cars and 'L' trains again did themselves proud clanging bells and blowing the sirens. The stunt of

Secretary of State Lansing issued the following statement:

"The American people can rejoice that their patriotism, their loyalty and their splendid spirit of service and sacrifice have been rewarded. Prussian militarism is ended; it no longer menaces liberty and justice. But before us lie new tasks and new burdens, which we must assume with the same unity of purpose, the same devotion and zeal, as have characterized the republic during this great war. Let us while we celebrate this day of victory look forward to the future, conscious of our supreme duty to humanity and confident in the united will of the nation."

making a very efficient noise-producing instrument out of an automobile cutout was repeated.

"Scores and scores of street parades were organized in a jiffy, and bands to lead them were gathered with surprising rapidity.

"But to-day's celebration may be compared to Thursday's only because Thursday's was the noisiest, most jubilant day in the annals of Chicago—up to to-day. To-day's bedlam was Thursday's, only ten times more noisy and impressive.

"Every loop building, store and factory poured its little city of men and women into the streets. Nobody felt like working, and the employers appreciated this. During the early morning hours the 'busiest corner in the world,' State and Madison streets, was busier than on the busiest Christmas shopping day on record. And at noon to-day it would have been impossible for a snake to wind its way through that maelstrom of humanity that had come to a dead stop and roared and vociferated and shouted into one another's ears.

"There was one cortege that was impressive. It consisted of a solemn faced band playing Chopin's dead march, a black hearse bearing a black casket, on which was inscribed, 'The Kaiser's Coffin—He's Going Where He Belongs,' and a long procession of mourners with black bands around their hats.

"Ever and anon the procession would stop, and somebody would emit a nerve shattering howl and turn a somersault amid frantic applause. And then the procession would continue.

"All morning, almost from 1:55 o'clock, the momentous minute when Chicago received the news of Germany's surrender, steam whistles all over added to the general noise. Passenger steamboats anchored at the mouth of the Chicago river joined in the chorus with the shrill, ear-splitting screech of their distress sirens. Near the federal building a big church bell joyously clanged.

"The news of the surrender, as on Thursday, brought to the loop thousands upon thousands of housewives, school children and factory workers. They packed every 'L' and suburban train and street car. Many had not even taken the time to change from their working clothes into street clothes, and among the throngs in the streets were many factory girls in overettes, housewives in huge aprons and men in overalls.

"But despite the vast crowds, to-day's celebration was largely a celebration by individuals. Many a man held a parade all by himself, either strutting about with a flag over his shoulder and gesticulating more or less wildly or earnestly pounding a big wash-tub or kettle.

"Toward noon the crowds and the noise increased. Babel at its worst could not have been worse than Chicago was to-day, so far as the incoherent tumult is concerned.

"Needless to say, the celebration became a little bit 'wet' as the day advanced. Many a man mixed liquor with jubilation, and the result was hilarious. But the good natured public closed one eye and even both eyes when

it became necessary. On the whole, there were few unpleasant outbursts.

"The general jubilation spread even to the county jail, where several thousand prisoners sang in chorus. And if one believes the guards, it was some chorus! All attempts to stop it failed.

"The first of the city's parades formed at Madison and State streets shortly after 2 o'clock in the morning. Night workers abandoned their posts, hotel guests fell in line and soldiers and sailors in Chicago on leave and waiting for trains to take them back to their cantonments swelled the procession. Every conceivable sort of noise making device, dish-pans, horns, revolvers, whistles, the whole category of ear splitting paraphernalia appeared as by magic.

"Soon several hundred people were in line. A young man in army uniform with a corporal's stripes was the leader of the first procession, but soon he had scores of rivals and by 4 o'clock there were half a dozen independent parades zigzagging their way about the downtown districts. A band of celebrants commandeered a big express truck early in the morning and after loading it to capacity started on a tour of the loop. One of the first places passed was a Madison street moving picture house which had a display sign, 'The Prussian Cur,' advertising a current production, and this was immediately seized and carried to the truck.

"Chicago public schools were closed for the day by special order. Although many youngsters failed to report for studies, the majority came to their classrooms and participated in demonstrations in honor of the receipt of the world's biggest news announcement.

"This news is real and there will be no classes to-day," said Mr. Loeb. 'I have dispatched an order to all principals of grammar and high schools closing the schools for the day.'

"Impressive services were held at many of the schools before the children were sent home. At the Eugene Field and Franklin schools, as well as a number of others on the south and west sides, the children began a patriotic song session which was opened with the singing of 'The Star Spangled Banner.'

IN OTHER CITIES.

The following telegrams show how the news of the signing of the armistice was celebrated in other large cities in the United States:

New York.

New York, Nov. 11.—The celebration which took place in New York Thursday upon the premature report of an armistice was a pale rehearsal of what occurred to-day. The bonafide occasion justified the full powers of rejoicing which New York displayed. The first whistles blew a few minutes after 3 o'clock in the morning and by 5 the city sat up in its millions of beds and thrilled with the consciousness that the dark days were ended, and that the most momentous day in the history of the world had dawned.

By 6 o'clock the streets were clamorous with masculine cheers; by 7, the voices of women were added; by 8, men and women, excused for the day from their tasks, thronged the great arteries of the city, elate with the sense of relief from sorrow. Hour by hour the tumult increased.

Fortunately it was a glorious day. The sky was an unclouded blue, the wind cool and rather strong, the sunlight pale but beautiful. Overhead an occasional airplane flew, silver white in the sun, but the noises of the aerial motors were drowned in the unceasing clamor and bellow of the streets.

To-night, eighteen hours after the glad tidings, celebrations, big and little, were going on in all quarters of New York city. Those in the foreign quarters were perhaps the most

picturesque. Red fire burned everywhere, and every known device for making noise was at a premium.

Tons of confetti sprinkled in the streets added a carnival note. The great thoroughfares were packed from building line to building line with ever-changing multitude. In Broadway, 5th avenue and the main cross streets vehicle traffic was almost abandoned. Men in uniforms of blue and khaki were caught up here and there and carried on the shoulders of the crowd.

There was no attempt at formal celebration. That will come later. The outpouring into the streets was a mere continuation of the "victory parade" decreed by Mayor Hylan as a token of the city's thanksgiving.

Boston.

Boston, Mass., Nov. 11.—New England threw off its traditional self-restraint to-day and celebrated the signing of the armistice from long before dawn until long after dark with more enthusiasm, noise and processions than ever marked its most glorious Independence day observances. While Gov. McCall in an official proclamation set aside to-morrow as "Victory day" for organized expression by the people of the state "of their very deep pleasure over so momentous an event," the citizens themselves, from corporation presidents to office boys, joined in a spontaneous outburst of joy that resulted in the general closing for the day of industrial establishments, offices and schools.

Boston streets were jammed all day. There were more processions in a day than ever tramped its pavements in a year.

St. Louis.

St. Louis, Mo., Nov. 11.—St. Louis was waiting to start celebrating when The Associated Press flashed the word that the war was over, and, having started, it had not stopped late to-night.

Kansas City.

Kansas City, Mo., Nov. 11.—A mammoth victory celebration at Convention hall here to-night marked the climax of a day replete with parades, jollification rallies and streets crowded with people who were armed with every sort of noisemaking device. Practically all business was suspended.

Omaha.

Omaha, Neb., Nov. 11.—Never in the history of Omaha has she witnessed such a celebration as to-day's festivities have been. Since early morning the streets have been thronged with a cheering mob. At 1:35 o'clock this afternoon a parade started in which 50,000 persons marched.

Salt Lake City.

Salt Lake City, Utah, Nov. 11.—From the moment it became known that the armistice had been accepted by Germany, Salt Lake City began to celebrate. A number of minor accidents were reported at the emergency hospital.

Des Moines.

Des Moines, Iowa, Nov. 11.—Business was suspended in Des Moines and many other Iowa cities and towns to-day as thousands of persons gave themselves over entirely to celebrating the end of the war. Throngs on the downtown streets here forced abandonment of street car traffic.

Milwaukee.

Milwaukee, Wis., Nov. 11.—The hanging of William Hohenzollern in effigy and a mammoth bonfire on the lake front were the crowning features of a peace celebration which started early to-day and continued until to-night.

ABDICATION OF EMPEROR

On Saturday, Nov. 9, 1918, the imperial German chancellor, Prince Maximilian of Baden, announced the abdication of Emperor William in the following decree:

"The kaiser and king has decided to renounce the throne.

"The imperial chancellor will remain in office until the questions connected with the abdication of the kaiser, the renouncing by the crown prince of the throne of the German empire and of Prussia, and the setting up of a regency shall have been settled.

"For the regency he intends to appoint Deputy Ebert as imperial chancellor, and he proposes that a bill shall be brought in for the establishment of a law providing for the immediate promulgation of general suffrage and for a constitutional German national assembly, which will settle finally the future form of government of the German nation and of those peoples, which might be desirous of coming within the empire.

"THE IMPERIAL CHANCELLOR.

"Berlin, Nov. 9, 1918."

German Defeat Acknowledged.

Before offering his resignation as chancellor Prince Maximilian issued an appeal "to Germans abroad" in which he said:

"In these difficult days the hearts of many among you, my fellow countrymen, who outside the frontier of the German fatherland are surrounded by manifestations of malicious joy and hatred, will be heavy. Do not despair of the German people.

"Our soldiers have fought to the last moment as heroically as any army has ever done. The home land has shown unprecedented strength in suffering and endurance.

"In the fifth year, abandoned by its allies, the German people could no longer wage war against the increasingly superior forces. The victory for which many had hoped has not been granted to us. But the German people has won this still greater victory over itself and its belief in the right of might.

"From this victory we shall draw new strength for the hard time which faces us and on which you also can build."

It will be noticed that in his announcement Prince Maximilian said that the kaiser had decided to abdicate and not that he had actually abdicated. As a matter of fact the emperor did not actually abdicate until Nov. 28, when he signed the following document:

Renunciation of Throne.

"By the present document I renounce forever my rights to the crown of Prussia and the rights to the German imperial crown. I release at the same time all the officials of the German empire and Prussia and also all officers, noncommissioned officers and soldiers of the Prussian navy and army and of contingents from confederated states from the oath of fidelity they have taken to me, as their emperor, king and supreme chief.

"I expect from them until a new organization of the German empire exists that they will aid those who effectively hold the power in Germany to protect the German people against the menacing dangers of anarchy, famine and foreign domination.

"Made and executed and signed by our own hand with the imperial seal at Amerongen, WILLIAM."

Defeated and Deserted.

Defeated on the battlefield and deserted by the people of Germany who before the armistice with the allies was signed were in the throes of a revolution, Emperor William was in despair. Ludendorff had resigned and departed for Sweden; Hindenburg remained but advised surrender, as the military situation was impossible; the armies which more than

WILLIAM II. OF GERMANY.

four years before had poured through Brussels in a mighty stream for three days were exhausted, decimated and unable to continue the struggle. He could no longer rattle his glittering sword or take refuge behind the vaunted "iron wall" of German might. His only recourse, it seemed to him, was flight.

Finds Sanctuary in Holland.

Deciding to take refuge in Holland he proceeded by a special train to the frontier station of Eysden, where he awaited the permission of the Dutch authorities to travel farther to Amerongen castle, owned by his friend Count von Bentinck. In his suite were Col. Gen. von Plessen, Lieut.-Gen. von Gontard, Hofmarschal von Platen, Maj.-Gen. von Frankenberg, Maj.-Gen. von Litorff, Maj.-Gen. von Grimman, Col. Count von Moltke, Surgeon-Colonel von Niester, Maj. von Hirschfeld, Capt. von Isermann, Capt. Seiss, Capt. Knauff, Capt. Schaderberg and Capt. Grutsche. No princes were in the party.

After some delay he was permitted to proceed and reached Amerongen castle on the afternoon of the 11th, and there he remained at the time this record closed on Dec. 12, 1918. His presence in Holland was unwelcome to many of the people there and for a time it threatened to lead to the deposition of the Dutch queen. The action of the government in giving refuge to the man generally blamed for bringing on the world war was criticized in most of the allied countries and suggestions that his extradition should be demanded were made. Others contended that the matter should be settled at the general peace conference where all the great issues resulting from the war would be considered.

Position of Dutch Government.

The position of the Dutch government was made plain on Dec. 11. The former German emperor was entitled to the right of sanctuary in Holland and therefore his return to Germany could not be demanded, according to a statement made on that day by Jonkheer Beerenbrück in the lower chamber of parliament during a debate on the visit of the former emperor to Holland. The premier said the government would have preferred that the former emperor had not chosen Holland as a refuge, but that he came as a private individual, after renouncing his throne, without direct or indirect notification of his intended arrival.

After renunciation of his throne, Jonkheer Beerenbrück continued, there could not be a question of internment, nor could the former emperor's return to Germany be demanded, in view of the immemorial tradition of right of sanctuary. The Netherlands government could adopt no line of conduct but that of granting "the right of sanctuary" and accepting it as a fact accomplished. The government, the premier continued, must repudiate every effort to see in this step an unneutral attitude. Nevertheless, he said, the once emperor's stay in Holland was only regarded as temporary.

Up to the present no power had protested against his visit, but any eventual demand for extradition must pass the test of law and of treaty. The government, the premier concluded, would not allow the former emperor to exercise any influence in another country.

Imperial Boasts Recalled.

After the former emperor's flight to Holland was announced British newspapers gave prominence to some of his utterances while the war was in progress.

1914.

In the year 1914 he said:
"Before the leaves fall from the trees we

shall be back again in the dear fatherland. Exterminate first the treacherous English and walk over Gen. French's contemptible little army. The warlike spirit still lives in the German people—that powerful spirit which attacks the enemy wherever it finds him regardless of the cost.

"You, my troops, are my guaranty that I can dictate peace to my enemies. Up and at the foes! God's goodness will guide the German people through battle to victory—to the goal appointed for the German people by Providence. I have drawn the sword, which without victory and without honor I cannot sheathe again. We stand with our hearts toward God—to the dust with all the enemies of Germany! Amen."

1915.

In the year 1915 the German ruler said: "Our brave soldiers have shown themselves to be invincible in battle against nearly the whole world. The war drama now is coming to its close." The war drama now is coming to its close.

To the king of the Senussi he said: "Our common enemies whom Allah will annihilate to the last man, shall fly before thee. So be it."

Regarding the United States the emperor declared:

"America had better look out after the war. I shall stand no nonsense from the Americans. My destructive sword has crushed the Russians. In a short while I will announce new victories. The war drama now is coming to its close. In a just cause I am ready to force myself to be cruel."

1916.

In 1916 the emperor said: "The world was prepared for anything but a victory of the German fleet over the British fleet. Fear will creep into the bones of the enemy."

"Bukharest has been taken. What a mag-

nificent success on the road to complete victory has been gained with God's help!

"Germany is invincible in spite of the superior numbers of our enemies and every day confirms this anew. Germany knows her strength and she relies on God's help.

"The foe is defending his native soil foot by foot. This is the resistance of despair, but it must be broken. He has prepared his soup and now he must sup it. I look to you to see to it."

"All Germany contemplates with pride her brave sons, whose deeds with God's help will be a landmark on the road to final victory"

1917.

In 1917 the head of the German nation said:

"If the enemy does not want peace, then we must bring peace by battering in with iron fist and shining sword the doors of those who will not have peace.

"Victory in the coming year will again be on our side and on that of our allies. If only we cast the burden on the Lord, He will smite the foe high and thigh as He did Amalek, the prototype of perfidious England.

"Our 'U' boats are not going to rest until, with God's help, the enemy is beaten. With the help of God, who has hitherto graciously protected us, the enemy shall have a decision.

"England is particularly the enemy to be struck down, however difficult it may be.

"The year 1917 with its great battles has proved that the German people has in the Lord of Creation above an unconditional and avowed ally on whom it can absolutely rely"

1918.

In June, 1918, the emperor said: "God, the Lord, has laid a heavy burden on my shoulders, but I can carry it in the consciousness of our good right, with confidence in our sharp sword and our strength." This was followed by various utterances of growing despondency.

CROWN PRINCE WILLIAM ON THE WAR.

Frederick William Hohenzollern, former crown prince of Germany, while a refugee in Holland, gave his views of the world war to a correspondent of The Associated Press Dec. 3, 1918. In the course of a lengthy conversation which took place in the small cottage of the village pastor on the island of Wieringen, where he is interned, he denied that as crown prince he had renounced his claim to the German throne.

"However," he continued, "should the German government decide to form a republic similar to the United States or France I shall be perfectly content to return to Germany as a simple citizen, ready to do anything to assist my country. I should even be happy to work as a laborer in a factory.

"At present everything appears chaos in Germany, but I hope things will right themselves."

Asked what in his opinion was the turning point of the war, he said:

"I was convinced early in October, 1914, that we had lost the war. I considered our position hopeless after the battle of the Marne, which we should not have lost if the chiefs of our general staff had not suffered a case of nerves."

"I tried to persuade the general staff to seek peace then, even at a great sacrifice, going so far as to give up Alsace-Lorraine. But I was told to mind my own business and confine my activities to commanding my armies. I have proof of this.

"The air raids on London and other towns and the big gun used against Paris were useless militarily, and in fact, were silly. Orders to submarine commanders were read differently by various officers, who went much too far.

"Regarding air raids, I suggested two years

ago an international agreement confining air activities to the actual war zone, but my opinion was entirely disregarded. I was again told my job was to command my armies."

What finally brought about the downfall of the German military power, he declared, was revolution induced by four years of hunger among the civilians and the troops in the rear, together with the overwhelming superiority in numbers attained by the entente powers since America's entry into the war, which had undermined the confidence of the German fighting forces.

"My soldiers, whom I loved and with whom I lived continuously, and who, if I may say so, loved me, fought with the utmost courage to the end, even when the odds were impossible to withstand," the refugee prince went on:

"They had no rest, and sometimes an entire division numbered only 600 rifles. These were opposed by fresh allied troops, among whom were American divisions containing 27,000 men apiece."

Describing how he left the front, Frederick William declared:

"I was with my group of armies after the kaiser left Germany. I asked the Berlin government whether they desired me to retain my command. They replied negatively, and I could not continue to lead armies under orders of the soldiers and workers' council.

"Therefore I came to Holland without hindrance. No shooting or bombing occurred, and I quit the army with the greatest regret, after having participated in the trench life with the soldiers for so long.

"I have not been in Germany for a year, and from the beginning of the war I have taken only three or four fortnight leaves."

Speaking of the beginning of the war, Frederick William asserted:

"Contrary to all statements hitherto made abroad, I never desired war, and thought the moment quite inopportune. I was never consulted, and the report about a crown council being held in Berlin to decide on the war I deny on my oath. I was enjoying a stay at a watering place when mobilization was ordered.

"My father also, I am sure, did not want war. If Germany had sought the best opportunity for making war, she would have chosen the period either of the Boer war or the Russo-Japanese war.

"From the beginning I was certain that England would enter the conflict. This view was not shared by Prince Henry and the other members of my family.

"People have credited me with warlike intentions. But I was only a soldier with a desire to see the army kept thoroughly efficient, and I worked hard to bring this about. People blame me with the failure at Verdun. But I refused twice to attack there with the troops at my disposal. On the third occasion my attack was successful for the first three days, but I was not properly supported.

"I thought the Verdun attack was a mistake. We should have attacked to the eastward of Verdun, where there would have been great probability of success."

The ex-crown prince was rather bitter regarding the work of the general staff, which, he asserted, was responsible for numerous mistakes, including the attack in March, 1918, which he was ordered to make, contrary to his own view, and was compelled to obey. He declared Ludendorff was the mainspring of Germany's warlike activities, while Hindenburg was a mere figurehead.

Ludendorff and his staff continually underestimated the enemy's forces, he declared, and never believed that America's contribution of soldiers was as great as it actually proved to be.

Frederick William declared himself to be an admirer of President Wilson, who, he felt assured, would bring about a peace of justice for the German people, and added:

"Any humiliation of a nation containing

70,000,000 people would leave only a feeling of revenge. Such a nation cannot be crushed.

"The armistice terms are very severe and almost impossible of execution, as the entente powers are taking away a large portion of the means of transport."

Asked whether Germany, if victorious, would not have imposed even more severe terms, he expressed the belief that such would not have been the case.

When the Brest-Litovsk treaty was mentioned, he said its terms were hard because in Russia the Germans were confronted by the bolsheviks.

With regard to air raids on unfortified cities, the fierce submarine warfare, the bombardment of Paris, and the deportation of women from the occupied districts to work in Germany, Frederick said he had always entirely disagreed with these policies.

In connection with Germany's actions in Belgium at the beginning of the war he said the German general staff had informed him that Field Marshal Haig was in Belgium in July, 1914, making a complete military survey for future operations. When it was suggested that the German staff had done the same thing, Frederick said he knew nothing about it.

German diplomats, he declared, had made "awful" mistakes, being unable to see the viewpoint of the countries where they were stationed and misreading opinion in other countries. Referring to the notorious kaiser telegram during the Boer war, he said:

"My father was made to send this telegram by his political advisers."

The former crown prince is living a simple life in the woods about the island, chats with peasants and is learning the Dutch language from a small boy. He says he is interned, although in reality not interned, as all the other German officers have been permitted to leave Holland. He does not expect his wife to come to Holland. She will remain in Berlin to superintend the education of their children.

Frederick William discussed various subjects quite frankly with the correspondent for two hours, but requested that some of the matters under discussion should not be published.

COUNT CZERNIN ON CAUSE OF WAR.

In Vienna Dec. 9, 1918, Count Czernin, former Austro-Hungarian minister for foreign affairs, discussed his efforts and those of the Austrian government to end the war, which he said was brought on by "too much bluffing," and outlined what in his estimation were the problems to be settled before peace could be made secure. He expressed hope for an agreement among the nations to disarm.

Count Czernin declared the Brest-Litovsk peace treaty was the work of the German military leaders and pointed Gen. Ludendorff, the quartermaster-general of the German army and virtual dictator of the empire's military policy in the last days of the conflict, as the man who stood between the central empires and peace on numerous occasions. Efforts to induce the German government to make concessions of an important nature seemed at times to be near success, but Ludendorff was adamant.

Recounting the efforts on the part of Austria to reach some sort of peace before the final absolute collapse of both the Austrian and German empires, Count Czernin said:

"With the knowledge of Emperor Charles, I proposed to Emperor William that Austria would give Germany the province of Galicia and permit her to have her way in Russian Poland, provided Alsace and Lorraine were ceded back to France.

"I presented the plan to Dr. Bethmann-Hollweg, then German imperial chancellor. Later he informed me that he was forced to decline to enter into the scheme, but I was informed that it was impossible to give up Alsace and Lorraine, because the German people never would understand the giving up of land which had cost so much blood."

After citing several moves in the direction of peace, Count Czernin continued:

"When our chances were bad and the entente

ATIONS WERE ELATED THEY WOULD NOT TALK PEACE.

When we were winning Ludendorff would not consent to permit peace negotiations.

"I signed the peace treaty of Brest-Litovsk, but we got nothing from it. This fact is worthy of mention. It was Ludendorff who forced Dr. Richard von Kuehlmann, the German foreign secretary, to make that peace. Dr. von Kuehlmann and I had hoped to make peace with Russia on the basis of President Wilson's principles, but Ludendorff always telegraphed 'No' to our proposals.

"Regarding Emperor William, I feel that he did not want the war, but he did not know how to get out of it. I honestly believe that no one wanted hostilities to begin.

"I have the impression that neither Emperor Francis Joseph, Emperor William nor their ministers wanted war. I might explain the fact that war started by saying that there was too much diplomatic bluffing, with every one looking for the other fellow to recede from his position."

DEATH OF EDMOND ROSTAND.

Edmond Rostand, the famous French poet and playwright, died in Paris, France, Dec. 2, 1918, of an attack of influenza. He was born in Marseilles April 1, 1868. He first came into prominence as an author in 1888, when his "Le Gai Rouge," a vaudeville sketch was produced in Paris. The more important of his plays, in the order of their production, were: "Les Romanesques" (1894); "La Princesse Lointaine" (1895); "La Samaritaine" (1897); "Cyrano de Bergerac" (1897); "L'Aiglon" (1899) and "Chantecler" (1910). Rostand was at the height of his popularity when "Chantecler" was produced in Paris. Seats sold for \$50 and the American rights for its presentation cost a fortune.

GENERAL CHRONOLOGY OF THE WAR.

(A more detailed chronology of the European war for the years 1914, 1915 and 1916 will be found in the issues of the Almanac and Year-Book for 1915, 1916, 1917 and 1918.)

1914.

- June 28—Archduke Francis Ferdinand and wife assassinated in Sarajevo, Bosnia.
 July 28—Austria-Hungary declares war on Serbia.
 Aug. 1—Germany declares war on Russia; general mobilization begun.
 Aug. 3—Germany declares war on France.
 Aug. 4—State of war between Great Britain and Germany is declared; Germany declares war on Belgium.
 Aug. 8—Germans capture Liege.
 Aug. 20—German troops enter Brussels.
 Aug. 23—Japan declares war on Germany; Russians victorious in East Prussia.
 Aug. 26—Large part of Louvain destroyed by Germans.
 Aug. 28—British win naval battle near Helgoland.
 Aug. 29—Germans inflict heavy defeat on Russians at Allenstein; Germans occupy Amiens.
 Sept. 1—Germans win decisive victory at Tannenberg, East Prussia; cross the Marne in France.
 Sept. 2—Lemberg captured by Russians; seat of French government transferred from Paris to Bordeaux.
 Sept. 5—England, France and Russia sign compact not to conclude peace separately.
 Sept. 6—Allies win battle of Marne.
 Sept. 7—Germans retreat from the Marne; capture Maubeuge.
 Sept. 7-10—Germans retreat to the Aisne.
 Sept. 14—Battle of Aisne begins; pursuit by allies halted.
 Sept. 15—First battle of Soissons fought.
 Sept. 18—Germans bombard Reims and damage cathedral.
 Sept. 19—Battle of Aisne develops into continuous trench fighting.
 Sept. 20—Russians capture Jaroslau and begin siege of Przemysl.
 Sept. 22—British cruisers Cressy, Aboukir and Hogue torpedoed and sunk in the North sea.
 Oct. 9-10—Germans capture Antwerp.
 Oct. 12—Germans capture Ghent.
 Oct. 20—Fighting along Yser river begins.
 Oct. 29—Turkey begins war on Russia.
 Nov. 1—British cruisers Good Hope and Monmouth sunk off coast of Chile.
 Nov. 7—Tsingtao captured by Japanese.
 Nov. 9—German cruiser Emden destroyed.
 Dec. 8—German cruisers sunk near Falkland islands by British fleet.
 Dec. 9—French government officials return to Paris.
 Dec. 14—Belgrade recaptured by Serbians.
 Dec. 17—Britain formally assumes a protectorate over Egypt.
 Dec. 25—Italy occupies Avlona, Albania.

1915.

- Jan. 1—British battle ship Formidable sunk.
 Jan. 11—Heavy fighting northeast of Soissons.
 Jan. 24—British win naval battle in North sea, sinking the German cruiser Bluecher and damaging two other cruisers.
 Feb. 11—Germans evacuate Lodz.
 Feb. 12—Germans drive Russians from positions in East Prussia, taking 26,000 prisoners.
 Feb. 19—British and French fleets bombard Dardanelles forts.
 March 1—Premier Asquith announces blockade by allies of all German, Austrian and Turkish ports.
 March 10—Battle of Neuve Chapelle begins.
 March 14—German cruiser Dresden sunk.
 March 18—British battle ships Irresistible and Ocean and French battle ship Bouvet sunk in Dardanelles strait.
 March 22—Fortress of Przemysl surrenders to Russians.

- April 23—Germans force way across Ypres canal at Steenstraete and Het Sas.
 May 2—Austro-Hungarian and German forces repulse Russians along the entire front of Malatow, Galicia, Gromik and north of these places in West Galicia.
 May 7—Liner Lusitania torpedoed and sunk by German submarine.
 May 23—Italy formally declares war on Austria and orders mobilization of army.
 June 3—Przemysl recaptured by Germans and Austrians.
 June 22—Germans and Austrians capture Lemberg.
 July 3—Tolmino falls into hands of Italians.
 July 29—Warsaw evacuated; Lublin captured by Austrians.
 Aug. 2—Germans occupy Mitau.
 Aug. 3-9—Battle of Hooge.
 Aug. 4—Germans occupy Warsaw.
 Aug. 5—Ivangorod taken by Germans.
 Aug. 6—British land at Suvla bay, Gallipoli.
 Aug. 17—Germans capture Kovno.
 Aug. 19-20—Germans take Novo Georgievsk.
 Aug. 26—Germans take Brest-Litovsk.
 Sept. 2—Germans capture Grodno.
 Sept. 5—Grand Duke Nicholas sent to the Caucasus.
 Sept. 8—Russians stop Germans at Tarnopol.
 Sept. 19—Germans capture Vilna.
 Sept. 20—Austrians and Germans begin drive on Serbia.
 Sept. 25-30—Battle of the Champagne.
 Oct. 9-10—Austro-Germans capture Belgrade.
 Oct. 12—Edith Cavell executed by Germans.
 Oct. 13—Bulgaria declares war on Serbia.
 Oct. 22—Bulgarians occupy Uskub.
 Nov. 7—Italian liner Ancona sunk.
 Nov. 22—British victory near Bagdad.
 Nov. 30—Bulgarians take Prizrend.
 Dec. 1—British retreat from near Bagdad.
 Dec. 8-9—Allies defeated in Macedonia.
 Dec. 15—Sir John Douglas Haig succeeds Sir John French.
 Dec. 27-30—Heavy Russian offensive in Galicia and Bessarabia.
 Dec. 30—Liner Persia sunk in Mediterranean.

1916.

- Jan. 6—Russians capture Czartorsk.
 Jan. 8—British troops at Kut-el-Amara surrounded.
 Jan. 9—British evacuate Gallipoli peninsula.
 Jan. 10—Austrians capture Mount Lovcen in Montenegro; predeceadnought King Edward VII. sunk.
 Jan. 13—Cetinje, capital of Montenegro, captured by Austrians.
 Jan. 23—Scutari, capital of Albania, captured by Austrians.
 Feb. 15—Erzerum captured by the Russians.
 Feb. 21—Germans under crown prince begin attack on Verdun defenses.
 Feb. 26—Germans capture Fort Douaumont; French transport La Provence sunk.
 March 2—Bitlis captured by Russians.
 March 16—Admiral von Tirpitz resigns.
 March 24—Sussex torpedoed and sunk.
 April 5-7—Battle of St. Eloi.
 April 17—Trebizond captured by Russians.
 April 18—President Wilson sends final note to Germany.
 April 19—President Wilson explains diplomatic situation in speech before congress in joint session.
 April 24—Insurrection in Dublin.
 April 29—British force at Kut-el-Amara surrenders to the Turks.
 April 30—Irish insurrection suppressed.
 May 3—Several leaders of Irish revolt executed.
 May 15—Austrians begin offensive against Italians in Trentino.
 May 31—Great naval battle off Danish coast.
 June 3—Germans assail British at Ypres; Russians under Gen. Brusiloff begin successful offensive.

June 5—Lord Kitchener lost with cruiser Hampshire.

June 6—Italians stop enemy in Trentino.

June 11—Russians capture Dubno.

June 18—Russians capture Czernowitz.

June 25—Gen. Brusiloff's army completes possession of Bukovina.

July 1—Battle of Somme begins.

July 25—Erzincan captured by the Russians.

July 26—Poizieres taken by British.

July 27—British take Delville wood; Serbs begin attack on Bulgars in Macedonia.

Aug. 2—French take Fleury.

Aug. 3—Sir Roger Casement executed for treason.

Aug. 5—British win victory north of Poizieres.

Aug. 9—Italians take Goritz by assault.

Aug. 15—Russians capture Jablonitz.

Aug. 18—Serbs capture Florina from Bulgars.

Aug. 24—French take Maurepas.

Aug. 27—Italy declares war against Germany.

Aug. 28—Roumania declares war against Austria-Hungary.

Aug. 30—Roumanians take Kronstadt in Transylvania; Bulgars seize Drama.

Sept. 2—Roumanians take Orsova and Hermannstadt.

Sept. 3—Allies take Guillemont and Clery.

Sept. 7—Germans capture Tutrakan.

Sept. 9—French recapture Fort Douaumont.

Sept. 10—German-Bulgar forces take Silistria.

Sept. 15—British take Flers, Martinpuich and Courcellette; French reach outskirts of Rancourt.

Sept. 17—French take Vermandovillers and Berny.

Sept. 25—British capture Morval and Les Boeufs.

Sept. 26—French and British take Combes; British take Thiepval and Guedecourt.

Sept. 28—Venizelos proclaims provisional government in Greece; to aid allies.

Sept. 30—Germans defeat Roumanians at Hermannstadt.

Oct. 8—Germans recapture Kronstadt from Roumanians.

Oct. 11—Germans defeat Roumanians in Alt valley and begin invasion of Roumania.

Oct. 13—Italians win victory on Carso plateau.

Oct. 23—Germans capture Constanza.

Oct. 24—Germans take Predeal.

Oct. 25—Germans capture Vulcan pass.

Nov. 3—French recapture Fort Vaux.

Nov. 12—French take all of Sallisel.

Nov. 13—British win battle of Ancre.

Nov. 19—Monastir taken by Serbs, French and Italians.

Nov. 24—Germans capture Orsova and Turnu-Severin.

Nov. 25—Venizelist provisional government in Greece declares war on Germany.

Nov. 28—Seat of Roumanian government removed from Bukharest to Jassy.

Dec. 3—Battle of Argenson won by Germans.

Dec. 5—British cabinet resigns.

Dec. 6—Bukharest occupied by German forces.

Dec. 10—New British cabinet formed with David Lloyd George at its head.

Dec. 11—Italian battle ship Regina Margherita sunk.

Dec. 12—Germany proposes peace negotiations.

Dec. 15—French recapture Vacherauville, Louvemont and Fort Hardaumont.

Dec. 18—President Wilson sends note to belligerent nations asking them to make known their peace terms and to neutral nations suggesting that they support America's action.

Dec. 27—Rimnik Sarat taken by Germans.

Dec. 28—Germany replies to President Wilson saying a direct exchange of views would be best way to bring about peace; gives no terms.

Dec. 29—Scandinavian countries express sympathy with President Wilson's suggestions.

- Oct. 24—Americans attack east of the Meuse and reach the Freya position; British drive Germans back along whole front between the Sambre and the Meuse; Germany promises to return art treasures taken in Belgium.
- Oct. 25—British, French and Italian troops begin new offensive on Italian front between the Brenta and Piave rivers, taking 3,000 prisoners; Americans capture Hill 360 east of the Meuse after severe fighting; President Wilson appeals for a democratic congress.
- Oct. 26—British troops advance south of Valenciennes; French pierce the Hunding line; Italians gain in attacks on Austrian defenses on Piave line; heavy fighting in Monte Grappa region; Turkish offer of surrender reported from Switzerland.
- Oct. 27—Gen. Ludendorff resigns as first quartermaster-general of German army; French gain five miles on Serre front and take ten towns; Italian forces cross the Piave and take 9,000 Austrians and fifty-one guns.
- Oct. 28—Austria again urgently asks for peace; French continue drive beyond the Oise; German administration moves from Brussels.
- Oct. 29—Allied forces in Italy capture Conegliano five miles from the Piave and push on along a front of thirty-seven miles; Rhine Germans in wild flight; disruption in Austria-Hungary proceeding.
- Oct. 30—New German note seeks to hasten decision on armistice terms; Czechs take over rule of Prague; Italians capture Vittorio and drive the Austrians back along the Piave from the mountains to the sea; taking of 33,000 Austrians in drive announced.
- Oct. 31—Turkey makes full surrender; Austrian collapse on Italian front; troops abandon everything in wild flight to escape; Gen. Pershing's forces occupy Bellejeuse farm; Belgians renew attack in direction of Ghent.
- Nov. 1—Armistice terms given to Austria; Americans advance four miles in new drive east of the Arzonne; British get grip on Valenciennes; allies in Belgium take nineteen towns and gain ten miles; Americans capture Landres-et-St. Georges, Remonville, Clery le Grand and other towns with 2,000 prisoners.
- Nov. 2—British take Valenciennes; Americans break through the Freya line and take Champigneulle, Buzancy, Fosse, Baricourt and Douillon; lose contact with foe.
- Nov. 3—Italians capture Trent and Udine; whole Austrian front smashed; German forces east of the Meuse in full retreat; American troops take many more small towns; Belgians push to within five miles of Ghent.
- Nov. 4—Austria makes complete surrender; Americans advance toward Sedan, reaching Stenay; British in advance between the Scheldt and the Oise-Sambre canal and with the French co-operating take 10,000 prisoners and 200 guns.
- Nov. 5—German armies on western front retreat everywhere, losing hundreds of guns and thousands of prisoners; French take Guise and Marle; allied troops on three sides of Ghent.
- Nov. 6—French win on 100-mile front, taking Vervins, Montcornet and Rethel; Americans enter Sedan; cross the Meuse river; Germans give up Ghent; Germans seeking truce reach French lines.
- Nov. 7—Passage of German peace envoys to French headquarters arranged; allied armies drive along whole front.
- Nov. 8—British, French and American armies press forward along whole of long line from extreme north to east of the Meuse; scores of towns taken; German plenipotentiaries arrive at Marshal Foch's headquarters and are given armistice terms fixed by allied war council with time limit for acceptance fixed for 11 o'clock Monday morning, Nov. 11; German socialists demand abdication of Emperor William; revolution in Berlin; Bavaria deposes king and proclaims a republic.
- Nov. 9—Chancellor Prince Maximilian of Germany announces that kaiser and crown prince have decided to renounce the throne; Deputy Ebert made imperial chancellor; Americans gain on both sides of the Meuse; French capture Hirson.
- Nov. 10—First and 2d American armies advance along the Moselle and the Meuse on a front of about seventy-one miles; capture Stenay and numerous fortified positions in Lorraine; Gen. Gouraud makes official entry into Sedan; Emperor William takes refuge in Holland.
- Nov. 11—German envoys sign armistice terms and fighting ceases at 11 a. m. all along the line; President Wilson announces to congress that "the war thus comes to an end"; great peace celebration held in all the allied countries with scenes of unparalleled enthusiasm.
- Nov. 12—Abdication of Emperor Charles announced in Austria; Germany appeals to President Wilson to start peace negotiations at once; new Roumanian government declares war on Germany.
- Nov. 13—Bolshevism reported to be spreading in various parts of Europe; abdication of various German rulers announced; King Albert enters Ghent; allied fleet anchors off Constantinople.
- Nov. 14—German women appeal for food; Polish troops hold Warsaw; last of German military forces in East Africa surrender; British land on Gallipoli point.
- Nov. 15—Representatives of associated and allied governments begin conferences on peace preliminaries in Paris; Germany prepares for calling a constituent assembly.
- Nov. 16—Belgians petition King Albert for reforms; Postmaster-General Burleson takes over Atlantic cables.
- Nov. 17—Third American army, one of the armies of occupation, enters Montm-dy; Premier Clemenceau wants President Wilson to attend peace conference; arrangements

made for surrender of part of German navy; King Friedrich III. of Saxony abdicates.

Nov. 18—President Wilson announces officially that he will sail for Europe to take part in the settlement of the main features of the treaty of peace; Germans fear bolshevism; German ships sail to surrender; allies fight bolsheviks on Dvina river; King George expresses thanks to parliament.

Nov. 19—American army of occupation carries relief to many towns; food supplies sent from the United States to northern France, Belgium and Austria; Gen. Petain and French troops enter Metz; King Albert enters Antwerp.

Nov. 20—American 3d army enters Luxembourg; Ukrainian government overturned; Germans make first surrender of twenty submarines at Harwich, England.

Nov. 21—Germany surrenders large part of high seas fleet and nineteen more submarines; Luxemburgers acclaim American troops; Kolchak made dictator at Omsk; British cavalry ride over old field of Waterloo.

Nov. 22—William G. McAdoo resigns as secretary of the treasury and director-general of railroads; the former crown prince of Germany takes refuge in Holland; Gen. Castelnau enters Colmar.

Nov. 23—American army of occupation crosses into Germany.

Nov. 24—More German submarines surrendered to the allies for internment; clashes between extremists and government group of socialists take place in Berlin; King Albert enters Brussels; French soldiers enter Strassburg.

Nov. 25—Marshal Foch with Gen. Guillaumat and Gen. Gourand enters Strassburg; bolshevik soviets try to take government from Ebert government.

Nov. 26—Allies prepare to make demand upon Holland for surrender of the former emperor of Germany; Gen. Ludendorff goes to Sweden.

Nov. 27—Names of American delegates to peace conference announced in Washington.

Nov. 28—Vienna plans to try men who began the war; Liebknecht group of extremists losing ground in Berlin.

Nov. 29—Many strikes take place in Germany; allies to ask Herbert C. Hoover to direct food distribution in Europe; Premier Lloyd George says William II. was to blame for the war; Germany asks for and gets formal abdication of former kaiser; Japan names delegates to peace conference.

Nov. 30—German border towns hostile to American army of occupation; internment of Field Marshal von Mackensen's army ordered by Hungarian government; peace conference to be held in Paris and Versailles.

Dec. 1—German government starts investigation of German atrocities in Belgium; American army of occupation enters Treves, Germany; Premier Clemenceau, Marshal Foch, Premier Orlando and Foreign Minister Sonnino arrive in London for conference with British leaders; Mauretania arrives at New York with more than 4,000 returning American soldiers.

Dec. 2—President Wilson delivers annual message to congress and tells of his decision to go to peace conference; allies delay action on kaiser until American delegates arrive; preliminary conference in London.

Dec. 3—President Wilson and party leave Washington late at night for New York.

Dec. 4—American peace delegation headed by President Wilson sail on the George Washington for France.

Dec. 5—Premier Clemenceau on return from London conference says there is complete agreement between the allies.

Dec. 6—Belgian troops occupy Dusseldorf, Germany.

Dec. 7—German soldiers stand by Ebert gov-

ernment; British to demand \$40,000,000,000 indemnity from Germany.

DATES OF BIG BATTLES.

This list shows in alphabetical order the names and dates of the principal battles of the war and the capture of important places. For full chronology of major American operations in 1918 see Gen. Pershing's report in this volume.

Aisne, battle of, began—Sept. 14, 1914.

Aisne caverns, battle of—Oct. 23, 1917.

Allenstein, battle of—Sept. 1, 1914.

Ancre, battle of, began—Nov. 13, 1916.

Antwerp, capture of, by Germans—Oct. 9-10, 1914.

Arges, battle of—Dec. 3, 1916.

Arras, battle of, began—April 9, 1917.

Artois, fighting in the—Sept. 26-Oct. 2, 1915.

Bagdad captured by British—March 11, 1917.

Balsizza plateau taken by Italians, Aug. 25, 1917; recaptured by Austrians and Germans, Oct. 25, 1917.

Bapaume captured by British—March 17, 1917; lost to Germans March 24, 1918; recaptured by British, Aug. 29, 1918.

Beersheba captured by British—Oct. 31, 1917.

Belgrade occupied by Austrians—Dec. 2, 1914; recaptured by Serbians, Dec. 11, 1914; taken by Germans and Austrians, Oct. 9-10, 1915.

Belloy en Senterre, battle of—July 4, 1916.

Brest-Litovsk captured by Germans—Aug. 25, 1915.

Bruges occupied by Germans—Oct. 14, 1914.

Brussels occupied by Germans—Aug. 20, 1914.

Bukharest captured by Germans—Dec. 6, 1916.

Bullecourt taken by Australians—May 12, 1917.

Cambrai, battle of—Nov. 21, 1917; Oct. 9, 1918.

Caporetto, battle of—Oct. 24, 1917.

Carso plateau, battle of—May 23-24, 1917.

Cetinje captured by Austrians—Jan. 12, 1916.

Champagne, battle of—Sept. 25-30, 1915.

Chateau Thierry, battle of—July 15, 1918.

Combes captured by French and British—Sept. 26, 1916.

Constanza captured by Germans—Oct. 23, 1916.

Courcellette captured by British—Sept. 15, 1916.

Craonne, battle of—Jan. 25-27, 1915; village recaptured by French, May 4, 1917.

Ctesiphon captured by British—March 8, 1917.

Czernowitz captured by Russians—June 13, 1916.

Dardanelles campaign begun—Nov. 3, 1914; ended, Jan. 9, 1916.

Dardanelles forts, bombardment of, begun—Feb. 19, 1915.

Dogger bank British naval victory—Jan. 24, 1915.

Douaumont fort, captured by Germans—Feb. 26, 1916; recaptured by French, Oct. 21, 1916.

Dubno captured by Russians—June 11, 1916.

Dunajec, battle of the—May 1, 1915.

Erzerum captured by Russians—Feb. 15, 1916.

Erzingan captured by Russians—July 25, 1916.

Falkland Islands, naval battle of—Dec. 8, 1914.

Festubert, battle of—May 16-17, 1915.

Flanders captured by British—Sept. 15, 1916.

Flury, battles of—July 11-Aug. 17, 1916.

Florina taken by Serbs—Aug. 18, 1916.

Fresnoy captured by Canadians—May 3, 1917.

Gallipoli, allies land at—April 22, 1915; evacuated by British, Jan. 9, 1916.

Gaza, battle of—March 26-27, 1917.

Geudecourt captured by British—Sept. 26, 1916.

Gheluvelt, battle of—Oct. 31, 1914.

Ghent captured by Germans—Oct. 12, 1914.

Givency, battle of—Dec. 19-21, 1914.

Gortz captured by Italians—Aug. 9, 1916; recaptured by Austro-Germans, Oct. 28, 1917.

Grandcourt captured by British—Feb. 7, 1917.

Gulleumont captured by allies—Sept. 3, 1916.

Helgoland, naval battle of—Aug. 28, 1914.

Hermannstadt, battle of—Sept. 30, 1916.

Hill 70 (near Lens) captured—Aug. 15, 1917.

Hindenburg retreat began—March 11, 1917.

Hooze, battle of—Aug. 3-9, 1915.

Huloch, battle of—Sept. 25-Oct. 2, 1915.

Jaffa captured by British—Nov. 18, 1917.

Jericho captured—Feb. 21, 1918.

Jerusalem captured by British—Dec. 9, 1917.

Jutland, naval battle of (Skagerrak)—May 31, 1916.

Kemmel hill taken by Germans—April 26, 1918.

Kitchener, Lord, lost at sea—June 5, 1916.

Kovno captured by Germans—Aug. 17, 1915.
 Kronstadt captured by Roumanians—Aug. 30, 1916; recaptured by Germans—Oct. 8, 1916.
 Kut-el-Amara, surrender of British force at—April 29, 1916; recaptured, Feb. 22-26, 1917.
 La Basse, battle of—Jan. 25-28, 1915.
 Le Cateau, battle of—Aug. 26, 1914; Oct. 19, 1918.
 Lemberg taken by Russians—Sept. 2, 1914; recaptured by Germans, June 22, 1915.
 Les Bœufs captured by British—Sept. 25, 1916.
 Libau occupied by Germans—May 8, 1915.
 Liege captured by Germans—Aug. 5-8, 1914.
 Longueval taken by British—July 14, 1916.
 Loos, battle of—Sept. 25 to Oct. 8, 1915.
 Louvain burned—Aug. 26, 1914.
 Lublin captured by Germans—July 31, 1915.
 Marne, battle of—Sept. 6-11, 1914; second battle of, July 15, 1918.
 Martiniuk captured by British—Sept. 15, 1916.
 Maubeuge captured by Germans—Sept. 7, 1914.
 Maurepas captured by French—Aug. 24, 1916.
 Menin road, battle of—Oct. 4, 1917.
 Messines ridge taken by British—June 7, 1917.
 Meuse-Argonne, battles of—Sept. 26, Oct. 4 and Nov. 1, 1918.
 Monastir captured by Bulgarians—Dec. 2, 1915; by allies, Nov. 19, 1916.
 Monthy le Preux, battle of—April 23-25, 1917.
 Monfalcone occupied by Italians—June 9, 1915.
 Mons, battle of—Aug. 21-23, 1914.
 Monte Santo taken by Italians—Aug. 24, 1917; recaptured by Austrians and Germans, Oct. 28, 1917.
 Morval captured by British—Sept. 25, 1916.
 Neuve Chapelle, battle of—March 10-12, 1915.
 Nish captured by Bulgarians—Nov. 5, 1915.
 Novo Georgievsk captured by Germans—Aug. 19, 1915.
 Orsova captured by Germans—Nov. 24, 1916.
 Ostend occupied by Germans—Oct. 15, 1914.
 Peronne captured by allies—March 18, 1917; lost March 24, 1918; recaptured, Sept. 1, 1918.
 Plave, battles of—June 23 and Oct. 28, 1918.
 Pozieres captured by British—Aug. 9, 1916.
 Prizrend captured by Bulgarians—Nov. 30, 1915.
 Przemysl, siege and capture of by Russians—Sept. 20, 1914, to March 22, 1915; recaptured by Germans, June 3, 1915.

USE OF SHOTGUNS IN WAR.

On Sept. 29, 1918, the United States authorities received through the Swiss legation an ultimatum from Germany declaring that if no satisfactory answer was forthcoming on Oct. 1 to the German protest against the use of shotguns by American soldiers, reprisals would be taken. The German communication follows:

"From prisoners captured during a skirmish between patrols on July 27 a repeating shotgun was taken. The prisoners, who belonged to American infantry regiment 307 of the 77th division, stated their patrol possessed three such guns, each loaded with six cartridges and each cartridge containing nine shots of size 00. Another shotgun was captured on Sept. 11 from the 3d infantry regiment of the 5th American division. The use of such weapons is forbidden by The Hague convention as causing unnecessary suffering. The German government protests energetically and expects from the United States government that steps will be taken immediately to discontinue the employment of shotguns.

"It is pointed out to the government of the United States that a prisoner on whom a shotgun or shotgun ammunition is found forfeits his life."

Secretary of State Lansing on Sept. 30 sent the following note to the German government: "In reply to the German protest the government of the United States has to say that the provision of The Hague convention cited in the protest does not in its opinion forbid the use of this kind of weapon. The government of the United States notes the threat of the German government to execute every prisoner of war found to have in his possession shotguns or shotgun ammunition. Not-

Rancourt captured by French—Sept. 25, 1916.
 Reims—Oct. 2-9, 1918.
 Richebourg, battle of—May 9-24, 1915.
 Sully-Sailles taken by French—Oct. 18, 1916.
 St. Eloy, battle of—Dec. 9, 1914.
 St. Juvin, battle of—Oct. 14, 1918.
 St. Mihiel, battle of—Sept. 12, 1918.
 Saloniki, allies land at—Oct. 5, 1915.
 Scutari captured by Austrians—Jan. 23, 1916.
 Serbia, invasion of, begun—Oct. 7, 1915.
 Silesia captured by Germans—Sept. 10, 1916.
 Skager-Rak, naval battle of—May 31, 1916.
 Soissons, first battle of—Sept. 15, 1914; second battle of, Jan. 8-12, 1915; lost by French, May 29, 1918; recapture by French, Aug. 2, 1918.
 Somme, battle of, begun—July 1, 1916.
 Stanislaus captured by Russians—Aug. 11, 1916.
 Suez canal, battle near—Feb. 2, 1915.
 Tannenberg, battle of—Aug. 26, 1914.
 Tarnopol, battle of—Sept. 8, 1915.
 Termonde destroyed—Sept. 18, 1914.
 Thiepval captured by British—Sept. 26, 1916.
 Tolmino occupied by Italians—July 3, 1915.
 Torcy, battle of—July 18, 1918.
 Trebond captured by Russians—April 17, 1916.
 Trentino, Austrian offensive in—May 15-June 6, 1916.
 Tsingtao captured by Japanese—Nov. 7, 1914.
 Turnu-Severin captured by Germans—Nov. 24, 1916.
 Tutrakan captured by Germans—Sept. 7, 1916.
 Udine captured by Austrians and Germans, Oct. 30, 1917.
 Uskup captured by Bulgarians—Oct. 24, 1915.
 Vaux, battle of—July 1, 1918.
 Vaux, port, recaptured by French—Nov. 3, 1916.
 Verdun, German attacks on, began—Feb. 22, 1916.
 Vermandovillers taken by French—Sept. 17, 1916.
 Vilna captured by Germans—Sept. 18, 1915.
 Vimy ridge captured by Canadians—April 9, 1917.
 Warsaw captured by Germans—Aug. 4, 1915.
 Wytshaete captured by British—June 7, 1917.
 Ypres, first battle of—Oct. 20-31, 1914; second battle of, April 22-24, 1915; third battle of, July 30-Aug. 2, 1917.
 Yser canal, battles along—Oct. 20-28, 1914.
 Zeebrugge and Ostend blocked by British—April 22 and May 9, 1918.

withstanding this threat, inasmuch as the weapon is lawful and may be rightfully used, its use will not be abandoned by the American army. Moreover, if the German government should carry out its threat in a single instance, it will be the right and duty of the government of the United States to make such reprisals as will best protect the American forces, and notice is hereby given of the intention of the government of the United States to make such reprisals."

[Article 23 of The Hague convention upon which Germany based its protest provides that it is "especially forbidden to employ arms, projectiles or materials calculated to cause unnecessary suffering."]

TREATMENT OF AMERICAN PRISONERS.

The war department in December, 1918, made the following statement concerning the physical condition of returned American prisoners, based on a cable received from Gen. Pershing, Nov. 29:

1. American prisoners released from German prison camps complain of poor, scanty food and bad housing conditions. Only a small percentage of those who are sick are hospital cases; the majority are suffering from slight colds. Practically all recover rapidly with proper food and housing.

2. There is as yet no evidence of discrimination against Americans. Among 7,000 prisoners of all nationalities there have been no authenticated instances of brutality against Americans.

3. The majority of American prisoners state that the German soldiers also suffered food privation, but that in cases where supply of food was insufficient the food for prisoners was cut off before that for German soldiers.

WHY UNITED STATES ENTERED THE WAR.

When one nation declares war on another formal notice of this action is given to all countries with which the nation declaring war has diplomatic relations. In this manner the United States was officially informed that a state of war existed by each of the belligerents that declared war. The spark that touched off the war was the murder of Archduke Francis Ferdinand, heir apparent to the thrones of Austria and Hungary, at Sarajevo, on June 28, 1914. Austria-Hungary charged the Serbian nation with complicity in the crime and demanded certain concessions by way of reparation. These were granted almost entirely, but Austria-Hungary professed not to be satisfied and declared war. In the negotiations between the different European nations with a view of averting a general conflict the United States had no part. The chronological table given below furnishes an adequate answer to the question: "Why did we go to war?"

1914.

- July 23—Austria-Hungary sends ultimatum to Serbia.
- July 28—Austria-Hungary declares war on Serbia.
- Aug. 1—Germany declares war on Russia.
- Aug. 3—Germany declares war on France.
- Aug. 3—Congress appropriates \$250,000 for emergency relief of Americans in Europe.
- Aug. 4—Germany declares war on Belgium.
- Aug. 4—Great Britain declares war on Germany.
- Aug. 4—America issues proclamation of neutrality.
- Aug. 4—France declares war on Germany.
- Aug. 5—President Wilson offers to mediate between belligerent nations; appeals for peace.
- Aug. 5—German-American cable cut.
- Aug. 6—Austria-Hungary declares war on Russia.
- Aug. 7—Montenegro declares war on Austria-Hungary.
- Aug. 9—Montenegro declares war on Germany.
- Aug. 9—Serbia declares war on Germany.
- Aug. 10—France declares war on Austria-Hungary.
- Aug. 12—Great Britain declares war on Austria-Hungary.
- Aug. 14—German kaiser tells United States Ambassador Gerard that he is unable to accept president's offer of mediation; says neutrality of Belgium had to be violated on strategical grounds.
- Aug. 15—Congress appropriates \$2,500,000 for use of American diplomatic and consular officers abroad to relieve American citizens.
- Aug. 16—United States cruisers Tennessee and North Carolina arrive at Falmouth, England, with money for relief of stranded Americans.
- Aug. 18—President Wilson appeals to citizens of United States to observe strict neutrality.
- Aug. 23—Japan declares war on Germany.
- Aug. 25—Belgium protests to the United States against throwing of bombs from German aircraft on Antwerp.
- Aug. 27—Austria-Hungary declares war on Japan.
- Aug. 28—Austria-Hungary declares war on Belgium.
- Sept. 4—Kaiser protests to President Wilson against alleged use by French of dumdum bullets.
- Sept. 11—Congress appropriates \$1,000,000 for expenses of American embassies and legations abroad representing various belligerents.
- Sept. 16—Mission from Belgium appeals to President Wilson against alleged atrocities committed by Germans.
- Oct. 22—American emergency war tax—increase in internal revenue tax—becomes a law.
- Nov. 1—Rockefeller foundation announces that it will help Belgium relief work.
- Nov. 3—Russia declares war on Turkey.
- Nov. 5—Great Britain and France declare war on Turkey.
- Nov. 16—United States launch from cruiser Tennessee fired upon by Turks at Smyrna.
- Nov. 25—Allies ask United States to help enforce neutrality of Ecuador and Colombia.

Dec. 24—Admiral von Tirpitz, chief of German navy, outlines possibilities of ruthless submarine war and asks: "What will America say?"

1915.

- Jan. 18—Buckthorne plant of John A. Roebling, Trenton, N. J., engaged in work for allies, burns; loss \$1,500,000. Incendiarism suspected.
- Jan. 19—Germany protests against American firms making hydro-aeroplanes for England on ground that they are war craft.
- Jan. 22—Steamer *Wilhelmina*, loaded with foodstuffs for Hamburg, Germany, leaves New York; is seized by British; cargo declared contraband; after negotiations, \$130,000 is awarded owners.
- Jan. 25—British cruiser *Farn* captured by German auxiliary cruiser *Karlsruhe*; sent to San Juan, P. R., where it is interned.
- Jan. 28—German auxiliary cruiser *Prinz Eitel Friedrich* sinks American ship *William P. Frye* and brings its crew to American port.
- Jan. 29—United States replies to Germany that hydro-aeroplanes cannot be considered war vessels.
- Feb. 2—Attempt to blow up international railroad bridge between Vanceboro, Me., and New Brunswick, Canada, confessed by Werner Horn, German captain.
- Feb. 4—Germany proclaims waters surrounding Great Britain and Ireland to be war zone and says that on and after Feb. 18 "every enemy merchant ship found in said zone will be destroyed, it being not always possible to avert dangers that threaten crews and passengers. Even neutral ships are exposed to danger in war zone, as in view of misuse of neutral flags ordered Jan. 31 by British government and of accidents of naval war it cannot always be avoided to strike even neutral ships in attacks that are directed at enemy ships."
- Feb. 10—United States replies to German proclamation, warning Germany that destruction of American vessels or loss of American life is an indefensible violation of neutral rights and that United States will hold Germany to strict accountability for all such acts.
- Feb. 10—America protests to Great Britain against use of American flag by British ships when pursued by enemy.
- Feb. 15—Congress starts investigation of interned ships of belligerents.
- Feb. 16—Germany protests to the United States against British blockade; justifies its submarine campaign on ground of "starvation methods" of allies; says it is not the intention of Germany to destroy neutral lives and neutral property.
- Feb. 19—American freight ship *Evelyn*, carrying cotton from New York to Bremen, strikes mine in North sea; on fire lost.
- Feb. 19—Great Britain explains that American flag was raised on liner *Lusitania* at request of American passengers and that this practice has been recognized heretofore as permissible in an emergency.
- Feb. 20—United States sends identical notes to Great Britain and Germany asking that neutral vessels be not endangered; that no floating mines be turned loose; that no anchored mines be placed in high seas; that submarines be not used to attack merchantmen; that no neutral flag be used on belligerent ships; that the nations agree that United States send foodstuffs to American agents in Germany for distribution to noncombatants.
- Feb. 22—American ship *Carib* sunk at mouth of Ems river, Germany.
- Feb. 27—Hamburg-American steamer *Dacia*, sold to Edward Breitung, an American, and loaded with cotton, bound for Rotterdam, taken by French to Brest.
- March 1—Germany replies that it would be willing not to use floating mines; refuses to give up anchored mines; sets forth submarine is not to attack merchant ships except to visit and search; sets forth enemy is not to use neutral

- flag nor to arm its merchantmen; demands that raw material be passed in addition to food-stuffs, the plan for the distribution of which it says "is generally acceptable."
- March 1—France and Great Britain announce that in view of indiscriminate sinking of ships by Germany, allies will hold, detain and take into port ships carrying goods of presumed enemy origin, destination and ownership.
- March 3—Congress creates coast guard and naval reserve.
- March 3—Bill providing for government ownership and operation of merchant vessels in foreign trade fails of passage in congress.
- March 4—Congress prohibits use of American waters as base for belligerent warships.
- March 5—United States asks limit to "radius of activity" of British warships in seizing neutral ships bound for Germany.
- March 6—Five men killed in two explosions in Du Pont powder plant at Haskell, N. H., manufacturing for allies.
- March 8—Charles Ruroede pleads guilty in New York to obtaining false passports for German reservists.
- March 10—German auxiliary cruiser Prinz Eltei Friedrich reaches Norfolk, Va., with crew of American ship William P. Frye, which it sank Feb. 28.
- March 14—France sends word that it will seize no neutral ship unless it carries contraband; neutral owner may sell contraband in French ports; if German owns cargo it will be sequestered until end of war.
- March 15—Great Britain reports order in council stopping all ships with commodities of any kind going to or from Germany.
- March 15—Great Britain replies to American note of Feb. 20 that it cannot consider acting on it since Germany will not abandon mine laying or submarine warfare. It protests against German acts affecting civilians in Belgium and northern France; mine laying on high seas; mistreatment of British prisoners of war; sinking of British merchantmen; bombarding of defenseless towns and air raids.
- March 27—American merchantman Falaba, 3,011 tons, sunk by submarine; one American life lost.
- March 30—United States issues protest against interference with its trade.
- March 31—The United States presents to Germany a claim for \$228,059 for sinking of the William P. Frye.
- April 1—Five men killed in explosion in plant of Equitable Powder company, Alton, Ill.
- April 2—American ship Greenbrier sunk by a mine immediately after leaving Bremen for New York.
- April 4—Germany protests that food shipments are not reaching her; since American war materials can reach only one group of belligerents she suggests an embargo on all war shipments.
- April 5—Germany offers to put the case of the William P. Frye up to prize court, to which the United States objects.
- April 8—German converted cruiser Prinz Eltei Friedrich interned at Norfolk navy yard.
- April 21—United States replies to German protest against sending munitions that it would not be neutral if it abandoned trade.
- April 22—German embassy at Washington publishes warning in New York newspapers against passengers sailing on Lusitania.
- April 26—Kronprinz Wilhelm, German converted cruiser, interned.
- April 28—American oil tank steamer Cushing, bound from Rotterdam to Philadelphia, attacked near Antwerp by German aeroplane, which throws three bombs.
- May 1—American oil tank steamer Gulfight torpedoed by German submarine without warning off Scilly islands; three Americans dead.
- May 7—Cunard liner Lusitania, from New York to Liverpool, torpedoed off Irish coast by German submarine without warning; 114 American lives lost.
